

# Deltek Time & Expense HotFix Readme

**Release Date: August 31, 2017**

## Enhancement

### General Installation Updates

The Time & Expense 10.0 Product Database Installer now provides the ability to convert various settings when upgrading from Time & Expense 9.0.1.

During installation, the user is prompted with the option to convert security settings after selecting the domain to be upgraded.

If you choose to convert security settings, you should do so *only* against your primary TE 9.0.1 domain, unless, you choose a unique ADMIN schema for additional domains.

---

When choosing to migrate security settings, the following items will be migrated over to your TE 10.0 configuration:

- **LDAP IP** – For clients who use LDAP as an authentication method, the employee LDAP ID will be converted to the Costpoint security model during this process.
- **Security Groups** – TE 9.0.1 security groups will be modified and converted to security groups in the Costpoint security model during this process.
- **UDT Labels** – TE 9.0.1 UDT Labels will be converted to the Time & Expense 10.0 configuration for all configured languages.

Please review the *Time & Expense 10.0 Post-Installation Configuration Guide* for additional steps and information regarding this conversion process.

### Requirements

This enhancement requires the following: DeltekTimeAndExpense1000DatabaseTier\_Build05.exe.

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

## To Download the HotFix/Feature Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix/Feature Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## To Check to See if the Feature is Installed:

1. Click **Help > About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).

## More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
