

## Deltek Costpoint 7.1.5.1 Release Notes (Build 7.1.5.1.1009)

Welcome to the **Deltek Costpoint 7.1.5.1 Release Notes**, which describe the new features and enhancements introduced in this release.

### Important Notes

These release notes address all of the modules associated with Deltek Costpoint 7.1.5.1, some of which your firm may not use. Skip the sections that do not apply to your implementation of Deltek Costpoint.

Release notes are available from the landing page and the Costpoint Information Center. We will make a PDF available for a while, as we transition to the new format.

We want the release notes to be as easy to use as possible. To this end, we will continue to analyze and improve upon the format. If you have feedback, please email [DeltekDocumentationFeedback@deltek.com](mailto:DeltekDocumentationFeedback@deltek.com).

### Installation Notes

The MR installer reads through all Costpoint systems selected. If a Time & Expense segment is found, it searches for the presence of a Time & Expense license for that Costpoint system. It provides a listing of all such systems found, prompting you to review the list and remove (using DBWizard, Remove License) any TE license from the Costpoint system where the connected TE segment is for a stand-alone, external connection that should not have had a Time & Expense license applied to it.

Any external Time & Expense segments found where a Time & Expense license is not present, or where the Time & Expense segment is for a Time & Expense 901 system, the MR Time & Expense patches, SPs, or Data Dictionary files will not be applied.

If all systems listed are properly licensed for Time & Expense and you do want the MR applied to them, please proceed. If you are unsure, please contact Deltek Technical Support.

### Software Issues Resolved

#### *People*

#### **Payroll >> Create Quarterly SUTA Tax File**

**Defect 1291603:** Effective January 1, 2020, Pennsylvania requires monthly employee count fields in the Total Tax Record (Record T) for both original and amended ICESA files. To comply with state requirements, the Create Quarterly SUTA Tax File (PRPSMM) screen now provides the following information in Record T of the Pennsylvania SUTA electronic file. The employee count will be provided in the following Record T positions regardless if the Report Type in Record A position 141–153 is "Original" or "Amended."

Position	Column	Value
227–233	Month 1 Employment for Employer	The number of covered employees who worked or received pay for the pay period, including the 12 <sup>th</sup> day of the 1 <sup>st</sup> month of the reporting period.

234–240	Month 2 Employment for Employer	The number of covered employees who worked or received pay for the pay period, including the 12 <sup>th</sup> day of the 2 <sup>nd</sup> month of the reporting period.
241–247	Month 3 Employment for Employer	The number of covered employees who worked or received pay for the pay period, including the 12 <sup>th</sup> day of the 3 <sup>rd</sup> month of the reporting period.

**Attention:** For more information, refer to the *File Layouts and Formats for Electronic Reporting of PA Quarterly Unemployment Compensation Wage and Tax Data*: [https://www.uc.pa.gov/Documents/UC\\_Forms/UC-2010.pdf](https://www.uc.pa.gov/Documents/UC_Forms/UC-2010.pdf).

## ***Planning***

### **Administration >> Refresh Process**

**Defect 1291208:** Duplicate records were displayed on the Report Project Details table.

### **Organization Budgeting >> Compute Forward Rates (AOI1)**

**Defect 1291209:** When you used Compute Forward Rates, the system did not create credit allocations.

## ***Projects***

### **Billing >> Calculate Standard Bills**

**Defect 1289070:** When the transaction and billing currencies were different from the functional currency, Costpoint used the USD currency for the burden calculation and used the invoice date to convert the burden cost to the billing currency.

**Defect 1290067:** When a project has records in the Z\_BLPUBILL\_RPT table but no longer has data in Manage Open Billing Detail, Costpoint now removes those records from the Z table. This is to avoid encountering an error when calculating bills.
