## Overview

The Maconomy 2.2.6 Cumulative Update (CU) 3 release includes all the software issues resolved and enhancements that were made in this version, as well as software updates introduced in earlier CUs. The software changes from earlier CUs are listed in a separate section in these release notes.

### Custom Programs Affected

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application areas affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

### Download the Cumulative Update

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Cumulative Updates folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

### Check Whether or not the Cumulative Update Is Installed

To check that the update is installed, complete the following steps:

1. On the Maconomy toolbar, click **Help » About**.
2. On the About Deltek Maconomy dialog box, click the **Details** button.

### More Information

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.

## Important TPU Notes for CU 3

The Workspace Client from CU3 is required for this update.

Deltek recommends that you always install the latest version of the Workspace Client in order to ensure compatibility with the most recent CUs.

## Software Issue Resolved – Technology (TPU)

### Workspace Client Versions Below 2.4.5 Unresponsive When Launched Under macOS Big Sur

**Deltek Tracking: 1389808**

Previously, Workspace Clients below version 2.4.5 became unresponsive when launched using macOS Big Sur. This error is corrected.

## Workspace Client Redraw Issues When Running macOS Big Sur

**Deltek Tracking: 1392108**

Previously, users experienced calendar redraw issues when running the Workspace Client with macOS Big Sur. This error is corrected.

\*These files were released as part of a previous update but still apply to the latest CU.

## Important TPU Notes for CU 2

The Workspace Client from CU2 is required for this update.

Deltek recommends that you always install the latest version of the Workspace Client in order to ensure compatibility with the most recent CUs.

## Software Issue Resolved – Technology (TPU)

### Workspace Client Cannot Log In if Popup Type Contains More Than 32,767 Entries

#### Deltek Tracking: 1347873

If any popup type previously had more than 32,767 entries, the Workspace Client logged an error during startup and would never get to the point where a workspace could be opened. The error reported was: “com.maconomy.util.errorhandling.McError: Could not find a popup value with ordinal value -1 in list: []”.

A server fix is implemented (in the Coupling Service) that allows the client to log in and work by ignoring the popup type in question. However, the popup will be empty if displayed in any workspace on the client. This is not expected to be a problem as displaying a popup with more than 32,767 entries on screen would not be of any use.

# Cumulative Update 1 – Jun. 19, 2020

## Software Issue Resolved – Application (APU)

### Different Company Numbers Prevent Invoice Reconciliation in G/L Journal

**Deltek Tracking: 1272530**

Previously, you would receive an error message when you reconciled an invoice in the G/L journal if the company number of the journal was different from the company number of the customer payment. This error is corrected.
