Deltek Defect Tracking Number:

Issues Resolved:

Description: The application used only the first character from the employee's first name to build the **Display Name** value (for example, Michaelson, J P). This issue occurred if the following two conditions existed:

- The **Display Name** field on the Record 4 in the input file contained a NULL value (or if no Record 4 existed in the input file).
- The combination of the employee's last name, suffix, first name, and middle initial exceeded 25 characters.

Customers Impacted: This defect affects Costpoint Employee users who import employee records using an input file.
