

# Deltek Costpoint HotFix Readme

*Released: February 19, 2016*

## Enhancements

### Allow Three-Digit Manufacturing Order (MO) Operation Step Number

To support the usage and import of three-digit MO operation step numbers from Deltek Time and Expense 9.x and 10.x, Costpoint now provides you the ability to use a file layout with a three-digit **MO Operation Step Number** (MO\_OPER\_STEP\_NO) field. You must enable this new feature if you have any three-digit MO operation step numbers.

This release includes updates to the following screens:

#### Import Timesheets from Deltek Time and Expense (LDPUPET)

- For Deltek Time and Expense 9.x users, the application now accepts MO operation step numbers of up to three digits if the **Use File Layout with a three-digit MO Operation Step Number** check box is selected in Configure Labor Settings screen.
- For Deltek Time and Expense 10.x+ users, the application will automatically accept MO operation step numbers of up to three digits.

#### Import Timesheets (AOPUTLTS)

The application now accepts MO operation step numbers of up to three digits.

#### Configure Labor Setting (LDMLABOR)

- The **Deltek Time & Expense** drop-down list options now include **Time & Expense 10.x+**.
- The screen now includes a new check box, **Use File Layout with a three-digit MO Operation Step Number**, that enables you to support importing of three-digit MO operation step numbers from Deltek Time and Expense 9.x.

If you are using Time and Expense 9.x and the **Use File Layout with a three-digit MO Operation Step Number** check box is not selected, you will only be able to import an MO Operation Step Number of up to two-digits in Costpoint.

In order to use a three-digit MO Operation Step number in Deltek Time and Expense 9.x, you must go in Deltek Time and Expense and also select the **3 Position Operation Step Number** check box on the Export Options tab of the Time Configuration screen.

Time and Expense 10.x has been updated to allow for an MO Operation Step Number of up to three digits, therefore the **Use File Layout with a three-digit MO Operation Step Number** check box will be disabled if the **Deltek Time & Expense** option is set to **Time & Expense 10.x+**.

## Patch Requirements

These enhancements require Costpoint 7.1.1 PATCH2870.

## Application JAR Requirements

The following table shows the required application JAR version for each screen affected by this update:

Domain	Module	Application ID	Application Name	Application JAR
PE	LD	AOPUTLTS	Import Timesheets	cp711_aoputlts_006.jar
PE	LD	LDMLABOR	Configure Labor Settings	cp711_ldmlabor_002.jar

PE	LD	LDPUPET	Import Timesheets from Deltek Time and Expense	cp711_ldpupet_002.jar
----	----	---------	--	-----------------------

More information about this release is on the following page.

## Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

## To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

## To Install the HotFix Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

## To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

## More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
