## **PJ/PJ/PJMBASIC/Basic Info**

### **Deltek Defect Tracking Number:**

971253

### **Issues Resolved:**

**Description:** The **Agency ID** value on the lower-level project was overwritten with the value from the top-level project if a change was made in the **Agency ID** at the top level. To resolve this issue, the following applications have been modified:

- Manage Government Contract Information (PJMGVOT) - The Agency ID field now has a corresponding Allow Edit check box to allow you to select whether or not the agency ID can be changed on lower-level projects.
- Manage Project User Flow (PJMBASIC) - On the Government Contract subtask, the Agency ID field now has a corresponding Allow Edit check box to allow you to select whether or not the agency ID can be changed on lower-level projects.
- Import Project Master Data (PJPPREP) - This application has been updated to consider the new check box added for the Agency ID field. The PROJ table has also been modified to include a new column, AGENCY\_ID\_FL.
- Mass Add Project Master Data (PJPMADD) - This screen now considers the Allow Edit check box added for the Agency ID field when adding or updating multiple projects.

**Customers Impacted:** These changes affect Costpoint users.

**Workaround Before Fix:** None.
