Overview

This document details Maintenance and Sustaining Support for Maconomy products and related third party products.

Support details are provided for:

- Maconomy with Touch and iAccess interfaces
- Maconomy Components
- People Planner
- Third Party Products

This document contains these sections:

- Active Support

Note: This section contains steps to access this information where it is maintained in the Deltek Product Support Compatibility Matrix.

- Maintenance Support
- Sustaining Support
- Appendix
 - Terms used in the document
 - Support by product

New Announcements

General

Apple M1 (ARM-based Mac) Support for Maconomy

Apple has moved from Intel to new ARM-based processors. The Deltek Maconomy Workspace Client (included embedded BPM and People Planner components) are certified to work on these new Mac computers (technically in Roseta mode, which is seamless to customers and their users). Support is certified from the following Maconomy versions and forward in the given streams:

- 2.5.3
- 2.4.7
- 2.3.4
- 2.2.6

Oracle Client

Deltek support for the Oracle client version (installed on the Application server) and Database version are not matched. We support Oracle 12.2 and 19c databases, but only 12.1 as the Oracle client version.

Desupport

Embedded BPM Reports on Mac

The Workspace Client on Mac computers no longer supports printing or exporting embedded BPM reports. The embedded reports can still be opened, but cannot be printed or exported.

This is due to a third party tool that is outside of Deltek's control.

The workaround is to open the report from the Workspace Client in a separate browser.

Some reports are already enabled for opening in separate browsers from the Workspace Client. For customer reports, you can add an action button that opens the report in a separate browser.

RHEL6

With desupport of RHEL6, new versions of MConfig will not run on RHEL6. You must use MConfig 9.3 on existing installations.

Internet Explorer Retires

Internet Explorer (IE) retires on June 15, 2022; Edge to replace. We recommend Edge for the Portal.

Monthly Time Reporting

With Maconomy 2.5.4, the Monthly Time Reporting functionality will be de-supported. This will be done as part of a code refactor project to optimize the time sheet code. With Maconomy 2.6 the functionality will be removed altogether.

Updates as of 2.6

As of Maconomy 2.6, we are making the following changes:

- Removing the Portal (replaced by iAccess)
- We will certify browsers only for iAccess and BPM
- Removing System Parameters defining host and port for EmailOnAction in MDML Layouts (replaced by server.ini configuration)
- Removing Kona / Deltek Collaboration integration
- Removing Dirmi WSC Protocol (replaced by MUXRMI)
- Removing MPL1 and MPL2 (replaced by MPL4)
- Desupporting SQL Server 2012 and 2014
- Desupporting our legacy MRL Reporting Technology
- Removing the Monthly Time Reporting functionality

Certifications

- **SQL Server 2019** – for BPM
- **Java SE Critical Patch Update October 2021**
- **ARM-based Mac replacement** – for Intel processors
- **Oracle Linux 8 (OEL 8)** – for Touch, Maconomy, and iAccess (excludes BPM)

Notes:

- Certification for BPM is planned for 2.6.
- Use Oracle 12.1 Client on Maconomy application server to connect to Oracle 19c database.
- **BO 4.2 SP8 Patch 8 and Patch 10** – for BPM
- **Android 12** – for Touch and iAccess
- **iOS 15** – for Touch and iAccess

iAccess

There are no announcements for this release.

Touch

There are no announcements for this release.

People Planner

There are no announcements for this release.

Active Support / Compatibility Matrix

Active Support information for Maconomy, iAccess, Touch, and People Planner is maintained in the Deltek Product Support Compatibility Matrix.

To view Active Support information:

1. Click [Deltek Product Support Compatibility Matrix](#).

or click the internal link:

<https://home.deltek.com/sites/products/Documents/DeltekProductSupportCompatibilityMatrix.pdf>

2. Log in to the Deltek Customer Care Connect site.
3. Scroll down and click on the related PDF.

•  [DeltekProductSupportCompatibilityMatrix.pdf](#) (6.89 MB)

4. Press CTRL + F and enter the product for which you need information (such as iAccess or Maconomy).

Historical Announcements

This section provides a list of important announcements for Maconomy and third party products.

Area	Date	Announcement
General	06/2021	<p>ARM-Based Macintosh Replacement for Intel Processors</p> <p>In its latest hardware, Apple is moving from Intel to new ARM-based processors which may impact the running of the Maconomy Workspace Client.</p> <p>Note: Deltek is in the process of Quality Assuring the Workspace Client on this new hardware, but until this is confirmed, we advise customers to postpone any upgrades to the latest Apple hardware as Deltek cannot guarantee or support this use.</p> <p>Desupport</p> <p>With desupport of RHEL6, new versions of MConfig will not run on RHEL6. You must use MConfig 9.3 on existing installations.</p> <p>With Maconomy 2.5.4, the Monthly Time Reporting functionality will be de-supported. This will be done as part of a code refactor project to optimize the time sheet code. With Maconomy 2.6 the functionality will be removed altogether.</p> <p>As of Maconomy 2.6, we will be removing support for our legacy MRL Reporting Technology.</p> <p>Certifications</p> <ul style="list-style-type: none"> ▪ SQL Server 2019 – for Maconomy ▪ Android 11 – for iAccess ▪ MAC OS 11 Big Sur – for Maconomy ▪ Java 8 Security Update 281 ▪ ARM-based Mac replacement – for Intel processors ▪ MAC OS 11 Big Sur – for Maconomy
General	07.2020	<p>Deltek CRM Integration Migrates to Vantagepoint REST API</p> <p>Maconomy 2.5.1 will support Vantagepoint 3.0, and as a result, the Deltek CRM Integration migrates to REST API. This means that Maconomy 2.5.1 CRM Integration will be compatible only with Vantagepoint 3.0 (or later).</p> <p>Certifications</p> <ul style="list-style-type: none"> ▪ BO 4.2 SP8 – for Maconomy and BPM. ▪ Android 10 – for iAccess.

Area	Date	Announcement								
		<ul style="list-style-type: none"> ▪ SQL Server 2017 – for BPM ▪ Chrome 80 – for iAccess and BPM Note: Cookies restricted to first party. ▪ Java 8 Security Update <p>Desupport</p> <ul style="list-style-type: none"> ▪ Upgrade Paths — Due to the age of legacy Maconomy versions, Deltek no longer supports and maintains direct upgrades from versions earlier than 2.1 to the latest releases of Maconomy. The supported upgrade paths are as follows: <table border="1" data-bbox="657 703 1427 1050"> <thead> <tr> <th data-bbox="657 703 992 766">Version</th> <th data-bbox="992 703 1427 766">Path</th> </tr> </thead> <tbody> <tr> <td data-bbox="657 766 992 829">Earlier than X1</td> <td data-bbox="992 766 1427 829">Please contact PDM</td> </tr> <tr> <td data-bbox="657 829 992 987">X1-2.0</td> <td data-bbox="992 829 1427 987">Two phase upgrade: Initially to 2.1 Followed by 2.1 to target version</td> </tr> <tr> <td data-bbox="657 987 992 1050">2.1 and later</td> <td data-bbox="992 987 1427 1050">Direct upgrade to target version</td> </tr> </tbody> </table> <ul style="list-style-type: none"> ▪ Workflow Engine — With Maconomy 2.5, we have disabled default Workflow Engine functionality, as it is desupported. This functionality is not available as standard in the Workspace Client or in iAccess and the approval hierarchy functionality in the Workspace Client and iAccess has replaced the need for workflows. We will remove the functionality altogether with Maconomy 2.5.1. ▪ Portal — Maconomy will desupport the Portal as of Maconomy 2.6, in Q3 2021. ▪ Windows 7 — Microsoft de-supported Windows 7 as a Client OS in January 2020, and in turn, Deltek has also desupported Windows 7. 	Version	Path	Earlier than X1	Please contact PDM	X1-2.0	Two phase upgrade: Initially to 2.1 Followed by 2.1 to target version	2.1 and later	Direct upgrade to target version

General	11.2019	<p>Certifications</p> <ul style="list-style-type: none"> ▪ Java SE 8 – Update 231 for Maconomy ▪ Oracle 19 – for Maconomy and BPM <p>Note: For Pentaho, Oracle 19, is supported as a data source only and not as a database repository. Additionally, while our BPM packaging supports Oracle 19, SAP itself has not officially certified Oracle 19 for use with BO SP5.</p>								

Area	Date	Announcement
		<ul style="list-style-type: none"> ▪ iOS 13.x – for iAccess (iPad) ▪ Safari on iOS 13.1.2 – for iAccess (iPad) <p>Note: Beginning with iOS 13.1.2, iPad users can now view BPM reports in either Safari or Chrome. However, for optimal viewing experience, SAP BI mobile still recommends the use of their Mobile BI app.</p>
	09.2019	<p>Certifications</p> <ul style="list-style-type: none"> ▪ Pentaho 8.2 – for Maconomy (1087545) ▪ SQL Server 2017– for Maconomy (excluding BPM) (774369) ▪ BO SP5 SP11 – for Maconomy (1163128) ▪ Android 9 – for iAccess (1149954) ▪ Android 10 – for Touch (1133278) ▪ Firefox 68 ESR – for iAccess, Maconomy, and BPM (1142896) ▪ iOS 13 – for Touch (1139874)
	05.2019	<p>Certifications:</p> <ul style="list-style-type: none"> ▪ Android 8 Tablet certification – for iAccess ▪ HTTP2 Certification – for Maconomy and Touch <p>Technology recently de-supported:</p> <ul style="list-style-type: none"> ▪ BI 4.2 SP3 is de-supported with this release when you upgrade to a Maconomy version supporting BI 4.2 SP5
	28.09.18	<p>Maconomy Migrates to Azure OpenID Protocol</p> <p>To optimize the latest security standards for SSO and 2FA, Deltek recommends that Maconomy users migrate from Azure OAuth protocol to Azure OpenID protocol. While Microsoft still supports both Azure OAuth and Azure OpenID, as of Maconomy 2.4.2, we support the Azure OpenID protocol.</p> <p>Furthermore, Apple has already removed support for the plugin we use for OAuth, which impacts our mobile solution, Deltek Touch for Maconomy. Therefore, to take advantage of the latest Touch version (3.0) you must configure Maconomy to use the Azure OpenID protocol. Otherwise Touch will cease to function and this will impact users who download the latest version of the Touch App</p> <p>Other Deltek or 3rd Party products within your Azure ecosystem may continue to use the older Azure OAuth protocol, which can exist side-by-side with the Azure OpenID configuration.</p>
	10.08.18	<p>Maconomy BPM/SAP BO Upgrade 4.2 SP 5</p>

Area	Date	Announcement
		<p>We are upgrading SAP BusinessObjects 4.2 SP3 to SP5 in upcoming Maconomy releases. Some benefits include:</p> <ul style="list-style-type: none"> ▪ Better performance with many bug fixes ▪ Enhanced user experience with the new look and feel called Fiori (introduced in SP4) ▪ Long-awaited improvements to the SDKs (used by our BPM team for internal development and packing) ▪ Improved experiences for Mobile users ▪ Reduced use of Java in the web applications, as SAP is working on the complete removal of Java as it relates to their web applications. <p>The following Maconomy/BPM releases will assume SAP BusinessObjects 4.2 SP5:</p> <ul style="list-style-type: none"> ▪ Maconomy 2.4.3 (internally 20.0 SP 102) ▪ Maconomy 2.3.4 (internally 19.0 SP 104) ▪ Maconomy 2.2.6 (internally 17.0 SP 106) <p>De-Support of Red Hat Linux</p> <p>We will be de-supporting Red Hat Linux as an O/S Server platform for Maconomy, with the current certification of Red Hat 6.X on Oracle 12.1 as the last supported version. Red Hat Linux Version 7.X will not be certified for Maconomy. Going forward, we will support Oracle Enterprise for Linux (OEL) with a target to certify Oracle 12.2 on this platform for Maconomy 2.3.x and 2.4.x streams and newer by the end of 2018.</p>
General	09.05.18	<p>Combined Releases</p> <p>With Maconomy 2.4.1, Maconomy will include a combined release with all its user interfaces with a single release and version, including Touch, iAccess, and Workspace Client. Going forward, the documentation for these user interfaces will be streamed together, as follows:</p> <p>Combined documents:</p> <ul style="list-style-type: none"> ▪ Release Notes ▪ Enhancements Guide ▪ Concepts Guide ▪ Product Support document / Compatibility Matrix ▪ Cumulative Update documents ▪ Other user documentation, such as User Guides and online help, will still be released separately.
	06.01.2018	<p>Following are core platform certifications, as of January 2018:</p> <ul style="list-style-type: none"> ▪ SQL Server 2016 ▪ Windows Server 2016 ▪ Case insensitive server setup for SQL server (for new Maconomy installations only)

Historical Announcements

Area	Date	Announcement
		<ul style="list-style-type: none"> ▪ Server 2008 is no longer supported as of Maconomy 2.4 C-GA.
	10.11.2017	<ul style="list-style-type: none"> ▪ Server 2008 is no longer supported as of Maconomy 2.4 C-GA
Maconomy	10.08.2018	<p>Versions Entering Sustaining Support</p> <ul style="list-style-type: none"> • Maconomy 2.2.x — The last planned release for the Maconomy 2.2.x stream is Maconomy 2.2.6, planned for 28.09.2018. Maconomy 2.2.x will enter sustaining support in 31 January 2019. <ul style="list-style-type: none"> ▪ Maconomy 2.3.x — This version will enter sustaining support 30 June 2019.
	09.05.18	<ul style="list-style-type: none"> ▪ With Maconomy 2.4.1 in Q2 2018, Deltek is aligning Maconomy releases and support schedules. Therefore, with 2.4.1 and subsequent releases, iAccess and Touch will follow the Maconomy support schedule.
	06.01.2018	<ul style="list-style-type: none"> ▪ As of 2.4 GA we add “Export to Excel” support for the .xlsx format, which enables support for exporting larger quantities of data from a Maconomy WSC table. ▪ As of 2.3, we de-support Solaris and IBM AIX as a Maconomy Application Server Platform for Maconomy. ▪ We plan to de-support MCRON, which was previously used for purposes that are now replaced by the Background Task Framework introduced in 2.3 GA. Customers should make plans to migrate use of MCRON to use the new framework.
	10.11.2017	<ul style="list-style-type: none"> ▪ Data Warehouse customers who rely on the ETL, note that Pentaho 7 is required to run SQL Server 2014. The product team is currently planning a future certification effort for Pentaho 7; however, this will not be available until 2018 due to core development required to support this certification. Prior to this effort, customers who require Pentaho will not be able to use SQL Server 2014 in a certified manner. ▪ With Maconomy 2.3.1, 2.2.5, and 2.4 LA2 and forward, you are required to also upgrade to BO 4.2 SP3 Patch 2. New clients using these versions or forward must install 4.2 by default.
iAccess	07.2020	<ul style="list-style-type: none"> ▪ Due to limited IE11 support, not all iAccess features work in Internet Explorer / IE11. ▪ Starting with Maconomy 2.5.1, iAccess no longer supports Internet Explorer 11.
	05.2020	<ul style="list-style-type: none"> ▪ Due to limited IE11 support, not all iAccess features work in Internet Explorer / IE11.
	11.2019	<ul style="list-style-type: none"> ▪ Starting with Maconomy 2.5.1, iAccess no longer supports Internet Explorer 11.

Maconomy Components

This section shows planned support of legacy Maconomy components.

To ensure that we focus on enabling Customer and Partner success, we occasionally discontinue support of legacy product components. As we do so, we take steps to limit disadvantage and provide a smooth migration to replacement functionality.

Maintenance Support and Sustaining Support dates do not apply to existing versions of Maconomy, where contractual “end-of-life” terms apply.

Notes: If not otherwise specified, the Sustaining support is only valid from the specific version listed in Sustaining Support column.

Material updated for this release is placed at the top of the table below, in blue background.

Component	Area	Maintenance Support	Sustaining Support	Notes	Last Updated
MCRON	Tooling	N/A		MCRON was previously used for purposes that are now replaced by the Background Task Framework introduced in 2.3 GA. Customers should make plans to migrate use of MCRON to use the new framework.	05.01.18
BPM on Business Objects 4.x	Reporting Platform	N/A	N/A	With Maconomy 2.3.1, 2.2.5, and 2.4 LA2 and forward, you are required to also upgrade to BO 4.2 SP3 Patch 2. New clients using these versions or forward must install 4.2 by default.	08.05.2017
Workflow Engine	Workflow Technology	17.11.2014	Q1 2017	The Workflow Engine is used by few Maconomy customers. This functionality is not available as standard in the workspace client and the approval hierarchy functionality in the workspace client have gradually replaced the need for workflows.	24.03.2017

Component	Area	Maintenance Support	Sustaining Support	Notes	Last Updated
				Therefore, with Maconomy 2.4 the Workflow Engine will no longer be available.	
Dimension Reports and Ad Hoc Analysis	Reporting	17.11.2014	Q2 2016 Maconomy 2.3	With the maturation of our BPM solution, Dimension Reports and Ad Hoc Analysis are now considered a legacy reporting technology.	24.03.2017
RGL	Reporting	23.09.2013	Currently in sustaining support	With the maturation of our BPM solution Extension Framework RGL is considered legacy technology.	24.03.2017
MPL1	Printing	23.09.2013	Q2 2016 Maconomy 2.3	MPL4, is introduced to replace all legacy MPL technology.	24.03.2017
Java Client	User Interface	17.11.2014 Maintenance support is available for customers on older supported Maconomy versions of Java client (no new features)	Q2 2016 Maconomy 2.3	Workspace Client 2.x introduces a powerful replacement for the Java Client. Note: The Analyser continues to be available in WSC.	24.03.2017
Traffic and Resource Planning	Application Functionality	17.11.2014	Q4 2016 Maconomy 2.3	This functionality is replaced by People Planner. Furthermore, reliance on the portal makes this functionality obsolete. The following dialogs are obsolete: <ul style="list-style-type: none"> ▪ Detailed Planning ▪ Detailed Employee Planning 	02.12.2016

				<ul style="list-style-type: none"> ▪ Gantt Chart ▪ Skill Requirements ▪ Task Staffing ▪ Task Search ▪ Employee Calendars ▪ Print Employee Load ▪ Print Planning Conflicts ▪ Print Resource Requirement ▪ Job Planning ▪ Print Detailed Planning ▪ Print Planning Conflicts ▪ Planning Slots ▪ Project Traffic Status ▪ Project Traffic Status Revisions 	
BPM on Business Objects 3.X	Reporting Platform	N/A	Q4 2015 Maconomy 2.2.3	SAP's Business Objects 4.x moves BO 3.x to sustaining support 12/31/2015. Customers do not need to be on 2.2.3 to use BO 4.x and receive related support We recommend that customers upgrade to a version of Maconomy that supports BO 4.x (2.2.3 or 2.3 forward).Custom universes/reports must be migrated as part of a traditional upgrade plan.	02.12.2016
MCS	Portal	23.09.2013	Q4 2014 Maconomy 2.2	If you are using MCS or MAS solutions and upgrading to version 2.2 or later, implement a current solution. To retain functionality from your existing solution, a final package can be used for using the solution as a customized installation. Discuss with your Account Manager as needed.	02.12.2016

Component	Area	Maintenance Support	Sustaining Support	Notes	Last Updated
MAS	Portal	23.09.2013	Q4 2014 Maconomy 2.2		02.12.2016
PSO 1.1 & 1.2	Portal	23.09.2013	TBD	Upgrades will still incorporate a fully supported standard upgrade of Portal components for these solutions, which have been adjusted to include any field changes that could otherwise break functionality.	02.12.2016
PSO 1.4		17.11.2014			
CPA		31.12.2015			

People Planner Components

This section shows planned support of legacy People Planner components.

To ensure that we focus on enabling Customer and Partner success, we occasionally discontinue support of legacy product components. As we do so, we take steps to limit disadvantage and provide a smooth migration to replacement functionality.

Maintenance Support and Sustaining Support dates do not apply to existing versions of People Planner, where contractual “end-of-life” terms apply.

Notes: If not otherwise specified, the Sustaining support is only valid from the specific version listed in Sustaining Support column.

Component	Area	Maintenance Support	Sustaining Support	Notes	Last Updated
“View Assigned Activities” view	Resource folder			Removed in 3.6.1	02.12.16

Maintenance and Sustaining Support

Component	Area	Maintenance Support	Sustaining Support	Notes	Last Updated
The tab to create a new task	Resource Manager Gantt Chart			Removed in 3.6.1	02.12.16
Ability to save the unencrypted database password	Data connection configuration file			Removed in 3.6.1	02.12.16
High volume of fields in query	Project selector			Instead of removing fields we re-factored the project selector to only load used fields.	
Cost and Cost Event	Billing price model			Removed Cost and Cost Event and added these: Overhead, Salary, Intercompany	

Appendix

Terms Used in This Document

This section describes general terms used in this document, such as Active Support, Maintenance Support, and Sustaining Support. The following information is for general support, and how this support may differ by product is detailed below.

Note: If you have questions about support, reach out to your account manager or product management (PDM) team.

General Terms

Active Support

Active Support is a period where Deltek is actively developing the next version of the software and actively supporting the most current version. During this phase of the product life cycle, there are software enhancements, and you have access to hot fixes as well as service packs and regulatory updates. Active Support begins at general release and ends when the next release is generally available.

Maintenance Support

Maintenance Support is a period where Deltek delivers on-going maintenance releases for the new version of the software, and at Deltek's approval, customers may continue to receive hot fixes for severity 1 issues. This phase begins when a newer version of the application is made generally available for major and minor releases (not including maintenance releases) and lasts for a minimum of 12 months. Following this 12-month period, it is possible the older/prior version of the software may be declared for sustaining support, which indicates Deltek will no longer deliver maintenance releases, nor hotfixes, for the version.

Note: The Maintenance Support period can be lengthened beyond the published retirement date by purchasing an Extended Support plan (i.e. Sustaining Support Plus), which provides customers with access to Deltek-approved severity-1 defect hotfixes. If interested in Sustaining Support Plus, please contact your Deltek Account Manager.

Sustaining Support

Sustaining Support is a period where you continue to have access to all fixes or service packs that existed prior the Sustaining Support life cycle phase. However, there are no new software enhancements, hot fixes, service packs, or regulatory updates of any kind for versions in this phase. Sustaining Support begins at the end of Maintenance Support and lasts indefinitely.

Third Party Products

Customer Care (CC) does accept support calls regarding 3rd party products and versions in Sustaining Support, but if the error cannot be reproduced in a supported product/version, CC does not make any further investigations regarding the bug. In this situation, CC and Engineering will consider the error fixed in the supported product/version. If a reported error in a desupported product/version also exists in a supported product/version, Engineering will produce a service pack/maintenance release for the supported product/version. In both cases, the customer must update to the supported product/version to have the error fixed.

Maconomy family products depend upon 3rd party product support, and is influenced by the support status of related vendors. When we talk about 3rd party product support, we refer to the approved use of these products with your Maconomy solution.

- If the product is an OS or database product, new installations and upgrades of the Maconomy product are not allowed before the third-party product is upgraded to a supported version.
- For all products, no error corrections are made to solve problems related to the third-party product.

Product Support Per Product

Maconomy

- **Active** — Active Support begins at general release and ends two years after the next main release.
- **Maintenance** — N/A unless explicitly specified for a release.
- **Sustaining** — Sustaining Support begins two years after the next main release

People Planner

- **Active** — Follows the general support process.
- **Maintenance** — Begins when the next major/minor version is released and stops when the following major/minor version is released.
- **Sustaining** — Starts when Maintenance Support stops
