**MATERIALS/INVENTORY/INMPCACT/Enter Actual Counts**

Deltek Defect Tracking Number:

441872

Issues Resolved:

**Description:** Manage Actual Count allowed you to save a count record when the sum of lot qtys counted does not match the actual count on the row. This created qty adjustments that were dropping the lot data, which in turn allowed the part inventory to get out of sync with the lot inventory.

**Customers Impacted:** This defect affects all Inventory module users in Costpoint 7.1.1.

**Workaround Before Fix:** None.

**Additional Notes:** None.
