

Deltak Costpoint HotFix Readme

Released: June 5, 2015

Enhancements

VETS-4212 Reporting

U.S. Department of Labor published a final rule which revises the VETS-100A Report and renamed it to VETS-4212 Report. The VETS-100 Report will no longer be used. This final rule is effective October 27, 2014 and will apply in 2015 reporting cycle.

The most notable change in new VETS-4212 is the requirement to report protected veteran numbers in aggregate broken down by job category only. Previously in VETS-100A and VETS-100 reports, the number of employees and new hires were reported by specific protected veteran category (for example, disabled veterans, other protected veterans, armed forces service medal veterans, and recently separated veterans).

The following changes were applied to Costpoint for this update:

- Renamed the **VETS-100A Report** to "VETS-4212 Report."
- Removed the **VETS-100 Report**.
- Updated the VETS-4212 Report to count protected veteran hiring and employment numbers in aggregate broken down by job category only. Previously, the numbers were reported by specific protected veteran category.
- Renamed the **Active Duty Warfare or Campaign Badge Veteran (Other Protected Vet)** fields to "Active Duty Wartime or Campaign Badge Veteran" in all affected applications.

This update affects the following Costpoint screens:

- Print VETS-4212 Report screen
- Manage Functional Job Titles screen
- Manage Employee Information screen
- Manage Employee Import User-Defined Format screen
- Import Employee Data screen
- View Employee Information screen

More information about this release is on the following page.

Custom Programs Affected:

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application area affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

To Download the HotFix Update:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot Fixes folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix Update:

Refer to the installation instructions posted on Deltek's Customer Care Connect site, <https://deltek.custhelp.com>.

- For Costpoint 7.1.1 updates, refer to Knowledge Base article 79232.
- For Costpoint 7.0.1 updates, refer to Knowledge Base article 73769.
- For Costpoint 7.0 updates, refer to Knowledge Base article 67722.

Before you install this update, please review all previous updates in the Knowledge Base article. You may need to install prerequisite programs or database patches (described in the Knowledge Base article) prior to installing this update. Note that when you download an update using Deltek Software Manager (DSM), all dependent files are automatically downloaded.

To Check to See if the HotFix is Installed:

1. Open the application that was updated.
2. Click **Help > About Costpoint** from the Costpoint toolbar. This will display a screen that shows you the latest update JAR for the application that is open, as well as the latest system JAR and all patches applied to the system.

More Information:

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.
