applications\TC\WEB-INF\classes\com\deltek\tc\exprpt\claimedexpenses\ExpReportClaimedExpensesController.class

**Other Applications Affected**

Expense Reports.

**System File Dependencies**

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs or stored procedures to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

## To Download the Cumulative Update:

1. From Internet Explorer, go to https://dsm.deltek.com. <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

2. Click **Run Deltek Software Manager**.

3. Log in using your Deltek Customer Care Connect credentials.

4. In the left pane of the Deltek Software Manager, expand your Deltek product.

5. Expand the Hot Fixes folder for your product, and select the update to download.

6. Click **Download** at the bottom of the screen.

## To Install the Cumulative Update:

**Deployment Instructions for WebLogic Tier**

Before installing *any* software update, you should first back up the files that will be modified. The files that will be modified during installation are listed in the Hot Fix PDF. The files are located in the \\Oracle\Middleware \DeltekTEx folder and the \\inetpub\wwwroot folder. You should either back up all files by making copies of both folders, or you should make individual backup copies of the files listed in the PDF.

In the instructions that follow, version number references are replaced with an "X" in file names.

1. Stop the Time & Expense service.
2. Extract the Hot Fix zip file to \\Oracle\Middleware\DeltekTEx folder.
3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

## WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTEx folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

## Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

## IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

## More Information:

If you have any questions, please contact Deltek Customer Care at https://support.deltek.com.

4. In the left pane of the Deltek Software Manager, expand your Deltek product.

5. Expand the Hot Fixes folder for your product, and select the update to download.

6. Click **Download** at the bottom of the screen.

## To Install the Cumulative Update:

**Deployment Instructions for WebLogic Tier**

Before installing *any* software update, you should first back up the files that will be modified. The files that will be modified during installation are listed in the Hot Fix PDF. The files are located in the \\Oracle\Middleware \DeltekTEx folder and the \\inetpub\wwwroot folder. You should either back up all files by making copies of both folders, or you should make individual backup copies of the files listed in the PDF.

In the instructions that follow, version number references are replaced with an "X" in file names.

1. Stop the Time & Expense service.
2. Extract the Hot Fix zip file to \\Oracle\Middleware\DeltekTEx folder.
3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

### WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTE*x* folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

### Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

### IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

## Custom Programs Affected:

Sometimes an update can cause custom programs or stored procedures to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

## To Download the Cumulative Update:

1.  From Internet Explorer, go to https://dsm.deltek.com. <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

2.  Click **Run Deltek Software Manager**.

3.  Log in using your Deltek Customer Care Connect credentials.

4.  In the left pane of the Deltek Software Manager, expand your Deltek product.

5.  Expand the Hot Fixes folder for your product, and select the update to download.

6.  Click **Download** at the bottom of the screen.

## To Install the Cumulative Update:

**Deployment Instructions for WebLogic Tier**

Before installing *any* software update, you should first back up the files that will be modified. The files that will be modified during installation are listed in the Hot Fix PDF. The files are located in the \\Oracle\Middleware \DeltekTEx folder and the \\inetpub\wwwroot folder. You should either back up all files by making copies of both folders, or you should make individual backup copies of the files listed in the PDF.

In the instructions that follow, version number references are replaced with an "X" in file names.

1. Stop the Time & Expense service.
2. Extract the Hot Fix zip file to \\Oracle\Middleware\DeltekTEx folder.
3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

### WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTEx folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

### Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

### IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

## More Information:

If you have any questions, please contact Deltek Customer Care at https://support.deltek.com.

# Deltek Time & Expense with Employee Self-Service  Hot Fix Notes

***Released: May 17, 2016***

**Release Name: TE901B8 Hotfix#129**

## Software Issues Resolved

## Expense

### Settings

#### Expense Report Types

**Deltek Defect Tracking Number:** 591742

**Description**: The **Order** drop-down list for Expense Report Tasks and Expense Authorization Tasks was updated for Record Tasks so that "Anytime" is now the only option available. This change ensures that the Record task cannot inadvertently be sequenced with other tasks. This applies to Expense Report tasks and Expense Authorization tasks.

**Customers Impacted**: This defect affects Expense module customers.

**Workaround Before Fix**: None.

**Additional Notes**: None.

## Custom Programs Affected:

Sometimes an update can cause custom programs or stored procedures to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

## To Download the Cumulative Update:

1. From Internet Explorer, go to https://dsm.deltek.com. <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

2. Click **Run Deltek Software Manager**.

3. Log in using your Deltek Customer Care Connect credentials.

4. In the left pane of the Deltek Software Manager, expand your Deltek product.

5. Expand the Hot Fixes folder for your product, and select the update to download.

6. Click **Download** at the bottom of the screen.

## To Install the Cumulative Update:

**Deployment Instructions for WebLogic Tier**

Before installing *any* software update, you should first back up the files that will be modified. The files that will be modified during installation are listed in the Hot Fix PDF. The files are located in the \\Oracle\Middleware \DeltekTEx folder and the \\inetpub\wwwroot folder. You should either back up all files by making copies of both folders, or you should make individual backup copies of the files listed in the PDF.

In the instructions that follow, version number references are replaced with an "X" in file names.

1. Stop the Time & Expense service.
2. Extract the Hot Fix zip file to \\Oracle\Middleware\DeltekTEx folder.
3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

### WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTEx folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

### Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

### IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

### WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTE*x* folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

### Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

### IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

**Other Applications Affected**

Timesheet

**System File Dependencies**

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs or stored procedures to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

## To Download the Cumulative Update:

1. From Internet Explorer, go to https://dsm.deltek.com. <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />

2. Click **Run Deltek Software Manager**.

3. Log in using your Deltek Customer Care Connect credentials.

4. In the left pane of the Deltek Software Manager, expand your Deltek product.

5. Expand the Hot Fixes folder for your product, and select the update to download.

6. Click **Download** at the bottom of the screen.

## To Install the Cumulative Update:

**Deployment Instructions for WebLogic Tier**

Before installing *any* software update, you should first back up the files that will be modified. The files that will be modified during installation are listed in the Hot Fix PDF. The files are located in the \\Oracle\Middleware \DeltekTEx folder and the \\inetpub\wwwroot folder. You should either back up all files by making copies of both folders, or you should make individual backup copies of the files listed in the PDF.

In the instructions that follow, version number references are replaced with an "X" in file names.

1. Stop the Time & Expense service.
2. Extract the Hot Fix zip file to \\Oracle\Middleware\DeltekTEx folder.
3. Start the Time & Expense with ESS service.

If the hot fix file contains a database Patch file, complete the following steps:

1. Go to Web Logic console (http://<servername>:7009/console).
2. Log in as system/weblogic.
3. Click **Domains** under Domain Structure.
4. Select **MASTER** domain.
5. Log in as SA if using SQL, or SYSTEM if using Oracle.
6. Click **Apply Service Pack**.
7. Type the password for the tc_0000 account.
8. Click **Execute**.
9. Wait for a "Process Completed Successfully" message.
10. Navigate to Domains, and then select **Sample** domain.
11. Click **Apply Service Pack**, and then click **Execute**.
12. Wait for a "Process Completed Successfully" message.
13. Continue applying the service pack to the rest of the domains (TC_0002, TC_0003, and so on) until they are all complete.
14. Start the Time & Expense with ESS service.

If the hot fix has an associated IIS hot fix, complete the following steps:

1. Extract the Hot Fix IIS zip file to \\inetpub\wwwroot folder.
2. Using the IIS Management console, restart the IIS service.

## To Check to See if the Cumulative Update is Installed:

### WebLogic Tier

1. Look in the \\Oracle\Middleware\DeltekTEx folder, where *x* is your version of Time & Expense, on your WebLogic server.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.

### Database Tier

1. Log into Time & Expense.
2. Click the "i" in the Global Options Area (upper right hand side) to display the About Time and Expense dialog box.
3. Check that the database hot fixes are displayed in the dialog box.

### IIS

1. Look in the \inetpub\wwwroot folder.
2. Open the Hot Fix PDF that corresponds to the hot fix you installed. Note which files were supposed to be replaced by the hot fix.
3. To verify that these files were replaced, confirm that the date and time on the replaced files matches the date and time on the hot fix zip file.
