## Overview

Welcome to the Deltek Maconomy iAccess 2.0.3 Release Notes.

These release notes contain a summary of the following:

- Pre-Installation Information
- Enhancements
- Software Issues Resolved
- Known Issues

iAccess 2.0.3 is a limited availability release.

---

## Pre-Installation Information

Please review the contents of this section before you install Maconomy iAccess 2.0.3.

### Prerequisites

See the *Deltek Maconomy iAccess 2.0.3 Installation Guide* for the list of prerequisites to installing iAccess.

### Supported Products

#### Supported Maconomy Versions

This version of iAccess supports the following Maconomy version/s:

- 2.2.5
- 2.3 GA CU3
- 2.3.1 GA CU1
- 2.4 LA1

#### Compatibility Matrix

Information about platform requirements (as well as supported Maconomy versions) is maintained in the *Deltek Product Support Compatibility Matrix*, located on the Deltek Customer Care Connect Site. In the Matrix, search on “Maconomy iAccess” to quickly navigate to the information you need.

#### Internal Link

<http://home.deltek.com/sites/products/Documents/DeltekProductSupportCompatibilityMatrix.pdf>

### Documentation

In addition to these Release Notes, the Maconomy iAccess 2.0.3 release contains the following documentation:

- Online help (accessed through the application)
- Deltek Maconomy iAccess Installation Guide

#### Locating Documentation Online

##### Internal Link — SharePoint

All documentation is available internally on SharePoint (drill down by product and version):

<https://home.deltek.com/sites/products/Maconomy/Documents/Forms/AllItems.aspx>

### External Link — DSM

<https://dsm.deltek.com/documentationlists/DeltekMaconomy225.html>

<https://dsm.deltek.com/documentationlists/DeltekMaconomy23GA.html>

<https://dsm.deltek.com/documentationlists/DeltekMaconomy231GA.html>

iAccess 2.0.3 documentation can also be downloaded from DSM as part of Maconomy version 2.4 LA1.

---

## Enhancements

The following features/enhancements are added for iAccess 2.0.3:

- Info Bubbles in Cards
- Approval Status Information in Time Sheet Lines

### Info Bubbles in Cards

**Tracking Number: 787485**

Info bubbles provide more information about the contents of a field. These are now available for some fields in the card part of the following workspaces:

- Weekly Time Sheet
- Daily Time Sheet
- Employee Self Service
- Employee Information

To view the info bubble for a specific card field, click once on that field. Note that you can only view info bubbles for card fields displayed with blue font (that is, not in Edit mode).

### Setup Instructions

Info bubbles are available in certain workspaces by default. To display additional info bubbles, customize the layout for the relevant workspace.

### Approval Status Information in Time Sheet Lines

**Tracking Number: 776430**

Weekly and daily time sheet lines now include a new **Status** field. This field displays the line's Approved/Rejected status, and clicking the field once displays an info bubble with more information about the approval status.

## Software Issues Resolved

### iAccess

#### Expenses: No “None” Value Displayed for Currency Field

**Defect:** 788425

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you created an expense sheet and did not specify a currency, iAccess did not populate the **Currency** field with a value of **None**.

This error is now fixed.

**Customers Impacted:** All clients.

**Workaround Before Fix:** N/A

#### Workspaces: Misaligned Fields and Values

**Defect:** 792063

**Browsers:** Firefox

**Description:** In most of the workspaces, card field names and their values were not aligned.

**Customers Impacted:** All clients using Firefox.

**Workaround Before Fix:** N/A

#### Null Values in the Calendar Displayed Incorrectly

**Defect:** 790596

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** The calendar widget displayed the value **NaN** for null data. This error is now fixed.

**Customers Impacted:** All clients.

**Workaround Before Fix:** N/A

#### Search-As-You-Type Malfunctioned on Subsequent Tries

**Defect:** 781343

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you repeated a search-as-you-type search in the same field, this second search yielded no results. This happened even if you got results during the first search.

**Customers Impacted:** All clients.

**Workaround Before Fix:** Refresh the browser page.

#### No Error Triggered by Unsaved Changed

**Defect:** 781338

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you had a record open in Edit mode and you tried to create a new one (or navigate to another record using the arrow buttons), iAccess did not display an error message to warn you about your unsaved changes. This happened in the Expenses, Mileage, and Purchase Orders workspaces.

This is now corrected.

**Customers Impacted:** All clients.

**Workaround Before Fix:** N/A

## Tablet Support

### iPad: Limited Photo Attachments Allowed

**Defect:** 781145

**Browsers:** Safari

**Description:** When uploading photos straight from the iPad camera, you could only attach one photo to your expense sheet. This happened because photos were always assigned the same filename (image.jpg.). If you tried to attach another photo via the camera, iAccess displayed a warning message about the duplicate filename.

This is now corrected. iAccess now assigns the filename "image-xxxxxxx.jpg" to any photos uploaded straight from your iPad camera.

**Customers Impacted:** All clients using iPads.

**Workaround Before Fix:** Take the photo, and attach to the expense sheet from the photo gallery.

## Settings

### iAccess Terms Not Translated

**Defect:** 778771

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you updated the language used by iAccess, not all the terms were translated.

This is now corrected.

**Customers Impacted:** All clients.

**Workaround Before Fix:** N/A

## Known Issues

### Tablet Support

#### Safari on iPad: Viewing BPM Reports is Not Supported

**Defect:** N/A

**Browsers:** Safari, Chrome

**Description:** You cannot view BPM Reports on any browser if you are using an iPad. This is a limitation of the BusinessObjects software used for reports.

**Customers Impacted:** Affects all clients using iPads.

**Workaround Before Fix:** Utilize other ways of viewing BO reports on a tablet: either through the Mobile BI app, or through emails with PDFs of reports attached to them.

### iAccess

#### Info Bubble Partially Cut in the First Row

**Defect:** 787050

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you try to view the info bubble for any field in the first row/line of a table, iAccess displays the info bubble with the top part cut off.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** N/A

#### Unable to Save New Absence/Allowance Request from the Period Summary Tab

**Defect:** 773491

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you create an absence/allowance request and click **Save** from the Period Summary tab, iAccess does not save the information. The application also disables the **Create** action until you click **Revert**.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** Make sure you save new absence/allowance requests from either the Absence Requests or Allowance Requests tab.

#### BPM Reports: No Session Expired Validation

**Defect:** 760872

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When the BPM server times out, iAccess cannot renew the session.

**Customers Impacted:** Affects all customers using BPM.

**Workaround Before Fix:** Log out of iAccess, refresh the page, and log in again.

## Notifications: Links to Absence-Related Items Do Not Navigate to the Correct Data

**Defect:** 775728

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** Clicking To-Dos related to the Absence Management Workspaces does not open the relevant records. The action only takes the users to the workspace.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** Navigate manually to the record mentioned in the To-Do.

## Notifications: Page Reloads When Opening an Item from Notifications

**Defect:** 775730

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When you open a Notification, the browser automatically reloads. This happens for all notifications, except those for time sheets.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** None.

## iAccess Automatically Sends New Token

**Defect:** 751817

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When the user enters an incorrect token during the reset password process, iAccess automatically sends out a new token.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** None.

## Popup Fields Are Not Searchable in Advanced Search

**Defect:** 763239

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When using the Advanced Search capability, you cannot make restrictions based on popup fields.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** None.

## User Roles: Last Visited Workspace Exclusive to a User Type Can Be Viewed by Other User Types

**Defect:** 770789

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** Since iAccess remembers the last workspace visited by a user, it can sometimes display that workspace when the user logs in again with a different user type. However, the user will not be able to view the data exclusive to the previous user type.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** None.

### **BPMReportView: Session Timeout When Opening a Report for Users Not Configured in BPM/BO**

**Defect:** 772372

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** When a user not set up in BPM tries to open a report, iAccess displays a Session Expired warning message. This is not the correct error message for the situation.

**Customers Impacted:** Affects all clients.

**Workaround Before Fix:** Use role-based access to hide the Reports workspace from users that are not set up in BPM.

### **Purchase Order: Include Vendor Name in Find Vendor**

**Defect:** 779720

**Browsers:** IE11, Chrome, Safari, and Firefox

**Description:** The Vendor Name is not displayed in the drop-down list for the **Vendor No.** field. Only the vendor numbers are listed.

**Customers Impacted:** Affects all clients running Maconomy 2.4 LA1 in the backend.

**Workaround Before Fix:** When creating or editing a PO, know the vendor number of the vendor you need to specify.

Deltek is the leading global provider of enterprise software and information solutions for government contractors, professional services firms and other project- and people-based businesses. For decades, we have delivered actionable insight that empowers our customers to unlock their business potential. 20,000 organizations and millions of users in over 80 countries around the world rely on Deltek to research and identify opportunities, win new business, recruit and develop talent, optimize resources, streamline operations and deliver more profitable projects.
