

Deltak Time & Expense HotFix Readme

Release Date: October 31, 2017

Enhancement

Export Location Configuration

The Time & Expense export process was enhanced so that configuration of the export location is now managed from the Miscellaneous tab of the **Configuration » Resources » Configure General Settings** screen. Prior to this update, the export locations were configured from the export applications within Time & Expense.

The following modifications were made to the Configure General Settings screen:

- The **Locations** group heading was renamed to **Import/Export Alternate File Locations**
- An **Export Location** field was added.
- The **Trash Location** field was renamed to **Import Trash Location**.

In the following applications, the **File Location** field was renamed to **Export File**:

- Export ERs / Advances
- Export Commitments
- Export Timesheets

It is now a display-only text field, and the export location specified in Configure General Settings appears as a prefix to the file name, as shown in the following example:

Additionally, under **Export Options** in the **Time » Interfaces » Export Timesheets** screen, the **Export to Costpoint** field was renamed to **Export Directly to Costpoint**.

Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

To Download the HotFix/Feature Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix/Feature Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.

- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

To Check to See if the Feature is Installed:

1. Click **Help > About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).
