10.0/Time/TM/TMMTIMESHEET

Deltek Defect Tracking Number:

866517

Issues Resolved:

Description: When employees made changes to their timesheets, they were not required to submit revision explanations.

Customers Impacted: This affects clients who use the Time module.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated:

cp711_te_common_007.zip

Time/Record Time/Timesheet/Timesheet

Deltek Defect Tracking Number:

87054

Other Applications Affected:

TS/Timesheet

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at https://deltek.custhelp.com before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to https://dsm.deltek.com.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

To Install the Hot Fix:

1. Download the ZIP file that contains the hot fix (for example, TE812HF20.zip) to your local workstation or any other workstation or server.
2. Check in the Other Applications Affected section of this readme file to see if the hot fix affects the WebLogic, IIS, Database, and/or Actuate tiers.
3. Follow the instructions below to install the hot fix files onto the appropriate tiers.

NOTE: If you are installing the hot fix onto multiple servers, please refer to the Deltek Time and Expense with ESS Technical Guide chapter titled """Multiple WebLogic Server Instances""" to see modified and additional steps.

To install on the WebLogic tier:

1. Stop the Time, Expense, and Self-Service Windows services on the WebLogic server.
2. Back up any files that will be replaced when you extract the contents of the zip file to the c:\bea\DeltekTE*x* folder on your WebLogic server, where *x* is your Time & Expense version number.
3. Extract the contents of the file to the c:\bea\DeltekTE*x* folder on your WebLogic server.
4. Re-start the Time, Expense, and Self-Service Windows services on the WebLogic server.

To install on the IIS tier:

1. Stop the IIS Service.
2. Back up any files that will be replaced when you extract the contents of the zip file to your IIS Web server default folder (for example, C:\inetpub\wwwroot).
3. Extract the contents of the file to your IIS Web server default folder.
4. Re-start the IIS Service.

To install on the database tier:

If the hot fix contains database changes, run the Apply Service Pack technical console function on one of the WebLogic instances. Follow these steps:

1. Stop the Time, Expense, and Self-Service Windows services on the WebLogic server.
2. Go to the Time & Expense technical console and run the Apply Service Pack function for all domains.
3. Re-start the Time, Expense, and Self-Service Windows services on the WebLogic server.
4. If your implementation of Time & Expense includes custom stored procedures, reapply these stored procedures to all application domains after applying the hot fix .

To install on the Actuate server:

1. Click Start > All Programs > Actuate **x** > Actuate Management Console, where **x** is your version of Actuate.
2. Look at the hot fix files and determine what .rox files will be updated by the hot fix.
3. In the management console, navigate to Files and Folders > deltek > tc > bin and delete these .rox files.
4. Back up any files that will be replaced when you extract the contents of the zip file to the C:\Program Files\Actuate**X**\DeltekTC folder on your Actuate server.
5. Extract the contents of the file to the C:\Program Files\Actuate**X**\DeltekTC folder on your Actuate server.
6. In the management console, click Add File to upload and add the updated versions of the .rox files.
7. If the hot fix includes .class files, extracting files from the zip file will automatically move the .class files to the correct location. However, you must restart the Actuate server.

To Check If the Hot Fix is Installed:

WebLogic Tier

1. Look in the c:\bea\DeltekTE*x* folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Find the HotFixReadme.n.n.n.nn.txt file that corresponds to the hot fix you installed.
3. See which files were supposed to be replaced by the hot fix.
4. Verify that the files included in the hot fix replaced the files that were backed up prior to installation.

Database Tier

1. Log into Time & Expense.
2. Click the """i""" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

IIS

1. Look in the c:\bea\DeltekTE*x* folder, where *x* is your version of Time & Expense, on your IIS server.
2. Find the HotFixReadme.n.n.n.nn.txt file that corresponds to the hot fix you installed.
3. See which files were supposed to be replaced by the hot fix.
4. Verify that the files included in the hot fix replaced the files that were backed up prior to installation.

Actuate

1. Look in the c:\bea\DeltekTE*x* folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Find the HotFixReadme.n.n.n.nn.txt file that corresponds to the hot fix you installed.
3. See which .class files were supposed to be replaced by the hot fix.
4. Verify that the files included in the hot fix replaced the files that were backed up prior to installation.
