### **PJ/PI/PJRPROJ/Print Project Status Report**

Deltek Defect Tracking Number:

817127

Issues Resolved:

**Description:** The Project Status Report (PSR) has been modified to include inception-to-date (ITD) funded and contract values that exclude regular modifications with future effective dates. Award fee modifications are excluded based on the fiscal year, start and end periods, and subperiod of the award fee rather than the effective date of the modification:

- A new column, ITD Amounts (w/o Future Mods), has been added to the header of the PSR to reflect the ITD amounts without future modifications. The fields under this column are populated by the new table, PROJ\_MOD\_ITD\_SUM, with amounts that are unique for the project/fiscal year/period/subperiod combination.
- The last column on the header of the PSR now has a label of Total Amounts (All Mods) to differentiate it from the new column added for the ITD amounts.

**Customers Impacted:** This change affects Costpoint users.

**Workaround Before Fix:** None.

**Additional Notes:** None.
