Deltek Costpoint HotFix Readme

Released: March 22, 2016

Enhancement

Manage System Integration Accounts (SYMINTGR)

Costpoint now provides the ability to update user name/password information used in various out-of-the-box integrations through Costpoint web user interface by utilizing the new application Manage System Integration Accounts (SYMINTGR). To access this screen, go to **Administration » Security System » Security System**.

Integrations are configured by a technical system administrator in the Configuration Utility. User name and password are part of the configuration for most integrations. Since this information changes more frequent (based on the company's password reset policy), it is useful in some cases to allow a separate administrator who manages a specific integration and who may not have access to the Configuration Utility to reset integration user name/password. This new application provides that capability.

This screen has nine subtasks that allow Costpoint administrators to modify the user name/password for the system integrations. Six of these subtasks are shown only if there is data configured in the Configuration Utility.

- Project Manufacturing Integration (SFT)
- Project Manufacturing Integration (ME)
- CMS Integration
- Exchange Integration (conditional subtask)
- SilkRoad Integration (conditional subtask)
- Cobra Integration (conditional subtask)
- GovWin CM Integration (conditional subtask)
- Talent Management Integration (conditional subtask)
- Resource Planning Integration (conditional subtask)

Application JAR Requirement

This enhancement requires cp711_symintgr_001.jar.

More information about this release is on the following page.

Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at http://support.deltek.com before you install the update.

To Download the HotFix Update:

1. From Internet Explorer, go to https://dsm.deltek.com.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, https://deltek.custhelp.com.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.

- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.

- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the HotFix is Installed:

1. Open the application that was updated.

2. Click **Help** > **About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

More Information:

If you have any questions, please contact Deltek Customer Care at https://support.deltek.com.
