MATERIALS/PRODUCTION CONTROL/PCMMOMNT/Enter Manufacturing Orders

[Deltek Defect Tracking Number:](#)

793756

[Issues Resolved:](#)

Description: When you modified a manufacturing order (MO), the application also updated the timestamps on the INV_TRN and INV_TRN_LN tables. This happened to all MO status types, including **Closed**.

Customers Impacted: This defect affects Costpoint users.

Workaround Before Fix: None.

Additional Notes: None.

MATERIALS/PRODUCTION CONTROL/PCMMOMNT/Enter Manufacturing Orders

[Deltek Defect Tracking Number:](#)

796354

Issues Resolved:

Description: The same Part/Rev and Find number combination was used in multiple lines (in different line numbers) within the MBOM, while the Part routing line component (MES created) did not have a Line number. This made it difficult to associate a routing line component with an MO requirement line component (coming from MBOM) and caused the MO requirements to add all lines in the first line of the requirements.

Customers Impacted: This defect affects Costpoint users.

Workaround Before Fix: Add unique Find numbers to the MBOM rows so that the routing line components can be associated with a unique MO requirement line.

Additional Notes: None.
