Import Employee Data

Use this screen to import employee information from an ASCII file.

You can review and edit employee data created through the preprocessor in the Manage Employee Information and Manage Employee Salary Information screens. Only one user at a time can run this application.

Note: This is a separately licensed product for the current release of Deltek Costpoint.

There are two ways to work with input files in Costpoint:

- You can access the input file from the network by using Alternate File Locations.
- You can upload the input file to the Costpoint database; in which case, no further access to network folders is necessary.

Note: If you decide to use the first option, click  in the **File Location** field to select an alternate file location. If you choose the second option, leave the **File Location** field blank and use the File Upload Manager to upload the input file to the Costpoint database.

The Edit Report displays the previous information for a field when a Salary Info & History record is changed. When you add a new Salary Info & History record for either current or new employees, no information displays for the previous values because you are adding, not changing, a record.

Display the Import Employee Data Screen

You access the Import Employee Data screen from the People domain.

Click **People** » **Employee** » **Employee Interfaces** » **Import Employee Data**.

Contents of the Import Employee Data Screen

Use the fields and options to configure the Import Employee Data screen.

Identification

Use the fields in this block to create a new parameter ID or to retrieve a previously saved parameter ID. A parameter ID represents a set of screen selection parameters. After you have saved a parameter ID and its related parameters, you can retrieve them using **Query**.

You can use the retrieved parameters to produce reports and run processes more efficiently and with greater consistency. The saved parameters are also useful and necessary when you want to run the process as part of a batch job. Many users save a unique set of parameters for each different way they run a report or process. When you select a previously saved parameter ID or parameter description, the associated saved screen selection parameters automatically display as selection defaults. The page setup and print options, if there are any, are also included in the saved parameter ID. You can change any of the associated selection defaults as necessary.

Field	Description
Parameter ID	<p>Enter, or click  to select, a parameter ID of up to 15 alphanumeric characters. Choose characters for your parameter ID that help identify the type of selections you made on the screen, such as PERIOD or QUARTERLY.</p> <p>When you save your record, all the selections made on the screen are stored with the parameter ID. Later, you can retrieve the parameter using Query.</p> <p>You can use the parameter to run the process more efficiently because you can select the parameter ID with its previously defined screen selections. After the default selections display on the screen, you can override the defaults.</p>
Description	Enter, or click  to select, a parameter description of up to 30 alphanumeric characters.

File Information and Options

Field	Description
File Format	<p>From the drop-down list, select the input file format. Valid options are:</p> <ul style="list-style-type: none"> ▪ Comma-Separated (CSV): If you select this option, each field is separated by a comma. The final field on each line does not have a trailing comma. Strings are not enclosed in quotes. ▪ Fixed-Length: If you select this option, each field is of fixed length and must be padded with spaces to the specified field width. You must use this type of file if you are going to import fields that contain commas in the data. ▪ ADP (MFOUT.xxx): Select this option to import data directly from the ASCII file formats generated by ADP's Full Masterfile Output Utility. The application determines which version of ADP prepared the file and automatically adjusts for the differences in the formats. ▪ User-Defined: Select this option if you created a unique file layout in the Manage Employee Import User-Defined Format screen. Each field should be separated by a comma and the field position is determined by the layout in the Manage Employee Import User-Defined Format screen.
File Location	<p>Enter the location of the input file you are importing. There are two ways to do this:</p> <ul style="list-style-type: none"> ▪ In the File Location field, enter, or click  to select, the alternate file location where the input file is located. Alternate file locations are set up in the Manage Alternate File Locations screen. ▪ From the Global Menu, click Process » File Upload. On the File Upload Manager dialog box, click Browse and use the dialog box to select the file you want to import. If you select the Overwrite? check

Field	Description
	<p>box, Costpoint will overwrite any file of the same name that already exists in the Costpoint database. Click Upload when you are finished. If you use this method, leave the File Location field blank. For more information about the File Upload Manager, see the File Upload Manager topic in the Getting Started Guide.</p>
File Name	<p>Enter, or click  to select, the name of the file to be processed. The error file has the same name with an extension of ".ERR." Do not give the input file an ".ERR" extension, or an error will occur.</p> <p>Note: International users: The data can contain non-English characters, provided they are in the ASCII character set. Before creating an ASCII text (.TXT) file, be sure that your keyboard language is set to "EN" (United States English) to prevent the application from generating errors. Deltek recommends that you use .TXT and .CSV file-naming conventions.</p>
Deletion Indicator	<p>Select the value that indicates field deletion.</p> <p>If the selected value is specified for an existing employee, and the field allows deletions, then the corresponding Manage Employee Information and Manage Employee Salary Information column is deleted upon processing.</p> <p>If the selected value is specified for a new employee, and the field is not required, then the corresponding Manage Employee Information and Manage Employee Salary Information column is populated with a NULL/blank value.</p> <p>Note: It is the responsibility of the application or program that creates the ASCII file to populate the file with the appropriate deletion indicator.</p> <ul style="list-style-type: none"> ▪ NULL (CSV Format) / Blanks (Fixed/ ADP Format): Select this option if processing a comma-separated file format and a NULL value indicates that a value must be deleted from an existing record. <p>Select this option if you are processing a fixed-length or ADP file format and blank spaces indicate that a value must be deleted from an existing record. For example, if you are processing a comma-separated file and no value is specified in the Emergency Telephone field for an employee in the input file, when that input file is imported, the employee's Emergency Telephone number in Costpoint's Manage Employee Information screen is deleted.</p> <p>Note: Values that are required by Costpoint (such as Employee ID) cannot be deleted. An attempt to delete a required value will result in an error on the Employee Basic Preprocessor Error Report.</p> <ul style="list-style-type: none"> ▪ Asterisk (*): Select this option if you are processing a comma-separated file or a fixed-length file format and an asterisk (*) indicates

Field	Description
	<p>that a value should be deleted from an existing record. For example, if you are processing an input file and an asterisk is specified in the Emergency Telephone field for an employee in the input file, then when that input file is imported, the employee's Emergency Telephone number in Costpoint's Manage Employee Information screen is deleted.</p> <p>Note: Values that are required by Costpoint (such as Employee ID) cannot be deleted. An attempt to delete a required value results in an error on the Error Report.</p>
Truncation Method	<p>Use this drop-down list to select what action Costpoint takes when an input file field is too long for the target database column. This field is available only if you selected Comma-Separated in the File Format drop-down list. Valid options are:</p> <ul style="list-style-type: none"> ▪ Always truncate: If you select this option, values that are too long are always truncated without a warning. A warning message is written to the Error Report. ▪ Never truncate: If you select this option, values that are too long are never truncated. The record is rejected and an error message is written to the Error Report. <p>This field is enabled only when you select Comma-Separated Values or User-Defined as the File Format.</p>
Rate Provided in File	<p>From the drop-down list, select a default value for rate type. Use this field only when you are using the ADP file formats to import. Valid options are:</p> <ul style="list-style-type: none"> ▪ Annual ▪ Hourly ▪ Salary
ADP Hire Date Location	<p>Enter the ADP Date Field Number that contains the hire date. This information is required for ADP processing only. The default is "1."</p>
ADP Birth Date Location	<p>Enter the ADP Date Field Number that contains the birth date. This information is optional for ADP processing only. The birth date location must be different from the hire date location.</p>
Map Input File Employee ID to Payroll Service ID	<p>Select this check box if the employee ID from the input file must be mapped to the PR Service ID assigned to a Costpoint employees.</p> <p>If this check box is selected, the Import Employee Data screen ignores the Costpoint employee ID and instead uses the PR Service ID to determine which employee records must be updated.</p> <p>If the input file's Employee ID matches the PR Service ID for an existing Costpoint employee, that employee's records are updated (employee treated as existing employee). If the input file's Employee ID does not match a PR</p>

Field	Description
	<p>Service ID for an existing Costpoint employee, a new employee is created and the input file Employee ID is used as the new Costpoint employee ID as well as the PR Service ID assigned to that employee (employee treated as new employee).</p> <p>If this check box is not selected, the input file Employee ID is mapped to the Costpoint employee ID. If the input file Employee ID matches an existing Costpoint employee ID, that employee's records are updated (employee treated as existing employee). If the input file's Employee ID does not match an existing Costpoint employee ID, a new employee is created and the input file Employee ID is used as the new Costpoint employee ID. The input file Employee ID is also the PR Service ID assigned to that employee (employee treated as new employee).</p>
Create/Update Vendor Record	<p>Select this check box to create a vendor record in Accounts Payable for new employees. If you choose this option, the term ON RECEIPT must exist in the Vendor Terms table in Accounts Payable. The Vendor ID issued to the employee is the same as the Employee ID. For existing employees with vendor records, the following fields are updated in the VEND table:</p> <ul style="list-style-type: none"> ▪ EMPL_ID ▪ VEND_LONG_NAME ▪ LN_1_ADR ▪ LN_2_ADR ▪ LN_3_ADR ▪ CITY_NAME ▪ MAIL_STATE_DC ▪ POSTAL_CD ▪ COUNTRY_CD <p>This check box is available only when you select the Add/Update Vendor on the Add/Updated of Employee check box on the Configure Vendor Settings screen.</p>
Vendor Update Password	<p>Enter the password that allows you to make updates to vendor information. This field is available only when the Create Vendor Record check box is selected.</p> <p>You must enter a password if both the Add/Update Vendor on Add/Update of Employee check box (on the Configure Vendor Settings screen) and the Record Vendor Info Updates check box (on the Configure Accounts Payable Settings screen) are selected.</p>
Use Standard Hours to calculate the Annual Rate	<p>Select this check box to specify that the application should use Estimated Hours, which were entered in Record 2, to determine the relationship between hourly and annual pay. Otherwise, the application uses the value from the Work Hours in Year field in Record 2.</p>

Field	Description
Default the Plant (will only default if Record 4 is provided for the Employee)	Select this check box if the Plant data field should be populated for the employees being imported. Otherwise, clear the checkbox. Note: You can view this checkbox if your company has a Materials Management license.

Default Values

Use the 16 fields in this group box to select the default values in the input file. If you select a default value for a field, any null (or blank) values encountered in the input file for that field are replaced with the default value you select. Note that this feature does not substitute a default value when an invalid value is encountered in the input file; invalid values cause the automatic rejection of the record containing the incorrect value.

Clear the drop-down lists to disable default value substitution.

Field	Description
Update Existing Employees Check Box	Select the Update Existing Employees check box if the selected default value overrides data for existing employees. Please note that the default value is used only if a value is not provided in the input file. Clear this check box if the selected default value does not override data for existing employees.
Timesheet Cycle	Enter, or click  to select, a default value for timesheet cycle.
Leave Cycle	Enter, or click  to select, a default value for leave cycle.
Default Overtime State	Enter, or click  to select, a default value for overtime state.
Workers' Compensation	Enter, or click  to select, a default value for worker's compensation.
Pay Type	Enter, or click  to select, a default value for pay type.
GLC	Enter, or click  to select, a default value for general labor category.
Timesheet Default GLC	Enter, or click  to select, a default value for timesheet general labor category.
Employee Class	Enter, or click  to select, a default value for employee class.
Employee Status	From the drop-down list, select a default value for employee status. Valid options are:

Field	Description
	<ul style="list-style-type: none"> ▪ Active ▪ Family Medical Leave ▪ Inactive Accruing Leave ▪ Inactive
FLSA Classification	From the drop-down list, select a default value for Fair Labor Standards Act (FLSA) status. Valid options are: <ul style="list-style-type: none"> ▪ Exempt ▪ Non-exempt
Rate Type	From the drop-down list, select a default value for hourly/salaried status. Valid options are: <ul style="list-style-type: none"> ▪ Fluctuating ▪ Hourly ▪ Salaried
Employee Type	From the drop-down list, select a default value for employee type. Valid options are: <ul style="list-style-type: none"> ▪ Regular ▪ Part-time ▪ Temporary
Home Organization	Enter, or click  to select, a default value for home organization.
Visa Type	Enter, or click  to select, a default value for visa type.
Race/Ethnicity	Enter, or click  to select, a default value for race/ethnicity code for new employees.
Plant	Enter, or click  to select, the Plant in which the employee will be working. <div data-bbox="572 1543 1367 1613" style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>Note: You can view this checkbox if your company has a Materials Management license.</p> </div>
Import and Print Input File	Click  and select one of the following options to upload the data into the Costpoint database tables and add new or update existing records. <ul style="list-style-type: none"> ▪ Import: import employee information from a text file

Field	Description
	<ul style="list-style-type: none"> ▪ Print/Import Employee Data: import and print H114 information from a text file. ▪ Batch mode Print/Import Employee Data: import and print H114 information from a text file and specify the start date and time for the import.

Table Information for the Import Employee Data Screen

Changes made to the Import Employee Data screen update several tables.

Updated tables include:

- ACCT
- GENL_LAB_CAT
- LAB_LOCATION
- LAB_SETTINGS
- LV_PD

Input File Layout

You supply the name for the input file. The input file can be a fixed-format file, a comma-separated file, or an ADP-formatted file.

If the file is a fixed-format file, you must fill every position with either an appropriate character or a space. It is not necessary to zero-fill numbers; you can use spaces to maintain the proper format.

If the input file is a comma-separated file, you do not need to fill every position. However, the file must contain the correct number of commas.

Note: You cannot use commas in the **Notes** field.

An ADP-formatted file is generated by ADP's "Full Masterfile Output Utility" and is named MFOUT.xxx, where xxx is your ADP company code. The record layouts for the ADP format is in the "ADP PC/Payroll & Personnel - System Administrator's Guide" at Appendix B in Version 6.

Note: The input file layout may contain fields that are available only in Costpoint Advanced. If you are using Costpoint Essentials, these fields are excluded from the import process and may be left blank or null when you create the input file.

Comma-Separated Values Format

The input file layouts for the comma-separated values format follow:

Input Record 1 (EMPL, EMPL_PHONE, DFLT_REG_TS, EMPL_LAB_INFO)

Field	Field Name	Costpoint Table/ Column	Data Type and Size	Required/ Optional for New Employees	Required/ Optional for Existing Employees	Contents

34	Protected Veteran (Declined to Self-Identify)	EMPL.VE T_STATU S_p	Char 1	591	Optional	Optional	Y or N

Note: Record 4 fields 26 - 34 were added as part of Costpoint Project Manufacturing interface.

Input Record 5 (EMPL and EMPL_LAB_INFO)

Field	Field Name	Costpoint Table/Column	Data Type and Size	Columns	Required/Optional for New Employees	Required/Optional for Existing Employees	Contents
1	Record Code		Char 1	1	Required	Required	5
2	Employee ID	EMPL.EMPL_ID	Char 12	2-13	Required	Required	
3	Detail Job Code	EMPL_LA_B_INFO.DETL_JOB_CD	Char 10	14-23	Required (if licensed for HR)	Required (if licensed for HR)	Must exist in the DETL_JOB_TITLE table.
4	Personnel Action Code 1	EMPL_LA_B_INFO.PERS_ACT_RSN_CD	Char 10	24-33	Optional	Optional	Must exist in the PERS_ACT_REASON table.
5	Personnel Action Code 2	EMPL_LA_B_INFO.PERS_ACT_RSN_CD	Char 10	34-43	Optional	Optional	Must exist in the PERS_ACT_REASON table.
6	Personnel Action Code 3	EMPL_LA_B_INFO.PERS_ACT_RSN_CD	Char 10	44-53	Optional	Optional	Must exist in the PERS_ACT_REASON table.
7	HR Org	EMPL_LA_B_INFO.HR_ORG_ID	Char 25	54-78	Optional	Optional	Must exist in the HR_ORG_MGR_DETAIL table. This field only accepts 20 characters. You will need to fill remaining five

Field	Field Name	Costpoint Table/Column	Data Type and Size	Columns	Required/Optional for New Employees	Required/Optional for Existing Employees	Contents
							characters with spaces.
8	Default Rate Group	EMPL_LA_B_INFO.DFLT_RT_GRP_ID	Char 6	79-84	Optional	Optional	Must exist in the RT_GRP table
9	Currency	EMPL_LA_B_INFO.TRN_CRNCY_CD	Char 3	85-87	Optional	Optional	Must exist in the CURRENCY table
10	Last Day Worked	EMPL.LAST_DAY_DT	Char 10	88-97	Optional	Optional	YYYY-MM-DD
11	Not a protected veteran	EMPL.VET_STATUS_NP_FL	Char 1	98-98	Optional	Optional	Y or N
12	Declined to provide veteran status	EMPL.VET_STATUS_DECLINED	Char 1	99-99	Optional	Optional	Y or N
13	Recently separated veteran	EMPL.VET_STATUS_RS	Char 1	100-100	Optional	Optional	Y or N
14	Supervisor ID for EMPL_LA_B_INFO	EMPL_LA_B_INFO.SPVSR_EMPL_ID	Char 12	101-112	Optional	N	
15	Requisition Number	EMPL_LA_B_INFO.REQ_NO	Char 10	113-122	Optional	N	
16	Contractor flag	EMPL.CONTRACTOR_FL	Char 1	123-123	Optional	Optional	Y or N
17	Blind flag	EMPL.BLIND_FL	Char 1	124-124	Optional	Optional	Y or N

Field	Field Name	Costpoint Table/Column	Data Type and Size	Columns	Required/Optional for New Employees	Required/Optional for Existing Employees	Contents
18	GovWin IQ ID	EMPL.GOVWINIQ_LOGIN_ID	Char (100)	125-224	Optional	N	Alphanumeric
19	ESS User	N/A - not stored	Char 1	225-225	Optional	N	Y or N
20	Login ID	N/A - not stored EMPL • Allow entry of up to 254 alphanumeric characters and special characters	Char 254	226-479	Optional	N/A - only used for new employees	
21	User ID	N/A - not stored EMPL	Char 20	480-499	Optional	N/A - only used for new employees	

Processing Details

The Import Employee Data screen performs multiple actions when you import input files.

1. Multiple employee records for the same employee can be imported using either the comma-separated file layout or the user-defined file layout. The effective date in the records must match with each other. For example, an employee record can be imported with an effective date of 3/01/2017. Records 1, 2, 3, 4 and 5 must all have that effective date. Another record for that employee can be imported using an effective date of 8/01/2017 and all those records must use that date.
2. Any existing rows in the worktables are deleted. (Normally there is not any data in these tables at the start of processing unless a previous attempt to use the Import Employee Data screen terminated abnormally.)
3. The input file you specify is opened for read-only access. An output file with the same name as the input file but with the three-letter extension ".ERR" is opened for write access. For example, if you select an input file of "EMPLDATA.DAT," the preprocessor

- opens an output file called "EMPLDATA.ERR." (Note that, if a file with the same name as the output file already exists, it is overwritten.)
4. The input worktable is loaded with data from the input text file. For Comma-Separated Format (CSV) files, the program checks the length of each field as it is being read into the worktable. If a field is too long to fit into the input worktable, the field is truncated, the record is rejected, or you are asked whether to truncate or reject the record, depending upon your selection in the **Truncated Values** drop-down list. For fixed-length format files, the preprocessor checks the line length and displays a warning message if a line is either longer or shorter than the expected length.
 5. When the input table has been loaded, the preprocessor begins scanning the records for null values in any fields you have designated for default value substitution in the **Default Values** group box. For example, if you specified that **WKLY** is substituted for any blank **Timesheet Cycle** fields, the preprocessor scans the table for any blank **Timesheet Cycles**. If a blank is found, the preprocessor changes the field value to **WKLY**.
 6. After all default value substitutions are completed, the preprocessor performs all data validations on the input table (see discussion below). Records containing invalid field values are marked for deletion, and error messages are written to the error table.
 7. When validations are finished, the preprocessor deletes all records containing invalid values from the input table and writes these records to the output error file. At the conclusion of processing, you can review the error report and make corrections. After the corrected error file is renamed, you can re-run the preprocessor using that file as the new input file.
 8. After the application deletes records containing invalid field values, the input table contains only records that passed all validation tests and are valid candidates for insertion or update in the Costpoint database tables. The preprocessor calculates the value for certain computed columns (such as **Annual Salary**) and updates the input table with these values.
 9. The Costpoint database tables are now updated. If records already exist, they are updated or replaced. New records are inserted. If any fatal errors are encountered during this phase of processing, all transactions are rolled back and processing is aborted. For example, if the database server were to crash during the insertion of a new employee record, all processing that took place during the upload would be canceled, including all prior transactions. Either all transactions succeed or they all fail.
 10. Finally, the Audit and Error reports are printed. After printing is completed, the contents of the worktables are deleted, and processing is finished.

Other Output

- Error File (input file name + .ERR)
- Edit Report
- Error Report

About Deltek

Better software means better projects. Deltek delivers software and information solutions that enable superior levels of project intelligence, management, and collaboration. Our industry-focused expertise makes your projects successful and helps you achieve performance that maximizes productivity and revenue.
