### PJ/IW/IWMALLOC/Maintain IWO Allocations

Deltek Defect Tracking Number:

530612

Issues Resolved:

**Description:** The **Functional Receiving Amount** value changed after you clicked **Find Rates** and then clicked **Apply** even though you did not change any value on the Exchange Rates subtask.**Customers Impacted:** This defect affects Inter-Company Work Orders module users.**Workaround Before Fix:** None.**Additional Notes:** This application has been updated to set the **Functional Receiving Amount** equal to the **Sending Amount** if the sending and receiving companies' functional currencies are the same but different from the IWO currency, and you do not change the exchange rate, rate group, and/or rate date on the Exchange Rates subtask. No currency translation takes place. This is applicable to both internal and external IWO transfers. In that case, the exchange rate information will reflect the expected rate group and rate date, but will show the exchange rate from the sending company.
