ACCOUNTING/ACCOUNTS RECEIVABLE/ARMCR/Enter Cash Receipts

Issues Resolved:

Description: You could not put a functional rounding adjustment on a Cash Receipt (CR) if a cash line did not exist. This resulted to a CR that was out of balance in the functional amount.

Customers Impacted: This defect affects you if you use UNK (Unknown) invoices to track prepayments and net them against the real invoice after it has been posted.

Workaround Before Fix: Add a zero cash line so you can enter rounding adjustments.
