Deployment Date: 2/18/2016

Hot Fix: DeltekCostpoint711FrameworkUpdate015.exe; cp711_sys_015.zip; cp711_patch7084_001.zip

Framework

Deltek Defect Tracking Number:

564633

Issues Resolved:

Description: Framework and the following applications are updated to accommodate changes required by the new ability to implement one-time passcode authentication in Costpoint:

- Manage Users (SYMUSR) – Two new items are added to the Authentication tab. Use the One-time Passcode Required check box to indicate whether or not a one-time passcode is required for the user upon login. Use the PIN field to enter a personal identification number (PIN) that the user will use with the passcode upon login.
- Configure User Preferences (UPMUSRPR) – Users can change their PIN set up by their system administrator through the new PIN field added to the Password Information group box of this screen.
- Configure System Settings (SYMSETNG) – The Corporate Settings block is now divided into the General Settings and Security Settings tabs. The first tab contains the Batch Job Retry Defaults group box, the Licensing Email ID field, and the Enforce Segregation of Duties Rules, Enable AutoComplete, and Use Auto Position mode check boxes. The second tab has the Password Complexity group box and a new group box, Authentication Passcode. Use the Authentication Passcode group box to establish parameters for one-time passcode authentication such as passcode and login intervals, Help Desk login message, and user PIN requirement.

A new screen, View User Authentication Passcode History (SYQMFAHS), is also created for this enhancement. Use this screen to view authentication passcode history for each user.**Customers Impacted:** This enhancement affects Costpoint users.**Workaround Before Fix:** None.**Additional Notes:** This requires PATCH2837, PATCH7080, and PATCH7084.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at https://deltek.custhelp.com before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to https://dsm.deltek.com.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:

If you have any questions, please contact Deltek support at https://deltek.custhelp.com.
