

Deployment Date: 11/27/2017

Hot Fix: cp711_sys_035.zip; cp711_pcmrelmo_017.zip

MATERIALS/PRODUCTION CONTROL/PCMRELMO/Relieve Manufacturing Orders

Deltek Defect Tracking Number:

838399

Issues Resolved:

Description: When the on-hand quantity of the backflush part was insufficient to complete a manufacturing order (MO) relief, you were still able to save the relief record on the Enter Manufacturing Order Reliefs (PCMRELMO) screen. This happened when the required quantity of the backflush component was a non-integer and the unit of measure (UM) code was EA (each).

Customers Impacted: This defect affects you if you use the Production Control module in Costpoint.

Workaround Before Fix: None.

Additional Notes: Costpoint should have displayed an error message saying that insufficient unallocated quantity exists for the backflush part, which is the same validation in web integration console (WIC).
