

## Deltek Costpoint HotFix Readme

Released: May 11, 2018

# Paid Family Leave Phase 2: Ability to Compute Leave for a Single Leave Type

This Costpoint enhancement will allow HR Administrators to compute leave accruals for a single leave type in the Compute Leave (LDPCLHF) application. This can be useful if you need the employee to have an accrual before timesheets are entered or imported. For example, You can use this functionality if your employee has a leave type for Paid Family Leave that must be accrued before it can be charged on timesheets, but the employee also has a leave type that is based on hours worked and must be computed after timesheets are entered or imported.

## Screen Updates

The Costpoint release applies the corresponding updates to the following screens for this feature:

### Compute Leave Accruals (LDPCLHF)

The screen now allows you to compute leave accruals for all or a single leave type. To support this functionality, the following **Leave Type** fields are now available in the **Selection Range** group box:

- **Range Type** — From the drop-down list, select the range of leave types to be computed. Valid options are **All** or **One**.

Select **One** when you have a leave type that must be computed before or after an employee's other leave types. If you select **One** as the range type, enter the leave type to be computed in the leave type **Start** field.

- **Start** — If you select **One** in the **Range Type** field, enter, or use Lookup to select, the leave type to be computed. This field is enabled only if the **Leave Type - Range Type** is **One**.

If your employee has multiple leave types and you only compute leave for one of those leave types, you will still be able to compute the other leave types in the future. However, please note that the same leave type cannot be posted to Leave History more than once for the same employee and leave period.

## Application JAR Requirements

The following table shows the required application JAR version for each screen affected by this update:

Domain	Module	Application ID	Application Name	Application File
People	Leave	LDPCLHF	Compute Leave Accruals	cp711_ldpclhf_015.zip

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Support Center at <https://deltek.custhelp.com> before you install the update.

## To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Support Center credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix Update:

Refer to the installation instructions posted on the Deltek Support Center site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help » About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## To Check to See if the Feature is Installed:

1. Click **Help » About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).
