PEOPLE/LEAVE/LDPCLHF/Compute Leave Accruals

Deltek Defect Tracking Number:

866148

Issues Resolved:

Description: When processing multiple employees that had a leave code with a compute method of **U** (Unit of Hours Worked), the hours basis from a prior period was not reset for each employee. As the application processed each employee, the Leave Unit Fractions (LV_UNIT_FRACTION) hours from a prior employee were included in the hours basis for the following employees with the leave code based on units of hours. For example, employee **AAA1** had extra hours that were not used to calculate the leave code's accrual in a prior period, those unused hours were included in the hours basis for employee **AAA2**, causing the accrual for **AAA2** to be incorrect.

Customers Impacted: This defect affects Costpoint Leave users.

Workaround Before Fix: None.

Additional Notes: None.
