

Hot Fix: cp711_te_epmexprpt_022.zip

10.0/Expense/EP/EPMEEXPRPT

Deltek Defect Tracking Number:

775658

Issues Resolved:

Description: Ceiling is not multiplied by the number of attendees.

Customers Impacted: This affects clients who use the Expense module.

Workaround Before Fix: None.

Additional Notes: To further help address this issue, a new right-click function, **Recalculate ceilings and reimbursable expenses**, was added to the Attendees table that clients can use when entering Meals expenses. Use this function to recalculate ceiling and reimbursable expenses whenever you add or delete attendees. In the Attendees Details subtask, right-click in first column (at left) to display the **Recalculate ceilings and reimbursable expenses** pop-up option. Click this option after adding or removing attendees to adjust the Ceiling total based on the revised number of attendees. In the near future, when the Expense Wizard functionality is released, the Recalculate right-click functionality described here will only be necessary in Expert Mode.
