

**Deployment Date: 12/27/2017**

**Hot Fix: cp711\_wfmappri\_006.zip**

## **OTHERS/WORKFLOW/WFMAPPRL/Approval Workflow Models**

**Deltek Defect Tracking Number:**

872715

**Issues Resolved:**

**Description:** Validation should have been in place when conditions have been defined with entity fields that were not mapped to actual application screen fields.

**Customers Impacted:** This defect affects you if you approve workflow models in Costpoint.

**Workaround Before Fix:** Make sure that all entity fields are mapped to application screen fields.

**Additional Notes:** Workflow definition can include conditions in three different places:

- Permission to Start approval
- Permission to approve activity
- Condition for IF statement

Conditions are built using entity fields. The system validates the value in a field on screen that is mapped to a specific condition in an entity field. If the entity field is not mapped, it cannot be evaluated. It is important that condition entity fields are mapped to fields on screen and that system validation is in place.

**Files Updated:**

cp711\_wfmappri\_006.zip

**System File Dependencies:**

cp711\_sys\_032.zip

**Custom Programs Affected:**

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

**To Download the Hot Fix:**

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

**More Information:**
