

Deployment Date: 5/25/2017

Hot Fix: DeltekCostpoint711FrameworkUpdate029.exe

Framework

[Deltek Defect Tracking Number:](#)

716856

[Issues Resolved:](#)

Description: Framework has been updated to allow new custom result sets, custom reports/actions, and custom applications to be used in the Web Integration Console (WIC). **Customers Impacted:** This change affects clients who use Extensibility with WIC. **Workaround Before Fix:** None. **Additional Notes:** None.

[Files Updated:](#)

csbatools.jar 7938 KB 05/17/2017 1:34am

Framework

[Deltek Defect Tracking Number:](#)

788681

[Issues Resolved:](#)

Description: Performance optimization has been performed for Active Directory Federation Services (ADFS) authentication. **Customers Impacted:** This change affects Costpoint users. **Workaround Before Fix:** None. **Additional Notes:** None.

[Files Updated:](#)

cp711_sys_029.zip

CPWebSecurityProviders.jar 250 KB 05/11/17 2:32pm

[System File Dependencies:](#)

N/A

Framework

[Deltek Defect Tracking Number:](#)

795777

[Issues Resolved:](#)

Description: The LDAP/AD group membership was not returned when the domain name contained three or more domain components separated with a period. For example, for domain **company.us.com**, user groups were not set correctly, but no problem was encountered when domain was **company.com**.

Customers Impacted: This defect affects Costpoint users.

Workaround Before Fix: None.

Additional Notes: This requires the new security provider, Framework update, and system JAR files.

Framework/External Tools/CONFIG

Deltek Defect Tracking Number:

791091

Issues Resolved:

Description: In the Configuration Utility, a test table has been set up for custom Java Database Connectivity (JDBC) data sources when the table is not yet defined. **Customers Impacted:** This change affects clients who use Extensibility. **Workaround Before Fix:** Manually set the test table. **Additional Notes:** This requires the new csbatools.jar file.

Framework/External Tools/DBWIZARD

Deltek Defect Tracking Number:

792722

Issues Resolved:

Description: A new functionality (**Remove License**) has been added to the DB Wizard Utility to allow users to remove a license for a given product (Costpoint, Time & Expense, and Budgeting & Planning). **Customers Impacted:** This change affects Costpoint users. **Workaround Before Fix:** None. **Additional Notes:** With this change, a strict enforcement will be applied on what database segments can be entered for each particular system in the Configuration Utility and the license(s) that are applied to a given system. For example, clients will need to apply the correct Budgeting & Planning license before configuring the Budgeting & Planning database segment in the Configuration Utility. If clients do not want to have Budgeting & Planning in a system, they would need to delete the Budgeting & Planning license from the system through the new menu item (**Remove License**) in the DB Wizard Utility. Runtime will also be displaying applications in the menu (still subject to user rights) based solely on licenses in a given system.

Framework/External Tools/SecurityProvider

Deltek Defect Tracking Number:

794050

Issues Resolved:

Description: An error occurred when you tried to select a single LDAP system to set up a different LDAP server for each system. **Customers Impacted:** This defect affects Costpoint users. **Workaround Before Fix:** Select the **All Systems** option in **Select System For new LDAP Server** to get the LDAP connection to work. **Additional Notes:** None.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.

3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:

If you have any questions, please contact Deltek support at <https://deltek.custhelp.com>.
