Overview

The Maconomy 3.0 Cumulative Bundle (CB) 2 release includes all the software issues resolved and enhancements that were made in this version.

Custom Programs Affected

Sometimes an update can cause custom programs and reports to stop working as expected. Before applying this update, consider whether you have any custom programs or reports in the application areas affected by the update. If so, contact Deltek Customer Care at <http://support.deltek.com> before you install the update.

Download the Cumulative Bundle

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Cumulative Bundles folder for your product, and select the update to download.
6. Click **Download** at the bottom of the screen.

Check Whether or not the Cumulative Bundle Is Installed

To check that the update is installed, complete the following steps:

1. On the Maconomy toolbar, click **Help » About**.
2. On the About Deltek Maconomy dialog box, click the **Details** button.

Technical Considerations

Statutory Updates

For further information on Statutory installation and updates, see the **Deltek Maconomy BPM Statutory Guide**.

More Information

If you have any questions, please contact Deltek Customer Care at <https://support.deltek.com>.

Cumulative Bundle 02 – December 19, 2025

Key Impact

This section flags bugs considered high importance, including:

- Corrected unintended budget creation, search field errors during rapid typing, incorrect Pagero timestamps after failed invoice sends, and access tokens exceeding storage limits. (2481719, 2531838, 2538521, 2538525)

Support Cases Resolved In This Release

- 2543874 — Remove Zero Lines Action Missing in Web Client

Software Issues Resolved

Time & Expense

Employee Overhead Maintenance Search Returned an Error

Deltek Tracking: 2531985

When you searched for **Employee Overhead Specifications** in the Employee Overhead Maintenance workspace, an error could occur. This is now fixed.

Remove Zero Lines Action Missing in Web Client

Deltek Tracking: 2543847

The **Remove Zero Lines** action was missing in the Budgeting and Estimating workspaces. It is now available.

General Application

Up/Down Arrows with Enter Key Did Not Work in List View

Deltek Tracking: 2526816

When in List view mode, pressing the DOWN ARROW/UP ARROW then ENTER did not open the record or transaction you selected. This is now fixed.

Up/Down Arrows Did Not Work in General Journal in Safari

Deltek Tracking: 2528437

The DOWN ARROW/UP ARROW keys did not work in read-only tables. This is now fixed.

Error Encountered When Typing Fast in Search Fields

Deltek Tracking: 2531838

Typing fast in **Search** fields caused Maconomy to display the following error message: "This record is no longer current". This is now corrected.

Tab Navigation Arrows Disappeared

Deltek Tracking: 2532128

Arrows for tab navigation disappeared after you navigated to another workspace, then went back to the original workspace. This is now fixed.

Default Height for Multiline Cells Too High

Deltek Tracking: 2534765

Multiline cells in tables now have a default height of one line instead of three.

Checkbox Borders Were Barely Visible

Deltek Tracking: 2539052

Checkbox borders were too faint. This is now corrected.

Disabling Image Support Did Not Hide Image Columns

Deltek Tracking: 2539073

When you disabled image support, Maconomy did not hide image columns in tables. This is now corrected.

Deprecated Columns in the Dialog Group Imports Tool Export File

Deltek Tracking: 2541803

Deprecated columns are now removed from the file produced by the Dialog Group Imports tool. This allows you to successfully re-import the file via the Import Groups workspace.

Calendar Widget Displayed Behind List View

Deltek Tracking: 2542882

While working in the Invoicing Plan Lines workspace, if you maximized the Invoicing Plan Lines table, clicked the **Filter** action, and then clicked the calendar icon in the **Date** field to select a date, the Maconomy web client displayed the calendar widget behind the table instead of on top of it. This is now fixed.

Could Not Create Reports with Empty Date ("") in Row Selections in the Web Analyzer

Deltek Tracking: 2548291

Web Analyzer users could not create or open existing reports that used empty dates in row selections. This is now fixed.

Integrations

Budgets Created Without User Action

Deltek Tracking: 2481719

When you accessed the Budgeting workspace, the system automatically created budgets even if no actions were taken. The issue is now resolved.

Incorrect Pagero Timestamps After Failed Invoice Send

Deltek Tracking: 2538521

When you sent an invoice through Pagero and it failed due to a background task error, the system still filled in the **Sent to Pagero Date** and **Send to Pagero Time** fields. This error is corrected.

Access Token Too Long to Store

Deltek Tracking: 2538525

When you tried to send an invoice using a Pagero access token longer than 255 characters, the system saved only a part of the token. This caused a 401 Unauthorized error. This error is corrected.

After installing the CU it will be required to authenticate every Pagero Company again.

Missing Print Actions in Web Client Workspaces

Deltek Tracking: 2544429

When you opened these workspaces **Access Control » Users, Setup » Access Control » Window Groups, Setup » Access Control » Access Levels** in the web client, the **Print User, Print Groups,** and **Print Access Levels** actions were missing. This error is corrected.

People Planner

Reassignment of Booking to Original Resource Fails

Deltek Tracking: 2516016

When using the People Planner REST API, reassigning a booking to a different resource worked as expected. However, if you later attempted to reassign the booking to the original resource, an error would prevent the reassignment. This has been corrected.

Unable to Adjust Timeframe Line

Deltek Tracking: 2533654

An error prevented users from adjusting the timeframe (red) line if they were using the **Day** or **Work Week** calendar view. This error has been corrected.

Page Layout Loading Error

Deltek Tracking: 2548196

When you attempted to load the Web Components with a page layout from a PP version lower than 3.8.5, an error would occur. This has been corrected.

Important People Planner Notes for CB 02

To install this CB, you can apply it to an existing People Planner installation by running the 4.9-CB2 installation.

Cumulative Bundle 01 – November 21, 2025

Key Impact

This section flags bugs considered high importance, including:

- Corrected errors include unparsed dates in Norway SAFT, unintended budget creation, installation and internal errors in Purchase Process Workspace, load errors in Estimating Workspace, incorrect revenue recognition after budget updates, and missing “Submitted and Not Approved” status in the approval dropdown. (2390942, 2481719, 2482790, 2484928, 2520992, 2525109)

Support Cases Resolved In This Release

- 2390942 — Norway - SAFT: Exception from Unparsed Dates
- 2496360 — Attention Field Missing a Dropdown
- 2511042 — Job Selection Dropdown Issue in Reallocate Entries To Wizard
- 2512379 — Restore Defaults Action Did Not Reset Column Order
- 2513545 — Correct Line Count Display in Approval Center Warning Message
- 2514241 — Previous/Next Arrows in List View Ignored Record Selection
- 2520992 — Incorrect Revenue Recognition on First Detail Line After Budget Update
- 2515754 — Overflow Error Due to Repeated Reallocation of Small Quantity

Software Issues Resolved

Time & Expense

Desired Billing Price Field Missing from Blanket Invoice Selection Table

Delttek Tracking: 2519711

It was possible to transfer the desired billing price from the card part of the Invoice Selection window to the invoice selection lines in the table. However, this field was missing from the table part of the Blanket Invoice Selection window, where one line per job is shown.

Incorrect Revenue Recognition on First Detail Line After Budget Update

Delttek Tracking: 2520992

On a fixed price job using fixed price from budget and detailed revenue recognition, an error could occur. After reopening the budget and adding a second budget line, approving the budget caused the revenue recognition details to incorrectly add the billing price to the wrong revenue recognition detail level.

Report Data Export Dialog Was Released Before It Was Ready

Delttek Tracking: 2521967

When you opened the Report Data Export dialog in version 3.0, you accessed a dialog that had been released by mistake while it was still in development, so the workspace was removed, and an error was displayed when you tried to open it.

Overflow Error Due to Repeated Reallocation of Small Quantity

Deltek Tracking: 2515754

When you reallocated job entries with quantities containing small decimal values, an overflow error could occur during invoice printing if the remainder after reallocation should have been zero. This issue is now fixed.

Overrun Handling Incorrectly Canceled Prior Revenue Recognition

Deltek Tracking: 2523782

The new feature that allows overrun handling together with revenue recognition by completion percentage could generate an overrun adjustment that canceled out revenue previously recognized. This is now corrected.

"Submitted and Not Approved" Status Missing from Approval Status Dropdown

Deltek Tracking: 2525109

In the Time Sheet Status workspace, it was not possible to restrict the view to show only time sheets that were submitted but not yet fully approved. A new restriction option, **Submitted and Not Approved**, has now been added to the Approval Status selection criteria.

Inconsistent Information in Time Sheet Notifications

Deltek Tracking: 2472790

Time sheet-related notifications in the web client used different formats, making related notifications inconsistent. The formats for these notifications have now been aligned.

The updated formats are as follows:

- **Time sheets for submission or approval:**
"[date] (Week [week number]), [employee name]. [hours registered] Hours"
- **Rejected time sheets:**
"[date] (Week [week number]), [employee name]. [hours registered] Hours"
- **Daily time sheets for submission or approval:**
"[date] ([week day]), [employee name]. [hours registered] Hours"
- **Time sheet not created:**
"[date] (Week [week number]), [employee name]"
- **Daily time sheet not created:**
"[date] ([week day]), [employee name]"
- **Time sheet lines for approval:**
"[description] ([date]), [job name] ([job number]), [employee name]"
- **Rejected time sheet lines:**
"[description] ([date]), [job name] ([job number]), [employee name]"
- Synchronous notifications were also updated:
- **Time sheets approved:**
"[date], [employee name]. [external hours registered] + [internal hours registered] Hours"

- **Time sheets for submission:**
"[date], [employee name]. [external hours registered] + [internal hours registered] Hours"
- **Time sheet lines for approval (synchronous):**
"[description] ([date]), [job name] ([job number]), [employee name]"

General Application

IndexHandler is Missing ASC/DESC when Generating CREATE Scripts

Deltek Tracking: 2525127

When you included an index that had columns that were marked with a DESC sorting in a CREATE script, the information in that column was missing. This is now corrected.

Restriction Row Hidden When Scrolling Horizontally Through List View Columns

Deltek Tracking: 2526802

The restriction row could disappear while you were horizontally scrolling through list view columns. This is now corrected. The row now remains visible regardless of column position.

Internal Error Encountered in Workspace List View

Deltek Tracking: 2482081

While working in workspaces in list view, if you used the **Search or Sort** field at the top of the workspace, clicked the browser's back button, and then clicked the browser's forward button, Maconomy displayed the following internal error message: "Cannot read properties of undefined (reading operator)." This is now fixed.

Configurable Menu Item Names in the Web Client

Deltek Tracking: 2484334

Menu items in the web client can now include an optional name property, allowing consultants to control the URL used when opening a workspace. This is especially useful when the same workspace appears multiple times in menus—each instance can have a unique name so the correct item is highlighted. Additionally, multiple workspaces can share the same name if they have mutually exclusive visibility conditions, enabling flexible proxy workspace setups. The previous **proxyFor** property is deprecated in favor of this approach.

Scroll Behavior Unresponsive in Expanded Table

Deltek Tracking: 2513717

When you expanded table rows in the Maconomy Essentials Web Client's Month End Dashboard, the scroll behavior became erratic and restricted. Users were unable to scroll smoothly from top to bottom, and the table would skip sections or stop scrolling prematurely. This error is corrected to ensure uninterrupted vertical scrolling regardless of the number of expanded rows.

Error Reporting Caused Java Analyzer/Maconomy Server Crash During Import

Deltek Tracking: 2513739

Importing Analyzer reports from .xro files could cause the Java Analyzer or Maconomy server to crash due to error reporting issues. This issue is now fixed.

Previous/Next Arrows in List View Ignored Record Selection

Deltek Tracking: 2514241

When in List view mode, the Previous/Next arrows did not respect the selected record shown in the List view. Instead, it navigated based on the record selected in the Detail view. This is now fixed. That is:

- When in Detail view, the Previous/Next arrows navigate based on the record shown in the workspace.
- When in List view, the Previous/Next arrows navigate based on the record selected in the List view.

Blank Space When Scrolling Through List View

Deltek Tracking: 2524476

When you scrolled up/down in tables, Maconomy would sometimes show a blank space instead of table lines. This is now fixed.

Time Sheet Assistants Not Aligned

Deltek Tracking: 2525014

The Time Sheet assistants found in the Time Sheet Status workspace and in the Time Sheets tab of the Approval Center workspace are now aligned, such that employee information is shown as the title while week and date information is shown as the subtitle.

Installation Error After First Login

Deltek Tracking: 2519475

Occasionally, users logging in for the first time were shown an installation error message regarding unavailable workspace menu items related to notifications. This is now fixed.

Selected Region in My Settings Did Not Apply Expected Formats

Deltek Tracking: 2523779

When you selected a region in the My Settings dialog box, the formats did not default as expected.

Preferred date, time, and number formats can now be configured for specific locales to prioritize them over default formats derived from a region's browser settings. Configured formats will appear at the top of the available formats list in the My Settings dialog box for the corresponding locale, improving discoverability for end-users.

Image Size Calculated Wrong

Deltek Tracking: 2424578

During image upload, Maconomy incorrectly calculated the image size, resulting in errors for images that were actually within the allowed size limit. This issue is now fixed.

Some Field Changes Not Saved During Autosubmit

Deltek Tracking: 2455901

Changing two navigation parameters did not prompt a warning about unsaved changes. This issue is now resolved.

No Error Message Shown When OAuth Login Failed

Deltek Tracking: 2470710

When OAuth login failed, Maconomy did not show the user an error message. This is now corrected.

Go To Link Not Displayed in Blue

Deltek Tracking: 2481788

All Go To links are now displayed in blue.

Assistant Not Loading Properly

Deltek Tracking: 2481945

When the user switched between tabs containing assistants, the assistant did not always display properly. This is now fixed.

Menu Jumped Up and Down

Deltek Tracking: 2470836

Selecting a menu item caused the menu to jump up and down. This is now fixed.

Smart Summary Panel Stuck in Loading After Request Cancellation

Deltek Tracking: 2473149

When you cancelled the Create Smart Summary request, the Smart Summary panel remained stuck in loading. This is now fixed.

File Upload Dialog Box Not Rendered Correctly

Deltek Tracking: 2473236

When you opened the File Upload dialog box while in dark mode, it did not render correctly. This is now fixed.

Value Would Disappear from Solidgauge Chart

Deltek Tracking: 2474129

In the Opportunities workspace, if you specified a value in the **Probability** field with more than three-four decimal digits, the value displayed in the gauge chart was not rounded and could even overflow. This is now fixed. The values are now rounded to zero decimal digits.

Info Bubbles Not Closing and Displaying Correctly

Deltek Tracking: 2474152

If you clicked a field to view its info bubble then clicked another field to view the info bubble for that field, Maconomy closed the first info bubble but displayed an empty info bubble for the second field. The empty info bubble would only close if you clicked the area outside of it.

This issue was encountered when clicking fields with info bubbles of the same type, and is now corrected.

"addFieldsAsReadOnly" Setting Changed Default Openness Even When Disabled

Deltek Tracking: 2474918

In tables where all fields were marked as read-only, there were instances when fields added using the Customize Columns dialog box were editable. This is now fixed.

Rendering of Assistant Segment Button Needed Improvement

Deltek Tracking: 2475090

The visual appearance of the assistant segment button is now improved.

Text in Status Field Difficult to Read

Deltek Tracking: 2475231

When you viewed the text in the open status field, it appeared difficult to read. This is now corrected.

First Day of Week Not Derived From Region

Deltek Tracking: 2498985

When you changed the region in the My Settings dialog box and clicked **OK**, Maconomy occasionally failed to update the first day of the week. This is now fixed.

Vendor Invoice Table Data Carried Over to Newly Created Journal

Deltek Tracking: 2501105

When users created a card record in a workspace which does not use a creation wizard, the table related to the new card would occasionally show data from the previously selected record. This is now corrected.

Long Text Error When Loading

Deltek Tracking: 2501301

When you enabled long descriptions in certain workspaces, an error occurred which prevented the **textAreaFieldHeight** property from being read. This is now corrected.

Session Expired Dialog Box Slightly Covered by Search Dropdown

Deltek Tracking: 2501336

When the Session Expired dialog box appeared while the dropdown of the **Search** field was expanded, the dialog box was displayed behind the dropdown. This is now fixed. The Session Expired dialog box is always displayed with no obstruction.

Traffic Lighting in Embedded Calendar Did Not Look Like Dropdown Calendar

Deltek Tracking: 2505174

Embedded calendars did not display date highlights in the same way as a regular calendar element. This is now corrected; both calendar types now render date highlights in the same style.

Action Not Right-Aligned

Deltek Tracking: 2505496

When only one action was available in the action bar and revision information was shown, the action was not right-aligned. This is now corrected.

Currency of New Vendor Invoice Not Reflected in the UI

Deltek Tracking: 2505506

After you created a vendor invoice, the user interface displayed the wrong currency. This is now fixed.

Job Selection Dropdown Issue in Reallocate Entries To Wizard

Deltek Tracking: 2511042

In the Reallocate Entries tab of the WIP Invoice workspace, the Reallocate Entries To wizard's job selection dropdown incorrectly selected values due to a problem with the auto-submit functionality. This issue is now corrected.

Could Not Change Tree Table Column Width

Deltek Tracking: 2512369

Users could not increase or decrease column width in tree tables. This issue is now corrected.

Restore Defaults Action Did Not Reset Column Order

Deltek Tracking: 2512379

When you dragged a column to a new position in the filter list, other columns would shift unexpectedly. Clicking **Revert to Default** did not restore the original column arrangement—you had to refresh the browser or switch workspaces to reset the order. This issue is now fixed, and the **Revert to Default** action now correctly restores columns to their default positions.

Removed Decimals for Progress Column Values

Deltek Tracking: 2491005

By default, progress columns now display zero decimal places.

Misaligned Description in the Revert and Invoice to Credit Memo Wizards

Deltek Tracking: 2491874

When you viewed the text and link elements only containing a title, they were misaligned. This is now fixed.

First Keystroke Not Registered When Tabbing Through Time Sheet Daily Description Fields

Deltek Tracking: 2492865

When navigating between fields in a card using the TAB key, the first keystroke after focusing a field did not input text—it only activated the field. This behavior is now fixed so that the first keystroke is now correctly entered into the field.

Misarranged Fields in My Plan Dialog Boxes

Deltek Tracking: 2494112

Enabling compact mode in the web client resulted in misarranged fields in the Create Booking and Edit Booking dialog boxes. This is now resolved.

Random Columns Appeared on Visible Columns List

Deltek Tracking: 2494218

In the Customize Columns dialog box, adding columns to or removing columns from the Visible columns list resulted in random columns appearing on the list. This is now fixed.

Attention Field Missing a Dropdown

Deltek Tracking: 2496360

In the Customer tab of the Job Home workspace, the **Attention** field under the customer address did not have a search dropdown. This issue is now fixed.

Could Not Clear Mandatory Fields Based on Foreign Keys

Deltek Tracking: 2496650

Maconomy did not allow users to clear mandatory fields linked to foreign keys. This is now corrected. Users can now clear these fields and, if needed, revert the change.

2FA Dialog Boxes Had Broken Layout

Deltek Tracking: 2497382

When you accessed the 2FA dialog boxes, the layout appeared broken and did not render correctly. This is now fixed.

Finance

Installation and Internal Error in Purchase Process Workspace

Deltek Tracking: 2482790

Previously, an installation error occurred when opening the Purchase Process workspace, and an internal error was triggered when creating a new purchase process. This error is now corrected.

Correct Line Count Display in Approval Center Warning Message

Deltek Tracking: 2513545

Previously, when using the **Approve All** action in the **Approval Center** workspace, the warning message displayed an incorrect number of lines pending approval. This error is now corrected, and the message accurately reflects the total number of lines to be approved.

Integrations

Error Saving StandardJobSummaryPrompt

Deltek Tracking: 2470798

When you edited or copied the StandardJobSummaryPrompt in **Setup » Dela » Prompts** and attempted to save, the system displayed the error message "Data was changed by another user." This error is corrected.

Budgets Created Without User Action

Deltek Tracking: 2481719

When you accessed the Budgeting workspace, the system automatically created budgets even if no actions were taken. The issue is now resolved.

Estimating Workspace Load Error

Deltek Tracking: 2484928

When you opened the Estimating workspace, an internal error appeared. This issue is now fixed.

Missing Text Lines in Peppol XML

Deltek Tracking: 2498491

When you generated order invoices or credit notes, text lines were not included in the Peppol XML file. This error is corrected by enabling ZEROTEXT functionality for order mappings.

System Error When User Lacks Smart Summary Access

Deltek Tracking: 2482997

When users without access to Smart Summary setup dialogs attempted to generate Smart Summaries from **Accounts Receivable » Customer** workspace, the system displayed a system error instead of the expected access-related message. This occurred even when the user had read/create access to Customer/Jobs and the relevant Smart Summary actions were enabled. This error is now corrected.

Incorrect Error Shown for Incomplete Window Binding

Deltek Tracking: 2482079

When you generated a Test Smart Summary with an incomplete window binding, the system displayed a system error instead of a normal error. The issue has been corrected to prevent use of incomplete window bindings on a Smart Summary type.

BPM

Norway - SAFT: Time Component Causing Validation Error

Deltek Tracking: 2431982

Previously, the date value in <TaxVerificationDate> included a time component, which caused a validation error against the 1.30 XSD. This error is corrected.

Norway - SAFT: Exception from Unparsed Dates

Deltek Tracking: 2390942

Previously, some date fields in the Norway Standard Audit File – Tax (NSAFT) report were not properly parsed, resulting in a java.lang.NullPointerException error in the logs. This error is corrected.

This bug was reported as a known issue for 3.0.
