

**Deployment Date: 7/20/2016**

**Hot Fix: cp711\_blprbil\_003.zip**

### **PJ/BL/BLPRBIL/Calculate Retroactive Billings**

**Deltek Defect Tracking Number:**

615540

**Issues Resolved:**

**Description:** The application combined records when more than one person calculated the retroactive bill.

**Customers Impacted:** This defect affects Costpoint users.

**Workaround Before Fix:** Do not allow another user to recalculate the retroactive bill.

**Additional Notes:** When two different users calculate a retroactive bill for the same billing node using the same parameters, the data in the Retroactive Billing Worksheet report is doubled. The underlying data in the Z\_BLPRBIL\_RPT table is stored by USER\_ID, but the report does not filter using the USER\_ID. The combined data for both USERIDs is displayed when the report is printed. The bill calculates and prints correctly. When the retroactive bill is subsequently calculated by the first user, the system overwrites the rows in the Z table for that user only. The data rows from the second user remain in the Z table, and the Retroactive Billing Worksheet is in error until the second user also recalculates the retroactive bill.

**Files Updated:**

cp711\_blprbil\_003.jar

**System File Dependencies:**

cp711\_sys\_006.zip

**Custom Programs Affected:**

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

**To Download the Hot Fix:**

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.
