ACCOUNTING/FIXED ASSETS/FAPACAST/Process Autocreation Transactions

Deltek Defect Tracking Number:

890552

Issues Resolved:

Description: When you ran the Create Asset Master Records application on Other Company, you saw Company 1's error validation in the Autocreation Transaction Error Report. This issue occurred because the User Asset No and User Item No combination that you used in the Manage Autocreation Transactions application of the autocreated asset in Company 1 already exists.

Customers Impacted: This defect affects you if you manage autocreation transactions in Costpoint.

Workaround Before Fix: Use a User Asset No and User Item No combination that does not exist in the ASSET table.
