ACCOUNTING/ACCOUNTS PAYABLE/APMVENDH/Maintain Vendor History

Deltek Defect Tracking Number:

483562

Issues Resolved:

Description: There were issues when an old record was recopied:

- The line sequence number did not generate a new number sequence. Thus, the record could not be saved and an error message displayed, "A gap in the line/sequence numbers exists and is not allowed in this application."
- When the **New/Copy** button was clicked, an incorrect error message was displayed, "You can not clone vouchers generated by the system. Only manually entered vouchers may be cloned."

Customers Impacted: This defect affects you if you use the Accounts Payable module in Costpoint 7.1.1.**Workaround Before Fix:** None.**Additional Notes:** None.

- State of Maryland in the State subtask of the Manage Pay Type Taxability screen and the Manage Deductions screen.

If you only have the Deduction and Pay Type taxability set up at the Maryland State level or at the Federal level (not at the Local level), you do not need to do anything further. The local tax calculation uses the taxability set up at the State level if it is not set up at the Local level.
