[Issues Resolved:](#)

**Description:** The application did not truncate values with more than 9 characters in the **Transmitter Federal EIN** field (positions 6-14 on A, B, and E Records). In addition, if the **Transmitter Federal EIN** field value was less than 9 characters, the next field in the record immediately occupied the next positions that are still designated for the **Transmitter Federal EIN** field value (positions 6-14). As a result of these issues, if the **Transmitter Federal EIN** field value was not exactly 9 characters, the positions of subsequent fields in the record were incorrect.

**Customers Impacted:** This defect affects Costpoint Payroll users.

**Workaround Before Fix:** Ensure that the value in **Tax ID** field on the Configure Company Information screen is equal to 9 characters.

**Additional Notes:** None.
