Issues Resolved:

Description: On the Activities subtask, when you entered a value in **Method** with the same description as another activity method on the Manage Activity Methods screen, the **Method** value was cleared when you saved the record. The same happened when you entered values in **Subject** (Activities subtask) and **Document Type** (Documents subtask), which also had the same description as another activity subject (on the Manage Activity screen) and document type (on the Manage Document Types screen), respectively.

Customers Impacted: This defect affects you if you use the Contract Management feature in Costpoint.

Workaround Before Fix: Manually enter values in the **Method**, **Subject**, and **Document Type** fields, and save the record again.
