

Deltak Costpoint HotFix Readme

Release Date: June 29, 2017

Email Redirect Capability

A new field, **E-mail Redirect**, has been added to the Company Settings tab of the Configure System Settings screen to allow you to redirect all emails to a single predefined email address.

This field can be helpful in a number of testing scenarios. One example is when testing in a new test environment using a copy of your production database. If you do not want emails generated by the test system to be sent to users to avoid confusion between emails coming from the production system and the new test system, you can use this field to redirect emails generated by the test system to a single email address during testing.

The redirected emails are updated with the information about the original recipient (that is, the information about the person who the email was intended to be sent to is not lost). This way, the person reviewing all the emails in the Inbox used for redirection can understand to whom the emails were sent in the first place.

Patch and System JAR Requirements

This enhancement requires the following:

- Costpoint 7.1.1 System JAR 030 (cp711_sys_030.zip)
- PATCH3208

Application JAR Requirement

The following table lists the Costpoint 7.1.1 screen affected by this update. It includes the required JAR version for the application.

Domain	Module	Application Name	Application ID	Application File
Administration	SY	Configure System Settings	SYMSETNG	cp711_symsetng_010.zip

More information about this release is on the following page.

Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

To Download the HotFix/Feature Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix/Feature Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

To Check to See if the Feature is Installed:

1. Click **Help > About Costpoint** from the Costpoint toolbar.
2. Open the Features subtask and click the Feature that was just installed.
3. Open the Applications subtask. Check the list of applications and their corresponding application jars and see if they are correct and have been successfully deployed (highlighted in green).
4. Open the Patches subtask. Check the list of patches and see if they are correct and have been successfully deployed (highlighted in green).

More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
