## Overview

Welcome to the Deltek Costpoint Help File Installer Cumulative Release Notes. Periodically (approximately monthly), we will deploy all those help topics that have been updated, corrected, or created since the previous help file update. These release notes summarize the contents of each help file installer deployed through the Deltek Software Manager (DSM).

## Help File Updates

Please note that after the initial release of the Costpoint 7.1.1 help installer, we updated the numbering to reflect the corresponding SYSTEM JAR release. The numbering has switched from 001 (DeltekCostpoint711HelpFileInstallerUpdate001) for the initial release to 018 (DeltekCostpoint711HelpFilesUpdate018) to coincide with the SYSTEM JAR 018 release. Any help updates delivered in between SYSTEM JAR releases will be given a sub-release number.

For example:

- DeltekCostpoint711HelpsFileUpdate018.1
- DeltekCostpoint711HelpsFileUpdate018.2

We believe this will make it easier for you to reconcile help updates with releases.
