Issues Resolved:

**Description:** The Compute Leave Accruals Report computed and displayed leave accrual for a leave that had no Exchange Rate available for the selected Currency Code combination, rate date, and Rate Group ID.. The application used an exchange rate from another employee with a different currency. When you queried the record on the Leave Edit Table, the Exchange Rate subtask displayed zero rate.

**Customers Impacted:** This defect affects Costpoint Leave users.

**Workaround Before Fix:** Ensure that the currency for the period being computed has an exchange rate.
