

## VISION 6.1 SP4 Connect for Microsoft Outlook 1.0.32.8 (Vision Hot Fix # 028)

### Installation Notes

- You must have Vision 6.1 SP4 with Hot Fix 028 installed before you can install the Connect for Microsoft Outlook Version 1.0.32.8 release on your Vision Web server. If you do not have Vision 6.1 SP4 installed, see the [Deltek Vision 6.1 SP4 Release Notes](#). You can download the release notes (in PDF format) from the Deltek Customer Care Connect site at <https://deltek.custhelp.com>.
- You must download and install Connect for Microsoft Outlook Version 1.0.32.8 on your Vision Web server from the Deltek Software Manager screen. In the Sub-Release section of Vision 6.1 (SP4), select the Deltek Connect for Microsoft Outlook software to download. The installation guide and release notes are also available on the Documents tab on the right side of the Deltek Software Manager screen.
- You must uninstall existing Connect for Microsoft Outlook client installations before you upgrade the Vision web server with the Connect for Microsoft Outlook Version 1.0.32.8 release.

### Connect for Microsoft Outlook

#### Deltek Defect Tracking Number:

168096

#### Issues Resolved:

**Description:** In the Connect for Microsoft Synchronization Control Panel, when you specified criterion to filter records and there were more than 1,000 records to be processed by the filter criterion, the **Values** field in the Connect for Microsoft Outlook Filter – Edit Criterion dialog box was blank. You were unable to proceed.
