

# **Deltak Costpoint HotFix Readme**

***Release Date: February 26, 2018***

## **Enhancement**

### **Remove Validation in Amount Fields in Rows**

The Manage Non-Project Beginning Balances (GLMBEGIN) application has been modified to allow zero values in the amount fields of the Transactional Currency Beginning Balances subtask. In this way, you can enter or update the amount fields for both transactional and functional and make them zero. This also allows you to correctly adjust the account beginning balances in transaction currency amount in cases where the transactional currency becomes zero, and the only balances are a functional balance for that currency.

In addition, you can now use USD as transactional currency when the functional currency is USD. The validation that requires a transaction currency before a functional currency row has been removed as well.

The system will still require that the Beginning Balance Amounts in the Transactional Currency Beginning Balances is the same with the amounts in the Account Details subtask.

### **System Requirements**

This enhancement requires cp711\_sys\_038.zip.

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Support Center at <https://deltek.custhelp.com> before you install the update.

## To Download the HotFix/Feature Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Support Center credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix/Feature Update:

Refer to the installation instructions posted on Deltek's Support Center site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## To Check to See if the Feature is Installed:

1. Click **Help > About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).

## More Information:

If you have any questions, please contact Deltek Support Center at <https://deltek.custhelp.com>.
