

Deltak Costpoint HotFix Readme

Released: September 30, 2016

Known Issues

Organization/Home Organization Field Lookup with Organization Security Enabled

Description: The application currently uses a common organization lookup which was recently updated to filter results based on organization security. However, the organization/home organization lookup in the application should not be filtered by organization security. This issue will be resolved with the release of Costpoint 7.1.1 SYSTEM JAR 022 in October 2016.

Customers Impacted: This defect affects Costpoint users who enable organization security and use lookup to populate the organization/home organization fields.

Workaround Before Fix: None.
