### **PEOPLE/LABOR/LDPLDJ/Post Labor Distribution**

**Deltek Defect Tracking Number:**

795063

**Issues Resolved:**

**Description:** When processing D and N timesheets with leave account, the application skipped a number when assigning values to the **EMPL\_LV\_HIST\_KEY** column on the Employee Leave History (EMPL\_LV\_HIST) table. As a result, the **EMPL\_LV\_HIST\_KEY** column value was not in synch with value on the **LAST\_KEY** column on the Sequence Generator (SEQ\_GENERATOR) table for Employee Leave History. This issue caused a system error to occur on the next processing of Post Labor (with leave account) or Post Leave due to duplicate **EMPL\_LV\_HIST\_KEY** column values.

**Customers Impacted:** This defect affects Costpoint Labor users.

**Workaround Before Fix:** None.

**Additional Notes:** None.
