

Deltak Costpoint HotFix Readme

Released: July 16, 2015

Enhancements

Allow Wage Determination with Multicurrency Labor

Costpoint was enhanced to allow Multicurrency Labor users to apply wage determination to timesheets. This functionality is limited to timesheets with US Dollar (**USD**) as transaction currency. The following are the updates in Costpoint:

- **Configure Labor Settings (LDMLABOR)**
 - You can now select the **Enable Multicurrency Functionality** and **Enable Wage Determination** check boxes at the same time.
 - The **Enable Multi-Currency Functionality** check box label was changed to "Enable Multicurrency Functionality."
- **Manage Timesheets (LDMTIME), Manage Correcting Timesheets (LDMCTIME), Import Timesheets (AOPUTLTS), Import Timesheets from Deltak Time & Expense (LDPUPET), Create Auto-Pay Timesheets (LDPDUMTS), Create Retroactive Timesheet Adjustments (LDPRETRO)**
 - Updated the existing Wage Determination functionality so that if both the **Enable Multicurrency Functionality** check box and the **Enable Wage Determination** check box are selected in the Configure Labor Settings screen for the Login Company, wage determination will be applied to the timesheet line if the following conditions are met:
 - The timesheet's **Transaction Currency** is **USD**; and
 - Wage Determination applies to the timesheet line.
 - -Updated the existing Wage Determination functionality so that if the **Enable Multicurrency Functionality** check box is selected in the Configure Labor Settings screen for the Login Company, a Wage Determination Fringe Line can only be generated if the timesheet's Transaction Currency is **USD**.
