Deltek

Deltek Costpoint Business Intelligence 8.2

Team Content Guide for Advanced License

December 12, 2023

This edition published December 12, 2023.

Contents

Overview

Costpoint Business Intelligence is a suite of applications that addresses the performance management needs of clients who are using the Costpoint Business Intelligence platform with the Deltek Costpoint, Deltek Time and Expense, Deltek Costpoint Planning, and Deltek Shop Floor Time products.

Costpoint Business Intelligence 8.2 provides the capability to plan, monitor, analyze, and understand how your business is performing and take appropriate actions to improve profitability and overall company value. The Costpoint Business Intelligence 8.2 release offers complete and robust data models and developed reports. This provides a path for upgrading to future versions, and follows a standard software development lifecycle process that includes tracking and updating customer-requested enhancements and fixes.

Before You Begin

You must be running the correct versions of Costpoint, Deltek Time and Expense, and Deltek Costpoint Planning to run the reports mentioned in this guide.

To use the reports discussed in this guide, you must be running at least one of the following:

- Deltek Costpoint 8.2
- Deltek Shop Floor Time 1.3 or 2.0

Also, Costpoint Business Intelligence 8.2 leverages IBM Cognos Analytics with Watson 11.2.4.

Attention: For more information, see *Deltek Costpoint Business Intelligence 8.2 Installation Guide for New Users* or the *Deltek Costpoint Business Intelligence 8.2 Installation Guide for Users Upgrading from an Earlier Version*.

About This Guide

This guide describes the predefined reports and dashboards provided with Costpoint Business Intelligence in the Team Content folder.

These objects were developed for a baseline Costpoint implementation without consideration of a company's specific implementation.

This guide includes the following information for each object:

- Object descriptions
- Prompt descriptions
- Sample output

Use this document as a resource for becoming familiar with the predefined objects and for planning modifications to tailor them for your particular needs.

Deltek revises this document regularly to provide the most up-to-date technical information and instructions. You can download the most recent version using the Products Download page in the Deltek Support Center.

Reports Included in this Release

Costpoint Business Intelligence 8.2 includes reporting and analytics for a variety of subject areas.

In Costpoint Business Intelligence, the Team Content tab contain report folders for the following subject areas:

- Accounts Payable
- Accounts Receivable
- BI Audit
- Billing
- Costpoint Administration
- CRM & Contracts
- Employee
- Executive
- Expense
- Fixed Assets
- General Ledger
- Human Resources
- Incurred Cost Submission (ICS)
- Labor
- Manufacturing
- Materials
- Payroll
- Planning
- Procurement
- Projects
- Shop Floor Time
- Smart AI Admin
- SOX (Sarbanes-Oxley) Controls Reporting
- Subcontractor Management
- Time

Note: Some subject areas include reports for Costpoint modules that are purchased separately as add-ons, and not included in the core Costpoint license. As a result, reports might be blank if you don't have a separate license for the add-on module.

Accounts Payable

The Accounts Payable folder stores standard Accounts Payable reports useful to accounting staff who need vendor information.

The contents of this folder are available to the following user groups:

- CER Accounting
- CER Accounting All Secure
- CER Accounts Payable Secure
- CER All

Accounts Payable Reports

The Accounts Payable folder includes the following reports:

- 1099 Exceptions
- Corpay Payments
- Corpay Portal Vendor
- Vendor Employee
- Vendor History by EEOC Classification
- Vendor Master (Form Style and List Style)

1099 Exceptions Report

The 1099 Exceptions report provides a list of the 1099 vendors that have missing or incomplete tax IDs.

This report should be run before the 1099s are printed to identify potential errors.

Prompts

Use the prompts to run the 1099 Exceptions report.

Prompt Message	Description
Company	Select one company from the list.
Select one or more tax ID's (Enter **Missing** to return vendors with no tax ID's.)	Enter a portion of one or more tax IDs or the text **Missing** in the **Keywords** field to search for vendors with incomplete tax IDs. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
AP 1099 type (Leave blank to include all.)	Select the AP type. For example: ▪ **A**: Acquisition/Abandonment ▪ **FED**: Federal Income Tax Withheld

Sample Report

Sample 1099 Exceptions report.

1099 Exceptions

1 - Company 1

Vendor	Vendor Name	A/P 1099 Type	A/P 1099 Type Description	Vendor Tax ID
GORDON	GORDON'S TEST VENDOR	NONEMP	Non-Employee Compensation	92-123456789
JFREGVEN001	JFREGVEN001 NAME	NONEMP	Non-Employee Compensation	992-22-1223
JSR1099CROP	JSR1099CROP	CROP	Crop Insurance Proceeds	987-654-321
PROUTY	DIANE PROUTY	NONEMP	Non-Employee Compensation	999-99-9996
WOLF	JOYCE WOLF	NONEMP	Non-Employee Compensation	999-99-9997
			Vendor ID Count	5

Corpay Payments Report

The Corpay Payments Report provides accounts payable information for Corpay, a third-party AP payment service.

In Costpoint, set up Corpay as the Bank Abbrev assigned to a vendor. When the vouchers are posted and selected for payment, the files are updated and Cash disbursement is posted. You can then print and send this report to Corpay to complete the cycle.

Use **Run Excel Data** to generate an XLS file to upload into the Corpay system.

Prompts

Select a company and optionally bank accounts, check numbers, and due dates to filter and run the Corpay Payments Report.

Contents

Prompt Message	Description
Company	Select the company whose vendors you want to include in the report.
Select Bank Account Abbreviation(s)	Enter a portion of one or more bank account abbreviations for the customer accounts you want to include in report, then click **Search** . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.

Prompt Message	Description
	If applicable, click the right-arrow to move your selected results to **Choices**.
Select Check Number(s)	Enter a portion of one or more check numbers to include in the report To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Due Date Range	Enter or select the starting date for due dates in **From** and the ending date in **To**. The report will include invoices with due dates that satisfy the date range you specify. You can opt to select the **Earliest date** or the **Latest date** possible for the date range.
Posted Date Range	Enter or select the starting date for invoices with posted dates in **From** and the ending date in **To**. The report will include invoices with posted dates that satisfy the date range you specify. You can opt to select the **Earliest date** or the **Latest date** possible for the date range.

Sample Report

The Corpay Payments Report includes the accounts payable information you can use with the Corpay system.

Corpay Payments

Vendor History by EEOC Classification

The Vendor History by EEOC Classification report provides a list of vendors and the classifications for those vendors who are designated as a Small Business (SB) in Costpoint.

Amounts from the Accounts Payable area are spread across the classification columns to display activity. Federal Contractors can use this information to help complete forms SF 294 and SF 295.

The values used in this report are a summarization of CST_AMT from the VCHR_LN_ACCT_HS table.

Note: If the associated PO from VCHR_LN_HS is a match type of 2, then the CST_AMT database field will NOT populate because the report is only concerned with matching the total PO amount with the total Vouchered amount. The cost per item is not important and is not considered for the report. If you set up the PO as a match type of 3, then the report matches the Qty Ordered on PO to Qty Received to Qty Vouchered (3 ways). In this case, the cost per item is very important and the CST_AMT populates on the voucher info.

Prompts

These are Vendor History by EEOC Classification prompts.

Prompt Message	Description
Company	Select one company from the list.
Invoice Date Range	Select the start date for the invoice date range. In the **From:** field, enter or select the start date assigned to invoices or click the calendar icon to select the date. In the **To:** field, enter or select the end date assigned to invoices or click the calendar icon to select the date. You can opt to select the **Earliest date** or the **Latest date** possible for the invoice dates.
Display Missing Projects Only	Select **Yes** if you want the report to display only data for vouchers that are not linked to a project.

Prompt Message	Description
	Select **No** if you want the report to display data for all vouchers selected by your entries in the prompt fields.
Select one or more Projects	In the **Keywords** field, enter a portion of one or more project IDs and click **Search** to list IDs to include in the report. Instructions for using the **Keywords** field are available in the **Entering Keywords in the Keywords Search Fields** section in the Overview.
Select one or more Agencies	In the **Keywords** field, enter a portion of one or more agency IDs and click **Search** to list IDs to include in the report. Instructions for using the **Keywords** field are available in the **Entering Keywords in the Keywords Search Fields** section in the Overview.

Note: To optimize the display of project IDs in **Select one or more projects**, this prompts screen limits the number of project IDs returned to 1,000. Because of this, you should enter as much of the project ID as possible when you search for projects. If your search is too general, the projects you want may not be included in the 1,000 that are returned.

As you are able to change this limit, decreasing the limit will result to performance improvement. Increasing it, on the other hand, will process the query at a much longer time.

Accounts Receivable

This folder stores standard Accounts Receivable reports for use by accounting staff.

The contents of this folder are available to the following user groups:

- CER Accounting
- CER Accounting All Secure
- CER Accounts Receivable Secure
- CER All

Accounts Receivable Reports

This folder displays sample prompt screens and sample reports for the following reports:

- Accounts Receivable Aging
- Customer Master Information

Accounts Receivable Aging Report

The Accounts Receivable Aging report is a management report that provides a list of all unpaid or partially paid invoices; the report ages the amounts based on an option of invoice date or due date.

The report contains drill through functionality that allows you to view more detailed information about the outstanding amounts.

When comparing this BI report to the Standard Accounts Receivable Aging Report in the Costpoint Accounting module, you may see a discrepancy in the total A/R balance outstanding. This discrepancy may be caused by overpayments on invoices, which show as credit balances on the BI A/R Aging Report but are not included in the Costpoint Standard version.

Prompts

The Accounts Receivable Aging Report prompts includes selections such as company, subperiod end date, and aging bucket configuration.

Prompt Message	Description
Company:	Select the Company that you want to display in the report.
Subperiod end date:	Enter or select the subperiod end date.
Primary group:	Select any option from the following list: ▪ Customer ▪ Customer Type ▪ Organization

Prompt Message	Description
	▪ Project ▪ Project Manager ▪ Project Type ▪ Reorganization
Secondary sort:	Select any option from the following list to use as the secondary sort on the report: ▪ Customer ▪ Customer Type ▪ Organization ▪ Project ▪ Project Manager ▪ Project Type ▪ Reorganization
Aging method:	Select one of the following options to age by: ▪ Due Date ▪ Invoice Date
Date to age by	Enter or select the date to use when determining which aging column the receivable amount belongs in, based on the number of days before this date the invoice date or due date (selected in the previous prompt) falls.
Limit customers:	In the **Keywords** field, enter a portion of one or more names or IDs to narrow the primary group you selected in the previous field. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Column 1 aging range:	Enter a range to age by in the following three columns. You can edit the default ranges as necessary as long as date ranges do not overlap from column to column . Defaults from **0** up to **30**.
Column 2 aging range:	Enter the column range for aging. Defaults from **31** up to **60**.
Column 3 aging range:	Enter the column range for aging. Defaults from **61** up to **90**.
Column 4 aging range:	This defaults to the last number in **Column 3 aging range** plus one.

Prompt Message	Description
Set Range:	When you edit the default ranges, click **Set Range** to reset the first numbers in columns 2, 3, and/or 4.

Customer Master Information Report

The Customer Master Information report provides a list of customers with the relevant master file information.

This report can be used as a drill through report from reports with a customer field.

Prompts

Use the Customer Master Information prompts to run the Customer Master Information report.

Prompt Message	Description
Company	Select one company from the list.
Select one or more customers	In the **Keywords** field, enter a portion of one or more customer IDs and click to list customers to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Status	Select a customer status to filter the report results by one or more of the following statuses:

Prompt Message	Description
	▪ **Hold**: Include customers whose sales order processing has been suspended. ▪ **OK**: Include customers with credit in good standing. ▪ **Warning**: Include customers whose sales orders are still being processed, but whose orders are marked with a warning message during sales order entry indicating the customer's credit status.
Customer type	Select one or more types of customers to include in the report. To filter for all types, leave this field blank.
Sales territory	Select the territories of customers you want to include in the report. Territories are established in the Sales Territories table in Costpoint Accounts Receivable. To filter for all territories, leave this field blank.

Sample Report

BI Audit Reports (for Cloud users only)

This folder stores standard BI Audit reports for the BI administrator to see BI usage and login data.

Use the BI audit reports to track the following types of information:

BI content execution information

- Type of content (Report, Report View, Dashboard, Unsaved Report, Active Report)
- Content name
- Source (package or data module name)
- Date/Time
- User name
- Execution time

User login and logoff information

- User name
- Login time
- Logoff time
- Session duration
- Logoff operation (Regular Logoff or Termination)

BI audit data is retained for six months.

Four out-of-the-box reports help analyze the audit data:

- BI Content by User Report
- User Login/Logoff Report
- Summary BI Report Usage
- BI Content Trended Usage Report

The contents of this folder are available to the following user groups:

- CER ALL
- CER CP Administration

BI Content by User Report

View the reports, dashboards/stories, and active reports run by users during a range of time.

Administrators can select users, content types, packages, and BI objects and specify the minimum execution time.

Prompts

Select the prompt values for the BI Content by Users report.

Contents

Field	Description
Date Range	In the **From** field, enter the beginning value for the active date range. In the **To** field, enter the end value for the date range. You can opt to select the **Earliest date** or the **Latest date** possible for the date range.
Execution Time in second(s)	Enter a number to filter the report by the execution time. The report includes only data that has an execution time greater than or equal to the number of seconds specified.
Select User(s)	Select one or more users for the report. If you do not select a user, the report will show data for all users.
Content Type	Select the types of content you want to include in the report: ▪ Dashboard/Story ▪ Unsaved Report ▪ Standard Report ▪ Report View ▪ Active Report

Sample Report

View a sample of the BI Content by User report.

You can filter the report by package and type.

BI Content By User Report with Execution Times Greater Than 0

from Earliest Date to Latest Date

Type: Type Package: Package

User name	Package	Report name	Type	Time stamp	Execution time in seconds
Asaka, Leslie	BI Audit Data	BI Content by User Report	Standard report	02/22/2022 01:15:11 PM	0.147
			Standard report	02/22/2022 12:26:12 PM	0.15
		Unsaved report	Unsaved report	10/21/2021 02:24:23 PM	0.489
			Unsaved report	10/21/2021 02:24:26 PM	0.459
		User Login/Logoff Report	Standard report	02/22/2022 11:36:30 AM	0.443

BI Content Trended Usage

The BI Content Trended Usage report helps you understand your BI content usage trends by month, with a bar chart with overall usage and by package. You can compare the last six months of data.

This report also includes a table of usage data by package and month. You can drill to more details on the report.

Prompts

Select the date range and packages for the BI Content Trended Usage report.

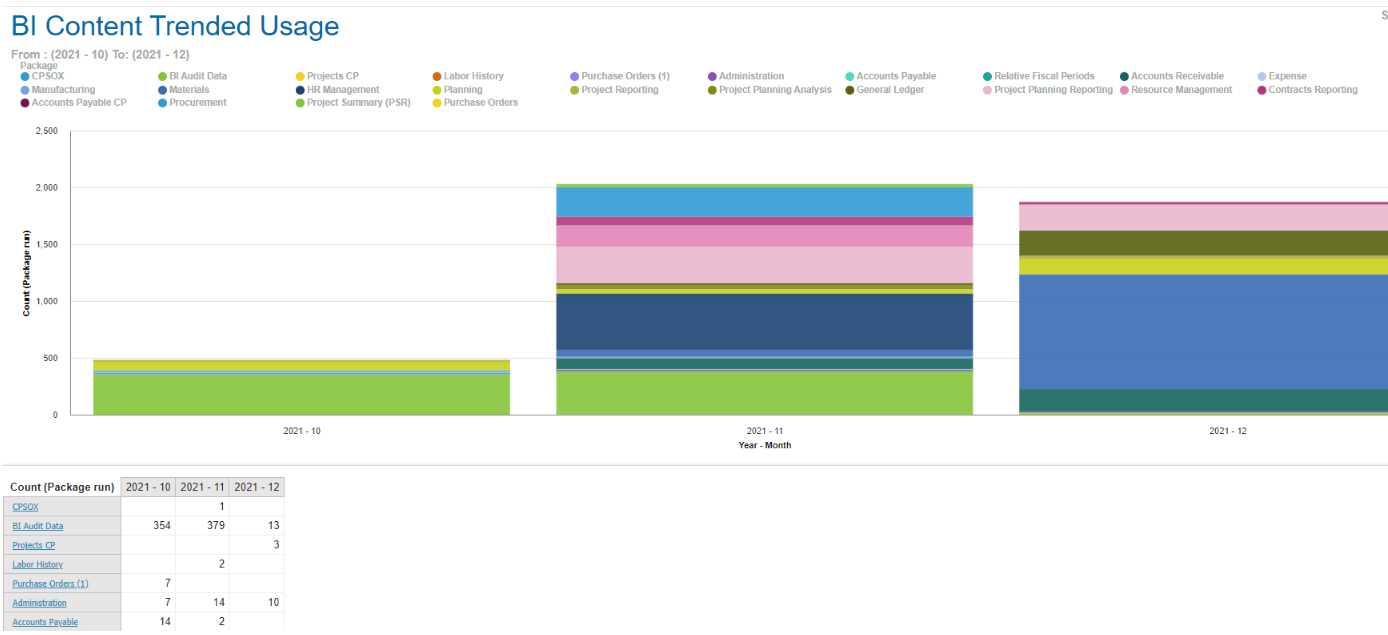
Contents

Field	Description
Year - Month From	Select the beginning month and year for the report.
Year - Month To	Select the ending month and year for the report.
Select Package(s)	Select the package for the selected time period.
Content Type	Select the types of content you want to include in the report: ▪ Dashboard/Story ▪ Unsaved Report ▪ Standard Report ▪ Report View

Field	Description
	▪ Active Report

Sample Report

View a sample of the BI Content Trended Usage report.



Count (Package run)	2021 - 10	2021 - 11	2021 - 12
CPSOX		1	
BI Audit Data	354	379	13
Projects CP			3
Labor History		2	
Purchase Orders (1)	7		
Administration	7	14	10
Accounts Payable	14	2	

Summary BI Report Usage Report

Run the Summary BI Report Usage report to see your most used reports, package, and average execution times.

Drill into the details to see who ran each report and the individual execution times.

> **Note:** The **# of Executions** column might show a higher number than expected. Due to audit logic, each action performed for the report, such as opening the report and searching and selecting prompts, counts towards the number of executions.

Prompts

Select the date range, content type, and packages for the Summary BI Report Usage report.

Contents

Field	Description
Date Range	In the **From** field, enter the beginning value for the active date range. In the **To** field, enter the end value for the date range.

Field	Description
	You can opt to select the **Earliest date** or the **Latest date** possible for the date range.
Content Type	Select one or more content types for the report.
Packages	Select the package to use for the report.
Show Detail Report Path	Choose whether to include each report's location.

Sample Report

This is an example of the Summary BI Report Usage report.

Billing

This folder stores standard billing reports.

The contents of this folder are available to the following user groups:

- CER All
- CER Billing Secure

Billing Reports

This section explains the prompt screens and sample reports for the Billing reports.

Billing reports include:

- Aged Open Billing Detail
- Milestone Invoice
- Pre-Bill Report
- Standard Invoice with Backup
- Unbilled Analysis
- Unposted Invoice
- Zero Rate Billing Exception Report

Aged Open Billing Detail Report

The Aged Open Billing Detail report is used to age transaction detail items that have not been billed.

This report identifies those projects that are not billing in a timely fashion and can help limit the amount of exposure for unbilled transactions. Aged Open Billing Detail is updated when transactions against billable projects are posted. The subperiod ending date is the basis for aging the unbilled transactions.

Drill through to additional reports for more details.

Name of Report That Opens (Drills Through) from the Aged Open Billing Detail Report	How to Open the Report
Project Master Report	This report displays when you click on a project.
Organization List Report	This report displays when you click on an organization.

Prompts

Use the Aged Open Billing Detail prompts to configure the Aged Open Billing Detail report.

Prompt Message	Description
Company	Select the company to use when running the report.
Fiscal Year	Select the desired fiscal year.
Period	Select the period number.
Subperiod	Select the subperiod number.
Primary Group	Select the primary grouping for the report: ▪ Account ▪ Customer ▪ Organization ▪ Project ▪ Project Manager
Secondary Group	Select a secondary sort option: ▪ None ▪ Account ▪ Customer ▪ Organization ▪ Project ▪ Project Manager
Date to Age By	Enter or select the date to age by.
Project Level	Select the project level at which you want the report printed. All lower levels will be rolled up for the report. Select **Transaction Level** to include all levels of detail.
Organization Level	Select the organization level at which you want the report printed. All lower levels will be rolled up for the report. Select **Transaction Level** to include all levels of detail.
Account Level	Select the account level at which you want the report printed. All lower levels will be rolled up for the report. Select **Transaction Level** to include all levels of detail.
Limit projects	In the **Keywords** field, enter a portion of one or more IDs or names to narrow the primary group you selected in the previous field. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather

Prompt Message	Description
	than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Column 1 Aging Range	Enter a range to age by in the following three columns. You can edit the default ranges as necessary as long as date ranges do not overlap from column to column. Defaults from **0** up to **30**.
Column 2 Aging Range	Enter the column range for aging. Defaults from **31** up to **60**.
Column 3 Aging Range	Enter the column range for aging. Defaults from **61** up to **90**.
Column 4 Aging Range	This defaults to the last number in **Column 3 aging range** plus one.
Set Range	When you edit the default ranges, click this button to reset the first numbers in columns 2, 3, and/or 4.

Milestone Invoice Report

The Milestone Invoice report renders the milestone/percent complete invoice, which can be used as a template to create customized standard invoices.

Before You Run This Report

Deltek recommends that you perform certain tasks in Costpoint before running the Milestone Bill report.

Perform the tasks in the following list:

- Set up Project data, including any ceilings
- Set up Customer Information
- Establish Remit to and Bill to Addresses
- Maintain Sales/VAT Tax, if needed
- Set up Project Billing Info
- Maintain Project Sales Tax, if needed
- Set up Maintain/Percent Complete Bills with billing data

If you want to use the optional Billing Cycle or Billing Group prompts, you must perform the following steps within Costpoint to populate the necessary data. These options are optional both in Costpoint and on the report.

- **Billing Cycle** — To use Billing Cycle on the report, you must first select the **Use Billing Cycles** check box on the Configure Billing Settings screen. Then establish the Billing Cycle in **Projects** » **Billing** » **Billing Controls** » **Manage Billing Cycles**. Then link the Billing Cycle to the project via the Manage Project Billing Information screen.
- **Billing Group** — To use Billing Group on the report, select the **Assign Bills to User Groups** check box on the Configure Billing Settings screen. Establish the Billing Group in **Projects** » **Billing** » **Billing Controls** » **Manage Billing User Groups**. Then link the Billing User Group to the Project via the Manage Project Billing Information screen.

Prompts

Use the Milestone Bill prompts to run the Milestone Bill report.

Prompt Message	Description
Company	Select one company from the list.
Primary Group	Select an option to use as a primary grouping for the report: ▪ Billing Cycle ▪ Billing Group ▪ Customer

Prompt Message	Description
	▪ Invoice ▪ Project
Print Status	Select the status of bills to include on the report: ▪ Selected ▪ Unselected
Limit Projects	In the **Keywords** field, enter a portion of one or more IDs or billing cycles to narrow the primary group you selected in the previous field. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Pre-Bill Report

The Pre-Bill Report is used to review draft invoices and get a quick preview of the labor, non-labor, burdens, fees, over ceiling amounts, and retainage that are ready to be invoiced.

As part of the pre-bill review process, you will have the ability to view the data in summary or drill from the summary and view the detail.
Only invoices with a status of Unselected are available to be printed on the report.

Prompts

These are Pre-Bill Report prompts.

Prompt Message	Description
Company	Select the company from the list.

Prompt Message	Description
Primary Group	Select the primary grouping for the report: ▪ Billing Group ▪ Customer ▪ Project ▪ Project Manager
Limit Projects	In the **Keywords** field, enter a portion of one or more IDs to narrow the primary group you selected in the previous field. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Standard Invoice with Backup Report

The Standard Invoice with Backup report renders the standard invoice with current billable amounts, units, and Accounting Classification Reference Number (ACRN) data, including supporting schedules.

This format can be used as a template to create customized standard invoices.

This report is similar to the one that exists in Costpoint, with enhancements such as including any outstanding invoice amounts along with the current invoice transactions and amounts.

Before You Run This Report

Certain tasks must be performed in Costpoint before you run the Standard Invoice with Backup report.

Perform the tasks in the following list:

- Set up project data, including any ceilings, overrides, units data, and PLC rates.
- Set up cost pools and associated provisional rates.
- Set up customer information.
- Establish remit to and bill to addresses.
- Set up generic billing formats.
- Set up supporting schedule formats.
- Set up project billing information.
- Manage ACRN bills, if the project is subject to ACRN billing requirements.
- Use Manage Open Billing Detail to edit transaction records, if necessary.
- Load labor rates, if necessary.
- Update cash basis Information, if necessary.
- Calculate billings.
- Make necessary edits in the Manage Standard Bills application.
- Calculate ACRN billings.
- Make necessary edits in the Manage ACRN Bills application.

Prompts

Use the Standard Invoice with Backup prompts to run the Standard Invoice with Backup report.

Prompt Message	Description
Company	Select a company from the list.
Primary Group	Select an option to use as a primary grouping for the report:

<table>
<tr><th>Prompt Message</th><th>Description</th></tr>
<tr><td></td><td>Billing Cycle
Billing Group
Customer
Invoice
Project
Billing Group and Billing Cycle are optional in Costpoint. If you use these options and want to use them in your report, you must perform the following steps within Costpoint to populate the necessary data:
Billing Cycle: To use Billing Cycle on the report, you must first select the Use Billing Cycles checkbox on the Configure Billing Settings screen. And then,establish the Billing Cycle in Projects » Billing » Billing Controls » Manage Billing Cycles and link the Billing Cycle to the project via the Manage Project Billing Information screen.
Billing Groups: To use Billing Groups on the report, select the Assign Bills to User Groups checkbox on the Configure Billing Settings screen. And then, establish the Billing Group in Projects » Billing » Billing Controls » Manage Billing User Groups and link the Billing User Group to the Project via the Manage Project Billing Information screen.</td></tr>
<tr><td>Print Status</td><td>Select the status of bills to include in the report:
Selected
Unselected</td></tr>
<tr><td>Project Level</td><td>Select the level to roll up transactions.</td></tr>
<tr><td>Limit Projects</td><td>In the Keywords field, enter a portion of one or more IDs or billing cycles to narrow the primary group you selected in the previous field.
To narrow the search, click Options to select filter criteria. If you search by name, use one of the Contains... options, rather than the Starts with... options. If applicable, click the right arrow to move your selected results to Choices.</td></tr>
</table>

Unbilled Analysis

Run the Unbilled Analysis report to gain insight into unbilled balances on projects.

Prompts

Select a company, fiscal year, period, rate type, and data level to run the Unbilled Analysis report. The projects available are based on your org security or roles security settings.

Contents

Prompt Message	Description
Company	Select the company to use when running the report.
Fiscal Year	Select the desired fiscal year.

Prompt Message	Description
Period	Select the period number.
Sub Period	Select the subperiod number.
Rate Type	Choose to show the **Actual** or **Target** rate.
Project Level Type	Choose to show data at any **Project** level, or at the **Revenue**, or **Billing** level.
Project Level	Select the project level number if you selected **Project Level** for the Project Level Type.
Select Projects	In the **Keywords** field, enter a portion of one or more project IDs and click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Owning Organization(s)	In the **Keywords** field, enter a portion of one or more Owning Organization IDs and click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Include Inactive Projects?	Choose **Yes** to include inactive projects in the report data or **No** to omit inactive projects.

Sample Report

Run the Unbilled Analysis report at the project, revenue, or billing level.

The Summary tab provides an overview of the unbilled balances and how they were derived.

Unposted Invoice

The Unposted Invoice report shows a listing of all pending (unposted) invoices.

This report does not include Customer Product and Progress Payment bills.

Prompts

Select a project to run the Unposted Invoice report.

Contents

Field	Description
Project(s)	Select a project for the report. In the **Keywords** field, enter a portion of one or more project IDs and click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

The report shows the invoice ID, project ID, project name, and invoice amount for each type of invoice.

Unposted Invoice

Project ID	Project Name	Invoice ID	Invoice Amount
Milestone Bill			
10400.MIL2	Navy UM AirSys Milestone1	INV-0000008578	128,250.00
Milestone Bill - Total			128,250.00
Standard Bill			
10160.20	Production - Transponder	INV-0000008583	0.00
10625.10	INA India II	INV-0000008563	15,434.40
Standard Bill - Total			15,434.40
Overall - Total			143,684.40

Zero Rate Billing Exception Report

The Zero Rate Billing Exception report helps reduce the number of billing errors by providing a list of employees, grouped by project and labor category, with billing rates = $0.

This information can help you determine if there is an error in the billing rate, before invoices are calculated.

Prompts

Use the Zero Rate Billing Exception Report prompts to configure the report.

Prompt Message	Description
Company	Select the company to use when running the report.
Fiscal Year	Select the desired fiscal year.
Period	Select the period number.
Subperiod	Select the subperiod number.
Limit Project(s)	In the **Keywords** field, enter a portion of one or more project IDs and click to list IDs to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
ID Type	Select an ID type: ▪ (All) ▪ Employee

Prompt Message	Description
	▪ Vendor ▪ Vendor Employee
Limit Name ID(s)	Select the ID from the list.

Note: To optimize the display of project IDs in **Limit Project(s)**, this prompts screen limits the number of project IDs returned to 1000. Because of this, you should enter as much of the project ID as possible when you search for projects. If your search is too general, the projects you want may not be included in the 1000 that are returned.

Costpoint Administration

This folder stores standard Administration reports, including user security for BI administrators.

The contents of this folder are available to the following user groups:

- CER All
- CER CP Admininstration

Data Dictionary Report

Use the Data Dictionary report to display selected data dictionary information, including table names and descriptions, column names and descriptions, and the Costpoint version when the column was introduced.

The data dictionary consists of a set of tables in the Costpoint database that describes database information including table descriptions, how the tables are used, their life cycles, and business rules, as well as detailed information at the column level.

Note: The Costpoint, Planning, and Time & Expense table data is available.

Note: Some customers may not be able to use the standard report if they don't use all three areas of Costpoint (Core, Planning and Time & Expense) but can create custom Data Dictionary reports for the table data they want to use with the Administration package. (This does not apply to Deltek Cloud customers who get all three areas).

Prompts

Use the prompts to filter the domain, modules, tables, columns, and versions included the Data Dictionary report. The values for each prompt are based on the domain, module, or table that you select. For example, if you select the Materials domain, you can only choose the modules, tables, or columns related to that domain.

Contents

Field	Description
Domain	Select the domain that contains the data for the report.
Module(s)	In the **Keywords** field, enter a portion of one or more Costpoint modules for the report, and click the **Search** icon. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Table(s)	In the **Keywords** field, enter a portion of one or more Costpoint database tables to include on the report, and click the **Search** icon.

Field	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Column(s)	In the **Keywords** field, enter a portion of one or more data dictionary table columns for the report, and click the **Search** icon. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Version(s)	Select the Costpoint versions for the report. To select multiple versions, press **CTRL** on your keyboard and click on the versions you want to include in the report.

Sample Report

The following image is an example of the Data Dictionary report.

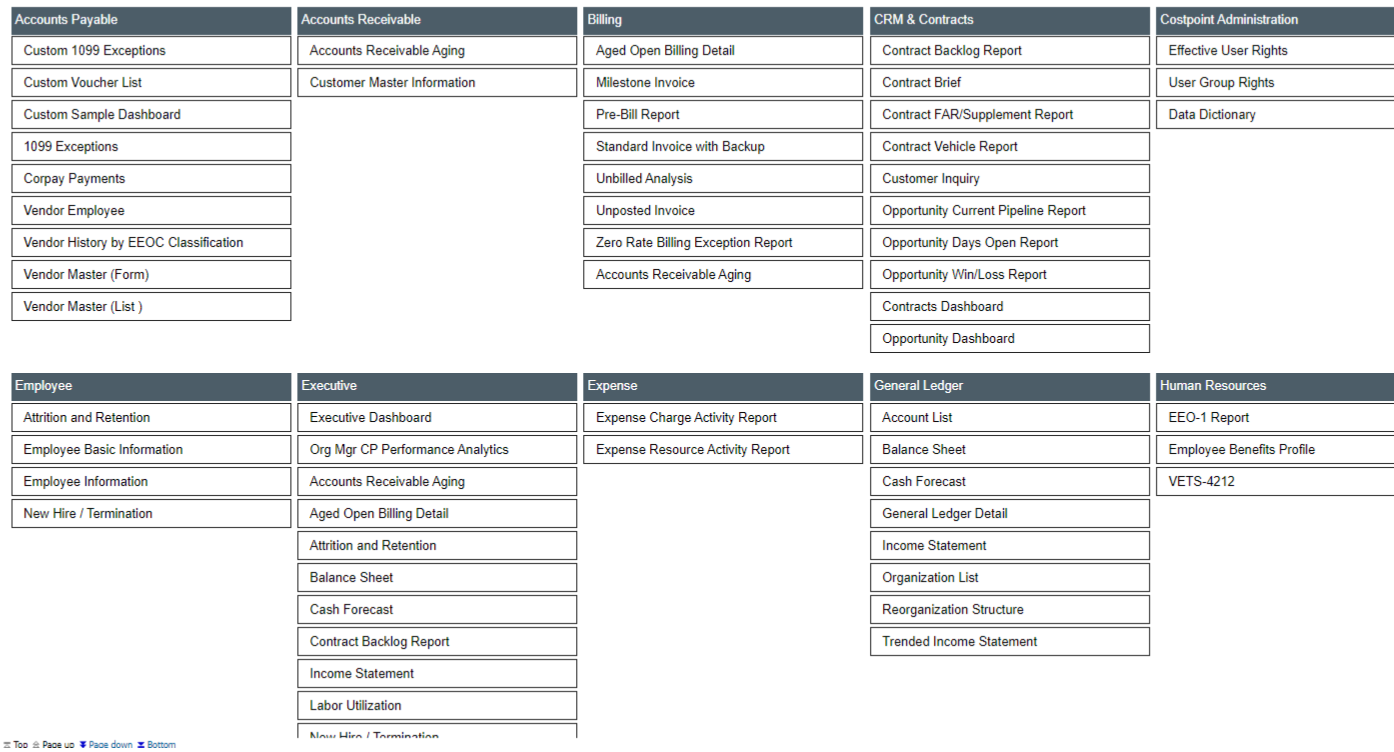
Menu Report

The Menu Report displays a list of Deltek standard reports (from Team Content) and can be expanded to include custom reports (from Company Content).

Launch reports directly from the Menu Report. Report content is based on your access rights.

Sample Report

This is a sample of the Menu report.



Security Reports

The Security contains the Effective User Rights report and the User Group Rights report.

Effective User Rights Report

This report displays the effective module and function rights for Costpoint users in a table format.

> **Note:** We strongly recommend using prompt filters to narrow the report output, even though the report does not require prompts to run it. There are no required prompts because they limit usability in cases where you may need to use different combinations of filters to generate the desired output. For example, you may need to see all the rights of a particular user or user group, or you may need to see all the users or user groups that have permissions to a specific application or module. If you tried to generate a report of all users and user groups with all the modules and applications of the system, this would produce an enormous output. And although BI queries and reports can typically handle large volumes of data, this report is pulling from two different data sources (CPDATA and CPSYSTEM). Running this report requires local processing instead of database processing and could significantly impact the performance of this report and other reports running on this server. Any report running over 6 hours will

automatically end, but we want to avoid knowingly initiating a query that could tax the system. We will continue to monitor this report's usage and run times and may opt to make future changes requiring certain prompt settings if this becomes problematic in production environments.

Prompts

Select the required prompts to run the Effective User Rights report.

Warning: Only run this report by initiating a combination of filters for User or User Groups or Module or Application, or you could experience performance issues. For more information on this warning, please see the Effective User Rights report overview.

Prompt Message	Description
Company	Select the company ID to include in the report.
Include Deactivated Users	Choose whether to include deactivated users in the report.
Show Application Details for Module	Choose whether to show the applications each user can access in a module.
Select User(s)	In the **Keywords** field, enter a portion of one or more user names or IDs to include only the selected users in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Module(s)	In the **Keywords** field, enter a portion of one or more modules to include only the selected modules in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Application(s)	In the **Keywords** field, enter a portion of one or more applications to include only the selected applications in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select User Group(s)	In the **Keywords** field, enter a portion of one or more user groups to include only the selected user groups in the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Access Levels	Select one or more access levels to display only the users who have the selected access.

CRM & Contracts

This folder stores standard CRM & Contracts reports and dashboards for contract administrators and staff.

The report templates in CRM & Contracts are interactive and you can modify them during run-time.

The contents of this folder are available to the following user groups:

- CER All
- CER Contracts

Note: The Contracts Reporting package requires a license to Contract Management in Costpoint.

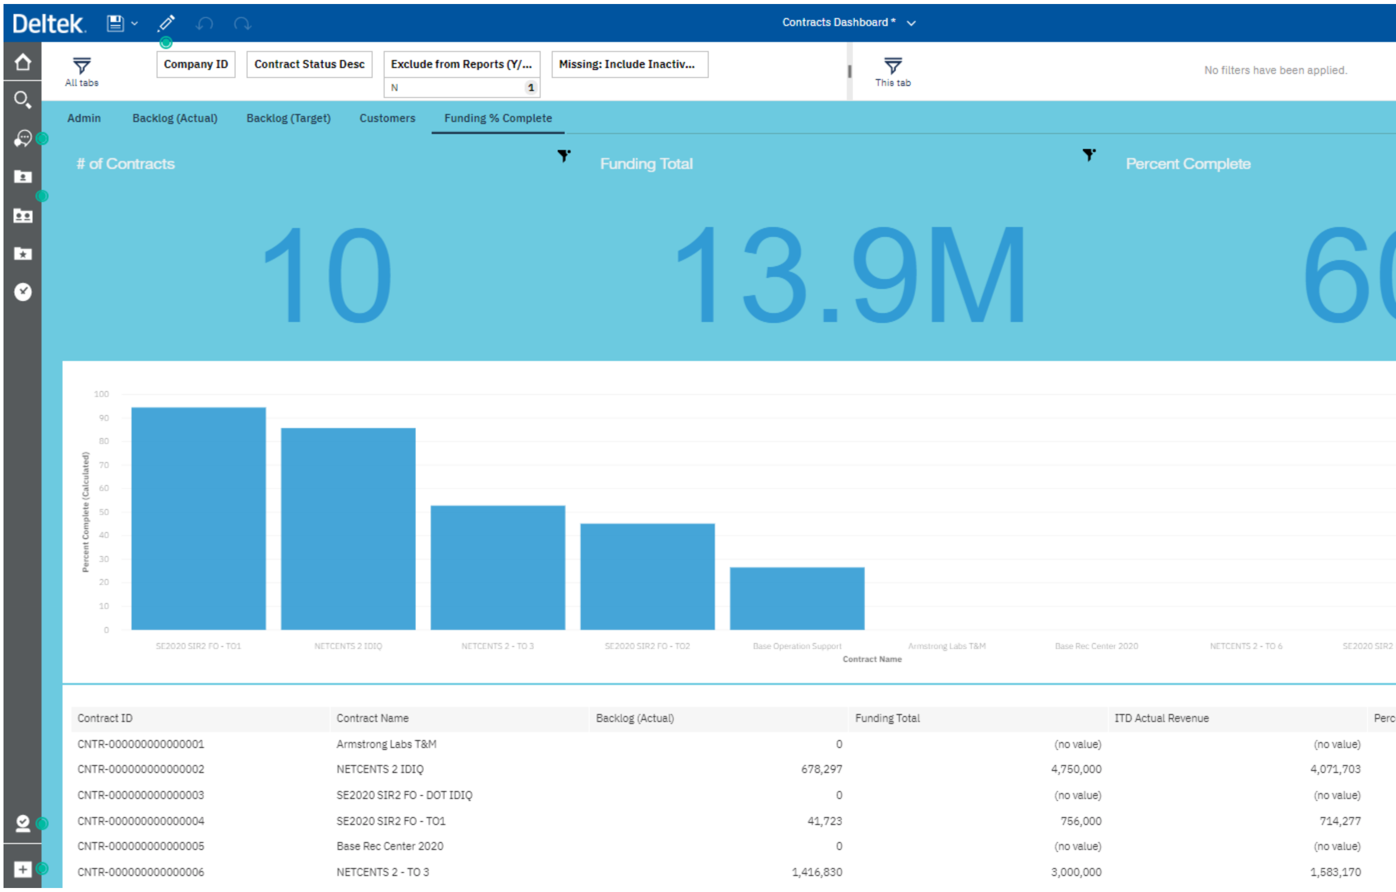
CRM & Contracts Dashboards

The template dashboards for CRM & Contracts allow you to create and share interactive analytical dashboards that uses the Costpoint Contracts Management data.

Contracts Dashboard

Use the Contracts Dashboard to see the percent complete of contracts and identify any fund limitation issues ahead of time.

The dashboard shows the backlog in contracts, the volume of contracts by primary customer, and the volume of contracts by contract administrator. Use this information to analyze the workload and responsibilities for the team.

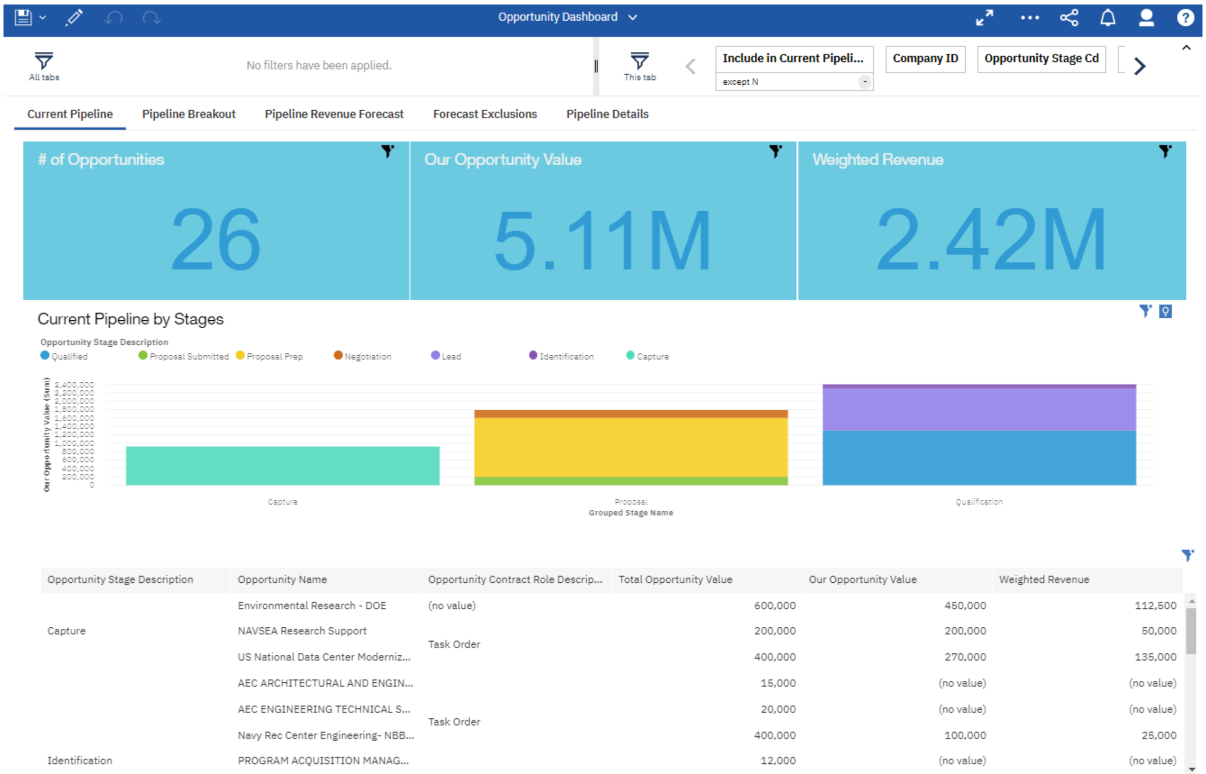


The Contracts Dashboard includes five tabs:

- **Admin**: Displays the volume of contracts per contract administrator.
- **Backlog (Actual)**: Displays the backlog of contracts that helps you determine if you need to notify the client that additional funding is needed.
- **Backlog (Target)**: Similar to **Backlog (Actual)**, this tab displays the backlog of contracts for the target amount.
- **Customers**: Displays the volume of contracts by primary customer. This tells you which customer has the majority of the contracts, which helps you determine where your company can invest in the future.
- **Funding % Complete**: Displays the percentage of completion of contracts based off a specified percentage amount.

Opportunity Dashboard

The Opportunity Dashboard displays consolidated metric views for the Opportunities module.



The dashboard contains the following tabs:

- **Current Pipeline:** This tab displays the detailed list of opportunities based on specified pipeline stages. This provides the sales team a visual representation of the value of the opportunities broken out by each of the stages to help determine where to prioritize efforts to close deals.
- **Pipeline By Stages:** This tab displays the list of opportunities, their stage, and value by month.
- **Pipeline Breakout:** This tab displays the summary of opportunity pipeline amounts organized by stage based on the anticipated award date. This lets you assess future revenue for the company.
- **Pipeline Revenue Forecast:** This tab displays the Opportunity Value and Weighted Revenue, spread evenly over months. The Opportunity Value Forecast Spread displays the estimated start date and estimated dates of the opportunities, and evenly spreads the opportunity value over the months. The Weighted Revenue Forecast Spread displays the estimated start date and estimated completion dates of the opportunities, and evenly spreads the weighted revenue over the months.

- **Forecast Exclusions:** This tab displays the opportunities that require additional data before they can be included in the Revenue Forecast. Required data may include the start date, end date, or the Our Opportunity Value/Weighted Value data.
- **Pipeline Details:** This tab displays the summary of opportunity pipeline amounts that are grouped and shows the total percentage by each stage.
- **Leads Analysis:** This tab displays leads grouped by source.

CRM & Contracts Reports

Contracts Reporting is the report package for Contracts.

Contract Backlog Report

The Contract Backlog report shows the contract backlog and funded percent complete for each contract. Use this report to determine the amount of money left on each contract and whether action needs to be done due to contract overruns.

Prompts

The prompts for the Contract Backlog Report include the selection for company, contracts, contract vehicle, contract type, and others.

Prompt Message	Description
Company	Select the Company that you want to display in the report.
Select Prime Contract(s)	Select the contracts that you want to display in the report. In **Keywords**, enter one or more characters for which you want to search to retrieve contract information from. To narrow the search, select one of the following in the dropdown field. ▪ **Starts with any of these keywords** ▪ **Starts with the first keyword and contains all of the remaining keywords** ▪ **Contains any of these keywords** ▪ **Contains all of these keywords** If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click the arrow to list the matching contracts in **Choices**.
Select Contract Vehicle(s)	Select the contract vehicle that you like to include in the report.
Select Contract Type(s)	Select the types of contract that you like to include in the report.

Prompt Message	Description
Basis for Actual % Complete	Select the basis for the actual percentage completion which can either be **Funded Value** or **Contract Value**.
Select Rate Type	Select the type of rate which can either be **Target** or **Actual**.
Include Inactive Contracts?	Indicate if you like to include inactive contracts (**Yes**) or not (**No**).

Customer Inquiry Drill-Thru Reports

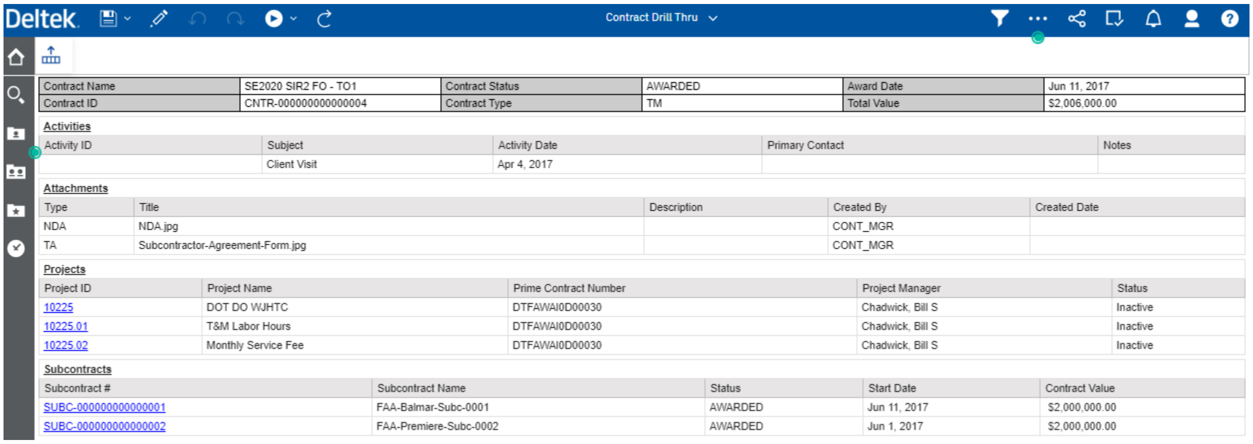
There are several drill-thru reports available in the Customer Inquiry report where you can see details about contracts, opportunities, projects, subcontracts, and organizational conflict of interest (OCIs).

Because drill-thru only reports are not run on their own, users do not need to enter prompt information for these reports. Information needed to run the report is retrieved based on the parent report such as the Customer Inquiry report. No user input is required.

Contract Drill-Thru

The Contract Drill-Thru report displays the contract details of a customer such as activities, projects, and subcontracts.

This is a sample Contract Drill-Thru report.



Contract Name	SE2020 SIR2 FO - TO1	Contract Status	AWARDED	Award Date	Jun 11, 2017

Opportunity Days Open Report

Use the Opportunity Days Open Report to see opportunities that your company won and lost as well as the number of days they were open. The information helps you to determine the number of days you spend on opportunities.

Prompts

Select a company and opportunity or customer name to run the Opportunity Days Open report.

Prompt Message	Description
Company	Select the company that you want to include in the Opportunity Days Open Report.
Limit By	Select the opportunity name or customer that you want to display in the report. In **Keywords**, enter one or more characters to include in the search for which you want retrieve customer information from. To narrow the search, select one of the following in the dropdown list. ▪ **Starts with any of these keywords** ▪ **Starts with the first keyword and contains all of the remaining keywords** ▪ **Contains any of these keywords** ▪ **Contains all of these keywords** If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click the arrow to list the matching contracts in **Choices**.
Stage(s)	Select the opportunity stage that you want to include in the report.
Type(s)	Select the opportunity type that you want to include in the report.
Date Opened	Select dates to display opportunities opened within this date range. In the **From** field, enter a date to display opportunities opened on or after this date, or click the calendar icon to select a date. In the **To** field, enter an end date to display opportunities opened on or before this date, or click the calendar icon to select a date. Or, you can select the **Earliest date** or the **Latest date** possible for the date range.

Prompt Message	Description
Include Inactive Opportunities?	Indicate if you want to include the inactive opportunities in the report (**Yes** or **No**).

Employee

This folder stores standard Employee reports for use by people administrators, Human Resources and Payroll staff, and managers of employees.

The contents of this folder are available to the following user groups:

- CER All
- CER Employee Secure
- CER People

Employee Reports

Three secured reports use the Employee model.

The Employee folder includes the following reports:

- Attrition and Retention
- Employee Basic Information
- Employee Information
- New Hires / Terminations

Attrition and Retention Report

The Attrition and Retention report enables you to monitor turnover trends for your company so you can manage employee retention more effectively.

The report displays the following for the reporting period you specify on the prompts screen:

- Total non-terminated employees at the end of the reporting period
- Number of new hires during the period
- Ratio of new hires to total non-terminated employees
- Number of terminations during the period
- Ratio of terminations to total non-terminated employees

You can organize this information by organization, labor location, or manager.

Prompts

Use the Attrition and Retention prompts to configure the report.

Prompt Message	Description
Company	Select the company for which you are generating the report.
Start date	Select the starting date for the date range. The report includes employees either hired or terminated within the date range you specify.

Prompt Message	Description
End date	Select the ending date for the date range. The report includes employees either hired or terminated within the date range you specify.
Primary group	Select one of the following options for grouping data on the report: ▪ Organization ▪ Labor Location ▪ Manager On the Advanced tab, you can also filter the report based on this selection.
Select organizations/labor locations/managers	Based on your selection for **Primary Group**, use this option to limit the report to selected organizations, labor locations, or managers. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Employee Basic Information Report

The Employee Basic Information report displays employee basic information (excluding salary-related information).

This report is one in a series of master information reports. This report is available as a drill through target from other reports.

Prompts

Use the Employee Basic Information prompts to configure the Employee Basic Information report.

Prompt Message	Description
Company	Select a company from the list.
Status	Select one or more of the following employee statuses to include in the report: ▪ Active

Prompt Message	Description
	▪ Family Medical Leave ▪ Inactive Accruing Leave ▪ Inactive
Employee Type	Select one or more of the following employee types to include in the report: ▪ Part Time ▪ Regular ▪ Temporary
Limit Organization(s)	In the **Keywords** field, enter a portion of one or more organization IDs and click 🔍 to list organizations to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Supervisor(s)	In the **Keywords** field, enter a portion of one or more supervisor names and click 🔍 to list supervisors to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Locator Code(s)	A locator code is an optional field that can be defined for an employee. It is used only in the employee record and not maintained or validated anywhere else in Costpoint. It is used typically as a way to organize how checks or leave status is printed (set up locator codes and print checks or leave status in groups, sorted by locator code). In the **Keywords** field, enter a portion of one or more locator codes and click 🔍 to list codes to use as filters for employee's to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Employee Information Report

The Employee Information report provides a flexible option for reporting on basic employee data and employee labor information.

You can select the employees that you want to include in the report. In addition, you can sort the report by either employee ID or employee name.

Prompts

Select the prompts to run the Employee Information report.

Prompt Message	Description
Company	Select the company to include on the report.
Primary Sort	Select one of the following options to indicate how to sort the employee information:

Prompt Message	Description
	▪ Employee ID ▪ Employee Name
Select Employee(s)	Use this option to limit the report to selected employees. (If you make no selections, the report includes all employees.) In the **Keywords** field, enter one or more characters for which you want to search to retrieve employees. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. When you generate the report, it includes only records for the employees in **Choices**.

Sample Report

Here is a sample of the Employee Information report.

If labor suppression is enabled for your user ID, the salary columns will be blank.

New Hires / Terminations Report

The New Hires/Terminations report is actually two reports that share the same prompt screen: the New Hires report and the Terminations report.

The New Hires report lists employees hired during the date range you specify on the prompts screen. The list is grouped by organization and provides the following information:

- Employee’s organization ID and name
- Employee ID and name
- Position title
- Employee's manager
- Original hire date

The Terminations report lists employees terminated during the date range you specify on the prompts screen. The list is grouped by organization and provides the following information:

- Employee’s organization ID and name
- Employee ID and name
- Position title
- Employee's manager
- Original and adjusted hire date
- Years of service
- Termination date

Prompts

Select a company and a date range to run the report.

Prompt Message	Description
Company	Select the company for which you are generating the report.
Beginning Hire / Termination Date	Select the starting date for the date range. The report includes employees either hired or terminated within the date range you specify.
Ending Hire / Termination Date	Select the ending date for the date range. The report includes employees either hired or terminated within the date range you specify.

Sample Report

This section includes samples of the New Hires report and the Terminations report.

The New Hires report is available on the New Hires tab.

Executive

The Executive folder stores standard reports and the Executive Dashboard that contains metrics for executives.

This folder also includes views of the following reports:

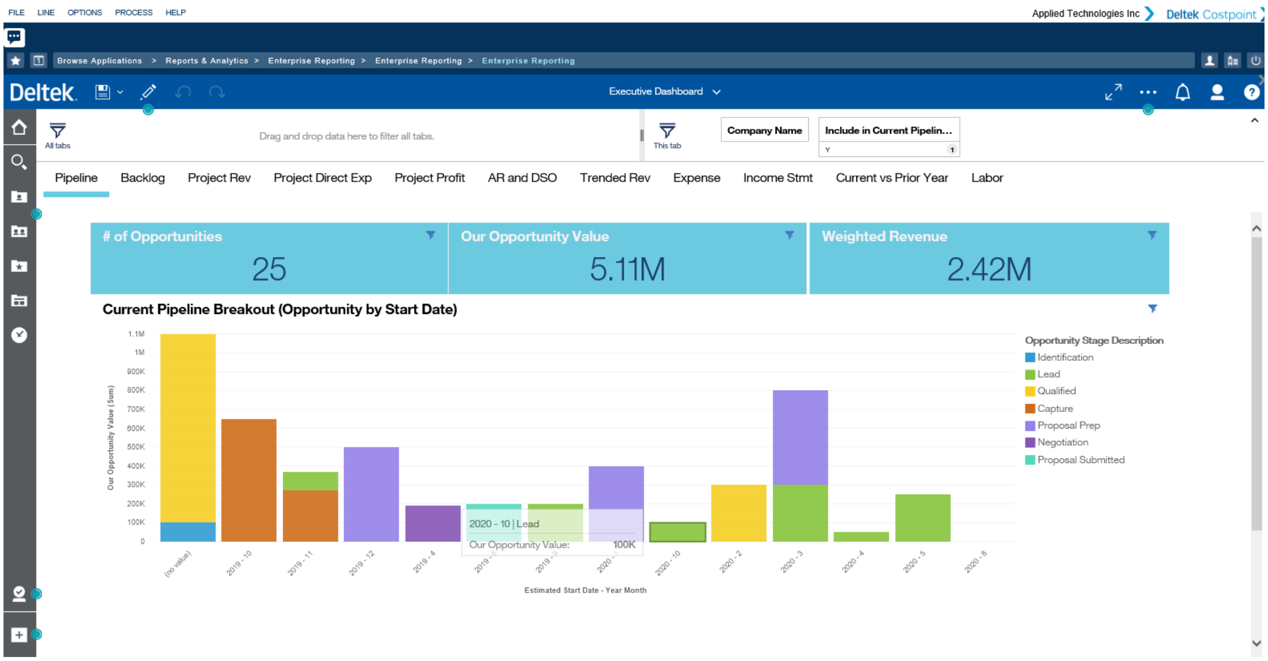
- Accounts Receivable Aging
- Aged Open Billing Detail
- Attrition and Retention
- Balance Sheet
- Cash Forecast
- Contract Backlog Report
- Income Statement
- Labor Utilization
- New Hire / Termination
- Opportunity Current Pipeline Report
- Opportunity Win/Loss Report
- Revenue Forecast
- Trended Income Statement
- Unbilled Analysis

The contents of this folder are available to the following user groups:

- CER All
- CER Executive Secure

Executive Dashboard

The Executive Dashboard provides a high level insight into overall contract information that is useful to senior management.



The Executive Dashboard includes:

- **Pipeline and Backlog**: This area shows information about the number of opportunities and their corresponding values as well as funding and contract backlogs.

  On the Backlog tab, the Funding Backlog (Target) by Contract Type and Contract Backlog (Target) by Contract Type dashparts drill through to Contract details. To view the drill through report, right-click on the dashpart and click the Drill Through icon.
- **Project Rev, Project Direct Exp, and Project Profit**: The information in these areas are categorized by owning organization and by project manager. The project revenue, expenses, and profit against budget by project or project type are also displayed.
- **AR and DSO**: This area shows the outstanding accounts receivable and day sales outstanding by organization and by customer.
- **Trended Rev**: This area shows the actual vs budgeted and current period vs year-to-date revenue over a period of time.
- **Expense**: This area shows information such as expenses by project classification and top expense type categories.
- **Income Stmt**: This area is created from a Crosstab Report and is viewed as an overall Income Statement by quarter for the current fiscal year, providing line items based on the filtering criteria of Company Name, Org Level 2 ID Name, Org Level 3 ID Name, and Financial Statement Code set to P&L.

- **Current vs Prior Year**: This area provides bar charts comparing Prior Year Revenue, Direct Expense, Indirect Expense, and Profit to the Current Fiscal Year Revenue, Direct Expense, Indirect Expense and Profit.
- **Labor**: This area displays labor hours and amount by project class and organization as well as by project classification.

Users in the **CER__EXEC_SECURE** user group have exclusive access to the Executive Dashboard.

Data on the Executive Dashboard come from multiple packages including Project Reporting, Contracts, Accounts Receivable, and General Ledger. If one of the packages is not used, for example, Contracts, the dashboard may not display data.

Expense

This folder stores standard Expense reports for expense administrators and managers approving expenses.

The contents of this folder are available to the following user groups:

- CER All
- CER Time & Expense
- CER Expense Secure

Expense Resource Activity Report

Resource Managers can use the Expense Resource Activity report to see how the employees they have a role over have charged their time.

Prompts

Select a company to run the Expense Resource Activity report.

Prompt Message	Description
Company	Select a company from the list.
Functional Role(s)	Select the functional role to include only the employees related to the role in the report.
Group(s)	Select one or more employee groups to include in the report. The options are based on the selected functional role.
Employee Name(s)	Select the employees you want to display in the report. In the **Keywords** field, enter one or more characters to search with to retrieve this information. To narrow the search, select one of the following in the dropdown list: ▪ Starts with any of these keywords ▪ Starts with the first keyword and contains all of the remaining keywords ▪ Contains any of these keywords ▪ Contains all of these keywords If you search by name, use one of the Contains... options, rather than the Starts with... options. Click the arrow to list the matching employees in **Choices**.
Expense Report ID - Description	Select the expense report ID to include in the report. In the **Keywords** field, enter one or more characters to search with to retrieve this information. To narrow the search, select one of the following in the dropdown list:

Prompt Message	Description
	▪ Starts with any of these keywords ▪ Starts with the first keyword and contains all of the remaining keywords ▪ Contains any of these keywords ▪ Contains all of these keywords If you search by name, use one of the Contains... options, rather than the Starts with... options. Click the arrow to list the matching expense report ID in **Choices**.
Expense Report Date	Enter or select the starting date for the report in the **From** field and the ending date in the **To** field. The report will include the records that satisfy the date range you specify. You can opt to select the **Earliest date** or the **Latest date** possible for the sales order dates.

Sample Report

This is a sample of the Expense Resource Activity report.

View the Expense Daily tab to see expense details listed by date.

Fixed Assets

This folder stores standard Fixed Assets reports for use by the accounting staff.

The contents of this folder are available to the following user groups:

- CER All
- CER Fixed Assets
- CER Accounting All Secure

Fixed Asset Report

The Fixed Asset folder includes the secured Fixed Asset report.

This report contains the total cost, accumulated depreciation, book value, and percentage of depreciation of fixed assets. This report provides a current snapshot of book value data at the time you run the report.

Prompts

Select prompt values to run the Fixed Asset Report.

Prompt Message	Description
Company	Select the ID of the company that you want to be included in the report.
Primary Group	Select the group to be included in the report.
Book	Enter the book that you want to get data from.
Record Status	Select the status code of the fixed assets that you want to be in the report.
Depreciation Status	Select the Depreciable Status code, which can either be **Depreciable** or **Non-depreciable**.
Asset Acquired	Specify the date range of the fixed asset. The depreciation computation will be based on the dates entered.
Limit Accounts	Enter a portion of one or more accounts in the **Keywords** field to be included in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Asset ID/Item	Enter a portion of one or more asset IDs/items in the **Keywords** field to be included in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather

Prompt Message	Description
	than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Organization	Enter a portion of one or more organizations in the **Keywords** field to be included in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Sample Report

You can print the Fixed Asset report or export it to MS Excel.

View a summary of fixed asset information.

General Ledger

The General Ledger folder stores standard General Ledger reports for use by the accounting staff.

The contents of this folder are available to the following user groups:

- CER Accounting
- CER Accounting All Secure
- CER General Ledger Secure
- CER All

General Ledger Reports

General Ledger reports provide financial information, including balance sheet, cash forecasting, general ledger account information, and more.

Account List Report

The Account List report displays general ledger account master file information.

This report provides a basic listing of the account structure. Use this report as a stand-alone report or as a drill through target from other reports, like the Balance Sheet and Income Statement.

Prompts

Use the Accounts List prompts to run the Account List report.

Prompt Message	Description
Company	Select one company from the list.
Select one or more accounts	Iin the **Keywords** field, enter a portion of one or more account IDs and click to list accounts to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Account level	Select the account level at which you want the report printed. All lower levels will be rolled up for the report.
Account status	Select one of the following options: ▪ **Active**: Include accounts currently in use in the report. ▪ **Inactive**: Include accounts not currently used in the report.

Prompt Message	Description
Project required	Select one of the following options: ▪ **Non-Project Required Accounts**: Include accounts with the **Project Required** option unselected. ▪ **Project Required Accounts**: Include accounts with the **Project Required** option selected, which indicates that whenever the account is used, a project must be charged.

Sample Report

This sample shows the Account List.

Account List

Balance Sheet

The Balance Sheet is a management report that displays the balance sheet financial statement.

You can view this report for any financial statement format selected and, for the current period only, you can drill through from a financial statement line item into transactional detail for the accounts that make up that line item.

Note: The Balance Sheet retrieves data from a database table designed to provide a snapshot of results for a particular point in time, while the General Ledger Detail report retrieves data from a database table designed to provide real-time, up-to-the-minute results. Because of this, when you drill through from the Balance Sheet to the General Ledger Detail report, some results may vary. To generate updated results, you can refresh the reporting tables before you run the report.

Prompts

Complete the required fields to run the Balance Sheet report.

Prompt Message	Description
Company	Select the single company to use when running the report.
Financial Statement Code	Select a financial statement code.
Fiscal year	Select the fiscal year for the report.
Period	Select the period. If adjustment periods are available for the selected fiscal year, they are displayed in the **Period** field options, including the adjustment period type, which can be either **Interim** or **Final**. For example: ▪ Interim adjustment period 13 will display as **13 Adj Pd – Interim**. ▪ Final adjustment period 14 will display as **Adj Pd – Final**.
Primary Group	Select the primary group to sort on: ▪ Company ▪ Organization ▪ Reorganization
Limit organizations / Limit reorganizations	When **Organization** or **Reorganization** is selected in the **Primary Group** prompt, you can choose the organizations or reorganizations for the report. Leave this field blank if you want to include all organizations or reorganizations in the report. In the **Keywords** field, enter a portion of an organization or reorganization name or ID and click **Search**. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Organization level / Reorganization level	Select a level for the report.
Column(s) to display	Select the columns to display for the report: ▪ Actual Amount ▪ Prior Year Amount ▪ Prior Year Variance

Prompt Message	Description
	▪ Budget Amount ▪ Budget Variance
Account Information	Select to **Show** or **Hide** the account ID and name.

Sample Report

This is a sample Balance Sheet report. You can click an account in the report to drill through to its Account List or General Ledger Details report.

General Ledger Detail Report

The General Ledger Detail report provides the details of the GL transaction information stored in Costpoint.

It can be used as a stand-alone report or as a drill through target from several other reports, such as the Balance Sheet, Income Statement, and Project Status Report, providing expense-related information.

Note: The General Ledger Detail report retrieves data from a database table designed to provide real-time, up-to-the-minute results, while the Project Status Report, Balance Sheet, and Income Statement reports retrieve data from a database table designed to provide a snapshot of results for a particular point in time. Because of this, when you drill through from the Project Status Report, Income Statement, or Balance Sheet to the General Ledger Detail report, some results may vary.

Prompts

Select prompts to run the General Ledger Detail Report.

Prompt Message	Description
Company	Select the company that you want to display in the report.
Fiscal Year	Select the desired fiscal year.
Starting Period and Subperiod	Select the period and subperiod to start the range. If adjustment subperiods are available for the selected period, they are displayed in the **subperiod** list, including the adjustment subperiod type, which can be either **Interim** or **Final**. For example: ▪ Interim adjustment subperiod 1 will display as **1 Adj Pd - Interim**. ▪ Final adjustment period 1 will display as **1 Adj Pd - Final**.
Ending Period and Subperiod	Select the period and subperiod to end the range.
Primary Group	Select an option to use for the report sort: **Organization** or **Reorganization**.
Display	Select a checkbox to display the **Amount**, **Transaction Amount**, or both in the report. If you select Transaction Amount, the Transaction Currency value will also display in the report.
Limit Account(s)	In the Keywords field, enter a portion of a specific account ID and click **Search**. Select accounts to include in the report.

Prompt Message	Description
	To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Organization	Enter a portion of a specific organization or reorganization that you want to include in the report based on the report sort you selected on the General tab. Click **Search**. In the search results, select one organization. For example, you know that the organization that you are looking for starts with an A. In the **Keywords** field, enter **A** and then click **Search**. All organizations that start with A will be in the search results. Select the organizations to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Limit Project(s)	In the **Keywords** field, enter a portion of a specific project ID and click **Search**. Select the projects to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Page 1 of 214

Income Statement Report

The Income Statement is a management report that displays profit and loss information by organization.

View this report for any financial statement format needed and, for the current period only, you can drill through from a financial statement line item into transactional detail for the accounts that make up that line item. For example, you can drill from the Income Statement to the General Ledger Detail report.

> **Note:** The Income Statement report retrieves data from a database table designed to provide a snapshot of results for a particular point in time, while the General Ledger Detail report retrieves data from a database table designed to provide real-time, up to the minute results. Because of this, when you drill through from the Income Statement to the General Ledger Detail report, some results may vary.

When you include the **Prior Year YTD Amount** column in the report and you see zero values, it may be because there is no adjustment period for the prior year. You may need this information when you want to compare the current year YTD with the prior year YTD amounts. You will have to fix this in Costpoint.

Comparing Current YTD Amounts to Prior YTD Amounts

If the **Prior Year YTD Amount** column in the report contains zero values, you need to add the adjustment period for the prior year in Costpoint if you want to compare the current year YTD with the prior year YTD amounts.

To compare the current year YTD and the prior year YTD amounts:

1. Open Costpoint and add an adjustment period for the prior year.
2. Enter values for that adjustment period in the prior year.
3. Run the Create General Ledger Report Tables (GLPCRRPT) application to update the reporting tables.
4. In Costpoint BI, run the Income Statement report and check the **YTD Amount** and **Prior Year YTD Amount** values.

Prompts

Complete the required fields to run the Income Statement report.

Prompt Message	Description
Company	Select a company for the report.
Financial Statement Code	Select a financial statement code.
Fiscal year	Select the fiscal year for the report.
Period	Select the period. If adjustment periods are available for the selected fiscal year, they are displayed in the **Period** list, including the adjustment period type which can be either **Interim** or **Final**. For example: ▪ Interim adjustment period 13 will display as **13 Adj Pd – Interim**. ▪ Final adjustment period 14 will display as **Adj Pd – Final**.

Prompt Message	Description
Primary Group	Select to insert page breaks after: ▪ Company ▪ Organization ▪ Reorganization
Column(s) to display	Select the columns to display in the report.
Account Information	Select to **Show** or **Hide** the account ID and name.
Organization level / Reorganization level	Select a level for the report.
Limit organizations / Limit reorganizations	When **Organization** or **Reorganization** is selected in the **Primary Group** prompt, you can choose the organizations or reorganizations for the report. Leave this field blank if you want to include all organizations or reorganizations in the report. In the **Keywords** field, enter a portion of an organization or reorganization name or ID and click **Search**. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Organization List Report

The Organization List report displays organization setup information, which allows you to review the organization structure set up in Costpoint.

You can use this report as a stand-alone report or drill-thru target from other reports, such as the Balance Sheet, Income Statement, Project Master Report, Project Status Report, and Aged Open Billing Detail Report.

Organizational security does not apply to this report.

Prompts

Use the Organization List prompts to run the Organization List report.

Prompt Message	Description
Company	Select one company from the list.
Organization(s)	In the **Keywords** field, enter a portion of one or more organization IDs and click to list organizations to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Organization level	Select the level of organization at which you want the report printed. All lower levels will be rolled up for the report.
Organization status	Select one of the following: ▪ **Active**: Includes organizations that are active, meaning available to receive charges. ▪ **Inactive**: Includes organizations not available to receive charges.

Sample Report

View a sample of the Organization List report.

Reorganization Structure

The Reorganization Structure report lists reorganization setup information which allows you to review the reorganization structure set up in Costpoint.

This report is available as a standalone report. It is also available as a drill-thru target from other reports, such as the Income Statement and Balance Sheet.

Prompts

Use the Reorganization Structure prompts to run the Reorganization Structure report.

Prompt Message	Description
Company	Select a company from the list.
Reorganization(s)	Enter a portion of one or more reorganization IDs in the **Keywords** field and click to list reorganizations to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Reorganization Level	Select the level of reorganization at which you want the report printed. All lower levels will be rolled up for the report.
Suppress Details	Select one of the following: ▪ **Yes**: Suppress all the organization information on the report, and just display the reorganization details. ▪ **No**: Display both Organization and Reorganization information.

Sample Report

View a sample of the Reorganization Structure report.

Cash Forecast Report

The Cash Forecast report provides a cash forecast for up to six months, based on the cash forecasting information calculated within Costpoint. This information can be helpful in forecasting future cash sources and needs.

Prerequisite: Cash Forecasting Template

Before you create a cash forecast, you must first create a cash forecasting template to determine the groups and individual lines to display in the cash forecast.

For more information, see the Cash Forecasting Overview help topic.

Prompts

Use the Cash Forecast prompts to configure the Cash Forecast report.

Prompt Message	Description
Company	Select the single company to use when running the report.
Cash template	Select the cash template to use to display the report.
Frequency code	Select a frequency code: ▪ Daily ▪ Monthly ▪ Weekly
Select Organization(s)	In the **Keywords** field, enter a portion of one or more organization IDs and click **Search** to list organizations to include in the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Human Resources

The Human Resources folder stores standard Human Resources reports and dashboards for use by people administrators and HR staff.

The human resources reports in Costpoint Business Intelligence enable human resource professionals to supplement standard Deltek Costpoint® reports for the Human Resources module with the following:

- A set of predefined reports created from the reporting package.
- Custom reports that you create for your company using Business Intelligence and the Human Resources framework manager model.
- Ad hoc reports that you create for specialized or one-time reporting needs.

A user's Org security settings determine which employees are visible on the reports.

The contents of this folder are available to the following user groups:

- CER All
- CER HR
- CER Human Resources Secure

Costpoint Prerequisites for Human Resources Reports

Certain tasks must be performed in Costpoint before you run the human resources reports.

The following must be in place in Costpoint before running the human resources reports:

- The Human Resources module.
- EEO setup, functional job titles, and detail job titles (required for the EEO-1 Worksheet, EEO-4 Worksheet, and VETS-4212 Worksheet).

Human Resources Reports

This Human Resources folder includes reports that use the secured Human Resources model.

The Human Resources folder includes the following reports:

- EEO-1 Report
- Employee Benefits Profile
- VETS-4212

EEO-1 Report

Use the EEO-1 report to gather the data you need to complete the EEO-1 report (Employer Information Report) for submission to the Equal Employment Opportunity Commission and the Department of Labor.

The worksheet provides a count of employees, as of the date you specify, for each combination of job category and race code, and it displays the total number of employees for each job category and for each race code. You can generate the worksheet for all or selected organizations.

Because this report only uses the current EEO job categories and race codes, you cannot use it to see historical EEO information. If you need to review historical data, use the equivalent standard report in Costpoint.

Prerequisites

Certain tasks must be performed in Costpoint before you run the EEO-1 Report.

The EEO-1 only provides accurate data if the following have been done in Costpoint:

- The standard job titles your company uses have been set up on the Manage Functional Job Titles screen.
- Detail job titles have been set up on the Manage Detail Job Titles screen.
- Employees have been assigned detail job titles and can be seen on the View Salary Information and History screen.
- The race ethnicity codes used by your company have been mapped on the EEO-1 Code Mappings subtask of the Manage Race and Ethnicity Codes screen.

Prompts

Use the EEO-1 Worksheet prompts to configure the report.

Prompt Message	Description
Company	Select the company for which you are generating the report.
Employment History Method	Select the method used to track employment history for the report.
Taxable Entity	Select the taxable entities of the employees to include in the report.
Labor Location(s)	Select the labor locations of the employees to include in the report.
Date Effectivity	Enter or select the date as of which you want to report EEO-1 data. The worksheet displays the employee counts as of this date.

Sample Report

The following sample shows the EEO-1 Worksheet report.

EEO - 1 Report

1 - Applied Technologies Inc

Employee Benefits Profile Report

The Employee Benefits Profile report provides a simple way to review employee benefit selections and coverage start and end dates.

The report displays the following for the employees and organizations selected on the prompts screen:

- Organization ID name

- Employee ID and name
- Benefit plan code
- Benefit package code
- Package description
- Benefit type code
- Coverage option code
- Effective date
- End date

Prompts

Select a company and other prompt values to run the Employee Benefits Profile report.

Prompt Message	Description
Company	Select the company for the report.
As of Date	Enter or select the date as of which you want to report employee benefits data. The worksheet displays employee benefits in effect on this date.
Employee(s)	Use this option to limit the report to selected employees. (If you make no selections, the report includes all employees.) In **Keywords**, enter one or more characters for which you want to search to retrieve employees. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. Click **Options** to specify how you want the search to match your entries with the IDs or names. (If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click **Search** to list the matching employees in Results. Select the employees in Results that you want to include and click **Insert** to move them to Choices. To select multiple employees that are together in the list, click the first employee in the group and then press SHIFT as you click the last one in the group. To select multiple employees that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the employees in Choices.
Organization(s)	Use this option to limit the report to selected organizations. (If you make no selections, the report includes all organizations.) In **Keywords**, enter one or more characters for which you want to search to retrieve organizations. The list displays

Prompt Message	Description
	values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. Click **Options** to specify how you want the search to match your entries with the IDs or names. (If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click **Search** to list the matching organizations in Results. Select the organizations in Results that you want to include and click **Insert** to move them to Choices. To select multiple organizations that are together in the list, click the first organization in the group and then press SHIFT as you click the last one in the group. To select multiple organizations that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the organizations in Choices.

Sample Report

The information in the Employee Benefit Profile report is based on the organizations and employees selected for the report.

VETS-4212 Report

The VETS-4212 report provides employee counts for each combination of EEO-1 job category and type of qualified veteran.

If your firm is a federal contractor or subcontractor that is required to submit the VETS-4212 or VETS-4212A report annually to the Department of Labor, the VETS-4212 report provides the Costpoint data you need to complete those forms.

The report also displays counts of employees hired in the past 12 months for each of those combinations, based on the reporting date you specify on the prompts screen.

Prerequisites

Certain tasks must be performed in Costpoint before you run this report.

The VETS-4212 report only provides accurate data if the following have been done in Costpoint:

- The EEO report that applies to your company (EEO-1 or EEO-4) has been selected in the EEO Setup subtask on the Configure Affirmative Action Settings screen.
- The standard job titles your company uses have been set up on the Manage Functional Job Titles screen.
- Detail job titles have been set up on the Manage Detail Job Titles screen.
- Employees have been assigned detail job titles and can be seen on the View Salary Information and History screen.

If one or more employees do not have detail job titles assigned, the worksheet displays a row with **Unknown** in the **EEO 1 Description** column and the counts for those employees in the applicable columns.

Prompts

Use the prompts to filter the VETS-4212 report.

Prompt Message	Description
Company	Select the company for which you are generating the report.
Employment History Method	Select the method used to track employment history for the report.
Taxable Entity	Select the taxable entity for which to create the report.
Labor Location(s)	Select the labor locations to include in the report.
Date Effectivity	Enter or select the date as of which you want to report VETS-4212 data. The report displays the employee counts as of this date.
Column to Display	Select the data to include in the report.

Incurred Cost Submission Reports

This folder stores reports to aid in preparing Incurred Cost Submission forms and is intended for use by accounting staff.

The "Allowable Cost and Payment" clause (FAR 52.216-7) requires that companies prepare a proposal to include supporting data within six months after the end of its fiscal year.

This proposal is called an Incurred Cost Submission (ICS). FAR 42.705-1 refers companies to the "Model Incurred Cost Proposal" in Chapter 6 of the DCAAP 7641.90 for guidance on what is included in the final indirect cost rate proposal and supporting data. DCAA requests that companies include an index with their Incurred Cost Submission proposal. If certain schedules are not applicable, the company should note that on the index.

To assist companies in meeting this requirement, Incurred Cost Submission reports can be created from data in Costpoint. These reports assume that the user properly assigns the Incurred Cost Submission codes on the Government Information screen in Costpoint. Proper and accurate setup of pools is also assumed.

There are 28 schedules that may be included in an Incurred Cost Submission. Of those, 10 are optional and are included at the discretion of the company.

Note: In this guide, the words report and schedule are used interchangeably.

This guide covers 13 required schedules that can be derived from Costpoint data normally stored and available in Costpoint. These reports were developed for a baseline Costpoint implementation without consideration of a company's specific implementation. Within this document, you will find information about the reports that are available to assist with producing the Incurred Cost Submission schedules. Information includes report descriptions, Costpoint tables used, and user prompts for collecting information for tailoring the report. A sample screen shot for each report is also included.

Use this document as a guideline for understanding the tables that data is drawn from for each report.

Note: All ICS reports should be run once a year after all the final costs have been captured for your company and you have closed the company's financials for a given year. These reports are meant to assist in the year-end reporting due to requirements of the DCAA and other similar agencies and are not designed to tie out the pools exclusively. The information in these reports may not be comprehensive, but they can be used as starting points or templates for your custom reports.

The contents in this report folder are available to the following user groups:

- CER Accounting
- CER Accounting All Secure
- CER All

Costpoint Setup Prerequisites

Certain tasks must be performed in Costpoint before you run the ICS report.

The following setup must be in place in Costpoint before running ICS reports:

- Costpoint must be reconciled between the General Ledger, Project Ledger, and Statement of Indirects.
- The Incurred Cost Submission Codes on the Manage Government Contract Information screen (**Projects** » **Project Setup** » **Project Master** » **Manage Government Contract Information**) must be completed.
- Pools must be properly identified in the **Pool Type** field on the Manage Cost Pools screen. Several of the schedules use the default Costpoint configured pool types to select and organize information, where pool type numbers 1, 2, 3, 4, and 6 are considered Overhead Type Pools. Pool type number 5 is, by default, considered a G&A Type Pool. You can modify the default Costpoint pool types from the Manage Allocation Groups screen. Note that if you make changes to the standard Costpoint configuration, you must also modify the Cognos Analytics reports accordingly.

  The default Costpoint pool types are:

  - **Pool Type 1** — FRINGE
  - **Pool Type 2** — OVERHEAD
  - **Pool Type 3** — MAT HANDLG
  - **Pool Type 4** — SUB CONTR
  - **Pool Type 5** — G&A
  - **Pool Type 6** — HM OFF G&A
- To run the ICS report, Schedule J, you must have the Costpoint Purchasing module. The Purchase Order area of this module is used as a source for subcontractor information on this schedule.

Security

Row-based security is not available for ICS reports in Costpoint Business Intelligence.

Deltek recommends that you set up role-based security in Cognos to provide access to the reports for the appropriate persons. Refer to the Cognos online documentation for information on how to implement role-based security.

Schedule A — Summary of Claimed Indirect Expense Rates

Schedule A is a summary of all the contractor’s indirect rates.

The pools and bases in Schedule A are linked to their respective schedules as shown in this table.

Note: Schedule A uses the standard Costpoint pool types. If your company has modified these defaults, you must modify the report accordingly.

Function	From Schedule
Overhead	Schedule C
Occupancy	Schedule D
G&A	Schedule B
Claimed Allocation Bases	Schedule E

Prompts

These are Schedule A — Summary of Claimed Indirect Expense Rates prompts.

Prompt Message	Description
Select the Company	Select the single company needed for the ICS.

Claimed Rate	12.51%	

07/04/2007 Page 2 of 3 05:23:17 PM

Schedule B — General and Administrative (G & A) Expenses

Schedule B contains the details of the contractor's general and administrative expenses.

These details include the following: account and organization balances from the G/L Trial Balance and any adjustments to the total incurred and the claimed amount. The G&A data in Schedule B are linked to their respective schedules as shown in this table.

> **Note:** Schedule B uses the standard Costpoint pool types. If your company has modified these defaults, you must modify the report accordingly. This report compares account and organization balances between POOL_SIE_SUPPORT and GL_POST_SUM. It is expected that the variance will be zero, but if there is a variance, this figure is reflected as an adjustment. For any adjustment, the report will generate a sequential number in the notes column. This number can be used as a reference for adding text explanations in a separate document.

Function	From Schedule
Occupancy	Schedule D
Direct Costs by Contract	Schedule H
IR & D/B&P	Schedule H

Prompts

These are Schedule B — General and Administrative (G&A) Expenses prompts.

Prompt Message	Description
Select the Company	Select the single company needed for the ICS.
Select the Fiscal Year	Select the desired fiscal year.
Select YTD Period Ending Number	Select the desired YTD period ending number.
For the Pool Base, Roll Up by Account or Organization?	Select the first sort option to use in this report. For example, selecting Account tells the report to sort by account first and then by organization.

Schedule C — Overhead Expenses

Schedule C contains the details of the contractor's overhead expenses.

These details include the following: account balances from the G/L Trial Balance and any adjustments to the total incurred and the claimed amount. Occupancy data in Schedule C is linked to Schedule D.

Note: Schedule C uses the standard Costpoint pool types. If your company has modified these defaults, you must modify the report accordingly. This report compares account and organization balances between POOL_SIE_SUPPORT and GL_POST_SUM. It is expected that the variance will be zero, but if there is a variance, this figure is reflected as an adjustment. For any adjustment, the report will generate a sequential number in the notes column. This number can be used as a reference for adding text explanations in a separate document.

Schedule G — Reconciliation of Books of Account and Claimed Direct Costs

Schedule G is the reconciliation of direct costs to the General Ledger/Trial Balance.

This schedule shows the amounts of various direct costs, the account numbers, the amount accumulated in the General Ledger, any adjustments, and the amount claimed. Schedule of Direct Costs data found in Schedule G is linked to Schedule H.

> **Note:** This report compares account and organization balances between PROJ_SUM and GL_POST_SUM. It is expected that the variance will be zero, but if there is a variance, this figure is reflected as an adjustment. For any adjustment, the report will generate a sequential number in the notes column. This number can be used as a reference for adding text explanations in a separate document.

Schedule H — Direct Costs by Contract/Subcontract Applied at Claimed Rates

Schedule H is the schedule of claimed and unclaimed direct costs by contract or subcontract, including direct Independent Research and Development/Bid and Proposal (IR&D/B&P), Overhead, G&A, and COM at the claimed rates.

The pools and bases in Schedule H are linked to their respective schedules as shown in this table.

Function	From Schedule
Summary of Final Overhead Rates	Schedule A
Direct Costs/IR&D/B&P	Schedule H

Note: For contractors that have only a few government contracts, it is practical to list all their government contracts on this schedule. However, for contractors that have many government contracts and/or multiple delivery orders, it is more practical to use this schedule as a summary of direct costs by contract type and to provide the required details in supplemental schedules.

Schedule H-1— Government Participation in Indirect Cost Pools

Schedule H-1 presents a general overview of the extent that cost type and flexibly priced contracts participate in the absorption of indirect expenses.

Direct Costs by Contract/Subcontract data in Schedule H-1 is linked to Schedule H. Schedule H-1 is used to break down the final base pool amounts by ICS code and to show by percentage what contribution each pool makes in the absorption of indirect expenses.

Schedule I — Schedule of Cumulative Direct and Indirect Cost Claimed & Billed

Schedule I is a schedule of cumulative direct and indirect costs claimed and billed from inception to date.

This schedule has multiple uses. It can be used, for example, to identify contracts with work that has been physically completed and can be identified for closing, and contracts that may require billing adjustments due to over/under billing situations. The latest voucher number billed on a contract is included on this schedule for easy verification. The pools and bases in Schedule I are linked to their respective schedules as shown in this table:

Function	From Schedule
Direct Costs by Contract	Schedule H
Summary of Amounts on T&M Contracts	Schedule K

The **Subject to Penalty Clause** column, **Prior Years Settled Costs** column, and **Notes** column are highlighted to indicate that you must provide that information manually. You can export the report to a Microsoft Excel or Adobe Acrobat (PDF) file, and use the corresponding application to edit those columns. You must also update the totals in the **Total Cumulative Settled or Claimed** column to reflect your manual entries.

The dates in the **Date Costs Billed Through** column are the latest invoice dates in the fiscal year for which you generate the schedule.

Prompts

These are Schedule I — Schedule of Cumulative Direct and Indirect Cost Claimed & Billed prompts.

Prompt Message	Description
Select the Company	Select the single company needed for the ICS.
Select the Fiscal Year	Select the desired fiscal year.
Select YTD Period Ending Number	Select the desired YTD period ending number.
Select YTD Sub Period Ending Number	Select the desired YTD sub period ending number.
Select the Rate Type	Select either Actual or Target to indicate if you want to use actual rates or target rates.
Select the Project Level	Select the project level at which you want to generate the report. The report rolls up all activity to that level.

Note: The invoice number reflected in the report is the last invoice number posted in the BILL_INVC_HDR_HS table. If any manual invoice was posted (for example, Manual Bill, Milestone, Project Product, or Customer Product Bill) for the project, the invoice number may be null or incorrect. This report assumes all invoices are computed and posted in Costpoint.

Schedule J — Subcontract Information

Schedule J provides subcontractor information as follows: subcontract number, prime contractor number, subcontract point of contact and phone number, subcontract value, costs incurred in fiscal year, and award type.

The schedule provides identification of subcontracts awarded to companies where the contractor is the prime or upper-tier contractor. This information is required for all cost type, flexibly priced, T&M, and labor hour subcontract awards.

Note: The budgeted hours (if applicable) must have been entered in Costpoint for this report to run properly. To run Schedule J, you must have the Costpoint Purchasing module. The Purchase Order area of this module is used as a source for subcontractor information on this schedule.

Prompts

These are Schedule J — Subcontract Information prompts.

Prompt Message	Description
Select the Company	Select the single company needed for the ICS.
Select the Fiscal Year	Select the desired fiscal year.
Select YTD Period Beginning Number	Select the desired YTD beginning period number.
Select YTD Period Ending Number	Select the desired YTD period ending number.
Select Subcontract Expense Account ID (Optional)	In the **Keywords** field, enter one or more account IDs used for subcontractor expenses that you want to include on the report. Separate account IDs by spaces. Click the **Search** button to retrieve the account IDs. All account IDs that are retrieved by the search appear in the Results area. Select an account ID and click **Insert** to include that ID.

Schedule K — Summary of Hours and Amounts on T&M/Labor Hour Contracts

Schedule K provides a summary of hours and amounts incurred on T&M contracts.

This schedule is useful for in-house verification of total amounts and hours incurred or billed on T&M contracts when processing final vouchers.

Prompts

These are Schedule K — Summary of Hours and Amounts on T&M/Labor Hour Contracts prompts.

Prompt Message	Description
Select the Company	Select the single company needed for the ICS.
Select the Fiscal Year	Select the desired fiscal year.
Select YTD Period Ending Number	Select the desired YTD period ending number.
Select YTD Sub Period Ending Number	Select the desired YTD sub period ending number.
Select Subcontract Labor Accounts	In the **Keywords** field, enter one or more account IDs used for subcontractor expenses that you want to include on the report. Separate account IDs by spaces. Click the **Search** button to retrieve the account IDs. All account IDs that are retrieved by the search appear in the Results area. Select an account ID and click **Insert** to include that ID.
Select the Rate Type	Select either Actual or Target to indicate if you want to use actual rates or target rates.
Select the Project Level	Select the project level at which you want to generate the report. The report rolls up all activity to that level. Note that the report only includes projects for which the ICS code is entered at the project level you specify when you generate the report. In addition, the report gets the contract number from that level.

Schedule L — Reconciliation of Total Payroll to Total Labor Distribution

Schedule L reconciles labor costs from the general ledger to the quarterly IRS 941 tax returns for the contractor's fiscal year.

Total Labor is broken out into direct and indirect costs.

- **Direct Costs** — These are derived by determining which account/org combinations from POOL_COST_ACCT are not associated with a pool. The missing account/org combinations and their respective general ledger amounts for the fiscal year are then rolled up into one amount called Direct Costs.
- **Indirect Costs** — These are derived by determining which account/org combinations from POOL_COST_ACCT are associated with a pool. These account/org combinations and their respective general amounts are then broken down further by the pool type numbers from POOL_TYPE and then listed by their respective account names. The total of these costs are the Indirect Costs.

These total labor costs are then compared to the Quarterly 941 amounts and any current and prior year accruals and these balances should coincide.

> **Note:** The Quarterly 941 amounts and the Current and Prior Year Accruals used to arrive at the Total Payroll will need to be calculated manually offline in a separate spreadsheet and will not be represented in this report.

Some of the amounts found on this schedule are derived from the previous schedules. Reconciliation adjustments may include bonus or vacation accruals. The pools and bases in Schedule L are linked to their respective schedules as shown in this table.

Function	From Schedule
Overhead	Schedule C
G&A	Schedule B
Intermediate Pools	Schedule D
Direct Costs by Contract/ Subcontract	Schedule H

Schedule O — Contract Closing Information

Schedule O is used to identify cost type, T&M, flexibly priced, and level of effort type contracts that will be closed after this current incurred cost submission is audited and the final indirect rates are agreed upon.

If the contract is not ready to close (for example, a contract modification is being pursued), the reasons should be included in a footnote to the schedule.

This schedule provides contract information including the period of performance, funded ceiling amount, and the funded fee. If there is a level of effort contract or flexibly priced contract, details of fee computation should be described along with the contract modification used.

The **Ready to Close** column and **Notes** column are highlighted to indicate that you must provide that information manually. You can export the report to a Microsoft Excel or Adobe Acrobat (PDF) file, and use the corresponding application to edit those columns.

Note: The budgeted hours (if applicable) must have been entered in Costpoint for this report to run properly. You must create project report tables in Costpoint, specifically the labor summary, for this report to work properly.

Prompts

Labor

The Labor folder stores standard Labor reports for use by managers of employees and subcontractors.

If Organization Security is used in Costpoint, you will only see the records of employees who belong to the organizations to which you have access.

The contents of this folder are available to the following user groups:

- CER All
- CER Labor Secure
- CER People

Labor Reports

There are two reports that use the Labor framework model.

Labor reports include:

- Employee Labor
- Labor Utilization

Employee Labor Report

The Employee Labor report provides the total labor hours and labor cost for an employee, based on their posted and unposted hours.

Labor hours are grouped by home organization and employee.

Prompts

Use the prompts to configure and run the Employee Labor report.

Prompt Message	Description
Company	Select the company to use to run the report.
Start Date	Select a start date.
End Date	Select the end date.
Primary Grouping	Select the primary grouping: ▪ Home Organization ▪ Employee ID Name
Select Home Org(s)	If you selected Home Organization in the **Primary Grouping** prompt, then you can select the home organizations for the report.

Prompt Message	Description
	To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Employee(s)	If you selected Employee ID or Employee Name in the **Primary Grouping** prompt, then you can select employees to include in the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Include	Select the labor hours to include in the report: ▪ Posted ▪ Unposted

Labor Utilization Report

The Labor Utilization report is an analysis of the percentage of employee chargeable hours on direct projects compared to the total hours spent.

The report includes **Direct Hours** and **Indirect Hours** columns.

Direct Hours are those hours on projects where the Billable flag has been set to Yes. The flag is set through the **Billable Project** check box found on the Basic tab of the Manage Project User Flow screen. Direct hours also include hours within a project classification that has been marked as **Include as direct hours** on the Labor Utilization Report prompt screen check boxes. Because the definition of "direct" can vary from company to company, the report provides the flexibility to determine which types of projects to include in the Direct project classification.

Indirect Hours are those project hours where the Billable flag is set to No. Indirect hours also include those project classifications that were not chosen to be part of the **Include as direct hours** selection.

The **Total Hours** column on the report is the summation of both the direct and indirect hours.

For example, consider the following table.

Project Classification	Billable Project (Y/N)
BID & PROPOSAL	N
BID & PROPOSAL	Y
COMMON INV	N
DIRECT PROJECT	Y
INDIRECT	N
INDIRECT	Y
INTER-COMPANY	Y
IR&D	N
WORK IN PROCESS	N
WORK IN PROCESS	Y

All hours where the **Billable Project** is set to **Y** are included in the Direct Hours calculation by default. Any project classification that has the **Billable Project** set to **N** could be added to Direct Hours and be removed from Indirect by using the check box prompt.

Prompts

Use the Labor Utilization prompts to configure the report.

Prompt Message	Description
Company	Select the company to use to run the report.
Fiscal Year	Select the fiscal year.

Prompt Message	Description
Period	Select the period.
Subperiod	Select the subperiod.
Primary Grouping	Select the primary grouping: ▪ Employee ID ▪ Employee Name ▪ Home Organization
Sort By	Select one of the following sort options: ▪ Employee ID ▪ Employee Name
GLC Option	Choose the GLC to use for the report: ▪ Employee Home GLC ▪ Timesheet GLC
Include(s)	Select items to include in the report: ▪ Leave Accounts ▪ Part-Time Employees ▪ Temporary Employees
Include as Direct Hours	Select one or more options from the list. Click the **Select all** link to select all options.
Select Home Organizations	If you selected Home Organization in the **Primary Grouping** prompt, then you can select the home organizations for the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Employee	If you selected Employee ID or Employee Name in the **Primary Grouping** prompt, then you can select employees to include in the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.

Prompt Message	Description
	If applicable, click the right-arrow to move your selected results to **Choices**.
Report version	Select one of the options for the report view: ▪ Summary Report ▪ PTD by Project Classification ▪ YTD by Project Classification

Manufacturing

This folder stores standard Manufacturing reports and dashboards for use by the manufacturing administrator and staff.

The Manufacturing reports in Deltek Costpoint Business Intelligence enable you to create a listing of inventory grouped by warehouse and location, inventory abbreviation and part-rev, and part-rev and project. These reports also enable you to create a manufacturing and engineering indented bills of materials (BOM) reports for a selected range of assembly part numbers.

> **Note:** If you use Multi-Company and do not separate your items by Company, your Company filters on reports and dashboards will show incorrect data in the Part selection. This will be resolved in a future release. You can determine whether you are separating items by Company in Configure Product Definition Settings (PDMITMRU). The **Separate Items By Company** check box must be selected to show the correct data in the Part section.

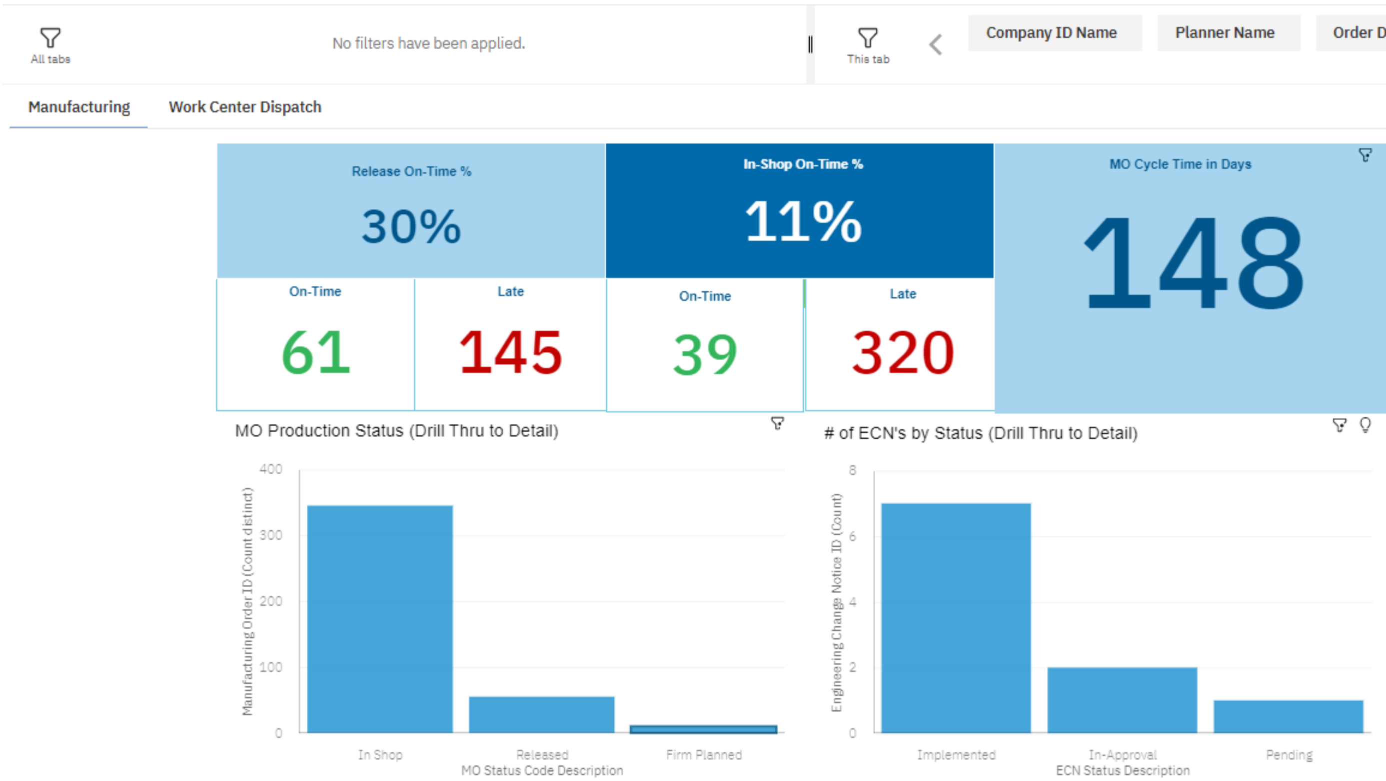
The contents of the Manufacturing folder are available to the following user groups:

- CER All
- CER Materials
- CER Materials Manufacturing All Secure
- CER Manufacturing Secure

Manufacturing Dashboard

The Manufacturing Dashboard displays data for manufacturing orders (MOs) and Engineering Change Notices (ECNs) that are used to document changes to a Part/Rev..

Manufacturing Tab



The Manufacturing tab provides statistics for MOs in various stages of the manufacturing process, including:

- **Release On-Time & In-Shop On-Time %**: These key performance indicators (KPIs) let you monitor planner performance and see when they are on-time or late with moving MOs to these stages in the process. The Release Date vs Planned Release Drill Thru and In-Shop Date vs Planned In-Shop Date Drill Thru reports show you MO details grouped by planner to reveal the build part and the difference in days from planned to actual.
- **MO Cycle Time in Days**: This area shows the overall average number of days it takes an MO to complete from the date it was ordered to completion. This KPI adjusts as you interact with other areas on the dashboard, including filters by part, planner, and project.
- **MO Production Status (Drill Thru to Detail)**:This area shows where the in-process MOs are in the production, with a count for each status. Use the MO Production Status Details Drill Thru report to see a breakdown of each status by planner and build part. You

can also see the number of days the MOs have been in their current status, the planned due date, need date, and MO completion percentage.

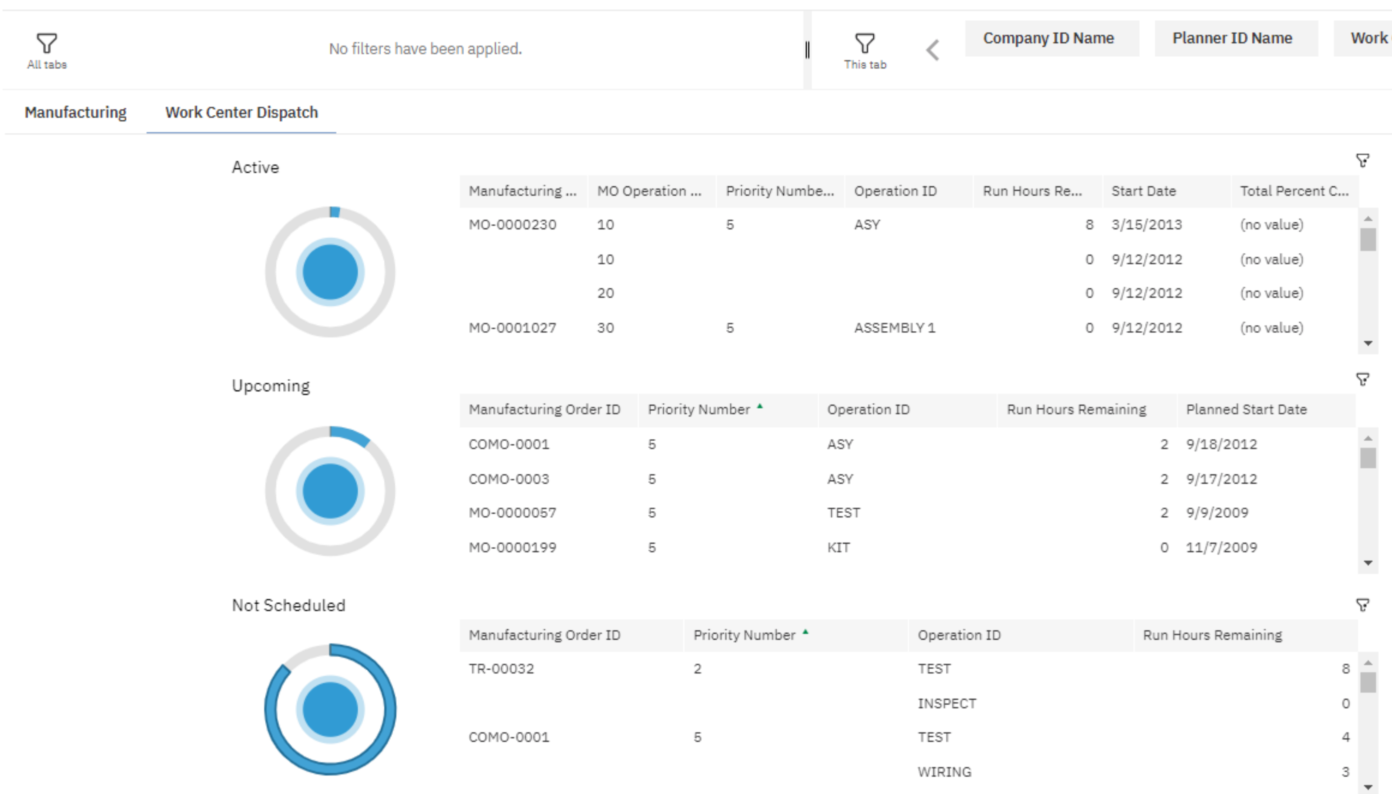
- **# of ECN's by Status (Drill Thru to Detail)**: This area shows a count of in-process ECNS that are Approved, In-Approval, Pending, Implemented or Rejected. Use the ECN Impact to MOs Drill Thru report to see the MOs impacted by ECNs.

  An ECN can impact an MO when:

  - The ECN alters or changes a build part.
  - The MO is using the original part on the ECN as a component to construct the build part on the MO.

Work Center Dispatch Tab

The Work Center Dispatch tab displays radial charts and table views of MOs that are active, upcoming, and not yet scheduled. Filter the dashboard to see MO information for specific work centers. You also can select a Radial Chart or individual MO ID and then click the Drill Through icon to open the Operation Status Drill Thru report.



MO information is organized by the following:

- **Active:** This section shows data for MO Current Operations, including the start date, percent complete, and the total run hours remaining for each MO. A drill thru report shows more details for the MOs in the Active list.

- **Upcoming:** This section includes MO Operations that are not yet the Current Operation, but have a planned start date. For each MO ID listed, its Priority, Operation, Total Run Hours Remaining, and the Planned Start Date is shown. A drill thru report shows more details for the MOs in the Upcoming list.
- **Not Scheduled:** This section includes data for MO Operations that do not have a planned start date. For each MO ID listed, its Priority, Operation, and Total Run Hours Remaining is shown. A drill thru report shows more details for the MOs in the Not Scheduled list.

Operation Status Drill Thru

The Operation Status Drill Thru report provides more MO information, including the Planned Start Date, Completed Quantity, Percent Complete, and the MO Critical Ratio value.

Use the MO Critical Ratio to identify potential priority needs. The lower the ratio value, the higher the priority and possible need for action. This ratio does not take into account the load on work centers, multiple shifts, or weekends.

When viewing the MO Critical Ratio:

- If the value is negative, then the order is past due and there are insufficient hours to complete the work on schedule without expediting order.
- If the value is 0, then the Due Date is equal to the Current Date.
- If the value is 1, then the hours of work remaining is equal to the hours remaining before the order is due, or the order is on time.
- If the value is greater than 1, then there are less hours of work remaining than hours remaining before the order is due.
- If the value is 9999, then the order might not have time loaded in the router.

> **Note:** Costpoint calculates the hours remaining by subtracting the Current Date from the Due Date, and multiplying that value by 8. The result is then divided by the sum of the hours remaining on the MO from the routing.

Manufacturing Reports

The Manufacturing folder includes seven reports.

Those reports are:

- Indented Bill of Materials Report
- MO Build-To Inv Abbrev Report
- MO Component Shortage Report
- MO Pick List Report
- MO Production Status Report
- MRP Message Report
- Summarized Bill of Material Report

BOM Component Shortage

The BOM Component Shortage report provides a list of potential component and sub assembly shortages for make or buy parts. Use the report to identify where you might need to make or buy parts to accommodate the top-level assembly.

The drill through report lists Manufacturing Orders for Make parts or Purchase Requisitions and Purchase Orders for Buy parts.

Prompts

Select a company and other prompt values to run the BOM Component Shortage report.

Contents

Prompt Message	Description
Company	Select a company.
Limit Assembly(s)	In the **Keywords** field, enter a portion of one or more assemblies to add to the report then click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Project(s)	Select the projects to include in the report. Leave this field blank to show data for all projects. In the **Keywords** field, enter a portion of one or more project IDs or names and then click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Built Quantity	Enter a number to use to calculate the Extended Required Quantity.
Compare Extended Required Quantity To	Choose to compare the Extended Required Quantity to the net available or on hand inventory.
BOM Type	Select which type of bills of material (BOM) you want to include in this report. The available options are the following: ▪ **Manufacturing:** Select this option to print the MBOM for the selected assembly part. You can only select standard components for this BOM type.

Prompt Message	Description
	▪ **Engineering:** Select this option to print the EBOM for the selected assembly part. You can select either standard or provisional components for this BOM type.
BOM Level	Select the BOM level at which you want the report printed. The available options are: ▪ **SINGLE:** Select this option to include level 1 in the report. ▪ **ALL:** Select this option to include all levels in the report.

Sample Report

Report data is based on your selection on the BOM Component Shortage prompt screen.

Indented Bills of Materials Report

The Indented Bill of Material report allows you to create a listing of indented Bills of Material (BOM) for a selected range of assembly part numbers.

You can include the first-level components of the assembly or the entire indented BOM through all levels. You can use this report to print either manufacturing bills of material (MBOMs) or engineering bills of material (EBOMs).

> **Attention:** This report relies on a report table that is generated in Costpoint. You have to run Costpoint's Print Indented Bills of Material Report application prior to executing this report.

> In Costpoint, when you run the Print Indented Bills of Material Report application, you must select **Update Indented Bills of Materials Report Table** on the Action menu to update the indented BOM table.

Prompts

Use the Indented Bill of Material prompts to configure the report.

Prompt	Description
Company	Select one company from the list.
Limit Assembly(s)	In the **Keywords** field, enter a portion of one or more assemblies to add on the report and then click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
BOM Type	Select which type of bills of material (BOM) you want to include on this report. The available options are the following: ▪ **Manufacturing:** Select this option to print the MBOM for the selected assembly part. You can only select standard components for this BOM type. ▪ **Engineering:** Select this option to print the EBOM for the selected assembly part. You can select either standard or provisional components for this BOM type.
Case Insensitive	Select this check box for BI to ignore the text case when searching keywords.
BOM Level	Select the BOM level at which you want the report printed. The available options are: ▪ **SINGLE:** Select this option to include level 1 in the report. ▪ **ALL:** Select this option to include all levels in the report.

MO Build-To Inv Abbrev Report

Use the MO Build-To Inventory Abbrev report to determine what parts need to be picked for a manufacturing order (MO), as well as the location of the parts. .

You can choose to include barcode images for the MO number and work center.

Prompts

Use the MO Build-To Inv Abbrev prompts to configure the report.

Prompt Message	Description
Company	Select one company from the list.
Secondary Sort	Select the secondary sorting criterion for the report. The available options are the following: ▪ Work Center ▪ Component Part ▪ Component Location ▪ Line Number ▪ Find Number

Prompt Message	Description
Print Barcode	Select the option to indicate if you want to print the barcode.
Print Previously Printed Documents	Select the option to indicate if you want to print previously printed documents.
MO Status	Select the status of the MO you want to include on this report. The available options are the following: ▪ Released ▪ In Shop All of the options are selected by default.
Limit MO Number(s)	In the **Keywords** field, enter a portion of one or more MO numbers to add on the report and then click . To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
MO Planned Shop Date Cut Off	In the **From:** field, enter the start cutoff date to use, or click the calendar icon to select the date. In the **To:** field, enter the end cutoff date to use, or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want any date filters to be applied. These are the default options.
Limit Planner(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more planners to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Work Center(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more work centers to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Warehouse(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more warehouses to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of

MO Component Shortage

The MO Component Shortage report allows you to print a listing of potential component and subassembly shortages for manufacturing orders.

A drill-thru report is available to provide a listing of detail requisition, purchase order, and manufacturing order data for the selected component.

Prompts

Use the MO Component Shortage report prompts to configure the report.

Prompt Message	Description
Company	Select one company from the list.
Primary grouping	Select the option to indicate how you want the components to be sorted and grouped. The available options are the following: ▪ Part ID ▪ Project ▪ Manufacturing Order
Limit Warehouse(s)	In the **Keywords** field, enter a portion of one or more warehouse IDs to be added on the report and then click .

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit MO Number(s)	In the **Keywords** field, enter a portion of one or more MO numbers to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
MO Status	Select the status of the MO you want to include on this report. The available options are the following: ▪ Planned ▪ Firm Planned ▪ Released ▪ In Shop All of the options are selected by default.
Limit Build-to Project(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more build-to project IDs to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit planner(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more planner IDs to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Part\Rev(s)	In the **Keywords** field, enter a portion of one or more part/revisions to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
Limit Netting Group(s)	Iin the **Keywords** field, enter a portion of one or more netting groups to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Buyer(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more buyer IDs to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Make/Buy	Select the option to indicate the component parts you want to include on this report. The available options are: ▪ **Make**: Manufactured ▪ **Buy**: Purchased Both options are selected by default.
Due Date	In the **From:** field, enter the due start date to use or click the calendar icon to select the date. In the **To:** field, enter the due end date to use or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want any date filters to be applied. These are the default options.

MO Pick List Report

The MO Pick List report allows you to print the list of materials to be picked for a manufacturing order, the operations in the routings related to the manufacturing order, and the quantities completed, as well as the location of the parts.

You can choose to include barcode images for the MO number and work center.

> **Note:** Unless the barcode font is installed locally, as well as on the Cognos server, the barcode symbol will not be displayed when you view the report in HTML or Excel formats. This can only be viewed either in PDF or printed formats.

Prompts

Use the MO Pick List prompts to configure the MO Pick List report.

MO Production Status Report

The MO Production Status Report allows you to print information about manufacturing orders and the operations in the routings associated with the manufacturing order.

Prompts

Use the MO Production Status prompts to configure the MO Production Status report.

Prompt Message	Description
Company	Select one company from the list.
Limit Part\Rev(s)	In the **Keywords** field, enter a portion of one or more part/ revisions to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit MO Number	In the **Keywords** field, enter a portion of one or more manufacturing order numbers to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Percent Complete	Enter the percentage of completion that you want to use as a filter for manufacturing orders in the report. For example, enter **100** if you want to include manufacturing orders that are 100 % completed.
Operator	Select the operator to use for the entered value in the **Percent Complete** prompt.
MO Type	Select the type of MO you want to include on this report. The available options are the following: ▪ Standard ▪ Customer Repair ▪ Rework ▪ MRO ▪ Discrepancy Rework
MO Status	Select the status of the MO you want to include on this report. The available options are the following:

Prompt Message	Description
	▪ Planned ▪ Firm Planned ▪ Released ▪ In Shop ▪ Closed ▪ Completed Only the **Closed** option is not selected by default.
Due Date	In the **From:** field, enter the due date to use, or click the calendar icon to select the date. In the **To:** field, enter the end date to use or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want to apply any date filters. These are the default options.
Need Date	In the **From:** field, enter the need start date to use, or click the calendar icon to select the date. In the **To:** field, enter the need end date to use or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want to apply any date filters. These are the default options.
Limit Build-To Inventory Abbrv(s)	In the **Keywords** field, enter a portion of one or more build-to inventory abbreviations to to search on and select the abbreviations you want added to the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Build-To Project(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more build-to projects you want to add on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Netting Group(s)	In the **Keywords** field, enter a portion of one or more netting groups to be added on the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Warehouse(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more warehouses to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Planner(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more planners to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Supervisor(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more supervisors to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

MRP Message Report

The MRP Message report allows you to print Material Requirements Planning (MRP) messages and use these to find potential problem areas by honing in on particular MRP action messages.

You can print messages for part/revision, projects, planners, and warehouses.

Prompts

Use the MRP Message prompts to configure the MRP Message report.

Prompt Message	Description
Company	Select a company from the list.
Part\Revision	In the **Keywords** field, enter a portion of one or more part/ revisions to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Project(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more projects to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Planner(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more planners to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
Limit Warehouse(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more warehouses to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Suggested Due Date	In the **From:** field, enter the suggested start date to use, or click the calendar icon to select the date. In the **To:** field, enter the suggested end date to use, or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want any date filters to be applied. These are the default options.
Suggested Order Date	In the **From:** field, enter the suggested order start date to use, or click the calendar icon to select the date. In the **To:** field, enter the suggested order end date to use, or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want any date filters to be applied. These are the default options.
Need Date	In the **From:** field, enter the suggested need start date to use or click the calendar icon to select the date. In the **To:** field, enter the suggested need end date to use or click the calendar icon to select the date. Select **Earliest date** to indicate all dates or **Latest date** if you do not want any date filters to be applied. These are the default options.

Summarized Bills of Material Report

The Summarized Bills of Material (BOM) report allows you to create a summarized listing of components for a given assembly.

This report allows you to select a range of assemblies.

You can include the first level, specified levels, or all levels of components of the assembly. You can use this report to print a summary of either manufacturing bills of material (MBOMs) or engineering bills of material (EBOMs).

Note: This Costpoint BI report relies on a report table that is generated in Costpoint.

You have to run Costpoint's Print Summarized Bills of Material Report application prior to executing this report.

In Costpoint, when you run the Print Summarized Bills of Material Report application, you must select **Update Summarized Bills of Materials Report Table** on the Action menu to update the summarized BOM table.

Prompts

Use the prompts to configure the Summarized Bill of Material report.

Prompt Message	Description
Company	Select a company from the list.

Prompt Message	Description
Limit Assembly(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more assemblies to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
BOM Type	Select which type of bills of material (BOM) you want to include on this report. The available options are the following: ▪ **Manufacturing**: Select this option to print the MBOM for the selected assembly part. You can only select standard components for this BOM type. ▪ **Engineering**: Select this option to print the EBOM for the selected assembly part. You can select either standard or provisional components for this BOM type.

Sample Report

This is a sample Summarized Bill of Material report.

Materials

The Materials folder stores standard Materials reports and dashboards for the manufacturing administrator and materials staff.

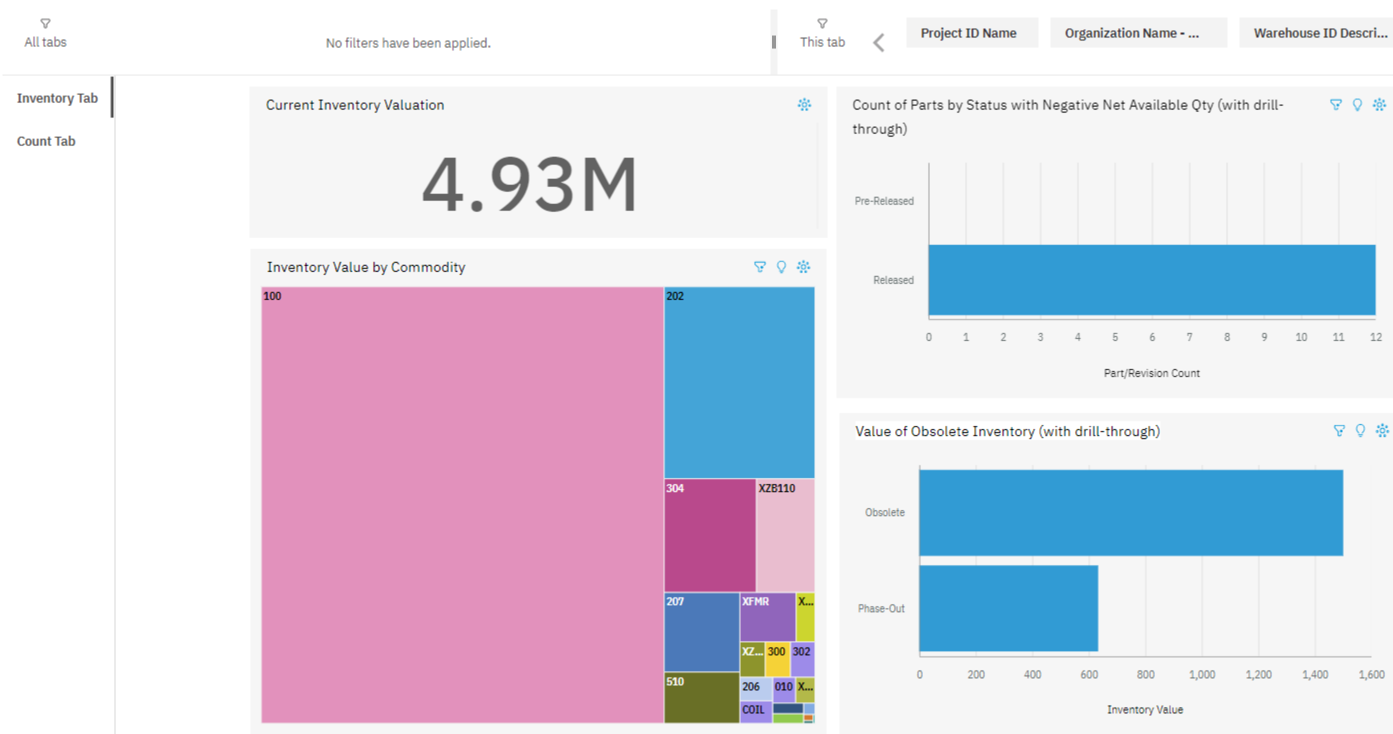
The contents of this folder are available to the following user groups:

- CER All
- CER Materials
- CER Materials Secure
- CER Materials Manufacturing All Secure

Inventory Dashboard

Use the Inventory Dashboard data to make decisions about inventory value, obsolete inventory levels, negative available inventory, and count accuracy.

Inventory Tab



The Inventory Tab provides data to help you analyze your inventory. You can also filter the data based on project, organization, warehouse, and part.

- **Current Inventory Valuation**: This KPI value is the total value of current inventory.
- **Count of Parts by Status with Negative Net Available Qty (with drill-through)**: This KPI value shows the number of parts by status that have a negative net available

quantity. This chart has a drill-through report that shows the list of these parts and their on-hand and available quantity. Click the **Part ID** to see a list of Manufacturing Orders for Make parts or Purchase Requisitions and Purchase Orders for Buy parts, and to see where these items are on order to come in.

- **Inventory Value by Commodity**: This pie chart shows the total inventory value by commodity.
- **Value of Obsolete Inventory (with drill-through)**: This bar chart displays the value of obsolete inventory based on the following criteria:
  - Obsolete part status
  - Phase-Out part status

  The drill-through report shows a list of the parts along with the on-hand quantity, unit cost, and total value of each obsolete and phased-out status.

Count Tab

The Count Tab provides inventory count data that you can filter by location, part, count ID, warehouse, the employee who performed the count, inventory abbreviation code, and counted date.

- **Inventory Count Accuracy % (with drill-through)**: This KPI component shows the inventory count accuracy percentage based on Actual Count data. Drill through to the Inventory Count Accuracy report and view the actual count data to see the variance amount, unit cost, and whether the variance has been reconciled.

- **Count Status**: This bar chart shows the number of active counts in different statuses (Counted, Not Counted, and Reconciled).

Materials Reports

The Materials area includes ten report templates that you can customize and use.

These reports are:

- Audit Log
- Container Content Labels
- Customer Return Report
- Goods List
- Indented Bill of Materials
- Item Vendors
- Lead Time Audit
- Lead Time Import Extraction
- Parts List
- Sales Order Status
- Services List
- Shipped Revenue
- Stock Status
- Summarized Bill of Material

Audit Log Report

The Audit Log report shows the audit log for part data security.

Prompts

These are the Audit Log prompts.

Prompt Message	Description
Date Range	Select the start date for the date range that will be included in the report. In the **From:** field, enter the start date assigned to audit logs or click the calendar icon to select the date. In the **To:** field, enter the end date assigned to audit logs or click the calendar icon to select the date. You can opt to select the **Earliest date** or the **Latest date** possible for the audit log dates.

Prompt Message	Description
Limit log type	Select the log type to be included in the report which can be: ▪ Authorized ▪ Unauthorized
Limit part	In the **Keywords** field, enter a portion of one or more parts to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit rev	Select a revision from the dropdown list.
Limit employee(s)	In the **Keywords** field, enter a portion of one or more employees to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

This is a sample Audit Log report.

Container Content Labels

Use the Container Content Labels report to print labels for each Inventory Transaction Line when putting inventory away during a purchase order and miscellaneous receipts, as well as manufacturing order relief during inspection acceptance.

Prompts

Select prompt values to run the Container Content Labels report.

Contents

Prompt Message	Description
Company	Select the company whose vendors you want to include in the report.
Transaction Type	Select the type of transaction to include in the report.
Transaction ID	Select transaction IDs to only print labels for this selection. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Transaction Line	Select transaction lines to only print labels for this selection. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Warehouse(s)	Select warehouses to only print labels for this selection. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Project(s)	Select projects to only print labels for this selection. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Show Field(s)	Select the fields to include on the container content labels.

Sample Report

The Container Content Labels report provides labels for each Inventory Transaction Line.

Note: The HTML report only displays barcodes on the Firefox browser. In other browsers, run the report in the PDF format.Also, the barcode font must be installed on your computer for it to show on the report. See the Costpoint 8.2 Business Intelligence Post Installation and Configuration guide for instructions to install the font or contact your BI administrator.

Customer Return Report

The Customer Return report allows you to see a list of Customer Return lines that can be filtered by Part or Project so you can analyze your returned material and understand where action is needed.

Prompts

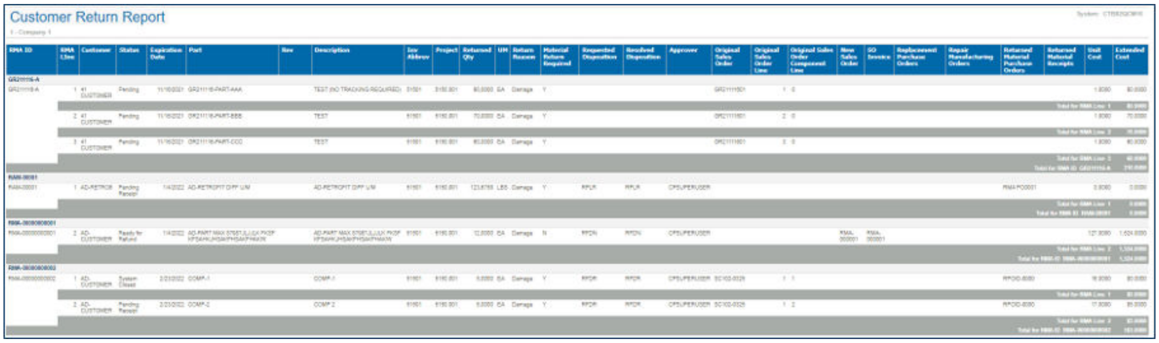
Select prompts to filter data for the Customer Return report.

Contents

Prompt	Description
Company	Select a company for the report.
RMA ID(s)	In the **Keywords** field, enter a portion of one or more RMA IDs to add to the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit customer(s)	In the **Keywords (ID+Name)** field, enter a portion of one or more customer names or IDs to add to the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit part/rev(s)	In the **Keywords** field, enter a portion of one or more parts/ revisions to add to the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit project(s)	In the **Keywords** field, enter a portion or the entire ID of one or more projects to add to the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Expiration date	In the **From** field, enter the beginning value for the active date range. In the **To** field, enter the end value for the date range. You can opt to select the **Earliest date** or the **Latest date** possible for the date range.
Status	Select the customer return statuses to include in the report.

Sample Report

The following sample shows the Customer Return report.



Goods List Report

The Goods List report allows you to generate a list of items that are categorized as goods.

Prompts

Use the Goods List prompts to configure the Goods List report..

Prompt Message	Description
Company	Select a company from the list.
Limit part\rev(s)	In the **Keywords** field, enter a portion of one or more part/ revisions to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Active	Select the option to indicate whether or not the item is active. The **Yes** and **No** options are both selected as a default.
Limit commodity code(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more commodity code IDs to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit buyer(s)	In the **Keywords** field, enter a portion of one or more buyers to be added on the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Indented Bills of Materials Report

The Indented Bill of Material report allows you to create a listing of indented Bills of Material (BOM) for a selected range of assembly part numbers.

You can include the first-level components of the assembly or the entire indented BOM through all levels. You can use this report to print either manufacturing bills of material (MBOMs) or engineering bills of material (EBOMs).

Attention: This report relies on a report table that is generated in Costpoint. You have to run Costpoint's Print Indented Bills of Material Report application prior to executing this report.

In Costpoint, when you run the Print Indented Bills of Material Report application, you must select **Update Indented Bills of Materials Report Table** on the Action menu to update the indented BOM table.

Prompts

Use the Indented Bill of Material prompts to configure the report.

Prompt	Description
Company	Select one company from the list.
Limit Assembly(s)	In the **Keywords** field, enter a portion of one or more assemblies to add on the report and then click 🔍. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
BOM Type	Select which type of bills of material (BOM) you want to include on this report. The available options are the following: ▪ **Manufacturing:** Select this option to print the MBOM for the selected assembly part. You can only select standard components for this BOM type. ▪ **Engineering:** Select this option to print the EBOM for the selected assembly part. You can select either standard or provisional components for this BOM type.
Case Insensitive	Select this check box for BI to ignore the text case when searching keywords.
BOM Level	Select the BOM level at which you want the report printed. The available options are: ▪ **SINGLE:** Select this option to include level 1 in the report. ▪ **ALL:** Select this option to include all levels in the report.

Sample Report

This is a sample Indented Bill of Materials report.

Item Vendors Report

The Item Vendors report allows you to create a listing of vendors that are assigned to items.

You can print this report for parts, services, or goods.

Prompts

Specify the prompts for the Item Vendors List.

Prompt Message	Description
Company	Select one company from the list.
Limit part/rev(s)	In the **Keywords** field, enter a portion of one or more part/ revisions to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Item Type	Select the option to indicate the item type you want to include on this report. The available options are the following:

Prompt Message	Description
	▪ Good ▪ Part ▪ Service All options are selected by default.
Active	Select the option to indicate whether or not the item is active. The **Yes** and **No** options are both selected as a default.
Limit vendor(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more vendor IDs to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit buyer(s)	In the **Keywords** field, enter a portion of one or more buyers to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Lead Time Audit Report

The Lead Time Audit Report allows you to easily see and manage your list of lead times that are set in Manage Parts. It also shows the Manufacturing Orders or Purchase Orders that make up that lead time.

Prompts

Use the prompts to filter data for the Lead Time Audit report.

Contents

Prompt	Description
Company	Select the company for the report.
Make or Buy	Select **Make** to display manufactured parts. Select **Buy** to include parts purchased from an outside source.
Type	Select one or more types to include in the report.
Select Buyer(s)	Select one or more buyers to filter the data based on the buyers selected.
Select Planner(s)	Select planners to filter the data based on the planners selected.
Select Commodity	Select commodities to filter the report based on the commodities selected.
Select Vendor(s)	Select vendors to filter the report based on the vendors selected.
Show Item Detail	Select whether to show the details of each item.

Lead Time Import Extraction Report

Use the Lead Time Import Extraction Report to extract the part list with current lead time information from Part.

This report is generated in the Import Items file format. Export the report to Excel, update the lead time information in the report and then import the file via the Import Items to make updates to your lead time data.

Update and Import Lead Time Data

Follow the instructions below to update the Lead Time Import Extraction report and import the changes into Costpoint.

To import lead time data to Costpoint, you must have access to the Import Items application or the Materials module, and have parts with lead times set up in Costpoint.

To update and import lead time data:

1. On the Team Content tab, click **Materials**.
2. In the Lead Time Import Extraction tile or row, click the **Action menu** icon.

3. Click **Run as**.
4. Confirm the **Prompt me** option is selected.
5. In the Format section, select **Excel Data**.
6. Click **Run**.
7. Select the prompt settings and then click **Finish**.
8. Save the Excel spreadsheet to your computer.
9. Open the spreadsheet and delete the header row.
10. Update lead times and save your changes.

    Note: If you import a record with a 0 value where no value existed, Costpoint will create a lead time entry with a 0 value. To avoid creating lead time records with 0 lead time, delete the line in the import file.

11. In Costpoint, open the Import Items application and import the updated Lead Time Import Extraction report.

Prompts

Use the prompts to filter the Lead Time Import Extraction report.

Prompt	Description
Company	Select a company for the report.
Make or Buy	Select **Make** or **Buy** to restrict the report selection to make parts or buy parts.
Type	Select the types to include in the report.
Lead Time Type	Select the lead time types to include in the report.
Select Buyer(s)	Select buyers to include only the parts they are assigned to in the report.
Select Planner(s)	Select planners to include only the parts they are assigned to in the report.
Select Commodity	Select commodities to filter the report based on the commodities selected.
Select Vendor(s)	Select vendors to filter the report based on the vendors selected.
Include Items with No Lead Time Record (by Type)	Choose whether to include a record for each Lead Time Type selected above when no record exists in the database.

Sample Report

View a sample of the Lead Time Import Extraction report.

Parts List Report

The Parts List report allows you to generate a list of items that are categorized as parts.

Prompts

Select prompt values before running the Parts List report.

Prompt Message	Description
Company	Select one company from the list.
Limit part/rev(s)	In the **Keywords** field, enter a portion of one or more part/ revisions to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Make/buy	Select the option to indicate the component parts you want to include on this report. The available options are:

<table>
<tr><th>Prompt Message</th><th>Description</th></tr>
<tr><td></td><td>Make: Manufactured
Buy: Purchased
Both options are selected by default.</td></tr>
<tr><td>Status</td><td>Select the status(es) of the parts you want to include on this report.
The available options are the following:
E: Estimating
O: Obsolete
R: Released
All options are selected by default.</td></tr>
<tr><td>Active</td><td>Select the option to indicate whether or not the item is active. The Yes and No options are both selected as a default.</td></tr>
<tr><td>Limit commodity code(s)</td><td>In the Keywords: (ID + Name) field, enter a portion of one or more commodity code IDs to be added on the report.
To narrow the search, select an option in the Starts with any of these keywords field. If you search by name, use one of the Contains... options, rather than the Starts with... options. If applicable, click the right-arrow to move your selected results to Choices.</td></tr>
<tr><td>Part type</td><td>Select the option to indicate the component part type you want to include on this report.
The available options are the following:
B: Buy with Components
L: MPS Planning-Only
P: Phantom
R: Reference
S: Standard
T: Tool
All options are selected by default.</td></tr>
<tr><td>As-required</td><td>Select the option to indicate which component parts you want to include on this report, based on whether or not the quantity per component part is flagged as "as required."
Selecting No will include component parts whose exact quantities have been specified.
Both options are selected by default.</td></tr>
</table>

Prompt Message	Description
QC inspection required	Select the option to indicate which component parts you want to include on this report, based on whether or not the parts require inspection by Quality Control. Both options are selected by default.
Source inspection required	Select the option to indicate which component parts you want to include on this report, based on whether or not the parts require source inspection.. Both options are selected by default.
Limit buyer(s)	In the **Keywords: (ID + Name)** field, enter a portion of one or more buyer IDs to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sales Order Status Report

The Sales Order Status report allows you to analyze sales orders.

Prompts

Select prompt values before running the Sales Order Status report.

Prompt Message	Description
Company	Select one company from the list.
Sales Order Status	Select the current status of the sales order that you want to include on the report. The available options are the following: ▪ Approved ▪ Closed ▪ In Approval ▪ Pending ▪ System Closed ▪ Void The default option is **Approved**.
Sales Order Date Range	In the **From:** field, enter the start date assigned to sales orders or click the calendar icon to select the date. In the **To:** field, enter the end date assigned to sales orders or click the calendar icon to select the date. You can opt to select the **Earliest date** or the **Latest date** possible for the sales order dates.
Sales Order Line Status	Select the sales order line status that you want to include on the report. The available options are the following: ▪ Closed ▪ Open ▪ System Closed The default option is **Open**.
Line Order Due Date	In the **From:** field, enter the start date assigned to line orders or click the calendar icon to select the date. In the **To:** field, enter the end date assigned to line orders or click the calendar icon to select the date. You can opt to select the **Earliest date** or the **Latest date** possible for the need line order dates.

Prompt Message	Description
Suppress sensitive columns	Select the option to suppress the net unit price or the original total amount on the report. The default option is **Original Total Amount**.
Limit SO number(s)	In the **Keywords** field, enter a portion of one or more SO numbers in the to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit customer(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more customers to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit sales representative(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more sales representatives to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit warehouse(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more warehouses to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit project(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more projectsto be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Stock Status Report

The Stock Status report provides a listing of inventory sorted by the following combinations: warehouse/location, project/part revision, inventory abbreviation/part revision, or part/revision/project.

This report is generated in real-time. The Excel output for the report excludes headers, footers, subtotals, and so on, making the data easier to manipulate. A drill-thru report is available to view serial/lot tracking information.

> **Note:** You can create Stock Status reports that can be exported to PDF and saved to a specified location. These jobs can be scheduled at recurring intervals and run on-demand. The exported PDF files contain date/time stamp information

Prompts

Use the Stock Status prompts to configure the Stock Status report.

Prompt Message	Description
Company	Select one company from the list.
Group By	Select the option to use for the report from the drop-down list. The options available are the following: ▪ **Warehouse\Location**: Select this option to print the report by warehouse and location. This is the default option.

Prompt Message	Description
	▪ **Project\Part Rev**: Select this option to print the report by project and part/revision. ▪ **Inventory Abbreviation Code\Part Rev**: Select this option to print the report by inventory abbreviation code and part/revision. ▪ **Part Rev\Project**: Select this option to print the report by part/revision and project.
Limit Warehouse(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more warehouses, projects, inventory abbreviation codes, or part/revisions to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Limit Inventory Location ID(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more inventory locations to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Location Type	Select the location type you want to include on the report. The location type is a system-defined code used to classify inventory records by locations. These system-defined location types are the following: ▪ **Incoming Inspection**: Select this option to indicate that this location contains parts that have been received, but have not been accepted or rejected. ▪ **Materials Review Board (MRB)**: Select this option to indicate that this location contains parts that are within quality control, and that the items do not meet the drawings. The items may be kept as they are, disposed, or returned to the vendor. ▪ **On-Hand**: Select this option to indicate that this location contains parts that should be counted as available. This is the default option.

Prompt Message	Description
	▪ **On-Hold**: Select this option to indicate that this location contains parts that should not be counted as available. ▪ **Reinspection**: Select this option to indicate that this location contains parts that have already been accepted or rejected but need to go back through that process. ▪ **Shipping**: Select this option to indicate that this location contains parts that have been removed from stock for shipping. The **Shipping** type and the **On-Hold** type are used in a similar fashion. Location types that are not selected do not print.
Account Type	Select the account type(s) of the inventory records you want to include on the report. The account types are the following: ▪ Assets ▪ Expense ▪ Government Furnished Materials You can select more than one account type by pressing and holding the CTRL key and selecting the options you want to include on the report. Account types that are not selected do not print. All account types are selected by default.
Inventory Type	Select the inventory type of the inventory records you want to include on the report. The inventory types are the following: ▪ Raw ▪ Finished Both inventory types are selected by default.
Excel Format	Select the option to indicate if you want to produce a report version that has no headers, footers, and subtotals for easier sorting and manipulation. The default option is **No**.

Summarized Bills of Material Report

The Summarized Bills of Material (BOM) report allows you to create a summarized listing of components for a given assembly.

This report allows you to select a range of assemblies.

You can include the first level, specified levels, or all levels of components of the assembly. You can use this report to print a summary of either manufacturing bills of material (MBOMs) or engineering bills of material (EBOMs).

Note: This Costpoint BI report relies on a report table that is generated in Costpoint.

You have to run Costpoint's Print Summarized Bills of Material Report application prior to executing this report.

In Costpoint, when you run the Print Summarized Bills of Material Report application, you must select **Update Summarized Bills of Materials Report Table** on the Action menu to update the summarized BOM table.

Prompts

Use the prompts to configure the Summarized Bill of Material report.

Prompt Message	Description
Company	Select a company from the list.
Limit Assembly(s)	In the **Keywords: (ID + Name)** field, enter a portion or the entire ID of one or more assemblies to be added on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
BOM Type	Select which type of bills of material (BOM) you want to include on this report. The available options are the following: ▪ **Manufacturing**: Select this option to print the MBOM for the selected assembly part. You can only select standard components for this BOM type. ▪ **Engineering**: Select this option to print the EBOM for the selected assembly part. You can select either standard or provisional components for this BOM type.

Sample Report

This is a sample Summarized Bill of Material report.

Payroll

The Payroll folder stores standard Payroll reports and dashboards for the people administrator and payroll staff.

Contents of the Payroll folder are available to the following user groups:

- CER All
- CER Payroll Secure
- CER People

Employee Earnings Report

This report shows a complete view of all employee earnings data. Filter the report on payroll dates, employees, and company.

Prompts

Select the company and pay period range to run the Employee Earnings report.

Prompt Message	Description
Company	Select the company for which you are generating the report.
Starting Pay Period	Enter or select the starting pay period of the pay period range for the report. The report includes earnings information for pay periods in this range.
Ending Pay Period	Enter or select the ending pay period of the pay period range for the report. The report includes earnings information for pay periods in this range.
Limit Employee(s)	Use this option to limit the report to selected employees. (If you make no selections, the report includes all employees.) In **Keywords**, enter one or more characters for which you want to search to retrieve employees. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. Click **Options** to specify how you want the search to match your entries with the IDs or names. (If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click **Search** to list the matching employees in Results. In Results, select the employees you want to include and click **Insert** to move them to Choices. To select multiple employees that are together in the list, click the first employee in the group, and then press SHIFT as you click the last one in the

Prompt Message	Description
	group. To select multiple employees that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the employees in Choices.

Sample Report

The report shows employee earnings for the selected pay periods.

Planning

This folder stores standard Planning reports and dashboards for the project planners and others with project roles.

The contents of this folder are available to the following user groups:

- CER All
- CER Planning (Projects)
- CER Planning (Projects) Secure

You can supplement standard Costpoint Planning reports with:

- Predefined reports in the reporting package
- Production reports that you create for your company using Costpoint Business Intelligence and the Planning model
- Ad hoc reports that you create for specialized or one-time reporting needs

This chapter also provides procedures for reconciling data on the Costpoint Business Intelligence reports with data in Costpoint Planning

Attention: Due to performance issues, the Org Mgr Planning Performance Analytics and PM Planning Performance Analytics dashboards that resided in the Planning folder in previous versions of CBI have been replaced with dashboards in the SMART AI area. You can access these dashboards in **Team Content** » **SMART AI Admin** » **SMART AI** » **Planning**. Refer to the Costpoint Business Intelligence SMART AI Guide for more information.

Update Reporting Tables

You need to turn on the Update feature for populating the reporting tables for Costpoint Planning.

With this feature turned on:

- When you commit a budget, the tables populate with updated Budget data only.
- When you run a refresh process, the tables populate with Actuals and Budget data that has not been updated.

Enable Update of Reporting Tables

To populate the reporting tables in Planning, configure the Update BI Reporting Tables option in the Planning configuration settings.

To enable the feature in updating reporting tables for Costpoint Planning:

1. In Costpoint, launch the Configuration Settings application in **Planning** » **Administration** » **Administration Controls** » **Configuration Settings**.
2. Click the **General** tab.
3. In the **Update BI Reporting Tables** list, select **All Projects** or **Active Projects**.

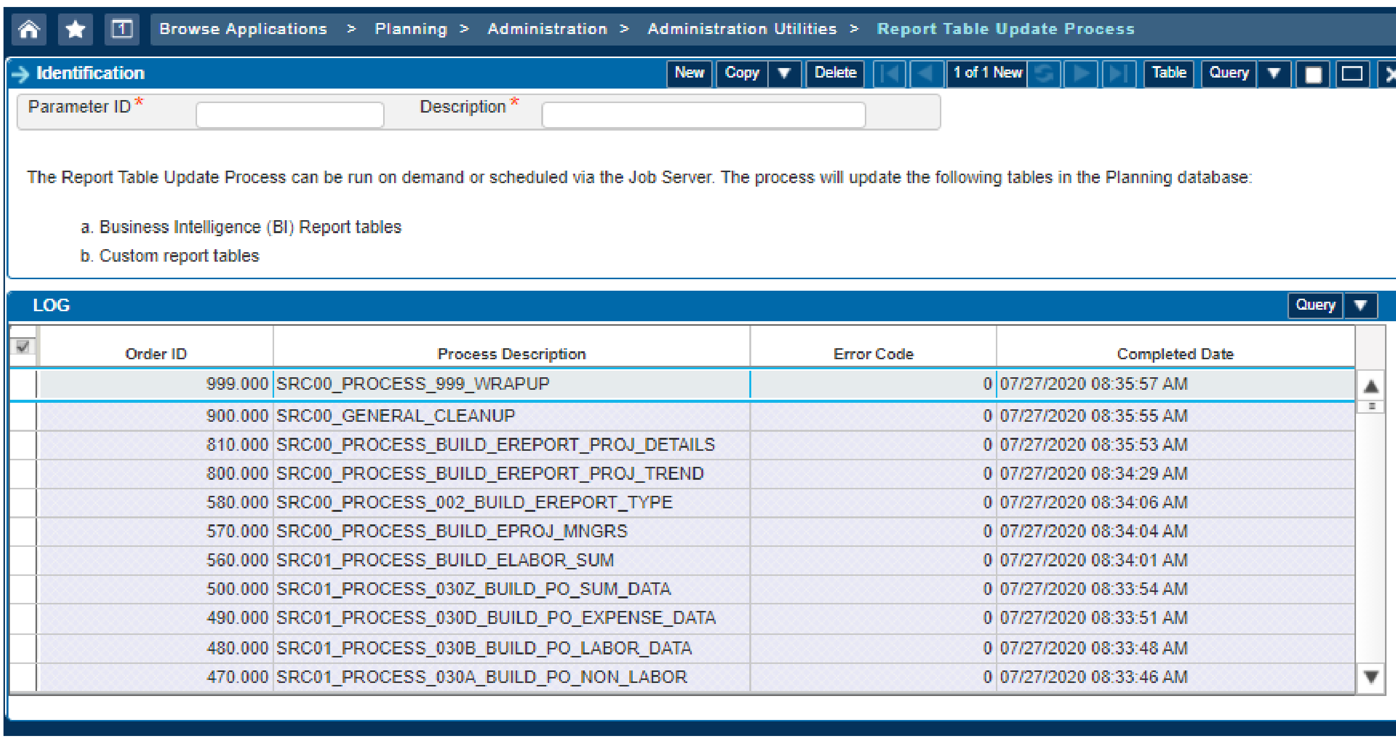
4. **Save**.

Report Table Update Process

The Report Table Update process updates BI Report tables, custom report tables, and project security tables.

As part of the Backend integration between Costpoint and Costpoint Planning, the Refresh Process in previous Costpoint versions has been removed and is no longer required to update the tables. The runtime will be significantly shorter because all of the tables are updated through a more direct integration using Link Views.

Note: Refer to the Costpoint online Help for more information about running the Report Table Update Process utility.



Report Package

The standard reports in Planning are published in the Project Planning Reporting package.

Reporting Areas

The Framework Manager model for Planning has several reporting areas.

Reporting Area	Purpose
Project Status Trend	Generate reports that display either or both of the following types of data: Current status of existing projects using current period, YTD, and ITD actual hours and amounts. (ITD and YTD values are through the latest closed fiscal period. They do not include the current period in Costpoint Planning.) Projected (trended) performance for existing and new business projects for up to 24 future fiscal periods using data from the baseline budget or the most recent budget or estimate at completion (EAC).
Project Status Details	Generate detailed reports on project actual and budgeted performance using detail data from all past, current, and future fiscal periods and subperiods. Data from all budget and EAC versions is available.
General Ledger Detail	Generate reports that display or summarize actual Costpoint transaction detail for existing projects. This reporting area contains no budget data. It is commonly used for drill-through reports.
A/R Header History	Generate reports that display current Costpoint AR invoice balance information for existing projects. This reporting area contains no AR history and no budget data. It is commonly used for drill-through reports.

Reporting Areas and Standard Reports

In addition to serving as starting points for your custom reports, the standard reports included with Planning provide a variety of examples of how to use the reporting areas in the Framework Manager model.

The following table lists the standard reports that use each of the reporting areas.

Reporting Area	Standard Reports
Project Status Trend	▪ Project Subcontractor Status ▪ Project Labor Hours Status ▪ Project Status Cost Summary ▪ Project Report with Labor Detail ▪ Revenue Forecast ▪ T&M Profitability

Reporting Area	Standard Reports
Project Status Details	▪ Labor Utilization ▪ Labor Utilization (drill through report) ▪ Labor Variance by PLC
General Ledger Detail	None
A/R Header History	None

Project Status Trend Reporting Area

The Project Status Trend reporting area enables you to report both on the current status of projects and on their projected performance, based on budget, for up to 24 future periods.

You can display report columns containing the following actual performance information:

- Hours and amounts for the current period in Costpoint Planning
- Hours and amounts year to date through the latest closed fiscal period
- Hours and amounts inception to date through the latest closed fiscal period

These values are directly available as measures. You do not need to set up your reports to calculate them.

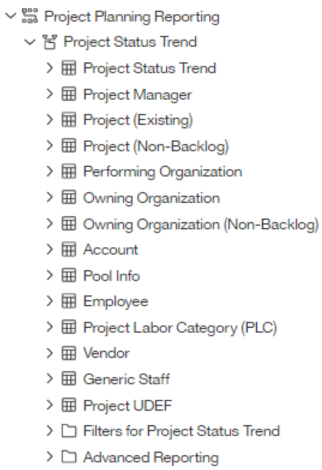
In addition, you can include report columns for project budget data for the current period and up to 24 future periods.

If you need to report on other budget versions, you can do so using the Project Status Details reporting area that gives you access to data from all budget versions.

Note that this reporting area has no time-related attributes for filtering actual performance data (for a range of fiscal periods, for example.) All actual hours and amounts are period to date for the current period, year to date for the current year through the last closed period, or inception to date through the last closed period. An administrator can set the current period in Costpoint in the Maintain Current Period application (**Planning** » **Administration** » **Administration Controls** » **Maintain Current Period**).

Structure

Cognos Analytics displays the Project Status Trend reporting area as shown.



The Project Status Trend query subject, the first item listed in the reporting area, is the fact table. If you expand that node of the tree, the list displays the identifier and attribute fields, followed by a series of folders that contain the measures, the actual and budget data fields. The other query subjects provide additional data related to the data in the fact table that you may want to use or display in your reports.

The Filters for Project Status Trend folder contains the pre-built filters for the reporting area.

The Advanced Reporting folder contains the query subjects and fields that you can use to implement rollups by project level and organization level, to report based on home organization, or to report based on reorganization.

Project Status Details Reporting Area

The Project Status Details reporting area enables you to generate detailed reports on project actual and budgeted performance using detail data from all past, current, and future fiscal periods and subperiods.

Unlike the Project Status Trend reporting area, the Project Status Details reporting area stores data by rows instead of columns. So while the Project Status Trend reporting area limits you to a maximum of 24 future periods, the Project Status Details reporting area gives you access to virtually an unlimited number of past and future fiscal periods. (Despite this difference between the two reporting areas, advanced users can pivot the data in the Project Status Details table to present it in period columns for a trended view.)

Another difference between this reporting area and the Project Status Trend reporting area is that the Project Status Details reporting area provides access to data in all budget or EAC versions. This enables you, for example, to use a filter to specify the budget version you want for the report or to select two budget versions to compare. That budget data can come from the baseline budget, from the most recent budget version or EAC, or from both the baseline budget and the most recent budget or EAC version (to provide a comparison of the two, for example).

Information from budget versions other than the baseline budget and the most current budget or EAC is not available in this reporting area.

Note: The pre-built filters that Deltek provides in the Framework Manager model for the Project Status Details reporting area include a filter for selecting the current budget version.

In addition, this reporting area includes time-related attributes, so you can filter data based on fiscal year, period, and subperiod. Be aware, however, that if you want to see year-to-date or inception-to-date amounts or hours, you must set up the reports to calculate them from the detailed records.

Note: The pre-built filters that Deltek provides in the Framework Manager model for the Project Status Details reporting areas include filters for selecting current period data only or future periods data only.

Current Budget vs. Final Version

This section describes the differences in the Final Version and Current Budget Flag Y/N columns in the Project Status Details table in Business Intelligence.

Only one version of a committed BUD/EAC can be designated as the final in the Planning module in Costpoint.

Final Version

The final version column reflects the final committed EAC and the final committed budget (BUD) version for a project in the Planning module (i.e. the final BUD and EAC).

Current Budget Flag

The Current Budget Flag (Y/N) column indicates the final version of the committed Budget unless there is an estimate at completion (EAC) defined for the project. If there is an EAC, the Current Budget Flag indicates the final version of the committed EAC (i.e. the final BUD or EAC).

Structure

The Cognos Analytics displays the Project Status Details reporting area as shown.

- Project Planning Reporting
  - Project Status Trend
  - Project Status Details
    - Project Status Details
    - Project Manager
    - Project (Existing)
    - Project (Non-Backlog)
    - Performing Organization
    - Owning Organization
    - Owning Organization for Project (Non-Backlog)
    - Account
    - Project Labor Category
    - Employee
    - Vendor
    - Generic Staff
    - Pool Info
    - Subperiod
    - Project UDEF
    - Filters for Project Status Details
    - Advanced Reporting

The Project Status Details query subject, the first item listed in the reporting area, is the fact table. If you expand that node of the tree, the list displays the identifier and attribute fields, followed by a Measures folder that contains the hours and amount fields.

The other query subjects provide additional data related to the data in the fact table that you may want to use or display in your reports. Of special note is the Subperiod query subject. It not only lists accounting period information but also provides a yes/no flag that identifies the current open period.

- Subperiod
  - Fiscal Year
  - Period
  - Fiscal Year Period
  - Subperiod
  - Start Date
  - End Date
  - Status
  - Work Days
  - Period Count
  - Bill Days
  - Current Period End Date
  - Current Period End Date (Y/N)
  - Maximum Current Period End Date
  - Period End Date With Current Period Flagged - Display
  - Current Fiscal Year Flagged - Display
  - Current Period Flagged - Display
  - Current Subperiod Flagged - Display
  - Current Year (Y/N)
  - Current Period (Y/N)
  - Other Information
  - Last 12 Periods
  - Most Recent 48 Periods
  - Future 12 Periods
  - Future 6 Periods

The following is a sample output from this query subject:

Fiscal Year	Period	Subperiod	Start Date	End Date	Status	Work Days	Period Count	Bill Days	Current Period End Date	Current Period End Date (Y/N)
2010	5	1	05/01/10	05/31/10	HISTORY	21	5	21		N
2010	6	1	06/01/10	06/30/10	HISTORY	22	6	22		N
2010	7	1	07/01/10	07/31/10	HISTORY	22	7	22		N
2010	8	1	08/01/10	08/31/10	HISTORY	22	8	22		N
2010	9	1	09/01/10	09/30/10	HISTORY	22	9	22		N
2010	10	1	10/01/10	10/31/10	HISTORY	21	10	21		N
2010	11	1	11/01/10	11/30/10	HISTORY	22	11	22		N
2010	12	1	12/01/10	12/31/10	HISTORY	23	12	23		N
2011	1	1	01/01/11	01/31/11	CURRENT	21	1	20		N
2011	2	1	02/01/11	02/28/11	CURRENT	20	2	20		N
2011	3	1	03/01/11	03/31/11	CURRENT	23	3	23		N
2011	4	1	04/01/11	04/30/11	CURRENT	21	4	21		N
2011	5	1	05/01/11	05/31/11	CURRENT	22	5	21		N
2011	6	1	06/01/11	06/30/11	CURRENT	22	6	22		N
2011	7	1	07/01/11	07/31/11	CURRENT	21	7	20	07/31/11	Y
2011	8	1	08/01/11	08/31/11	CURRENT	23	8	23		N
2011	9	1	09/01/11	09/30/11	CURRENT	22	9	21		N
2011	10	1	10/01/11	10/31/11	CURRENT	21	10	21		N

The Filters for Project Status Details folder contains the pre-built filters for the reporting area.

The Advanced Reporting folder contains the query subjects and fields that you can use to implement rollups by project level and organization level, to report based on home organization, or to report based on reorganization.

Existing Projects and New Business Projects

Both the Project Status Trend reporting area and the Project Status Detail reporting area give you the option to include existing projects, new business projects, or both.

In contrast, the General Ledger Detail and A/R Header History reporting areas only include data for existing projects.

If you include new business projects on a report, keep the following in mind:

- New business projects do not have the same set of attributes that existing projects have.
- You cannot roll up data for new business projects based on project or organization levels.

> **Note:** The pre-built filters that Deltek provides in the Framework Manager model for the Project Status Trend and Project Status Details reporting areas include filters for selecting existing projects, new business projects, or both.

Major and Minor Group Numbers

You can use the Major and Minor Group Numbers to include or exclude data categories and select and group data that was identified by the Major Group Numbers.

Records in the Project Status Trend reporting area and the Project Status Detail reporting area include the following attribute fields to enable you to include or exclude categories of data from your report:

- Major Group Number

- Minor Group Number

Major Group Number

Use the **Major Group Number** attribute field in filters to include or exclude the data categories from the reports.

The following table lists the categories of data that you can include or exclude from the reports:

Data Category	Major Group Number
Revenue	1
Direct costs	2
Indirect costs by resource	3
Indirect costs by pool	4

For example, to include revenue, direct costs, and indirect costs by resource on a report, use a filter that selects records with 1, 2, or 3 as the **Major Group Number** value.

You can also group data on a report based on the value in **Major Group Number**.

To include indirect costs on a report, use a filter that selects records with one, but not both, of the indirect costs values in **Major Group Number**. If you select both, the report will include duplicate records, and the indirect costs will be overstated.

Minor Group Number

The **Minor Group Number** attribute field provides a way to select and group subsets of the data identified by the **Major Group Number** values.

Each **Minor Group Number** value is only valid for a single **Major Group Number** value.

Major Group Number/ Description	Valid Minor Group Number/Description
1 – Revenue	**0** – Actual revenue **1** – Labor revenue **2** – Non-labor revenue
2 – Direct costs	**3** – Direct labor costs **4** – Direct non-labor costs
3 – Indirect costs by resource	**5** – Indirect labor costs **6** – Indirect non-labor costs
4 – Indirect costs by pool	**7** – Indirect labor costs **8** – Indirect non-labor costs

For example, to include only labor revenue, direct labor costs, and indirect labor costs by resource on a report, use a filter that selects records with one of the following sets of values:

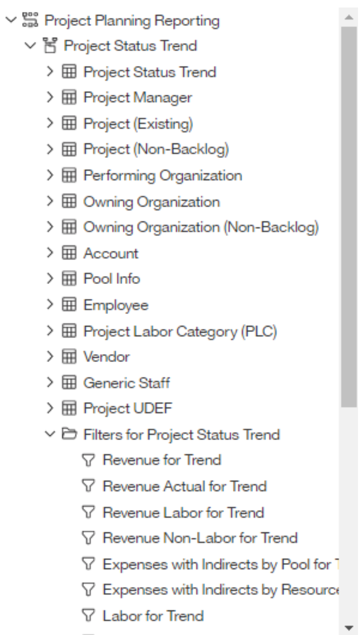
- 1 as the **Major Group Number** value and 1 as the **Minor Group Number** value
- 2 as the **Major Group Number** value and 3 as the **Minor Group Number** value
- 3 as the **Major Group Number** value and 5 as the **Minor Group Number** value

Pre-Built Filters and Major and Minor Group Numbers

In most cases, you do not need to set up your own filters to take advantage of major and minor group numbers.

Instead you can use the pre-built filters that Deltek provides in the Framework Manager model for the Project Status Trend and Project Status Details reporting areas.

To view and select from the list of filters in Cognos Analytics, expand the reporting area in the **Source** tab of the **Data** pane and expand the Filters for… folder. The filter name indicates the categories of data that the filter selects for inclusion in the report.



Project Access

Costpoint Business Intelligence provides access to budgeting and planning data based on the existing projects (actual projects set up in Costpoint) to which the user is granted access in Costpoint Planning.

When you define a user's access to project data in Costpoint Planning, you can grant or deny access to the whole project tree, or to any individual branch or project ID in the project tree.

Project security applies only to transaction and budget data. It does not apply to the projects themselves or their attributes (project type or project manager, for example). As a result, the following are true:

- You can create ad hoc queries and reports in Cognos that return master file data for projects to which Costpoint Planning security does not give you access. However, you cannot create queries that return transaction or budget data for those projects.
- For reports that enable you to select the projects that are included, you can select any projects at any project level. You are not restricted to the projects to which you have access. However, the data on the reports will not include any actual or budget hours or amounts for projects to which you do not have access. (If you do not have access to any of the selected projects, the report displays only **No Rows Found**.)

  Example: You do not have access to the level 1 project, 1000. You also do not have access to the level 2 project 1000.01, but you do have access to 1000.02. When you generate a Revenue Forecast report, you can generate it at level 1 for project 1000. However, the values rolled up for 1000 will be partial values because they only include data for 1000.02. Data for 1000.01 is excluded because you do not have access to that project.

New Business Project Access

Project security applies only to actual projects set up in Costpoint.

It does not apply to budget data for new business projects set up in Costpoint Planning. All Costpoint Business Intelligence for Budgeting and Planning users can view data for all available new business projects.

All new business projects may not be available, however. The data only includes new business projects that are designated as "shared" in Costpoint Planning. (Proposals are never included in the data.)

Organization Access

The Framework Manager model for the budgeting and planning data in Costpoint Business Intelligence only includes project budget data.

It does not include organization budgets. Security for this data is based only on access to projects which does use organization security since each project is tied to an organization.

Planning Reports

There are three report templates for the Planning area and they are the BnP PSR Trending Analysis, Planning Revenue Summary Report Template and PSR Report Template.

Use the BnP PSR Trending Analysis report to show how the pre-determined time analysis dimension can be used for trending PSR data in a report.

Use the Planning Revenue Summary Template as a starting point when you create project reports from reporting views in Budgeting & Planning. It is easy to use and you can make your own reports based on it.

The PSR Report Template can be used when you want to create reports based on PSR Report tables in Budgeting & Planning. Similar with the Revenue Summary Report Template, you can modify it and customize based on the needs of your business.

BnP PSR Trending Analysis

The BnP Trending Analysis report uses the Planning Analysis model which leverages the pre-determined time analysis dimension that is useful for trending PSR data in a report.

Prompts

The prompt for the BnP PSR Trending Analysis includes the selection for project .

Prompt Message	Description
Select Level 1 Project(s)	Select the projects that you want to include in the report.

Sample Report

Burdened Labor Costs by Project

Use the Burdened Labor Costs by Project Report to see burdened costs charged or budgeted to a project as well as burdened costs against the budget for the current period, year to date, and inception to date timeframes.

Data from this report comes from Deltek Costpoint Planning and it displays:

- Project ID and Name
- Account Level based on selection
- Account ID and Name

- Current Period Actual, EAC, and Variance
- Year to Date Actual, EAC, and Variance
- Inception to Date Actual, EAC, and Variance
- Subtotal by Account
- Subtotal by Account Level
- Total by Project

Prompts

Select prompt settings to run the Burdened Labor Costs by Project report.

Prompt Message	Description
Company	Select the company for the report.
Rate Type	Select to include the **Actual** or **Target** rate type the report.
Project Level	Select the level of the project to roll data up to for the report.
Budget Type	Choose **BUD** to use the latest budget information. Choose **EAC** to use the latest EAC information.
Limit projects	Select the project(s) for the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Labor Utilization Forecast

Use the Labor Utilization Forecast to review forecasted labor utilization for labor resources to identify potential under-staffing or over-staffing issues.

For each employee, the report displays forecasted labor utilization rates for the current period in Costpoint Planning and for the five periods following that one. (The report excludes vendor resources.)

The report also provides labor utilization rates for those six periods for each organization as a whole.

Labor Utilization Rate Calculation

Costpoint Business Intelligence calculates labor utilization rates by comparing a resource's budgeted hours for a fiscal period to the standard hours for that period.

Standard hours for a fiscal period are 8 hours per work day, multiplied by the number of business days in the period, less any holidays or other excluded days.

Budget Used

Budgeted hours for this report come from the current budget.

Reconcile Labor Utilization with Drill Through

Use the Costpoint Planning reports to reconcile data on the Labor Utilization with Drill Through report.

These reports include the following:

- Labor Hours Analysis
- Hours Breakdown
- Labor Cost Analysis
- Raw Cost Breakdown

To reconcile the Costpoint Business Intelligence Labor Utilization Report with Drill Through with Costpoint Planning:

1. Run the Labor Utilization report in Costpoint Business Intelligence.
2. Obtain the data for each component of the utilization calculation by running the following Costpoint Planning reports, and then compile data to compare to the Utilization %.

   This allows you to independently calculate and confirm the Utilization %.

   a) Run the Labor Hours Analysis report in Costpoint Planning (**Planning** » **Project Budgeting** » **Top Level (All Projects) Reports** » **Labor Hours Analysis**) to list the labor hours for each project.

   b) Run the Hours Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Hours Breakdown**) to verify the labor utilization by hours.

      Calculate the standard hours and run a SQL script to identify the standard hours by period. These are computed by multiplying the number of work days by 8 hours. Work days are defined in the Subperiod table (eSub_PD.Work_Days).

      In the **Report Type** field, select **Budget**.

      In the **Budget Type** field, select **EAC**. The labor utilization calculation for hours is:

      EAC hours/Standard hours

      The report shows monthly EAC hours by employee, but you can expand the employee to view the breakdown by project for the drill-through.

   c) Run the Labor Cost Analysis report in Costpoint Planning (**Planning** » **Organization Budgeting** » **Labor Analysis Reports** » **Labor Cost Analysis**) to list the projects that each employee charged.

      Calculate the standard hours and run a SQL script to identify the standard hours by period. These are computed by multiplying the number of work days by 8 hours. Work days are defined in the Subperiod table (eSub_PD.Work_Days).

      In the **Report Type** field, select **Budget**.

      In the **Budget Type** field, select **EAC**. The labor utilization calculation for cost by employee is:

      EAC amount/(Standard hours * hourly amount)

      The labor utilization calculation for cost by generic staff is:

EAC amount/(Standard hours * avg hourly amount)

3. The report displays monthly EAC cost by employee, but you can expand the employee to view the breakdown by project for the drill-through.

   a) Determine the current hourly amount for each employee.

      This information is available to those users with access rights to the Costpoint EMPL_LAB_INFO.HRLY_AMT table. You can use a SQL script to determine this information.

   b) Find the average hourly rate for generic staff.

      Attention: To do this, you must refer to the Maintain Generic Staff report at (**Planning** » **Organization Budgeting** » **Controls and Utilities** » **Maintain Generic Staff**).

   c) Run the Raw Cost Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Raw Cost Breakdown**) for each project that was listed in the Labor Cost Analysis report to display the unburdened labor costs.

      If an employee has charged multiple projects, you must run this report for each charge and then manually compile the total EAC labor costs.

4. Export the data into an Excel spreadsheet to view all calculations and comparisons.

Prompts

Use the prompts to run the Labor Utilization Forecast.

Prompt Message	Description
Primary Group	Indicate if you want the report to group data by owning organization or by performing organization.
Organizational Level	Select the level of the organization structure at which you want to review labor utilization rates. The report rolls up all data to that level.
Exclude New Business	Select **Yes** to exclude new business (non-backlog) projects from the calculation of labor utilization rates. Select **No** to include new business projects in the calculation of labor utilization rates.
Organization(s)	Use this option to limit the report to selected organizations. (If you make no selections, the report includes all organizations.) To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

Standard Hours		160.00	176.00	176.00	160.00	184.00	144.00
Utilization		102%	114%	105%	105%	96%	133%

The Labor Utilization drill through displays the resource's budgeted hours for each project for the current period in Costpoint Planning and the next five fiscal periods following the current period. For each period, the report also provides the resource's total budgeted hours for all projects, the standard hours, and the labor utilization rate. (Budgeted hours come from the most recent budget version.)

Your selection in the **Exclude new business** prompt for the main report determines whether or not the drill report displays new business (non-backlog) projects along with the existing projects.

Labor Variance by PLC Report

Use the Labor Variance by PLC report to review actual and budgeted employee labor hours for a single existing project at any project level, broken down by project labor category (PLC).

For each PLC for the project, the report displays the following for a selected fiscal period and for the year to date:

- Actual hours
- Budget hours
- Variance (Budget hours – Actual hours)
- Variance percentage (Variance / Budget hours)

The report provides totals for all columns for the project as a whole.

> **Note:** The standard version of this report is filtered to display employee labor hours only. It does not include subcontractor or consultant labor hours. If you want to display all labor hours, you can modify the Labor for Details filter expression to match the following: **[DeltekBP].[Labor for Details]** or **[DeltekBP].[Non-Labor for Details]**.

Budgets

If different budget versions exist for the selected project tree, the report uses only the most current budget version.

Reconcile Labor Variance by PLC

Use the Costpoint Planning reports to reconcile data on the Labor Variance by PLC report.

These reports include the following:

- Project Status Report
- Hours Breakdown Report

To reconcile the Costpoint Business Intelligence Labor Variance by PLC report with Costpoint Planning:

1. Run the Labor Variance by PLC report in Costpoint Business Intelligence.
2. Run the Project Status report in Costpoint Planning (**Planning** » **Project Budgeting** » **Supplemental Reports**).
3. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Current Period Actual Hours	Current Period Labor Hours
YTD Actual Hours	Fiscal Yr to Date Labor Hours

4. Run the Hours Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports**).
5. Select **Budget**.
6. In the **Budget Type** field, select **EAC**.
7. Click **All Periods**.

8. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Total for Current Period Budget Hours column	Total labor (employee labor) from the current period column. (Do not include subcontractor or consultant hours.)
Total for YTD Budget Hours column	Total labor (employee labor) from adding the monthly columns that should be included in YTD. (Do not include subcontractor or consultant hours.)

> **Note: Current Period**, **YTD Variance**, and **Variance %** columns in the Labor Variance by PLC report are calculations that can be independently verified.

Prompts

Select prompt values to run the Labor Variance by PLC report.

Prompt Message	Description
Fiscal year	Select the fiscal year for which you want to generate the report.
Period	Select the fiscal period for which you want to generate the report.
Project Level	Select the project level at which you want to generate the report. The report rolls up all data to that level.
Project	Select one project at the level specified in the Project level prompt. In **Keywords**, enter one or more characters for which you want to search to retrieve projects. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. Click in the dropdown list to specify how you want the search to match your entries with the IDs or names. (If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.) Click **Search** to list the matching projects.
Show Pending Charges	Select this check box to include pending charges in the report. If selected, columns for ITD will be displayed. Also, the pending hours will be part of the **Actual** columns in the report. In addition, a note will be displayed that will indicate that pending hours are included in the report.

Sample Report

Pending Charges Detail Report

Use the Pending Charges Detail Report to view labor details, an expense report, and other direct expenses that are in a pending state, those charges that are not yet posted to the project.

This report displays in detail every pending charge broken out by:

- Labor Hours
- Employee Expenses
- Other Direct Costs

Pending charges include:

- Hours on timesheets not yet posted in Costpoint
- Employee Expense reports not yet posted in Costpoint
- Employee Expense Commitments where an expense report has not been turned
- Other Direct Expenses for unposted vouchers and purchase orders

In addition, the report includes the following:

- Resource/Vendor ID
- Resource/Vendor Name
- Project Labor Category/Account
- Charge Date
- Pending Hours
- Pending Cost with Burden

You have the option to show detailed Labor Cost. There might be cases where you want to remove Labor Cost for security purposes.

Cost detail is hidden by default.

Prompts

Use the Pending Charges Detail Report prompts to configure the report.

Prompt Message	Description
Project Level	Select the project level at which you want to generate the report. The report rolls up all data to that level.
Limit Project(s)	Use this option to limit the report to selected projects. (If you make no selections, the report includes all projects.) In **Keywords**, enter one or more characters for which you want to search to retrieve projects. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the projects in the results that you want to include and click the arrow to move them to Choices. To select multiple projects that are together in the list, click the first project in the group and then press SHIFT as you click the last one in the group. To select multiple projects that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the projects in Choices.
Organization Type	Select the organization type that you want to include in the report. Valid options are: ▪ Owning Organization ▪ Performing Organization
Organization Level	Select the Organization level at which you want to generate the report.
Limit Organization(s)	Use this option to limit the report to selected organizations. (If you make no selections, the report includes all organizations.) In **Keywords**, enter one or more characters for which you want to search to retrieve organizations. The list displays values as a combination of ID and name, so you can search

Prompt Message	Description
	by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the organizations in Results that you want to include and click **Insert** to move them to Choices. To select multiple organizations that are together in the list, click the first organization in the group and then press SHIFT as you click the last one in the group. To select multiple organizations that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the organizations in Choices.
Limit Project Manager(s)	Use this option to limit the report to selected project managers. (If you make no selections, the report includes all project managers.) In **Keywords**, enter one or more characters for which you want to search to retrieve project managers. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Project Labor Hours Status Report

Use the Project Labor Hours Status report to monitor and manage labor hours at the resource level for existing projects.

To provide the most up-to-date picture, the report includes all unposted timesheet hours from Deltek Time Collection.

For each resource, the report displays the following:

- Inception-to-date (ITD) actual hours through the period preceding the current period in Costpoint Planning
- Unposted hours
- Actual hours for the current period in Costpoint Planning (<current period end date> **Actuals** column)
- Budget hours for the current fiscal period in Costpoint Planning (<current period end date> **Forecast** column)
- Estimate-at-completion (EAC) hours
- Hours spent to date (ITD actual hours + Unposted hours + Current period actual hours)
- Hours remaining (EAC hours – Hours spent to date)

The report displays subtotals for each project level and totals for the report as a whole.

Reconcile Project Labor Hours Status

Use the Costpoint Planning reports to reconcile data on the Project Labor Hours Status report.

These reports include the following:

- Project Status Report
- Hours Breakdown Report

To reconcile the Costpoint Business Intelligence Project Labor Hours Status report with Costpoint Planning:

1. Run the Project Labor Hours Status report in Costpoint Business Intelligence.
2. Run the Project Status report in Costpoint Planning (**Planning** » **Project Budgeting** » **Supplemental Reports** » **Project Status**).
3. In the **Budget Type** field, select **EAC**.
4. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
ITD Actual Hours + Current Period Actuals	Labor Hours for Contract to Date – you can expand these fields to verify hours by employee
Unposted Hours	Labor Hours for Unposted Time – you can expand these fields to verify hours by employee
Current Period Actuals	Labor Hours for Current Period – you can expand these fields to verify hours by employee

5. Run the Hours Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Hours Breakdown**).
6. Select **Budget**.
7. In the **Budget Type** field, select **EAC**.

8. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Total EAC Hours	Tot Hrs Bgt
Current Period Forecast	Total for monthly column (current period)

Prompts

Use the following prompts for the Project Labor Hours Status report.

Prompt Message	Description
Project	Enter all or part of a project ID. The report includes all projects with IDs that begin with your entry in this prompt.
Budget Type	Select **BUD** to use the latest budget information. Select **EAC** to use the latest EAC information.
Show Pending Charges	Select this check box to include pending charges in the report. If selected, the following are displayed: ▪ Pending charges (in hours) for each employee ▪ **ITD Plus Pending** column that has the ITD Actual Hours plus pending hours ▪ Hours Spent to Date which are pending hours in addition to ITD and Current Month Actual

Sample Report

This is a sample of the Project Labor Hours Status report.

Project Labor Hours Status

Resource ID	Resource Name	Resource Type Description	ITD Actual Hours 07/31/2020	ITD Burn Rate	08/31/2020 Actuals	08/31/2020 Forecast	Total EAC Hours	Hours Remain

Subtotal for 10105.10.001			**6,185.60**		**0.00**	**0.00**	**17,712.00**	**11,526**

Page 1 of 85

Project Report with Labor Detail

Use the Project Report with Labor Detail to view, for individual resources, an analysis of project labor hours to date and forecasted hours through the completion of the project.

In addition, the report displays the costs related to the labor hours shown in the detail section, the related revenue, and the resulting profit or loss.

For each resource for the project, the report displays the following:

- Inception-to-date (ITD) actual hours through the period preceding the current period in Costpoint Planning
- Actual hours for the current period in Costpoint Planning (<current period end date> **Actuals** column)
- Budget hours for the current fiscal period in Costpoint Planning (<current period end date> **Budget** column)
- Budget hours for each of the next six fiscal periods following the current period in Costpoint Planning
- Remaining budget hours beyond the next six fiscal periods (**Through Completion** column)
- Total estimate-to-complete (ETC) hours
- Total forecast hours (ITD actual hours + Total ETC hours)

- Total estimate-at-completion (EAC) hours

For each project, the report also provides the totals listed below. These are broken down into the same report columns as the resource labor costs (ITD actual, period budgets, remaining budget, and so on):

- Total labor hours
- Total labor cost
- Total labor burden
- Total labor cost with burden
- Other direct costs with burden
- Total cost
- Total revenue
- Profit or loss

Options

You can select how to display the report.

When you generate this report, you can:

- Select the project level at which you want to review labor detail.
- Select the projects, at the selected project level, that you want to include on the report.

Forecast Amounts

In most cases, amounts in the **Total Forecast** column match those in the **Total EAC** column.

If the EAC for a project in Costpoint Planning is not up to date, for example, those amounts may be different. In that case, the amounts in **Total Forecast**, which the report calculates from ITD actual amounts and from budget amounts, may provide more accurate approximations of the expected completion amounts.

Reconcile Project Report with Labor Detail

Use the Costpoint Planning reports to reconcile data on the Project Report with Labor Detail.

These reports include the following:

- Project Status
- Current Forecast
- Hours Breakdown
- Burdened Cost Breakdown

To reconcile the Costpoint Business Intelligence Project Report with Labor Detail report with Costpoint Planning:

1. Run the Project Report with Labor Detail in Costpoint Business Intelligence.
2. Run the Project Status report in Costpoint Planning.(**Planning** » **Project Budgeting** » **Supplemental Reports** » **Project Status**).
3. Select **Revenue**.
4. Compare the following:

Costpoint Business Intelligence: ITD to <prior period> Column	Costpoint Planning Report: (Fiscal Year To Date Column + Prior Years Column – Current Period Column)
Total Revenue	Revenue
Total Labor Hours	Labor Hours
Total Labor cost	Labor Cost
Total Cost	Total Expense
Profit/Loss	Profit

Costpoint Business Intelligence: Current Period Actuals Column	Costpoint Planning Report: Current Period Column
Total Revenue	Revenue
Total Labor Hours	Labor Hours
Total Labor cost	Labor Cost
Total Cost	Total Expense
Profit/Loss	Profit

5. Expand the **Labor Hours** section to view the actual hours by employee.
   Check the actual hours by employee.

Costpoint Business Intelligence: ITD Actual Column	Costpoint Planning Report: Contract to Date Column
Actual Hours — You can expand these fields to view employee detail	**Total Labor Hours** — you can expand these fields to view employee detail

6. Run the Current Forecast report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Current Forecast**).
7. Compare the following for the six months of forecasts between the two reports:

> **Note:** This report must be run for the next period.

Costpoint Business Intelligence: Total Forecast Budget Column	Costpoint Planning Report: Forecast Total Column
Total Revenue	Revenue
Total Labor Cost	Labor Cost
Total Cost	Add the following columns: Labor Cost, Non-Labor Cost, and Indirect Cost.
Profit/Loss	Profit
EAC	Bgt/EAC Total

8. Select **EAC**.
9. Run the Hours Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports**).
10. Compare the following:

Costpoint Business Intelligence: EAC Column	Costpoint Planning Report: Total HRS BGT Column
Total Labor Hours	Total
Lines by employee from the 6 monthly forecast columns and EAC column	Lines by employee from the 6 Monthly Forecast columns and Total HRS BGT column

11. Run the Burdened Cost Breakdown report (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**). Compare the following for **ITD to <prior period>** and **Current Period Actuals** amounts:

Costpoint Business Intelligence: ITD to <prior period> Column	Costpoint Planning Report: ITD Total – Current Period
Total Labor Cost with Burden	Labor
Other Direct Cost with Burden	Calculated by Total - Labor
Total Costs	Total

Costpoint Business Intelligence: Current Period Actuals Column	Costpoint Planning Report: Current Period
Total Labor Cost with Burden	Labor
Other Direct Cost with Burden	Calculated by Total - Labor
Total Costs	Total

Costpoint Business Intelligence: Current Period Actuals Column	Costpoint Planning Report: Current Period
Costpoint Enterprise Report Current Period Actual Column	Budgeting and Planning Report Current Period

12. Run the Burdened Cost Breakdown report (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**).
13. Select **Budget**.
14. In the **Budget Type** field, select **EAC**.
15. Compare the following for the six months of forecasts between the two reports:

Costpoint Business Intelligence: ETC Periods	Costpoint Planning Report: ETC Period
Total Labor Cost with Burden	Labor
Other Direct Cost with Burden	Calculated by Total - Labor
Total Costs	Total

Costpoint Business Intelligence: EAC column	Costpoint Planning Report: Tot Burd Budget column
Total Labor Cost with Burden	Labor
Other Direct Cost with Burden	Calculated by Total – Labor
Total Costs	Total

Costpoint Business Intelligence: Total Forecast Budget column	Costpoint Planning Report: Forecast Total column
Total Labor Cost with Burden	Labor
Other Direct Cost with Burden	Calculated by Total - Labor
Total Costs	Total

Prompts

Use the following prompts to run the Project Report with Labor Detail report.

Prompt Message	Description
Project Level	Select the project level at which you want to generate the report. The report rolls up all data to that level.

Prompt Message	Description
Budget Type	Select **BUD** to use the latest budget information. Select **EAC** to use the latest EAC information.
Limit Project(s)	Use this option to limit the report to selected projects. (If you make no selections, the report includes all projects.) In **Keywords**, enter one or more characters for which you want to search to retrieve projects. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the projects in Results that you want to include and click **Insert** to move them to Choices. To select multiple projects that are together in the list, click the first project in the group and then press SHIFT as you click the last one in the group. To select multiple projects that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the projects in Choices.
Show Pending Charges	Select this check box if you want to display the pending charges. If selected, the **Pending Charges** column will display which includes the hourly detail by employee, labor cost, labor burden, other direct cost with burden and revenue. In addition, the **ITD Plus Pending** column will be included in the report that displays the total of ITD previous Period plus Current Month Actuals amount plus pending charges.

Sample Report

This is a sample of the Project Report with Labor Detail report.

Page 1 of ?

Project Status Cost Summary

Use the Project Status Cost Summary report to monitor the cost status of the projects for an organization or set of organizations by comparing estimate-at-completion (EAC) cost amounts, as of the current fiscal period, to total baseline budget cost amounts.

For each project, the report displays the following:

- Inception-to-date (ITD) actual burdened cost through the period preceding the current period in Costpoint Planning
- Estimate-to-complete (ETC) burdened cost
- Forecast burdened cost (ITD actual burdened cost + ETC burdened cost)
- Total baseline budget burdened cost
- Variance between forecast cost and baseline budget cost (Total baseline budget burdened cost – Forecast burdened cost)
- Variance percentage (Variance / Total baseline budget burdened cost)

To call your attention to potential issues, the report highlights negative or positive variances greater than $25,000 and variance percentages of 5 percent or more.

Options

You can select options on how you want the report to be displayed.

When you generate this report, you can do the following:

- Group projects based on owning organization or performing organization.
- Specify the organization level to which you want to roll up the data.
- Select the project level to which you want to roll up the data.
- Select the organizations, at the specified organization level, that you want to include on the report.
- Select the projects, at the specified project level, that you want to include on the report.

Note: If you do not filter the report for specific projects, and if costs for any projects have been charged to, or budgeted at, a higher project level than the project rollup level you specify on the prompts page, the report displays the total of those additional costs in a separate detail row without a project ID. It also includes those costs in the organization subtotals so those subtotals reflect the total costs for the organization.

Reconcile Project Status Cost Summary

Use the Costpoint Planning reports to reconcile data on the Project Status Cost Summary report.

These reports include the following:

- Project Status Cost Summary
- Current Forecast

To reconcile the Costpoint Business Intelligence Project Status Cost Summary report with Costpoint Planning:

1. Run the Project Status Cost Summary report in Costpoint Business Intelligence.
2. Run the Project Status report in Costpoint Planning (**Planning** » **Project Budgeting** » **Supplemental Reports**).
3. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
ITD Actual Amount	Contract to Date Total Expense

4. Run the Current Forecast report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports**).

   Note: This report must be run for the next period.

5. Select **Budget**.

6. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Baseline Budget Amount	The sum of Labor Cost, Non-Labor Cost, and Indirect Cost from the Bgt/EAC Total column

7. In the **Budget Type** field, select **EAC**.
8. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Forecast Amount	The sum of Labor Cost, Non-Labor Cost, and Indirect Cost from the Forecast Total column

9. Verify that the **ETC Amount** total in the Project Status Cost Summary report in Costpoint Business Intelligence is equal to the **Forecast Amount** column less the **ITD Actual Amount** column in the same report.

> **Note: Variance Amount** and **Variance Percentage** are report calculations that can be verified independently once the other figures are confirmed against Costpoint Planning.

Prompts

Use the prompts to run the Project Status Cost Summary report.

Prompt Message	Description
Primary Group	Indicate if you want the report to group data by owning organization or by performing organization.
Budget Type	Select **BUD** to use the latest budget information. Select **EAC** to use the latest EAC information.
Organization Level	Select the level of the organization structure at which you want to review project costs. The report rolls up all data to that level.
Project Level	Select the project level at which you want to review project costs. The report rolls up all data to that level.
Show Pending Charges	Select this check box if you want to display the pending charges. If selected, a column with pending charges will be included in the report with the total of all charges for labor plus burden, and other direct costs plus burden. Also, a column for ITD Plus Pending (total of ITD amount plus pending charged) will display.
Limit Organizations	Use this option to limit the report to selected organizations. (If you make no selections, the report includes all organizations.)

Prompt Message	Description
	In **Keywords**, enter one or more characters for which you want to search to retrieve organizations. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the organizations in Results that you want to include and click **Insert** to move them to Choices. To select multiple organizations that are together in the list, click the first organization in the group and then press SHIFT as you click the last one in the group. To select multiple organizations that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the organizations in Choices.
Limit Projects	Use this option to limit the report to selected projects. (If you make no selections, the report includes all projects.) In **Keywords**, enter one or more characters for which you want to search to retrieve projects. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the projects in Results that you want to include and click **Insert** to move them to Choices. To select multiple projects that are together in the list, click the first project in the group and then press SHIFT as you click the last one in the group. To select multiple projects that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the projects in Choices.

Subtotal for Organization 04		4,141.72	2,046.84	6,188.56	0.00	4,141.72	0.00	(4,141.72)	0.00
Total		120,072,852.32	11,125,449.51	131,198,301.83	594,832.48	120,667,684.80	93,161,305.76	(27,506,379.03)	(29.53

Project Subcontractor Status Report

Use the Project Subcontractor Status report to monitor and manage subcontractor labor and other subcontractor costs for existing projects.

To provide a more complete picture, the report includes the cost of unfulfilled materials and services commitments from Costpoint.

> **Note:** This report only includes costs identified as subcontractor costs in Costpoint Planning. It does not include other direct costs.

For each subcontractor resource, the report displays the following:

- Inception-to-date (ITD) actual burdened cost through the period preceding the current period in Costpoint Planning
- Actual burdened cost for the current period in Costpoint Planning (<current period end date> **Actuals** column)
- Burdened commitment cost
- Total cost to date (ITD actual burdened cost + Current period actual burdened cost + Commitment burdened cost)
- Estimate-at-completion (EAC) burdened cost
- Balance remaining (EAC burdened cost – Total cost to date)

The report displays subtotals for each project level and totals for the report as a whole.

Reconcile Project Subcontractor Status

Use the Costpoint Planning reports to reconcile data on the Project Subcontractor Status report.

These reports include the following:

- Burdened Cost Breakdown (Cost Analysis)
- Burdened Cost Breakdown (Budget Development)

To reconcile the Costpoint Business Intelligence Project Subcontractor Status report with Costpoint Planning:

1. Run the Project Subcontractor Status report in Costpoint Business Intelligence.
2. Run the Burdened Cost Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**).
3. Click **Mtls&Subs**.
4. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
ITD Actual Costs	Total of the 'Subs' line from ITD Total column
Commitments	Total of the 'Subs' line from Commit column
Current Period Actuals	Total of the 'Subs' line from Current Period column

5. Run the Burdened Cost Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**).
6. Click **Subcontracts**.
7. In the **Budget Type** field, select **EAC**.
8. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report Total Burden Budget Column
EAC	Subcontracts and Other Mtls & Subs

Prompt

Use the prompts to run the Project Subcontractor Status report.

Prompt Message	Description
Project	Enter all or part of a project ID. The report includes all projects with IDs that begin with your entry in this prompt.
Budget Type	Select **BUD** to use the latest budget information. Select **EAC** to use the latest EAC information.

Sample Report

EAC is the selected Budget Type for this Project Subcontractor Status report.

Project Subcontractor Status

PSR Report Template

The PSR Report Template helps you to get started in creating reports based on PSR Report tables in Costpoint Planning.

Prompts

The prompts for the PSR Report Template include fields such as Company, Rate Type, Project Level, and others.

Prompt Message	Description
Company	Select the Company that you want to display in the report.
Rate Type	Select the Rate Type that you want to display in the report.

Prompt Message	Description
Budget/EAC	Select either **Budget** or **EAC** to indicate if you want to use budget or EAC in the report.
Project Level	Select the project level at which you want the report printed.
Account Level	Select the account level at which you want the report printed.
Select Project(s)	Select the projects that you want to include in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Project Manager(s)	Select the project manager(s) that you want to include in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

This is a sample PSR Report Template.

Real Time Project Status Report

Use the Real Time Project Status Report to view the most current status of a project or group of projects versus the budget or estimate to complete.

If you are entering your budgets and estimate to complete forecasts in the Costpoint Planning module and calculating the pending charges in that module, you can get a real time status of projects. The report includes real time calculations of your revenue, labor, non-labor, and burdens compared to your most recent baseline budget or estimate at completion (EAC) forecast.

Prompts

Use the prompts to run the Real Time Project Status report.

Prompt Message	Description
Primary Group	Select the primary grouping for the report: ▪ Project ▪ Project Manager ▪ Owning Organization ▪ Performing Organization ▪ Customer
Rate Type	Select either **Actual** or **Target** to indicate if you want to use actual rates or target rates in the report.
Budget/EAC	Select either **Budget** or **EAC** to indicate if you want to use budget or EAC forecast in the report.
Calculate profit as percentage of	Select whether to calculate profit as percent of **Costs** or **Revenue**.
Limit Projects	Use this option to limit the report to selected projects. (If you make no selections, the report includes all projects.) In **Keywords**, enter one or more characters for which you want to search to retrieve projects. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Click to list the matching projects in Results. Select the projects in Results that you want to include and click **Insert** to move them to Choice. To select multiple projects that are together in the list, click the first project in the group and then press SHIFT as you click the last one in the group. To select multiple projects that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the projects in Choice.

Prompt Message	Description
Limit Project Managers	Use this option to limit the report to selected project managers. (If you make no selections, the report includes all project managers.) In **Keywords**, enter one or more characters for which you want to search to retrieve project managers. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Click to list the matching project managers in Results. Select the project managers in Results that you want to include and click **Insert** to move them to Choice. To select multiple project managers that are together in the list, click the first project manager in the group and then press SHIFT as you click the last one in the group. To select multiple project managers that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the project managers in Choice.
Project Level	Select the project level at which you want the report printed. All lower levels will be rolled up for the report.
Organization Level	Select the organization level at which you want the report printed. All lower levels will be rolled up for the report.
Account Level	Select the account level at which you want the report printed. All lower levels will be rolled up for the report.
Column 1-7	Select the data you want the report to display in each column.

Revenue Forecast Report

Use the Revenue Forecast report to review projected revenue for one or more organizations for the next 12 months based on data for both existing projects and new business projects.

You can control how firm the forecasted revenue amounts are by specifying a minimum win probability for new business projects.

For each project, the report displays the following:

- Win probability (100 percent for all existing projects)
- Contract value
- Forecast revenue amounts for the next 12 months following the current period in Costpoint Planning

For each organization, the report displays backlog revenue, non-backlog revenue, and total forecast revenue subtotals for each of these columns, along with totals for the report as a whole.

Options

You can choose how to display the report.

When you generate this report, you can do the following:

- Group projects based on owning organization or performing organization.
- Specify the organization level to which you want to roll up the data.
- Select the project level to which you want to roll up the data.

- Specify a minimum win probability. Only projects with a higher win probability than this percentage are included.
- Exclude or include new business projects.
- Select the organizations, at the specified organization level, that you want to include on the report.

Contract Value

There are different contract values for backlog projects and new business projects.

For backlog projects, the contract value is calculated as Project Value Fee + Project Value Costs. For new business projects, the contract value is the total revenue budget.

Project Rollup Notes

The report rolls up revenue for backlog projects to the project level that you specify on the prompts screen.

Note the following about the project rollup option:

- The report does not roll up revenue for new business projects. Those amounts are always displayed at the level they are entered in Costpoint Planning.
- If you do not filter the report for specific projects, and if revenue for any projects has been budgeted at a higher project level than the project rollup level you specify on the prompts page, the report displays the total of that additional revenue in a separate detail row without a project ID. It also includes that revenue in the organization subtotals so those subtotals reflect the total projected revenue for the organization.

Reconcile Revenue Forecast

These are the Costpoint Planning reports you can use to reconcile data on the Revenue Forecast report.

These reports include the following:

- Project Status
- Current Forecast
- Audit/Modify Non-Backlog Project Budget

To reconcile the Costpoint Business Intelligence Revenue Forecast report with Costpoint Planning:

1. Run the Revenue Forecast report in Costpoint Business Intelligence.

   > **Note:** Projects that do not have monthly forecasts within the next 6 months are excluded from the report. Use the Current Forecast report to confirm if there are monthly forecasts for each of the detail projects. See Step 4 for details.

2. Run the Project Status report in Costpoint Planning (**Planning** » **Project Budgeting** » **Supplemental Reports**) to validate **Contract Value** for existing projects.
3. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report Contract Value Total Column
Contract Value for the line item with the same Project ID	Total Expense

4. Run the Current Forecast in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports**) to validate the monthly forecasts for each of the detail projects.

Note: This report must be run for the next period.

5. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Backlog projects	Total Revenue for each monthly forecast

6. Run the Audit/Modify Non-Backlog Project Budget report in Costpoint Planning (**Planning** » **New Business Budgeting** » **Actions/Processing** » **New Business Budgets**) to validate the contract value and monthly forecasts of non-backlog/new business projects.
7. Click **View** next to the desired project and latest budget version number, and select **REVBD** from the drop-down list.
8. Export the report to Microsoft Excel to generate the totals.
9. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Total Contract	Totals
Monthly forecast	Monthly columns

Note: If there are no forecasts in the specified period for a particular line item, the line is excluded from the Costpoint Business Intelligence report.

Prompts

Use the prompts to configure the Revenue Forecast report.

Prompt Message	Description
Primary Group	Indicate if you want the report to group data by owning organization or by performing organization.
Budget Type	Select **BUD** to use the latest budget information.

Prompt Message	Description
	Select **EAC** to use the latest EAC information.
Organization Level	Select the level of the organization structure at which you want to review project costs. The report rolls up all data to that level.
Project Level	Select the project level at which you want to review project costs. The report rolls up all data to that level.
Include projects with probability greater than	Enter a win probability cutoff percentage. Only projects with a win probability greater than your entry are included on the report.
Exclude New Business	Select **No** to include new business projects on the report. The report includes new business projects that satisfy the probability requirement you specify in **Include projects with probability greater than**. Select **Yes** to exclude all new business projects from the report.
Limit Organization(s)	Use this option to limit the report to selected organizations. (If you make no selections, the report includes all organizations.) In **Keywords**, enter one or more characters for which you want to search to retrieve organizations. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**. Select the organizations in Results that you want to include and click **Insert** to move them to Choices. To select multiple organizations that are together in the list, click the first organization in the group and then press SHIFT as you click the last one in the group. To select multiple organizations that are not listed together, press CTRL as you click each one. When you generate the report, it includes only records for the organizations in Choices.

Sample Report

This is a sample of the Revenue Forecast report.

T&M Profitability Report

Use the T&M Profitability report to review actual employee contributions to revenue and profit for existing Time and Materials (T&M) projects through the current fiscal period in Costpoint Planning, along with projected contributions for the next six fiscal periods.

Employees are grouped by project and by project labor category (PLC).

For each employee, the report displays the following revenue, burdened cost, and profit amounts:

- Inception-to-date (ITD) amounts through the period preceding the current period in Costpoint Planning
- Projected amounts for the current period in Costpoint Planning (<current period end date> **Budget** column)
- Projected amounts for the next five fiscal periods
- Projected amount beyond the next six fiscal periods (ETC amount – Sum of the projected period amounts)
- Estimate-to-complete (ETC) amount

- Estimate-at-completion (EAC) amount
- Forecast amount (ITD amount + ETC amount)

Revenue Amounts

The report calculates employee revenue amounts for a PLC using the PLC billing rate.

The report uses the following calculation for the employee revenue amounts: Employee's actual or budgeted hours for the PLC × PLC billing rate.

Forecast Amounts

In most cases, amounts in the **Forecast** column match those in the **EAC** column.

If the EAC for a project in Costpoint Planning is not up to date, for example, those amounts may be different. In that case, the amounts in **Forecast**, which the report calculates from ITD actual amounts and from budget amounts, may provide more accurate approximations of the expected completion amounts.

Reconcile T&M Profitability

Use the Costpoint Planning reports to reconcile your T&M Profitability reports.

These Costpoint Planning reports include the following:

- T&M Billable Revenue Breakdown
- Burdened Cost Breakdown
- Revenue Breakdown
- Burdened Cost Breakdown

To reconcile the Costpoint Business Intelligence T&M Profitability report with Costpoint Planning:

1. Run the T&M Profitability report in Costpoint Business Intelligence.
2. Run the T&M Billable Revenue Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **T&M Billable Revenue Breakdown**).
3. Compare the following:

Costpoint Business Intelligence ITD Amount Column	Costpoint Planning Report ITD Amt Column
Revenue	ITD Amt

4. Run the Burdened Cost Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**).
5. Compare the following:

Costpoint Business Intelligence ITD Amount Column	Costpoint Planning Report ITD Total Column
Revenue	Labor

6. Run the T&M Billable Revenue Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **T&M Billable Revenue Breakdown**).
7. Select **Latest EAC**.
8. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Billing Rate	Bill Rate
Revenue from EAC Column	Total Revenue Labor Amount from ITD Amt Column
Revenue from Monthly Forecast Columns	Total Revenue Labor from Monthly Forecast Columns

9. Run the Burdened Cost Breakdown report in Costpoint Planning (**Planning** » **Project Budgeting** » **Active Level Reports** » **Burdened Cost Breakdown**).
10. Select the **Latest EAC**.
11. Compare the following:

Costpoint Business Intelligence	Costpoint Planning Report
Burdened Labor from EAC Column	Labor from Tot Burd Bgt Column
Burdened Labor from Monthly Forecast Columns	Labor from Monthly Forecast Columns

Prompt

Use the prompt to select a project for the T&M Profitability report.

Prompt Message	Description
Project (starts with)	Enter all or part of a project ID. The report includes all projects with IDs that begin with your entry in this prompt.
Budget Type	Select **BUD** to use the latest budget information. Select **EAC** to use the latest EAC information.

Sample Report

This is a sample of the T&M Profitability report.

Procurement

The Procurement folder stores standard Procurement reports and dashboards for manufacturing administrators and procurement staff.

The contents of this folder are available to the following user groups:

- CER All
- CER Materials
- CER Materials Manufacturing All Secure
- CER Procurement Secure

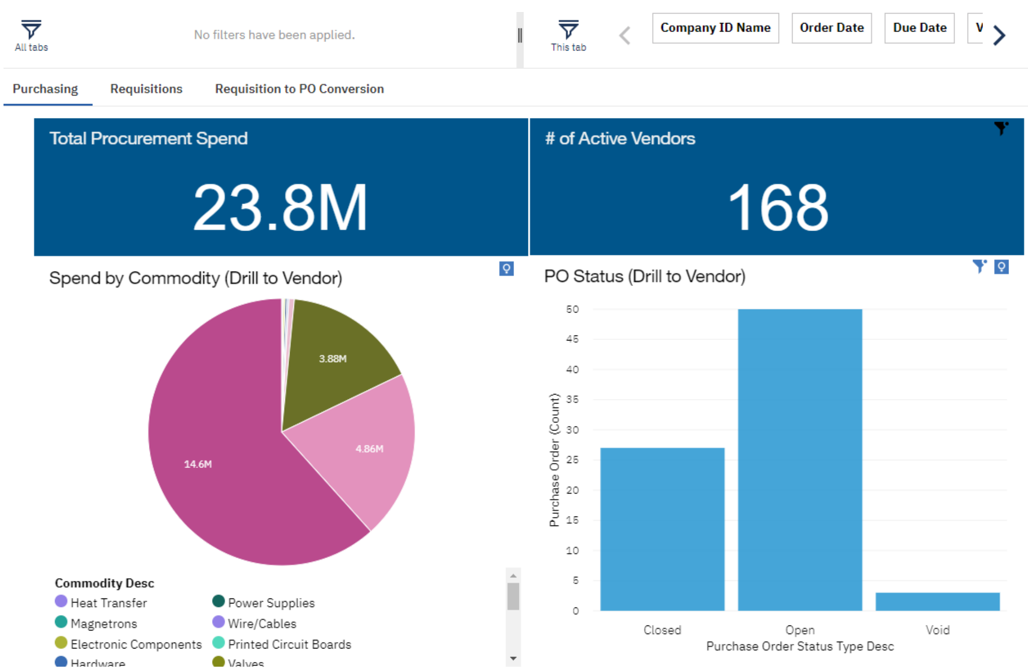
Procurement Dashboards

The template dashboards for Procurement allow you to create and share interactive analytical dashboards that use data from the Procurement package.

Procurement Dashboard (Header or Line Level Approval)

The Procurement dashboard displays analytics for both purchasing and procurement planning with requisitions.

The data provided is based on the Requisition Approval Assignments (Header or by Line) that are set in the Procurement Planning module.



The Procurement dashboard includes three tabs.

Purchasing Tab

- **Total Procurement Spend:** This report displays the total amount spent on procurement, organized by purchase order (PO) type. This information helps you track your spending for the year, whether you are above or below budget, and if you need to make adjustments.
- **# of Active Vendors:** This report displays the total number of vendors with an Active status, by Company ID. This number adjusts as you interact with other areas on the dashboard, providing visibility into your vendor count for multiple procurement scenarios.
- **Spend by Commodity (Drill to Vendor):** This report displays the total purchases by commodity code. To see which vendors you are using the most, you can drill down to view each commodity spend by vendor.

  Note: Lines without commodity are excluded. Alternatively, you can remove this filter.
- **PO Status (Drill to Vendor):** This report displays the number of purchase orders that are closed, open, and void. You can modify this view to show other PO statuses. Drill through to see the status count for an individual vendor.

Requisitions Tab

- **Requisitions Awaiting Approval by Approver:** This report displays the requisitions awaiting approval. Viewing requisitions that are In-Approval by the current approver can help you understand where the approval process has stalled and where to take action to move the requisitions through the pipeline.

  The drill-thru detail report allows you to select one or more approvers and see a list of requisitions that are in their bucket for approval. It also shows how many days the requisitions have been awaiting approval.
- **Requisition Status by Requisitioner:** This report displays a requisition status count for each requisitioner. The counts are for approved, pending, rejected, and in approval statuses.

Requisition to PO Conversion Tab

- **Approved Requisitions Awaiting PO Conversion by Buyer (Drill Thru to Detail):** This report displays the number of requisitions that have been approved but are awaiting conversion to a PO. This information is shown for each buyer so that you can analyze buyer performance.

  The drill thru detail report shows the date the requisition was approved, the number of days since approval, the target date to create the PO, and the number of days until or past the target release or place date. The number of unassigned requisitions are also provided and included in the drill thru report.

Procurement Reports

The Procurement folder contains multiple reports that use the Procurement framework model.

These reports are:

- Buyer Requisition Worksheet

- PO Commitments Detail
- PO Payment & Remaining Balance
- Purchase Order
- Requisitions
- Requisitions Pending PO Conversion
- Vendor Exclusion

Buyer Requisition Worksheet

The Buyer Requisition Worksheet provides buyers with the critical information needed to make purchasing decisions.

Use this worksheet to view past purchasing activity and approved vendor information for items listed on approved requisitions.

Prompts

Complete the required prompts to run the Buyer Requisition Worksheet.

Prompt Message	Description
Company	Select the company to use when running the report.
Primary group	Select the primary group to sort on: ▪ Buyer ▪ Item ▪ Requisition
Requisition status	Select the status of the requisitions to include on the report: ▪ Approved ▪ In Approval ▪ Pending
Number of PO lines to display	Enter the number of purchase order lines to display.
Number of vendor quote lines to display	Enter the number of vendor quote lines to display.
Number of RFQ lines to display	Enter the number of RFQ lines to display.
Exclude items older than	Enter the date to exclude older objects.
Select one or more requisitions	Iin the **Keywords** field, enter a portion of one or more requisition IDs and click to return requisitions to include on the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select one or more buyers	In the **Keywords** field, enter a portion of one or more buyer IDs and click to return buyers to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Include requisition lines with no items	Select whether or not to include requisition lines with no items.

PO Commitments Detail Report

The PO Commitments Detail report provides details of the purchase order commitments shown on the Project Status Report and serves as a drill-thru from that report.

You can run this report as a stand-alone report or as a drill-thru target from other reports.

Before You Run This Report

You must run **Compute/Print Purchasing Commitments** in Costpoint before running the Purchase Order Commitments Detail report.

The following options are available in the Compute/Print Purchasing Commitments screen in Costpoint:

- **Real Time**: If this option is selected, the commitments data is stored in the PO_RT_COMMIT_SUM and PO_RT_COMMIT_DETL tables. The report includes all transactions regardless of the transaction dates, so you do not need to enter prompt information for fiscal year, period, or subperiod.
- **By Period End Date**: If this option is selected, the commitments data is stored in the PO_COMMIT_SUM and PO_COMMIT_DETL tables. The report calculates commitments based on fiscal year, period, and subperiod, and you must enter information for these prompts, which display when you select a company.

Prompts

Select values for the required prompts to run the PO Commitments Detail report.

Prompt Message	Description
Company	Select the company to include in the report.
Inquiry Method	Select **By Period** to show commitments for the fiscal year, period, and subperiod entered in the prompts. Use this option if the Print/Compute Purchasing Commitments was calculated By Period End Date. Select **Real Time** to show commitments for all purchase requisition/purchase order activity in Costpoint, regardless of the transaction dates. Use this option if the Print/Compute Purchasing Commitments was calculated by Real Time.
Fiscal Year	Enter the fiscal year to use for the report. This option displays only if you selected**By Period** for the **Inquiry Method** prompt.
Period	Select the period to use for the report. This option displays only if you selected **By Period** for the **Inquiry Method** prompt.
Subperiod	Select the subperiod to use. This option displays only if **By Period** is selected for the **Inquiry Method** prompt.

Prompt Message	Description
Project starts with	In the **Keywords** field, enter a portion of one or more project IDs and click **Search** to list projects to include on the report. Then, select a project. To narrow the search, select an option in the dropdown list. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.
Account	In the **Keywords** field, enter a portion of one or more account IDs and click to list accounts to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Organization	In the **Keywords** field, enter a portion of one or more organizations and click to list organizations to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Note: To optimize the display of project IDs in the **Project starts with** field, this prompt's screen limits the number of project IDs returned to 1000. Because of this, you should enter as much of the project ID as possible when you search for projects. If your search is too general, the projects you want may not be included in the 1000 that are returned.

PO Payment & Remaining Balance Report

Use the PO Payment & Remaining Balance report to view the total PO amount, payments made (cash disbursements), and the remaining balance for each purchase order.

Prompts

Select prompt values before running the PO Payment & Remaining Balance report.

Prompt Message	Description
Company	Select the company to use when running the report.
Currency Type	Choose the type of currency to display in the report. ▪ **Functional**: View amounts in the Functional Currency ▪ **Transactional**: View amounts in the Transactional Currency
PO Type	Select one or more purchase order types for the report.
PO Status	Select one or more purchase order statuses for the report.
Select PO Number(s)	In the **Keywords** field, enter a portion of one or more purchase order numbers and click the **Search** icon to view results and select purchase orders for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options.

Prompt Message	Description
	If applicable, click the right-arrow to move your selected results to **Choices**.
Select Account(s)	In the **Keywords** field, enter a portion of one or more accounts and click the **Search** icon to view results and select accounts for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Org(s)	In the **Keywords** field, enter a portion of one or more organizations and click the **Search** icon to view results and select organizations for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Project(s)	In the **Keywords** field, enter a portion of one or more project IDs or names and click the **Search** icon to view results and select projects for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Buyer(s)	In the **Keywords** field, enter a portion of one or more buyers and click the **Search** icon to view results and select buyers for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Vendor(s)	In the **Keywords** field, enter a portion of one or more vendors and click the **Search** icon to view results and select vendors for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
Remaining Balance	In the **From:** field, enter the beginning value for the remaining balance range. In the**To:** field, enter the end value for the remaining balance range. You can opt to select the **Lowest value** or the **Highest value** possible for the remaining balances.
Order Date	In the **From:** field, enter the start date assigned to purchase orders or click the calendar icon to select the date. In the**To:** field, enter the end date assigned to purchase orders or click the calendar icon to select the date. You can opt to select the **Earliest date** or the **Latest date** possible for the purchase order dates.

Purchase Order Report

The Purchase Order report uses a basic purchase order format.

This report provides the flexibility to select the additional information needed from the header and line levels to print on the report. The Purchase Order report is written with US dollars as the currency.

Prompts

Select values for the Purchase Order prompts to run the report.

Prompt Message	Description
Company	Select the company to use to run the report.
Purchase Order Type	Select one or more purchase order types for the report.
Include Previously Printed PO's	Select an option to specify whether or not POs that have been printed before will be included in the report.
Include Project/Acct/Org Breakdown	Select an option to specify whether or not the project account organization breakdown will be included in the report.
Print Original Due Date	Select an option to specify whether or not the original due date will be printed.
Print Line Charge Type Code	Select **Yes** or **No** to specify whether the line charge type code will be printed.
Print NAICS Code	Specify whether to print the NAICS code in the header of the purchase order.
Print NAICS SBA Size Standards for All Bus Size	Specify whether to print the corresponding SBA Size and Business Size standards linked to the PO Header NAICS code regardless of the business size.
Position of Header Notes	Specify where to place the header notes on the report. Select **Top** or **Bottom**.
Position of Header Text/Doc/SOW	Specify where to place the header on the report. Select **Top** or **Bottom**.
Select Purchase Order(s)	In the **Keywords** field, enter a portion of one or more purchase order IDs and click **Search** to list purchase orders to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
Select PO Release Number(s)	In the **Keywords** field, enter a portion of one or more PO release numbers and click to list PO release numbers to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Buyer(s)	In the **Keywords** field, enter a portion of one or more buyer IDs and click to list buyers to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select the Return Address Branch Location	In the **Keywords** field, enter a portion of one or more address codes and click to list addresses to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select the Transaction Currency of PO's	In the **Keywords** field, enter a portion of one or more transaction currencies and click to list purchase orders to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Requisitions Pending PO Conversion Report

The Requisitions Pending report gives buyers and purchasing managers the ability to see requisitions for which purchase orders have not yet been generated.

The report includes requisitions that are in a pending, in-approval, approved, or rejected status.

Prompts

Use the prompts to select data for the Requisitions Pending PO Conversion report.

Prompt Message	Description
Company	Select the company to use when running the report.
Primary Group	Select the primary grouping for the report: ▪ Approver ▪ Buyer ▪ Requisition ▪ Requisition Status ▪ Requisitioner
Requisition status	Select the statuses of the requisitions to include: ▪ Approved ▪ In Approval ▪ Pending ▪ Rejected
Include Requisitions without Assigned Buyer	Select **Yes** to include only those requisitions without an assigned buyer.
Limit Requisitions	Enter a portion of one or more IDs in the **Keywords** field and click to narrow the primary group you selected in the previous field. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Vendor Exclusion Report

The Vendor Exclusion report provides a list of purchase orders that have vendors on the Exclusion list so that you can take action to stop those purchase orders.

If you are configured for the GovWin IQ to Costpoint Vendor integration, with the Import GovWin IQ Vendor Data, then the Vendor Exclusion list report will display any purchase orders where the PO Vendor has been flagged as Active on the SAM.gov Exclusion list.

The exclusion data comes from GovWin IQ and is updated every time the GovWin IQ to Costpoint Vendor integration is run. Note, however, that the exclusion data may not be a complete representation of exclusions.

Attention: For details on the source data and vendor fields updated by the GovWin IQ integration, see the field mapping information in the GovWin IQ Integration Setup Guide.

Prompts

Select prompt values before running the Vendor Exclusion report.

Prompt Message	Description
Company	Select a company to use when running the report.
Select Purchase Order(s)	In the **Keywords** field, enter a portion of one or more purchase order IDs and click to list purchase orders to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select PO Release Number(s)	In the **Keywords** field, enter a portion of one or more PO release numbers and click to list PO release numbers to include on the report.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Buyer(s)	In the **Keywords** field, enter a portion of one or more buyer IDs and click to list buyers to include on the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
PO Status	Select one or more PO statuses to use as a filter to include in the report.
Order Date Range	In the **From** field, enter the beginning value for the order date range. In the **To** field, enter the end value for the order date range. You can opt to select the **Lowest value** or the **Highest value** possible for the date range.
Active Date Range	In the **From** field, enter the beginning value for the active date range. In the **To** field, enter the end value for the active date range. You can opt to select the **Lowest value** or the **Highest value** possible for the date range.

Procurement Drill-Thru Reports

Certain reports are drill-thru only, meaning they are not intended to be run on their own, but accessed from the links in other parent reports.

The necessary information that is retrieved to run the report is based on the parent report, such as the Requisitions Pending PO Conversion report. No input is required.

PO Header and Line Detail - Drill Thru Only

The PO Header and Line Detail report shows detailed information for a specific purchase order.

This report displays information from the Purchase Order header, Purchase Order line, and Purchase Order line account for a selected purchase order. Use this report as a drill-through from the Requisitions report.

This is a sample PO Header and Line Detail Drill-Thru report.

Projects

This folder stores Deltek standard reports and dashboards for Projects.

The contents of this folder are available to the following user groups:

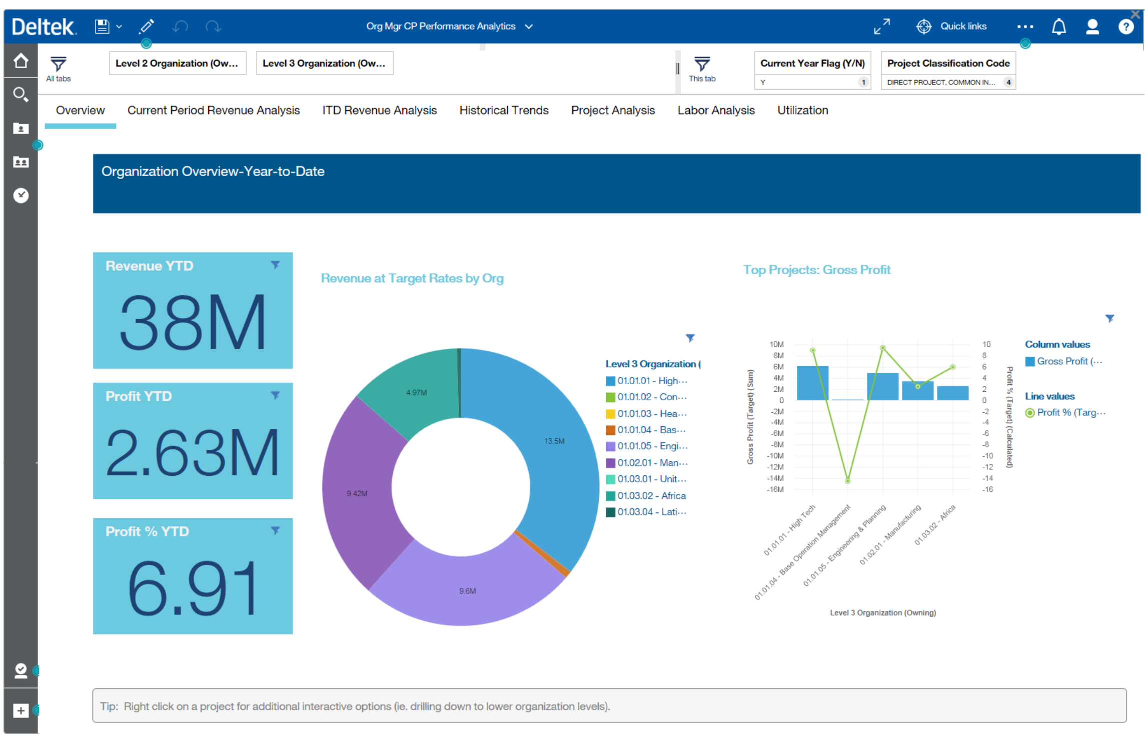
- CER All
- CER Projects
- CER Projects Secure

Projects Dashboards

The template dashboards for Projects allow you to create and share interactive analytical dashboards that uses the Costpoint Projects Data.

Org Mgr CP Performance Analytics

Use the Org Mgr CP Performance Analytics dashboard to see project performance, utilization, and other metrics of the owning organization.

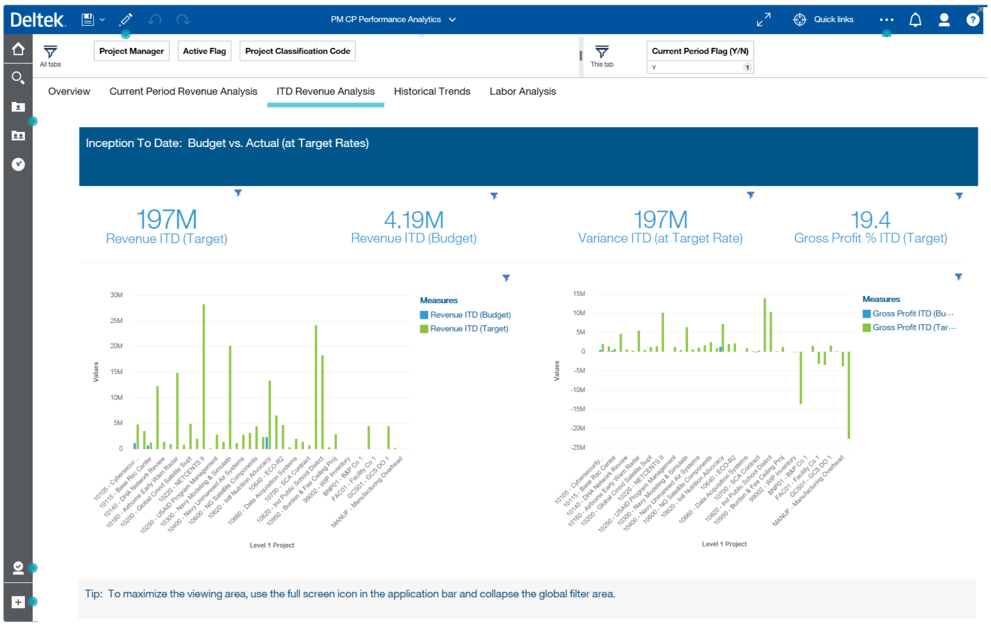


The filters for Owning Organization levels 2 and 3 are preset in the dashboard but can be easily changed to other levels. Additionally the Organization folder has levels that will show the data by performing organization if that is desired. This dashboard has 7 tabs that cover the different views of the organization data.

- **Overview** - This tab shows year-to-date information leveraging the current year flag, so it will always show the YTD information through the current month which is controlled by your CBI Administrator. Measures include Revenue, Profit, and Profit % as well as charts that compare actual revenue (at target rates) versus budgets.
- **Current Period Revenue Analysis** - This tab focuses on the current period performance showing revenue versus budget and gross profit (that is, revenue less direct expenses). The dashboard is filtered for Direct Projects only.
- **ITD Revenue Analysis** - This tab will show ITD revenue for all projects to get an idea of historical performance showing revenue vs. budget and gross profit. The dasbhoard is filtered for Direct Projects only. Note that all projects are shown whether Active or Inactive.
- **Historical Trends** - This tab shows comparison trends of actual versus budget for each Org at Level 3 leveraging the Repeat (row) capability in Dashboards to automatically create a separate chart for each Org at level 3.
- **Project Analysis** - This tab goes deeper than the org level to show project performance by Project Manager and % complete for largest 10 projects. The % complete chart shows the top 10 projects labor cost to date and determines % of the total EAC budget for labor.
- **Labor Analysis** - This tab leverages the "tree map" visualization where each block is a level 1 project, the size of the block represents the number of hours spent in the current period. Note that since budgeted hours are not available in Costpoint projects module, leveraging Deltek Project Planning can be used to track hour variances.
- **Utilization** - This tab breaks out the utilization by project classification. In aggregate, direct, indirect, total hours and average hourly rate are shown. In the bar chart, Org level 3 is broken out by project classification to show the utilization by % of hours spent in each category.

PM CP Performance Analytics

Use the PM CP Performance Analytics to review project performance.



If Organization security is used in Costpoint, users will only see the projects that belong to the organizations they have access to. However, if Project Manager Security is enable they will see only projects they are assigned to as PM. The dashboard has 5 tabs covering a different view of the project data. Note that all project results use Target Rates for actual results.

There are 5 tabs with different views of the project performance data:

- **Overview** - This tab shows inception-to-date information leveraging the current period flag, so it will always show the Inception To Date information through the current month which is controlled by your CBI Administrator. Measures include Revenue, Profit, and Profit % as well as charts that show the top 5 and bottom 5 performing projects.
- **Current Period Review Analysis** - This tab focuses on the current period performance showing revenue versus budget and gross profit (that is, revenue less direct expenses).
- **ITD Revenue Analysis** - This tab will show Inception To Date revenue for all projects to get an idea of historical performance showing revenue versus budget and gross profit.
- **Historical Trends** - This tab shows comparison trends of actual versus budget for each project leveraging the Repeat (row) capability in Dashboards to automatically create a separate chart for each project at level 1.
- **Labor Analysis** - This tab leverages the "tree map" visualization where each block is an employee, the size of the block represents the number of hours spent on the project. Note that since budgeted hours are not available in Costpoint projects module, leveraging Deltek Project Planning can be used to track hour variances.

Project Reports

The following reports are in the Projects folder:

- Burdened Labor and ODC's
- Labor Detail
- PLC Exception Report for Missing Rates
- Project Ledger Detail
- Project Master (Form and List)
- Project Percent Complete
- Project Revenue Summary with Backlog
- Project Work Force
- Project Status
- PSR Template
- PSR Trending Analysis
- Revenue Summary Report Template

Burdened Labor and ODC’s Report

The Burdened Labor and ODC's report displays the burdened costs by resource for labor, and by account for non-labor, by project; information that was previously unavailable in Costpoint.

This report uses specific tables, which need to be created by a specific process in Costpoint, relating to Deltek Cobra integration. You do not have to be licensed or use COBRA to run this report. Refer to the user guide for more details about specific setup instructions before running this report.

Note: Before you run this report, data that coincides with the prompts you select must exist in the CB_SUM and CB_BURD_SUM tables. These tables are populated during the Compute Cobra Burden Costs process, for projects that are identified as Cobra programs. This means that if you want to run a report that includes data for certain projects for Fiscal Year 2022, Period 10, Subperiod 1, you must first run the Compute Cobra Burden Costs process for these projects for Fiscal Year 2022, Period 10, Subperiod 1. A project is identified as a Cobra program by checking the **Cobra Program** check box on the Manage Project User Flow screen in Costpoint. This option can only be selected at the top level of the project and if selected, the entire project tree will be included in the Compute Cobra Burden Costs process.

Prompts

Use the Burdened Labor and ODC's prompts to configure the report.

Prompt Message	Description
Company	Select the company to use to run the report.

Prompt Message	Description
Fiscal Year	Select the fiscal year.
Period	Select the period.
Subperiod	Select the subperiod.
Rate Type	Select the rate type to include: ▪ **Actual**: Print the report using actual burden rates from the tables. ▪ **Target**: Print the report using target burden rates from the tables.
Primary Group	Select the primary grouping: ▪ Organization ▪ Project ▪ Project Manager
Secondary Group	Select a secondary sort, different from the primary, if desired: ▪ Labor Detail ▪ Organization ▪ Project Manager
Labor Category	Select **General Lab Cat** or **Project Lab Cat** to add a column that displays the general labor or project labor category associated with the detail line. Select **None** to hide this detail.
Limit Projects	Enter a portion of one or more project IDs or names in the **Keywords** field to narrow the primary group you selected in the previous field. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Display Burden Costs	Select **Yes** to display detailed burden costs. Select **No** to hide this detail.
Include the Following Details	Select one of these options to display detail: ▪ Account ▪ Labor

Labor Detail Report

The Labor Detail report provides a detailed look at the labor activity related to a project.

You can use this report as a stand-alone report or as a drill-through target from other reports, like the Project Status Report.

> **Note:** The Labor Detail report retrieves data from one database table (Labor Summary) designed to provide a snapshot of results for a particular point in time, while the Project Status Report retrieves data from a different database table (PSR) also designed to provide a snapshot of results for a particular point in time. If the database tables were updated at different times, when you drill through from the Project Status Report, some results may vary. To ensure that drill-through data is the same as the parent Project Status Report, update the PSR and Labor Summary tables on the same schedule.

Prompts

Use the Labor Detail prompts to configure the report.

Prompt Message	Description
Company	Select a company from the list.
Fiscal Year	Select the fiscal year.
Period	Select a period for the report.
Starting Subperiod	Select the starting subperiod to use on the report.
Ending Subperiod	Select the ending subperiod.
Primary Group	Select the primary grouping: ▪ Organization ▪ Project ▪ Project Manager ▪ Reorganization
Select Projects	Enter a portion of one or more project IDs or names in the **Keywords** field to display a list of projects to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Note: To optimize the display of project IDs in **Select Projects** when you select project as the primary group, this prompt screen limits the number of project IDs returned to 1000. Because of this, you should enter as much of the project ID as possible when you search for projects. If your search is too general, the projects you want may not be included in the 1000 that are returned.

Labor Detail Report

This is a sample of the Labor Detail report.

PLC Exception Report for Missing Rates

The PLC Exception Report for Missing Rates report provides a list of employees, grouped by project and PLC, with revenue rates of zero.

This information can help you determine if there is an error in the revenue rate, before revenue and billing are computed.

Prompts

Use the PLC Exception Report for Missing Rates prompts to configure the report.

Prompt Message	Description
Company	Select the company to use to run the report.
Fiscal Year	Select the fiscal year.
Period	Select the period.
Subperiod	Select the subperiod.
Select one or more projects	In the **Keywords** field, enter a portion of one or more project IDs or names to include on the report.

Prompt Message	Description
	To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Select one or more employees	In the **Keywords** field, enter a portion of one or more employee IDs or names to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Note: To optimize the display of project IDs in **Select one or more projects**, this prompts screen limits the number of project IDs returned to 1000. Because of this, you should enter as much of the project ID as possible when you search for projects. If your search is too general, the projects you want may not be included in the 1000 that are returned.

Project Ledger Detail Report

Run the Project Ledger Detail report to review detail postings to the general ledger for project/ account/organization combinations.

This report helps you analyze project activity and balances.

Prompts

Select the prompts to run the Project Ledger Details report.

Prompt Message	Description
Company	Select the Company that has the data you want to include in the report.
Fiscal Year	Select the fiscal year for the report.

Prompt Message	Description
Starting Period and Subperiod	Select the period and subperiod that will begin the range of periods included in the report.
Ending Period and Subperiod	Select the period and subperiod that will end the range of periods included in the report.
Organization Type	Choose to run the report for base organizations or reorganizations.
Display	Choose to display the amount, transactional amount (for Multicurrency use), or both, in the report.
Primary Group	Choose to run the report for projects or alternate projects.
Select Project(s)	In the **Keywords** field, enter a portion of one or more IDs or names to narrow the search for projects. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Account(s)	In the **Keywords** field, enter a portion of one or more IDs or names to narrow the search for accounts. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Organization(s)	In the **Keywords** field, enter a portion of one or more IDs or names to narrow the search for organizations. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Project Master (Form/List)

The Project Master report is a one-page report that contains project master file information in a form or list format.

Users can click links in this report to see more detailed information regarding the project. This report is used as a drill-through report from other reports, such as the Aged Open Billing Detail Report and the Project Status Report, and is intended to be a "snapshot" of a project.

This report includes three sections:

- A section with basic project information.
- A section with charging information.
- A section with billing and revenue information.

The report also displays the project hierarchy for the whole project structure.

Prompts

Use the Project Master prompts to configure the report.

Prompt Message	Description
Company	Select the company to use to run the report.

Prompt Message	Description
Project level	Select the project level at which you want the report printed. All lower levels will be rolled up for the report.
Primary Group	Select the primary grouping: ▪ Customer ▪ Project ▪ Project Classification ▪ Project Manager ▪ Project Type
Limit projects	Enter a portion of one or more IDs or names in the **Keywords** field to narrow the primary group you selected in the previous field. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Sample Report

View a sample of the Project Master report as a list and as a form.

Click the Owning Organization link to view the Organization List.

The following image shows the report as a form.

Project Percent Complete Report

The Project Percent Complete Report provides a list of projects whose revenue has reached a certain percentage of their contract or funded value.

You can use this report to track how close a project is to reaching its value to ensure adequate funding is available to complete performance requirements or to prepare necessary documents for the government, such as showing the contracting officer that 75% of funding has been reached.

This report provides drill-down capability to a lower summary level of the percent complete report. You can drill from one summary level to another summary level until the end of the project tree is reached. Note that this drill is only a reflection of what is stored at a particular level and below. If amounts are stored at a higher level, they are not reflected.

Before You Run the Report

You must complete certain processes before you run this report.

Perform the following steps:

- Update the Project Report tables
- Compute Burden
- Compute Revenue
- Update Project Status Reports
- Create Project Report Tables (with the **Revenue Summary** check box selected)

Prompts

Use the Project Percent Complete Report prompts to configure the report.

Prompt Message	Description
Company	Select the company to use to run the report.
Fiscal Year	Select the fiscal year.
Period	Select the period.
Subperiod	Select the subperiod. If adjustment subperiods are available for the selected period, they are displayed in the **Subperiod** drop-down list including the adjustment period type which can either be **Interim** or **Final**. For example: ▪ Interim adjustment period 1 will display as **1 Adj Pd - Interim**. ▪ Final adjustment period 1 will display as **1 Adj Pd - Final**.
Primary Group	Select the primary grouping for the report: ▪ Alternate Project ▪ Organization - Owning ▪ Organization - Performing ▪ Project ▪ Project Manager ▪ Reorganization Reorganization, Alternate Project, and Project Manager are optional prompts that require some prior setup in Costpoint before you can use them. To use Reorganization, first establish Reorganization structure in **Accounting** » **General Ledger** » **Reorganizations**. To use Alternate Project, first establish alternate project structure in **Projects** » **Project Setup** » **Alternate Projects**. To use Project Managers, link project managers to projects on the Manage Project User Flow screen in Costpoint.
Rate Type	Select the rate type to include: ▪ **Actual**: Print the report using actual burden rates from the tables. ▪ **Target**: Print the report using target burden rates from the tables.

Prompt Message	Description
Basis	Choose one of the following: ■ **Contract Value**: Select this option to include projects on the report that compute and post revenue based on the signed value of the project. ■ **Funded Value**: Select this option to include projects on the report that compute and post revenue based on the funded value of the project.
Operator	Select one of the following to indicate the relation to the percent complete: ■ Greater than or Equal To ■ Less than or Equal To ■ Equal to ■ None (Show All)
Percent Complete	Enter a value as a percentage of total project work completed.
Revenue Level	Select **Yes** to display project data at the revenue level.
Project Level	Select the project level at which you want the report printed. All lower levels will be rolled up for the report.
Organization Level	Select the organization level at which you want the report printed. All lower levels will be rolled up for the report.
Limit Project(s)	Enter a portion of one or more project IDs in the **Keywords** field and click **Search** to list projects to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.
Exclude Future Modifications	Select **Yes** to not include any modifications past the selected fiscal year, period, and subperiod. Select **No** to include all modifications, regardless of the date.

Project Health

The Project Health report is a dashboard style report that shows key financial data related to projects and allows you to drill to supporting details.

You only can see your projects when Project Role security is enabled.

> **Note:** There might be a timing/reconciliation difference present when drilling into details. For example, the backlog that displays on Summary boxes comes from the PSR but drills into details from the RPT_REV_SUM table. If these tables are not updated at the same time, there could be differences in the results.

Sample Report

A summary of key data displays at the top of the Project Health report. Select a role and click a summary item to drill through to a report with more information.

Note: Gross Profit, Gross Profit %, Profit, and Profit % values are based on **Revenue**.

The following table shows which drill through report opens for each summary item.

Summary Item	**Drill Through Report**
Accounts Receivable	Accounts Receivable Aging
Open Billing	Aged Open Billing Detail
Unposted Invoices	Unposted Invoice
Unbilled	Unbilled Analysis
Project Backlog	Project Revenue Summary with Backlog
Funded Backlog	Project Revenue Summary with Backlog

In the Project column, click the **project ID and name** to open its Project Status report or to drill down to the next project level.

Summary Item and Column Calculations

This section lists the formulas used to calculate the values in the summary boxes and columns.

Summary Item / Column	Formula
Project Backlog	(Total) Project Value - (Total) Revenue (when ITD)
Funded Backlog	(Total) Funded Value - (Total) Revenue (when ITD)
% Complete	Revenue / Project Value Total Amount
Gross Profit %	Gross Profit / (Award Fee +Revenue)
Total Gross Profit %	(Total) Gross Profit / [(Total) Revenue + (Total) Award Fee]
Total Profit %	[(Total) Profit / (Total) Revenue] + (Total) Award Fee
Profit %	Profit / (Revenue + Award Fee)
Gross Profit	Revenue + Award Fee - (Direct Labor + Direct Non-Labor + Indirect Expense)
Profit	Revenue + Award Fee - (Direct Labor + Direct Non-Labor)

Project Revenue Summary with Backlog Report

The Project Revenue Summary with Backlog report provides revenue, cost, budget, and backlog information for an individual project or a group of projects.

This information can help with the analysis of project results. Users can view information on the report at the organization level and select the levels for organization and project. This report provides drill-down capability to a lower, summary level of the Project Revenue Summary with Backlog report. You can drill from one summary level to another summary level until the end of the project tree is reached. Note that this drill is only a reflection of what is stored at a particular level and below. If amounts are stored at a higher level, they will not be reflected.

Users can select the columns they want displayed out of the extensive list of project measures.

Prerequisites for Administrators

Before you run the report, you must update the report tables for the reporting period. This process usually is completed on a weekly or monthly basis.

Perform the following steps:

- Compute Burden
- Compute Revenue
- Update Project Status Reports
- Create Project Report Tables (with **Revenue Summary** selected)

- If you want to use budget data on the report, the following setup screens and processes should be run prior to updating and creating the project report tables:
  - If using Standard Budgeting (Budgeting and ETC module)
    - Manage Project Total Budget or Manage Project Budgets by Period
    - Update Budget Report Tables
  - If using Advanced Budgeting (Advanced Project Budgeting module)
    - Manage Project Budgets and ETC
    - Create PSR Budget Report Tables
  - If you are reporting a backlog, the **Contract Value** and/or **Funded Value** amounts must be entered on the Manage Modifications screen prior to updating and creating the project report tables.

Prompts

Use the Project Revenue Summary with Backlog prompts to run the report.

Prompt Message	Description
Company	Select the company to use to run the report.
Fiscal year	Select the fiscal year.
Period	Select the period.
Subperiod	Select the subperiod. If adjustment subperiods are available for the selected period, they are displayed in the **Subperiod** drop-down list including the adjustment period type which can either be **Interim** or **Final**. For example: ▪ Interim adjustment subperiod 1 will display as **3 Adj Pd - Interim**. ▪ Final adjustment period 1 will display as **Adj Pd - Final**.
Primary group	Select the primary grouping for the report. Reorganization, Alternate Project, and Project Manager are optional prompts that require some prior setup in Costpoint before you can use them. To use Reorganization, first establish the Reorganization structure on the Reorganizations screen in Costpoint. To use Alternate Project, first establish an alternate project structure on the Alternate Reporting screen in Costpoint. To use Project Managers, link project managers to projects on the Manage Project User Flow screen in Costpoint.

Prompt Message	Description
Revenue level	Select **Yes** to display project data at revenue level. Select **No** and then select a project level in the next field to display data at project level.
Organization level	Select the organization level at which you want the report printed. All lower levels will be rolled up for the report.
Include	Select the types of projects to include: ▪ Active projects only ▪ Billable projects only
Columns to display	Select the data you want to display from the list of columns.
Limit projects	Enter a portion of one or more project IDs in the **Keywords** field and click **Search** to list projects to include on the report. To narrow the search, click **Options** to select filter criteria. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right arrow to move your selected results to **Choices**.

Project Status Report

The Project Status Report (PSR) displays revenue, direct costs (labor and non-labor), indirect costs, and profitability by project.

This report allows the user to select any level of the project, account, and organization to be displayed.

Drill-through links provide more transactional detail for labor and non-labor charges, including voucher, purchase order, and requisition information. This drill-through to transactional detail applies to transactions in the current period only. Commitment detail can also be accessed from a drill-through link in this report.

Note: The Project Status Report retrieves data from a database table designed to provide a snapshot of results for a particular point in time, while the General Ledger Detail report retrieves data from a database table designed to provide real-time, up to the minute results. Because of this, when you drill through from the Project Status Report to the General Ledger Detail report, some results may vary. To generate updated results, you can refresh the reporting tables before you run the report.

When you include the columns that pertain to prior year, those columns may display zero values on the report. This happens when there is no adjustment period for that prior year, thus, the report displays no values. To fix this, you need to open Costpoint and add a corresponding adjustment period in that prior year and update the reporting tables.

Prompts

The Project Status Report (PSR) prompts include selections such as company, fiscal year, period, and subperiod.

Prompt Message	Description
Company:	Select the Company that you want to display in the report.
Fiscal Year:	Select the fiscal year that you want to include in the report.
Period:	Select the period.
Subperiod:	Select the subperiod.
Primary Group:	Select the primary group for the report: ▪ Owning Organization ▪ Performing Organization ▪ Project ▪ Reorganization ▪ Alternate Project
Rate Type:	Select the rate type to include in the report:

Prompt Message	Description
	▪ **Actual**: Print the report using actual burden rates from the tables. ▪ **Target**: Print the report using target burden rates from the tables. ▪ **Actual/Target**: Print the report using actual and target burden rates from the tables.
Calculate profit as percentage of:	Select whether to calculate profit as percent of: ▪ Costs ▪ Revenue
Columns 1 to 7:	Select the data you want the report to display in each column.
Project Level:	Select the project level at which you want the report printed. All lower levels will be rolled up for the report.
Organization Level:	Select the organization level at which you want the report printed. All lower levels will be rolled up for the report.
Account Level:	Select the account level at which you want the report printed. All lower levels will be rolled up for the report.
Limit Projects:	In the **Keywords** field, enter a portion of one or more IDs or names to narrow the search for values you selected in the previous field. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Top Page up Page down Bottom

PSR Template

The PSR Template is a basic project status report with prompts that you can customize. Use the PSR Template when you want to use a starting point when creating a report from PSR data.

Prompts

The PSR Template prompt includes selections such as Company, Project Level, Rate Type and others.

Prompt Message	Description
Company	Select the Company that you want to display in the report.
Use Current	Select **Yes** if you want to use the current period in the settings which automatically fills in the year, period, and subperiod.
Fiscal Year	Select the Fiscal Year to display in the report.
Period	Select the Period to display in the report.
Subperiod	Select the Subperiod to include in the report
Account Level	Select the account level at which you want the report printed.

Prompt Message	Description
Rate Type	Select either **Actual** or **Target** to indicate if you want to use actual rates or target rates in the report.
Project Level	Select the project level at which you want the report printed.
Select Project(s)	Select the projects that you want to include in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Project Manager(s)	Select the project manager(s) that you want to include in the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

PSR Trending Analysis

Use the PSR Trending Analysis report template to show trending PSR data in a report based on the pre-determined time analysis dimension.

Prompts - PSR Trending Analysis

The selections included in the PSR Trending Analysis prompt page are for projects and company.

Prompt Message	Description
Select Project(s)	Select the projects that you want to include in the report.
Select Company	Select the company that you want to include in the report.

Sample Report

This is a sample PSR Trending Analysis report.

Revenue Summary Report Template

Use the Revenue Summary Report template as a starting point when you want to create a report based on the revenue summary report tables in Costpoint.

Prompts

The Revenue Summary Report Template prompt page includes selections such as Company, Project Level, and Projects.

Prompt Message	Description
Company	Select the Company that you want to display in the report.
Use Current	Select **Yes** if you want to use the current period in the settings which automatically fills in the year, period, and subperiod.
Fiscal Year	Select the Fiscal Year to display in the report.
Period	Select the Period to display in the report.
Subperiod	Select the Subperiod to include in the report

Prompt Message	Description
Rate Type	Select either **Actual** or **Target** to indicate if you want to use actual rates or target rates in the report.
Project Level	Select the project level at which you want the report printed.
Select Project(s)	Select the projects that you want to include in the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Owning Org	Select the owning organization to include in the report. To search with **Keywords**, enter one or more characters that will help retrieve the item(s) you want to select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Shop Floor Time

This folder stores reports for Shop Floor Time and is intended for use by time administrators.

The contents of this folder are available to the following user groups:

- CER All
- CER People

Report Package

The template report in Shop Floor Time is published in the Costpoint Shop Floor Time package.

Costpoint Shop Floor Time Reconciliation Report

This section shows a sample prompt screen and output of the Costpoint Shop Floor Time Reconciliation report.

This report contains information about the discrepancies between the timesheet entries in Shop Floor Time and Costpoint including the timesheet variances (in hours).

Note: This report only runs for on-premise Costpoint users.

Prompts

These are Costpoint Shop Floor Time Reconciliation Report prompts.

Prompt Message	Description
Starting Date	Enter the start date for the range of timesheets you would like to reconcile.
Ending Date	Enter the end date for the range.
Exclude SFT Pay Type(s)	Select the SFT pay type(s) that you want to be omitted in the report.

Sample Report

Sample Costpoint Shop Floor Time Reconciliation report.

Costpoint Shop Floor Time Reconciliation Report

Sep 23, 2016 to Oct 7, 2016

Adding New Joins in the Costpoint Shop Floor Time Reconciliation Report

You may want to further customize your Costpoint Shop Floor Time Reconciliation Report by defining new join relationships. Do this in the Edit mode.

To add join relationships in the Costpoint Shop Floor Time Reconciliation report:

1. Open the Costpoint Shop Floor Time Reconciliation Report in Edit mode.
2. Click the **Queries** ( ) icon on the left-hand side of the screen.
3. Expand QUERIES and look for **Query 1**.
4. Expand **Query 1** and click**Join** (yellow boxes) .
5. On the **Join Relationships** dialog box, click a query object in the **CP TS DATA** box that you like to create a new join relationship from (for example, **Employee ID**).
6. Click the **New Link** button.
7. Click a query object in the **SFT DATA** box to link to (for example, **Pay Type**).

   Before joining, carefully examine the implications of joining (you do not want to create a loop join).
8. Click **OK**.

Configuring the Timesheet Line Source Code

Your organization may be using an automatic interface between Shop Floor Time and Costpoint.

This interface uses the Timesheet Line Source Code that makes the integration between the two systems possible. You can change the source code value in the Costpoint Shop Floor Time Reconciliation Report if needed.

Timesheet Line Source Code Values

If your organization uses the automatic interface, the Timesheet Line Source Code value should be **SFT**.

This is the default value for the source code in the Costpoint Shop Floor Time Reconciliation Report. However, if your organization uses the Import Timesheet function instead of the automatic interface, the Timesheet Line Source code value must be **AOPUTLTS**.

Changing the Source Code Value in the Costpoint Shop Floor Time Reconciliation Report

The default value for the source code in the Costpoint Shop Floor Time Reconciliation Report is **SFT**.

To change the Source Code value in the Costpoint Shop Floor Time Reconciliation report:

1. Edit the Costpoint Shop Floor Time Reconciliation Report.
2. Select **Queries** from the Navigation bar, and click the **CP TS DATA** query.
3. In the Detail Filters pane, double-click the appropriate filter for **Source Code**.
4. On the Detail Filter Expression dialog box, change the **Timesheet Line Source Code** text to either **SFT** or **AOPUTLTS**.

   > **Note:** For the automatic interface, **[Timesheet Line Source Code] = ‘SFT’**.
   > For the Import Timesheet function, **[Timesheet Line Source Code] = ‘AOPUTLTS’**.

5. Click **OK**, and save the report.

SOX Controls Reporting

This chapter includes a section on scheduling Sarbanes-Oxley Controls Reports.

The section also lists the report categories and links to their sample reports.

The contents of the SOX Controls Reporting folder are available to the following user groups:

- CER Accounting
- CER All

Scheduling SOX Controls Reporting

Deltek has provided predefined jobs so that you can schedule your Sarbanes-Oxley (SOX) control reports to run in batch mode.

These jobs, defined in the **SOX Controls Reporting.zip** file, will run the reports and save the output in the PDF file format. Also available is a batch program, which renames these PDF files so that the run date/time of each report is appended to its file name.

This document will help you to configure the output location, batch file, and Cognos server, to execute these jobs, and to run the renaming script.

The following are the steps in configuring your SOX reports:

Step 1: Import the deployment zip file.
Step 2: Customize the rename program and set the output location.
Step 3: Configure the Cognos Analytics server to save the report output and call the batch file.
Step 4: Execute the predefined jobs to run the reports in batch mode.

Step 1: Import the Deployment Zip File

You must complete this step during the installation process to make the predefined scheduling jobs available.

For instructions on importing this file, see the *Deltek Costpoint Business Intelligence 8.0 Upgrade Installation Guide*, available at the Knowledge Center tab of the Deltek Support Center site, https://support.deltek.com.

After you have completed the import, browse to the **Team content** » **SOX Controls Reporting** directory, where you will find the Report Generation Schedules folder. This folder contains all the predefined scheduling jobs.

The SOX Controls Reporting job runs all the SOX reports for Costpoint and Time Collection. There are also predefined jobs for specific modules. For example, Costpoint Accounting and for sub-modules, such as **Costpoint Accounting** » **Accounts Payable**.

Step 2: Customize the Batch Renaming Script

The reports generated by Cognos scheduler are given cryptic names.

For example, **Approver Settings** could potentially be generated as a file named 397_1163638261400.pdf. For each PDF file, the Cognos server also generates a descriptor file in .xml format. This file contains the mapping of the generated PDF file name to the report’s original name on the Cognos Server.

> **Note:** When the Cognos scheduler generates a report, it saves this PDF file to a “Work” subfolder at the output location you specify in Step 3. Make sure to create these folders before running your job.

Deltek provides a script which, when run, takes the mapping information from the xml file to rename the PDF files to their original report names. This script then also appends the date and time of the report generation to the end of the file name. There is then an option to delete these descriptor files upon completion of the renaming process.

To customize the batch renaming script for your firm, you must edit the renameFiles.bat file (located at C:\Program Files (x86)\Deltek\CostpointEnterpriseReporting\CER723\SOX\Scripts), as necessary. The areas to edit are in italics in the following sample.

When you are through, save the renameFiles.bat file. Ensure that the renameFiles.bat, renameFiles.java, and renameFiles.class files are saved to the desired output location.

> **Note:** The renaming script will not run if special characters exist in the name. Therefore, exclude special characters from path and report names. Examples of special characters are: > < “ ‘ & + / ? % # + , . : ; = [ ]

```
@echo off
REM
REM Please update the following information before executing the
program:

REM COGNOS_HOME:        Your cognos install directory

Set COGNOS_HOME=C:\Program Files\ibm\cognos\analytics

REM JAVA_HOME:        Combining Cognos_Home with this location
REM                   should result in a folder location where
REM                   “bin” folder can be found. Make sure there
REM                   is a java.exe inside the “bin” folder.

set JAVA_HOME=%COGNOS_HOME%\jre

set PATH=%JAVA_HOME%\bin;%PATH%

REM CMOUTPUT_LOCATION:        Location where your CRN Server will
REM                   save files. This is the directory
REM                   where the files “renameFiles.bat”,
REM                   “renameFile.class” and
REM                   “renameFiles.java” should exist.

Set CMOUTPUT_LOCATION=C:\Output

REM WORK_LOCATION:    Location where all files will be moved
REM                   before renaming them. By default this
REM                   is the ‘Work’ subfolder of the
REM                   CM_OUTPUT_LOCATION. You can use the
REM                   alternate code below for specifying another
```

```
REM                 location altogether. Just remember to "REM"
REM                 the line of code not in use.

Set WORK_LOCATION=%CMOUTPUT_LOCATION%\work
REM set WORK_LOCATION=C:\test

REM Call the java program to rename the output file
REM -cp option specifies the classpath information i.e. location of
renameFiles.class
REM The files (%1 and %2) that the server will pass to the batch
file will be renamed

REM Set the last parameter of the code below to "Y" or "y" for the
program to put files
REM under a subfolder; "N" or "n" otherwise
Call "%JAVA_HOME%\bin\java" -cp "%CMOUTPUT_LOCATION%" renameFiles
"%WORK_LOCATION%" "%1" "%2" n

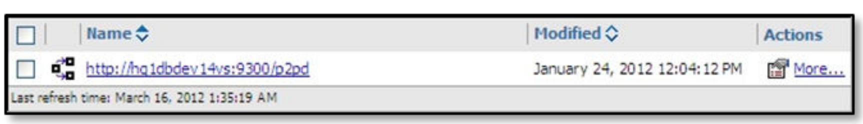
REM Delete the XML descriptor files
REM Remove "REM" from the line below if you want descriptor files
deleted
REM Deltek %WORK_LOCATION%\*.xml
```

Step 3: Configure the IBM Cognos Analytics Server

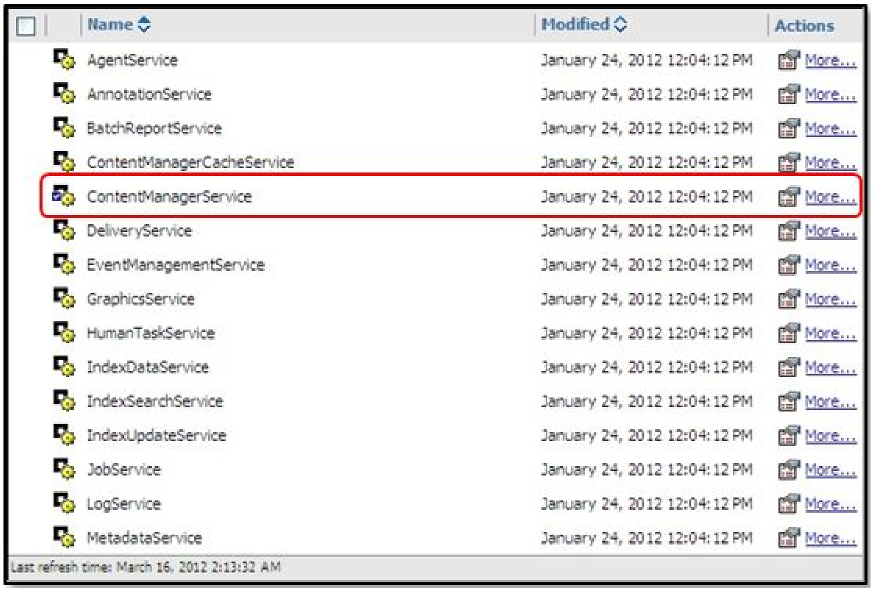
You must log on to Cognos Analytics and set the server parameters in order to save the output of reports in the proper folder structure on the file system.

To set the server parameters:

1. From the Navigation bar, click **Manage** » **Administration Console**.
2. On the IBM Cognos Administration page, click the Configuration tab, select the **COSTPOINT** check box, and click **Dispatchers and Services**.
3. Click the link for the dispatcher you want to configure.



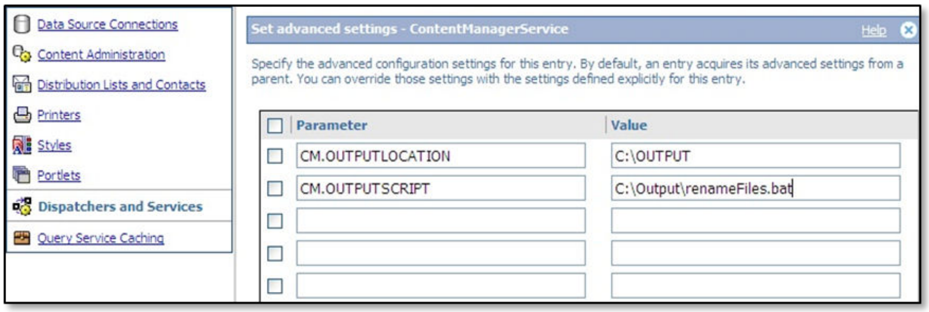
4. Select **ContentManagerService** from the list of objects to configure.



5. Under the **Actions** column, click the **Set properties** button.
6. Click the Settings tab.
7. Under the **Value** column, click **Edit** of **Environment** » **Advanced Settings**.
8. Select the **Override the settings acquired from the parent entry** check box.
   A table displays, in which you can add parameters.
9. Under **Parameter**, enter **CM.OUTPUTLOCATION**.
10. Under **Value**, enter the file system location where you want to store report outputs (for example, **C:\Output**).

    > **Note:** This will not work if you specify a UNC name. If you must specify a network location, use a mapped drive from the local machine.

11. Complete the following steps to add the batch renaming script file, which runs after a report output is saved to the target directory:
    a) Under **Parameter**, click an empty cell and enter **CM.OUTPUTSCRIPT**.
    b) In the corresponding **Value** cell, enter the location and the name of the script (for example, **C:\Output\renameFiles.bat**).
    c) Click **OK**.



12. Complete the configuration of Cognos Analytics Server:
    a) On the computer where you installed Content Manager, start IBM Cognos Configuration. You can find the IBM Cognos Configuration file (cogconfigw.exe) at C:\Program Files\ibm\cognos\analytics\bin64.
    b) In the Explorer window, under **Data Access**, click **Content Manager**.
    c) In the **Save report outputs to a file system** field, select **True**.
    d) On the menu, click **File** » **Save**.
    e) Restart the IBM Cognos service.

Step 4: Execute Job on Recurring Schedule

Browse to the job you want to run.

To execute the job:

1. Find a predefined SOX job in **Team content** » **SOX Controls Reporting** » **Report Generation Schedules**.
2. Click the **More** icon (dotted vertical line) to the right of the report, and select **Properties**.
3. Click **Job** » **Advanced**.
4. Under **Advanced**, do the following:
    a) Click **Set** to the right of **Properties** to edit the job and set parameters, and click **OK**.
    b) Click **Set** to the right of **Schedule Job** to set the desired schedule, and click **OK**.

After the job has completed running, browse to the specified output location to see the report output.

SOX Controls Reporting Report Categories

SOX Controls Reporting includes several report categories.

These report categories include the following:

- Costpoint Accounting
- Costpoint Materials
- Costpoint People

- Costpoint Projects
- Costpoint Other
- Deltek Time Collection
- Report Generation Schedules

SOX Controls Reports

The SOX Controls Reporting includes several report categories and their reports.

These report categories include the following:

Costpoint Accounting	
Accounts Payable	▪ Accounts Payable Accounts ▪ Accounts Payable Settings ▪ Accounts Payable Voucher Settings ▪ Approver Settings ▪ Cash Accounts ▪ Purchase Order Voucher Settings ▪ Vendor Settings ▪ Vendor Terms
Accounts Receivable	▪ Accounts Receivable Settings ▪ System-Assigned Cash Receipt Number ▪ Transfer Accounts
Fixed Assets	▪ Accumulated Depreciation Account Codes ▪ Asset or Template Change Settings ▪ Asset Template Information ▪ Auto-Creation Settings for Purchase Orders or Receiving Data ▪ Depreciation Expense Account Allocation Codes ▪ Depreciation Methods - Basic Setup ▪ Fixed Assets Accounting Periods ▪ Fixed Assets Fiscal Years ▪ Fixed Assets Settings

Costpoint Accounting	
	▪ Posting Settings ▪ Template Information Global Changes
General Ledger	▪ Account Entry Groups ▪ Accounting Periods ▪ Account-Org Links ▪ Accounts ▪ Bank Statements ▪ Banks ▪ Company Bank Accounts ▪ Company Information ▪ Financial Statement Setup ▪ Fiscal Years ▪ General Ledger Settings ▪ Journal Entry Cycles ▪ Mass Links of Accounts-Orgs ▪ Organization Elements ▪ Organization Structures ▪ Subperiods ▪ System-Assigned Journal Entry Number
Multicurrency	▪ Exchange Rate Groups ▪ Multicurrency Accounts ▪ Multicurrency Settings

Costpoint Materials	
Inventory	▪ Default WIP Asset Accounts ▪ Inventory Accounts ▪ Inventory Projects ▪ Inventory Settings ▪ Serial-Lot Settings
Procurement Planning	▪ Requisition Approval Processes

Costpoint Materials	
	▪ Requisition Approval Titles ▪ Requisition Settings ▪ Vendor Settings ▪ Vendor Terms
Purchasing	▪ Buyers ▪ Buyer Organization Accounts ▪ Buyer Organization Accounts - Drill-Through ▪ Buyer Projects ▪ Buyer Projects - Drill-Through ▪ Branch Locations ▪ Purchase Order Line Charge Types ▪ Purchase Order Settings ▪ Units of Measure ▪ Vendor Settings ▪ Vendor Terms
Receiving	▪ Receiving Settings
Sales Order Entry	▪ Approval Processes ▪ Approval Titles ▪ Catalog Settings ▪ Cost Types ▪ Defaults ▪ Line Charge Types ▪ Project Settings ▪ Sales Order Settings ▪ Serial-Lot Settings

Costpoint People	
Labor	▪ Allowances ▪ Allowance Accounts

Costpoint People	
	▪ Labor Groups - Unions ▪ Labor Location - Locals ▪ Labor Settings ▪ Overtime Premium Recast ▪ Overtime Rules by Location ▪ Overtime Rules by State ▪ Overtime Settings ▪ Pay Types ▪ Timesheet Periods
Leave	▪ Leave Period ▪ Leave Settings ▪ Leave Tables ▪ Leave Types
Payroll	▪ Contribution Matching Rates ▪ Contribution Matching Rates - Drill-Through ▪ Deductions ▪ Deduction Schedules ▪ Direct Deposit Banks ▪ Direct Deposit Setup ▪ Local Taxable Deductions ▪ Local Taxable Deductions - Drill-Through ▪ Modify Codes ▪ Pay Periods ▪ Pay Type Taxability ▪ Pay Type Taxability - Local ▪ Pay Type Taxability - Local - Drill-Through ▪ Pay Type Taxability - State ▪ Pay Type Taxability - State - Drill-Through

Costpoint People	
	▪ Paycheck Setup ▪ Payroll Settings ▪ Savings Bond Info by Taxable Entity ▪ State Taxable Deductions ▪ State Taxable Deductions - Drill Through ▪ Workers' Compensation Modify Codes ▪ Workers' Compensation State Rates
Time Collection Interface	▪ Time Collection Account Types ▪ Time Collection Accounts ▪ Time Collection Projects

Costpoint Projects	
Billing	▪ Billing Accounts ▪ Billing Settings ▪ Generic Billing Formats ▪ Other Charges ▪ Remittance Addresses ▪ Taxable Sales Accounts
Cost and Revenue Processing	▪ Cost Pools ▪ Pool Base Accounts ▪ Pool Base Accounts - Drill-Through ▪ Pool Cost Accounts ▪ Pool Cost Accounts - Drill-Through ▪ Pool Rates ▪ Pool Rates - Drill-Through
Intercompany Work Orders	▪ IWO Expense Mapping ▪ IWO Locations ▪ IWO Project Setup
Project Setup	▪ Mass Link Project-Account-Orgs

Costpoint Projects	
	▪ Project Account Groups ▪ Project Labor Categories ▪ Project Settings ▪ Valid Project-Account-Orgs

Costpoint Other	
System Administration	▪ System Settings

Deltek Time Collection	
▪ Account Types ▪ Charge Trees ▪ Charge Trees - Drill-Through ▪ Charge Trees 1-Level ▪ Configuration Tables ▪ Employee Group Supervisor ▪ Employee Group Supervisor - Drill-Through ▪ Employee Group Types ▪ Employee Groups ▪ Employee Info - Charge Employees ▪ Employee Info - Charge Employees - Drill-Through ▪ Employee Information ▪ Functional Roles ▪ Leave Types ▪ Links and Miscellaneous ▪ Security Roles ▪ Timesheet Class - Leave ▪ Timesheet Class - Leave - Drill-Through ▪ Timesheet Class - UDT10	▪ UDT01 Controls - UDT02 Links ▪ UDT01 Controls - UDT02 Links - Drill-Through ▪ UDT01 Controls - UDT09 Links ▪ UDT01 Controls - UDT09 Links - Drill-Through ▪ UDT02 Controls ▪ UDT02 Controls - UDT01 Links ▪ UDT02 Controls - UDT01 Links Drill-Through ▪ UDT02 Controls - UDT07 Links ▪ UDT02 Controls - UDT07 Links Drill-Through ▪ UDT02 Controls - UDT09 Links ▪ UDT02 Controls - UDT09 Links Drill-Through ▪ UDT03 Controls ▪ UDT04 Controls ▪ UDT05 Controls ▪ UDT07 Controls ▪ UDT09 Controls ▪ UDT09 Controls - UDT01 Links ▪ UDT09 Controls - UDT01 Links Drill-Through

Deltek Time Collection	
▪ Timesheet Class - UDT10 - Drill-Through ▪ Timesheet Classes ▪ Timesheet Schedules ▪ UDT01 Controls	▪ UDT09 Controls - UDT02 Links ▪ UDT09 Controls - UDT02 Links Drill-Through ▪ UDT10 Controls ▪ Utilization

Subcontractor Management

This chapter describes the reports in the Subcontractor Management folder.

The contents of this folder are available to the following user groups:

- CER All
- CER Subcontract Mgmt Secure

Subcontractor Management Reports

The Subcontractor Management folder includes the Subcontractor Status report and the Work Assignment Charge Detail report.

Subcontractor Management reports use row-level security based on the Owning Org of a project. Only the work assignments and PO rows for projects that belong to Owning Orgs you have access to are visible.

Subcontractor Status Report

Run the Subcontractor Status report to view the work assignments associated with purchase order (PO) lines.

The report displays PO line information, including PO line amount, vouchered amount, and remaining amount. You can also view the work assignments (ID, start date, end date) associated with a PO or PO line in the Subcontractor Status report.

Drill down from a work assignment to see the hours planned for vendor employees on the work assignment and timesheet charges posted against the work assignment for each vendor employee.

Prompts

Select the prompts to filter or run the report.

Contents

Prompt Message	Description
Company	Select the company that you want to include in the report.
Select Purchase Order(s)	Use this prompt to limit the report to selected purchase orders. In the **Keywords** field, enter one or more characters for the purchase orders you want to retrieve. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Prompt Message	Description
Select PO Release Number(s)	Use this prompt to limit the report to selected PO release numbers. In the **Keywords** field, enter one or more characters for the PO release numbers you want to retrieve. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Vendor(s)	Use this prompt to limit the report to selected vendors. In the **Keywords** field, enter one or more characters for the vendors you want to retrieve. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Work Assignment Start Date Range	Filter the report to only include work assignments that start within a specified date range. In the **From** field, enter the earliest start for the date range or click the Calendar to select the date. In the **To** field, enter the latest date for the date range or click the Calendar icon to select the date. You can opt to select the Earliest date or the Latest date possible for the work assignments.
Select Project(s)	Use this prompt to limit the report to selected projects. In the **Keywords** field, enter one or more characters for the projects you want to retrieve. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Account(s)	Use this prompt to limit the report to selected accounts. In the **Keywords** field, enter one or more characters for the accounts you want to retrieve. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces.

Prompt Message	Description
	To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Select Organization(s)	Use this prompt to limit the report to selected organizations. In the **Keywords** field, enter one or more characters for the organizations you want to retrieve. The list displays values as a combination of ID and name, so you can search by ID or by name. To enter more than one search string, separate them with spaces. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

This is a sample of the Subcontractor Status report.

Click a **Work Assignment ID** to view the Subcontractor Status Report Drill Thru.

Subcontract Status Report - Drill Thru

Work Assignment ID	Vendor Employee	Vendor Employee Name	WA Hours	TS Hours	Remaining Hours
WA-0000001	VE-0001	Gus Davis	100.00	190.00	(90.00)
	VE-0002	James Barnes	250.00	190.00	60.00
	VE-0003	Roger O'Brien	200.00	136.00	64.00
	VE-0004	Patricia Meyers	150.00	195.00	(45.00)
Total			700.00	711.00	(11.00)

The drill thru report shows the planned, actual, and remaining hours of each vendor employee assigned to the work assignment, based on the charges from their timesheets. If the TS Hours (actual hours) is greater than the WA Hours (planned), the Remaining Hours will display in parenthesis, indicating that the vendor employee worked more hours than planned for the work assignment.

Work Assignment Charge Detail Report

View a detailed report of work assignments for subcontractor management purchase orders.

You can run the Work Assignment Charge Detail report for a range of items, including vendors, customers, purchase orders, work assignments, and/or work assignment start and end dates.

Prompts

Select the prompts to run the Work Assignment Charge Detail report.

Time

This folder stores standard Time reports for the time administrator, time supervisor, and other managers who approve time.

The contents of this folder are available to the following user groups:

- CER All
- CER Time & Expense
- CER Time Secure

Time Reports

The following reports are in the Time folder:

- Charge Activity Report
- Resource Activity Report
- Work Hous by Day by Project
- Work Hours by Day by Resource

Charge Activity Report

Project managers can use the Charge Activity report to review the activity on their projects.

Before You Run the Report

Certain processes must be performed before you run this report.

Because this report contains sensitive labor information, you may decide to restrict it to selected individuals.

This report may contain Unposted (unprocessed) information, which may change any time new postings are made. Unprocessed Hours include both Open (O) and Sent (S) T&E.TS_CELL.S_CELL_STATUS_CD. Unprocessed Expenses include both Under Review (U) and Approved (A) T&E.EXP_RPT.S_EXP_RPT_STATUS_CD.

You must set up the following or run the following processes in Costpoint:

- You must be using both Time & Expense and Costpoint.
- The report is designed with the idea that the primary way to break out labor is PLC. However, the report will also function without PLCs.
- You should be using Billable Labor Rates. You must execute the Load Labor Rates process to populate the rates tables. You must also run the Retrieve Labor Rates process from **Projects** » **Budgeting and ETC** » **Budget Interfaces**.

Prompts

Use the Charge Activity report prompts to configure the report.

Prompt Message	Description
Company	Select a company from the list.
Date Range	Enter or select the starting date for the report in **From** and the ending date in **To**. The report will include projects that satisfy the date range you specify. You can opt to select the **Earliest date** or the **Latest date** possible for the sales order dates.
Functional Role(s)	Select the functional role code(s) to only include the employees related to the role(s) in the report.
Project Prompt Type	Choose a method that will help you find the projects you want to select for the report. Select **Listview Prompt** to select projects from a list or select **Search and Select Prompt** to search and select individual projects using keywords.
Project	Based on the project prompt type specified, select the project(s) to include in the report from the project list or using keywords.

Resource Activity Report

Managers can use the Resource Activity report to see how the employees they have a role over have charged their time.

You can only view the activity of the resources you have a role over.

Prompts

Use the Resource Activity Report prompts to select a company and run the report.

Prompt Message	Description
Company	Select a company from the list.
Date From	Enter or select the starting date for the report in **From** and the ending date in **To**. The report will include the records that satisfy the date range you specify. You can opt to select the **Earliest date** or the **Latest date** possible for the sales order dates.
Functional Role(s)	Select the functional role code(s) to only include the employees related to the role(s) in the report.
Group(s)	Select the employee group(s) to include in the report.
Employee(s)	Select the employee(s) you want to display in the report. In **Keywords**, enter one or more characters to search with to retrieve this information. To narrow the search, select one of the following in the dropdown list: ▪ Starts with any of these keywords ▪ Starts with the first keyword and contains all of the remaining keywords ▪ Contains any of these keywords ▪ Contains all of these keywords If you search by name, use one of the Contains... options, rather than the Starts with... options. Click the arrow to list the matching employees in **Choices**.

Sample Report

This is a sample Resource Activity report.

Work Hours by Day by Project

Use the Work Hours by Day by Project report for a breakdown of the Work Hours Charged by Day based on Projects that you have a functional role over in T&E.

Prompts

Select a company, date range, and projects to run the Work Hours by Day by Project report.

Contents

Field	Description
Company	Select the company for the report.
Date Range	Enter or select the starting date for the report in **From** and the ending date in **To**. The report will include projects that satisfy the date range you specify.
Functional Role Card	Select the functional role code to include only the employees related to the role in the report.
Project Starts With (This project list is restricted to projects you have rights to view in T&E)	In the **Keywords** field, enter one or more project names or IDs to search for and select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.
Resource Starts With	In the **Keywords** field, enter one or more resource names or IDs to search for and select for the report. To narrow the search, select an option in the **Starts with any of these keywords** field. If you search by name, use one of the **Contains...** options, rather than the **Starts with...** options. If applicable, click the right-arrow to move your selected results to **Choices**.

Sample Report

Total hours for each employee and each day are provided in the report.
