## **OTHERS/WORKFLOW/WFMAPPRL/Approval Workflow Models**

[Deltek Defect Tracking Number:](#)

745059

[Issues Resolved:](#)

**Description:** Costpoint successfully saved the workflow data even if the **Application** and **Result Set (Screen)** field combination was invalid. This happened when you created a workflow record with data on the Approval Screen Fields subtask, and you updated the value in the **Application** field before saving the record. **Customers Impacted:** This defect affects Costpoint users. **Workaround Before Fix:** Delete the newly created record and create a new record with the correct data. Do not use the record with the invalid combination in the actual workflow process; otherwise, it can no longer be deleted. **Additional Notes:** None.
