**Issues Resolved:**

**Description:** When there were no unprocessed earnings records and you ran the process to create a voucher for an adjustment amount, the application printed the report but it did not create the adjustment voucher. If there are unprocessed earnings records the report displayed two vouchers and created both the voucher for the records and adjustment.

**Customers Impacted:** This defect affects Costpoint users.

**Workaround Before Fix:** Enter adjustment amounts when there is an unprocessed payroll record available.
