## Software Issues Resolved

This section includes all fixes in this release.

### Defect: 2149222

#### Error When Trying to Login with Okta

When using the Touch native app, in the Touch Login screen, if you entered your Okta username and tapped **Login**, then performed the remaining authentication in Okta / Azure, the app showed the "mismatched guid" error and it was not possible to log in. This is now fixed.

### **Defect: 2059873**

#### **Unable to Use Proper Field Casing in Restrictions**

When you used uppercase letters in the fields for restrictions in layouts, the restriction was not applied. It should have been possible to use proper casing on fields in restrictions. This is now fixed.

### **Defect: 2063900**

#### **Unable to Change Unit Price from 4.09 to 4.10**

If you had an expense sheet line with Unit Price 4.09 and changed it to 4.10, after tapping **Save**, the Unit Price remained 4.09. This is now fixed.

### **Defect: 2079281**

#### **Unable to Select Value in Expense Justification Field of Type Option List**

If an expense sheet line required expense justification of type option list, it was not possible to enter (select) a value in the justification field. This is now fixed.

### **Defect: 2080897**

#### **App Hangs When Trying to Login with Azure**

When using the Touch native app, in the Touch Login screen, if you entered anything in the username and tapped **Login**, the app froze with the animation on top. This is now fixed.

### **Defect: 2128787**

#### **Incorrect Expense Sheet Line Content**

When you changed the last line's data (description, job, and task) and attached a receipt, instead of seeing the data for the last line, you were shown the data for the first line. This is now fixed.
