Framework

[Deltek Defect Tracking Number:](#)

604983

[Issues Resolved:](#)

Description: Framework and the following applications have been updated to add support for managing user groups through the Active Directory.

- **Manage Users** - A new check box, **Manage User Groups in Active Directory**, has been added to the **Authentication** tab. This check box is enabled only for **Active Directory** and **Windows Domain** and **Active Directory** authentication methods. Select this check box if you want a user to automatically be assigned to user groups mapped to the **Active Directory** linked to the user. Upon login, those user groups display on the **Assigned User Groups** subtask.
- **Manage User Groups** - A new column, **Active Directory ID (sAMAccountName)**, is now available on this screen. Use this column to enter the ID of the **Active Directory** you want to map to a user group. After you mapped the **Active Directory** to the user group, the users belonging to the **Active Directory** will automatically be assigned to the user group if the **Manage User Groups in Active Directory** check box on the **Manage Users** screen is selected for these users.

Customers Impacted: This enhancement affects Costpoint users. **Workaround Before Fix:** None. **Additional Notes:** None.
