## Overview

Welcome to Deltek Costpoint 7.1.9 Release Notes. These release notes contain a summary of the following:

- Enhancements
- Software Issues Resolved

These release notes address all of the modules associated with Deltek Costpoint 7.1.9, some of which your firm may not use. Skip the sections that do not apply to your implementation of Deltek Costpoint.

## New Release Notes Format

Beginning with Costpoint 7.1.2, Costpoint Release Notes are delivered in HTML format and can be viewed at this link: <https://help.deltek.com/product/Costpoint/7.1/ReleaseNotes/>. This web page contains links to the Release Notes for each release version as well as links to the Costpoint online help, Costpoint Information Center (CIC), and Costpoint Cloud Information Center (CCIC).

We will continue to provide PDFs for the next few releases as we transition to the new format.

If you have feedback or questions, please send an email to [DeltekDocumentationFeedback@deltek.com](mailto:DeltekDocumentationFeedback@deltek.com).

## Installation Notes

The MR installer reads through all Costpoint systems selected. If a Time & Expense (TE) segment is found, it searches for the presence of a Time & Expense license for that Costpoint system. It provides a listing of all such systems found, prompting you to review the list and remove (using DBWizard, Remove License) any TE license from the Costpoint system where the connected TE segment is for a standalone, external connection that should not have had a Time & Expense license applied to it.

Any external Time & Expense segments found where a Time & Expense license is not present, or where the Time & Expense segment is for a Time & Expense 901 system, the MR Time & Expense patches, SPs, or Data Dictionary files will not be applied.

If all systems listed are properly licensed for Time & Expense and you do want the MR applied to them, please proceed. If you are unsure, please contact Deltek Technical Support.

## Enhancements

This section includes summaries of the enhancements made to existing features in this release.

### Regulatory Enhancements

#### State

##### 2020 Guam Tax Table Update/Income Tax Withholding and the Ability to Use 2020 W-4 Logic for Other Territories

Costpoint will now support Guam tax table updates and income tax withholding beginning tax year 2020 and the ability to use the 2020 W-4 logic for other territories. The enhancement features the following updates:

- The Manage State Taxes (PRMSTI) screen provides a new check box that indicates whether or not the U.S. territory's income tax calculations are the same as the federal income tax calculations.
- This release adds Guam tax records effective 01/01/2020 on the following screens:
  - Manage State Taxes
  - Manage State Standard Deductions
  - Manage State Tax Withholding Adjustments
  - Manage State Tax Tables
- All applications which calculate Guam taxable wages and tax withholding will be updated to accommodate Guam's requirements.
- Costpoint ESS will allow employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

#### Filing Status Updates

Costpoint provides new filing statuses for Guam to indicate if the withholding method will be based on the 2020 Form W-4. This enhancement includes the following changes:

- Six filing statuses were added.
- Descriptions of existing filing statuses were updated.
- The length of the S\_ST\_FIL\_STAT\_NAME column in the STATE\_FILING\_STATUS table increased from 50 to 80 characters.

The following are the filing status codes for Guam:

Filing Status Code	Filing Status Description
EXEMPT	Exempt from state taxes
SINGLE	Single, 2019 W4 or earlier
MARRIED FILING SEPARATELY	Married filing separately, 2019 W4 or earlier

Filing Status Code	Filing Status Description
MARRIED FILING JOINTLY	Married filing jointly, 2019 W4 or earlier
HEAD OF HOUSEHOLD	Head of household, 2019 W4 or earlier
QUALIFYING WIDOW(ER)	Qualifying widow(er), 2019 W4 or earlier
SINGLE 2020 W4 STEP 2	Single/Married Filing Separately, 2020 W4 Step 2 Checked
MARRIED 2020 W4 STEP 2	Married filing jointly/Qualifying Widow(er), 2020 W4 Step 2 Checked
HEAD OF HOUSEHOLD W4 STEP 2	Head of household, 2020 W4 Step 2 Checked
SINGLE 2020 W4	Single/Married Filing Separately, 2020 W4 Step 2 Unchecked
MARRIED 2020 W4	Married filing jointly/Qualifying Widow(er), 2020 W4 Step 2 Unchecked
HEAD OF HOUSEHOLD 2020 W4	Head of household, 2020 W4 Step 2 Unchecked

### Manage State Taxes (PRMSTI)

The screen provides the following new field:

Field	Description
<b>Territory Tax based on Federal Tax</b>	<p>The screen selects this check box if the U.S. territory income tax system mirrors the federal income tax system. Currently, the screen selects this check box if the state is Guam or Virgin Islands.</p> <p>This check box is not editable.</p>

### Compute Payroll (PRPCPR)

The application now has the ability to process the income tax withholding of U.S. territories based on federal income tax withholding calculation. Currently, this is applicable to both Virgin Islands and Guam.

### Manage Payroll Records (PRMPTF)

The application now has the ability to process the income tax withholding of U.S. territories based on federal income tax withholding calculation. Currently, this is applicable to both Virgin Islands and Guam.

### Manage Employee Taxes (PRMETAX)

The screen now allows employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

### Federal Withholding (ESMFEDWH)

The screen now allows employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

### State Withholding (ESMSTATEWH)

The screen now allows employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

### Life Events/New Hires (ESMLIFEEVENT)

The screen now allows employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

### Configure State Tax Settings (AOMESSST)

The screen provides the following changes:

- The **Equal to Federal** functionality will not be available for territories flagged as having income tax calculation based on federal income tax calculation.
- The length of **Filing Status Description** increased from 50 to 80 characters.

### Print Data Dictionary Report (SYRDD)

The report was updated to reflect the following field changes:

Field	Table	Change
S_ST_FIL_STAT_NAME	STATE_FILING_STATUS	The length increased from 50 to 80 characters.
FIL_ST_DESC	ESS_STATE_TAX_LN	The length increased from 50 to 80 characters.
TERRITORY_TAX_FL	STATE_TAX_HS	This is a new field.

### Manage Employee Information (LDMEINFO)

The Taxes subtask now allows employees to provide their state W-4 data for Guam and any other territory with income tax calculations that are the same as the federal income tax calculations.

### Manage Employee Earnings History (PRMERF)

A new column (STATE\_TAX\_HS.TERRITORY\_TAX\_FL) was added to the work table(s) used by the application.

### Print Soc Sec and Medicare Reconciliation Report (PRRFICA)

A new column (STATE\_TAX\_HS.TERRITORY\_TAX\_FL) was added to the work table(s) used by the application.

### Print Quarterly Federal Payroll Tax Report (PRRFD TAX)

A new column (STATE\_TAX\_HS.TERRITORY\_TAX\_FL) was added to the work table(s) used by the application.

### Recompute Taxable Wages (PRPRCOMP)

The application now recomputes Guam's taxable wages based on the new code for processing of U.S. Territories income tax withholding, which is based on federal income tax withholding calculation.

## Installation

### MR Installer Enhancement

The following cache folders and files will now be deleted during an MR installation:

\Deltek\Costpoint\71\delteke

- BIN
- INIT-INFO
- NODEMANAGER
- PENDING
- TMP
- "edit.lok" - file if it exists

\Deltek\Costpoint\71\delteke\config

- CONFIGCACHE

## People

### Audit Tracking for the Employer Portion of Social Security and Medicare Taxes for COVID-19 Tax Credit

Costpoint MR 7.1.9 adds the ability to track changes made to the Employer Portion of Social Security and Medicare Taxes for COVID-19 Tax Credit in Costpoint. You can access the audit trail for these data on the View Employee Earnings screen and the View Payroll Edit Table screen.

#### View Employee Earnings (PRQERF)

The View Employee Earnings screen now displays the employer portion of exempt pay types and taxable wages of FICA taxes. To support the new functionality, this release applies the following changes to the screen:

## Enhancements

- A new Employer Accrual tab allows you to access the Unemployment Taxes fields transferred from Payroll Edits tab and the employer FICA Taxes fields. The FICA Taxes group box provides the following fields:

- Social Security**

Field	Description
<b>Exempt Pay Types</b>	This field displays the amount for the employer portion of social security exempt pay types.
<b>Exempt Deductions</b>	The field displays the total of the social security exempt deductions. This field is not editable.
<b>Taxable Wages</b>	This field displays the amount for the employer portion of social security taxable wages.
<b>Accrued Expense</b>	This field displays the employer expense accrued for social security.

- Medicare**

Field	Description
<b>Exempt Pay Types</b>	This field displays the amount for the employer portion of Medicare exempt pay types.
<b>Exempt Deductions</b>	This field displays the total of the Medicare exempt deductions. This field is not editable.
<b>Taxable Wages</b>	This field displays the amount for the employer portion of Medicare taxable wages.
<b>Accrued Expense</b>	This field displays the employer expense accrued for Medicare.

- The unemployment taxes fields were transferred from Employee Earnings tab to the new Employer Accrual tab. In addition, the social security **Accrued Expense** field and the **Medicare Accrued Expense** field are no longer editable on the Employee Earnings tab.
- The following columns were added to the EMPL\_E\_ADT database table to track the employer amounts of Social Security taxes:
  - SS\_ER\_EXMPT\_PT\_AMT
  - SS\_ER\_TXBL\_AMT
- The following columns were added to the in EMPL\_E\_ADT database table to track the employer amounts of Medicare taxes.
  - MDCR\_ER\_EXMPT\_PT\_AMT
  - MDCR\_ER\_TXBL\_AMT

### View Payroll Edit Table (PRQPTE)

The View Payroll Edit Table screen now allows you to view the employer portion of FICA taxes. To support the new functionality, this release applies the following changes to the screen:

- The unemployment taxes fields were transferred from the Payroll Edit tab to the new Employer Accrual tab. The social security **Accrued Expense** field and the **Medicare Accrued Expense** field on the Payroll Edit tab are no longer editable.
- A new Employer Accrual tab allows you to access the **Unemployment Taxes** fields transferred from the Payroll Edits tab and the employer **FICA Taxes** fields. The **FICA Taxes** group box provides the following fields:

- **Social Security**

Field	Description
<b>Exempt Pay Types</b>	Enter the amount for the employer portion of social security exempt pay types.
<b>Exempt Deductions</b>	The field displays the total of the social security exempt deductions. This field is not editable.
<b>Taxable Wages</b>	Enter the amount for the employer portion of social security taxable wages.
<b>Accrued Expense</b>	This field displays the employer expense accrued for social security.

- **Medicare**

Field	Description
<b>Exempt Pay Types</b>	Enter the amount for the employer portion of Medicare exempt pay types.
<b>Exempt Deductions</b>	This field displays the total of the Medicare exempt deductions. This field is not editable.
<b>Taxable Wages</b>	Enter the amount for the employer portion of Medicare taxable wages.
<b>Accrued Expense</b>	This field displays the employer expense accrued for Medicare.

- The following columns were added to the EMPL\_PAYROLL\_ADT database table to track the employer amounts of Social Security taxes:
  - SS\_ER\_EXMPT\_PT\_AMT
  - SS\_ER\_TXBL\_AMT
- The following columns were added to the EMPL\_PAYROLL\_ADT database table to track the employer amounts of Medicare taxes:
  - MDCR\_ER\_EXMPT\_PT\_AMT
  - MDCR\_ER\_TXBL\_AMT

## Deferral of Employee Portion of Social Security Tax from September 1 to December 31

Source: Bloomberg Tax

### Employee Social Security Tax Deferred from Sept. 1 to Dec. 31

- The relief is in addition to the deferral of the employer portion of Social Security tax with respect to March 27 to Dec. 31.
- Employees generally must have biweekly pay of less than \$4,000 to be eligible for the new deferral.

Withholding, deposits, and payments of the employee portion of Social Security tax are to be deferred with respect to the period from Sept. 1 to Dec. 31, 2020, under a presidential memorandum signed Aug. 8 by President Donald Trump.

This relief for employees is separate from, and in addition to, the deferral of deposits and payments of the employer portion of Social Security tax with respect to the period from March 27 to Dec. 31, 2020, which was authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

The deferral provisions pertaining to the employee portion of Social Security tax are to apply only to compensation paid to employees whose biweekly pretax compensation generally is less than \$4,000. The employee portion of Medicare tax is not affected by the memorandum, as the memorandum specifies its applicability to the employee portion of Social Security tax imposed by Internal Revenue Code Section 3101(a) without also identifying applicability to the employee portion of Medicare tax imposed by IRC Section 3101(b).

Although the memorandum indicates that deferrals of the employee portion of Social Security tax are available with regard to compensation paid during the period from Sept. 1 to Dec. 31, the memorandum does not indicate that the employee relief would extend to deposit deadlines from Sept. 1 to Dec. 31 for assessments on compensation paid before that period. By contrast, deferrals of the employer portion of Social Security tax are available both with respect to deposit deadlines that occur within the period from March 27 to Dec. 31, even if those deposit deadlines are for assessments on compensation paid before that period, and deposit deadlines after that period but that are based on compensation paid during that period.

While the CARES Act did not require employers to defer their portion of Social Security tax and instead merely provided them with the option to do so, Sections 1 and 2 of the memorandum appear to have the combined effect of requiring the deferral of the employee portion of Social Security tax for eligible employees. It is likely that Treasury Department guidance issued pursuant to Section 3 of the memorandum will clarify whether deferral of the employee portion of Social Security tax indeed is required.

Although the CARES Act specified that half of the deferred employer portion of Social Security tax would be due Dec. 31, 2021, with the other half due Dec. 31, 2022, the memorandum does not specify when the deferred employee portion of Social Security tax would be due. Instead, Section 3 of the memorandum authorizes the Treasury Department to issue guidance that would clarify when the deferred employee portion would be due.

However, the memorandum identified that there is a possibility that the deferral of the employee portion of Social Security tax with respect to the period from Sept. 1 to Dec. 31 will be transformed into an elimination of the liability to pay that amount. Section 4 of the memorandum specifies in this regard that the Treasury Department “shall explore avenues, including legislation, to eliminate the obligation to pay the taxes deferred pursuant to the implementation of this memorandum.”

As it is uncertain whether the liability to pay the deferred amounts of the employee portion of Social Security is to eventually be eliminated, the deferrals of the employee portion of Social Security tax are for

now, like the deferrals of the employer portion of Social Security tax, not to be treated as deferrals of liability.

Therefore, for now, the employee portion of Social Security tax, even with deferrals, that normally would be due with respect to the period from Sept. 1 to Dec. 31 would need to continue to be included in Lines 12 and 16 of Form 941, Employer's Quarterly Federal Tax Return, and in applicable boxes for Form 941's Schedule B for semiweekly depositors, with respect to the returns reporting data for the period from Sept. 1 to Dec. 31. Amounts of the employee portion of Social Security tax, regardless of deferral, also would continue to be factored into determinations during the period from Sept. 1 to Dec. 31 of whether an employer must perform a next-day deposit because it accumulated employment tax liability of at least \$100,000.

In light of the new line 13b that was added to Form 941, upon the release of its finalized revision June 19, to report deferrals of the employer portion of Social Security tax, it remains to be seen whether Form 941 will be further modified to accommodate reporting of deferrals of the employee portion of Social Security tax.

**Attention:** For more information, refer to the Memorandum on Deferring Payroll Tax Obligations in Light of the Ongoing COVID-19 Disaster: <https://www.whitehouse.gov/presidential-actions/memorandum-deferring-payroll-tax-obligations-light-ongoing-covid-19-disaster/?fbclid=IwAR19mUMFDE3Sr62xogkuwOM9kHtg17Rw3vaancO78WBacuDqlrO445uof3w>

## Costpoint Solution

Based on the information provided in the memorandum, here are the required steps you will need to take to be compliant with the federal requirement:

**Warning:** Before computing payroll for your first paycheck in September 2020, you must complete steps 1 and 2 even if you have not yet downloaded Costpoint MR 7.1.9 or MR 8.0.1.

1. Identify the employees that are eligible for deferral from their portion of Social Security taxes by identifying employees that generally have biweekly pay of less than \$4,000.
2. Clear the **Subject to Social Security** check box on the Manage Employee Taxes screen for the identified employees. This will impede the calculation of both the employee's portion of Social Security taxes and the employer's portion of Social Security taxes when Compute Payroll is processed. This step **MUST** be done before the first paycheck with a date that falls within the 9/1/2020 to 12/31/2020 period of deferral.

The screenshot shows the 'Manage Employee Taxes' window in Deltek. The 'Identification' tab is active, and the 'Tax Details' section is expanded. The 'Subject to' section is highlighted with a red box, showing checkboxes for Social Security, Medicare, and FUTA. The 'Withholding State' section is also visible, showing fields for State, Filing Status, Exemptions, Dependents, Credits, Override Amount, and Override Percent. The 'Local' section at the bottom shows a table with columns for Locality, Filing Status, Exemptions, Dependents, Credits, Override Amount, and Additional Amount.

3. The presidential memorandum states that only the employee's portion of Social Security taxes will be deferred. Therefore, after you post payroll and before you generate the Quarterly Federal Tax Report for 941 reporting, you will need to download MR 7.1.9 or MR 8.0.1 in order to obtain the updates that will allow you to calculate the employer portion of the Social Security tax and the employee's Social Security taxable wages.
4. Once MR 7.1.9 or MR 8.0.1 is loaded, query the employees that were identified for deferral from the employee portion of Social Security taxes and select the new **Employer Subject to Accrual via Recompute Taxable Wages** check box for each of the employees. Selecting this check box indicates that the employer is still liable for their portion of the Social Security taxes while the employee's Social Security Withholding is in a deferred status from 09/01/2020 through 12/31/2020.

## Enhancements

The screenshot displays the 'Manage Employee Taxes' interface. At the top, there's a navigation bar with 'Employee Payroll Information' and 'Manage Employee Taxes'. Below this, the 'Identification' section includes a search bar and a 'New' button. The 'Tax Details' section is divided into 'Taxes' and 'Tax Reporting Information'. The 'Federal' section contains fields for Filing Status (Single), Exemptions (0), Override Amount, Override Percent, Dependents (0), Other Dependents (0), Other Tax Credit Amount (0.00), Other Income (0.00), Deductions (0.00), and Additional Amount (0.00). The 'SUTA' section includes SUTA State (NJ) and a checked 'Subject To SUTA' checkbox. The 'Withholding State' section has fields for State, Filing Status, Exemptions, Dependents, Credits, Override Amount, Override Percent, and Additional Amount. The 'Subject to' section includes checkboxes for Social Security, Medicare, FUTA, and 'Employer Subject to Accrual via Recompute Taxable Wages' (highlighted with a red box). The 'Local' section is a table with columns for Locality, Filing Status, Exemptions, Dependents, Credits, Override Amount, and Additional Amount, with rows for Local 1 through Local 5. A 'Multi-State Taxes' link is visible at the bottom right.

5. In order to update the employer's Social Security tax liability and the employee's Social Security taxable wages, you will need to run the Recompute Taxable Wages application. If an employee's **Employer Subject to Accrual via Recompute Taxable Wages** check box is selected in Manage Employee Taxes and the check date falls within the 9/1/2020 to 12/31/2020 deferral period, the Recompute Taxable Wages application will perform the following:
  - Calculate and populate the Manage Employee Earnings History record with the employer's Social Security taxable wages.
  - Calculate and populate the Manage Employee Earnings History record with the employer's Social Security tax accrual amount.
  - Calculate and populate the Manage Employee Earnings History record with the employee's Social Security taxable wages.

## Manage Employee Taxes (PRMETAX)

**Note:** The updates in this section also apply to the Taxes subtask on the Manage Employee Information screen.

The screen provides the following new field:

Field	Description
<b>Employer Subject to Social Security Accrual via Recompute Taxable Wages</b>	<p>Use this check box in conjunction with the <b>Social Security</b> check box in the <b>Subject to</b> group box to comply with the presidential memorandum signed 8/8/2020 which mandates a deferral of the employee portion of Social Security tax for compensation paid to employees whose biweekly pretax compensation generally is less than \$4,000.</p> <p>If an employee is subject to deferral of their Social Security withholding under the memorandum, but the employer is still responsible for their portion of the Social Security tax, this screen should be set up as follows:</p> <ol style="list-style-type: none"> <li>1. Clear the <b>Social Security</b> check box in the <b>Subject to</b> group box. This suspends the computation of both the employee Social Security withholding tax and the employer Social Security tax liability on the Compute Payroll screen.</li> <li>2. Select the <b>Employer Subject to Accrual via Recompute Taxable Wages</b> check box. This indicates that the employer is still liable for their portion of the Social Security taxes while the employee's Social Security Withholding is in a deferred status from 09/01/2020 through 12/31/2020. If an employee's <b>Employer Subject to Accrual via Recompute Taxable Wages</b> check box is selected on Manage Employee Taxes screen and the check date falls within the 9/1/2020 to 12/31/2020 deferral period, Recompute Taxable Wages application will perform the following: <ul style="list-style-type: none"> <li>▪ Calculate and populate the Manage Employee Earnings History record with the employer's Social Security taxable wages</li> <li>▪ Calculate and populate the Manage Employee Earnings History record with the employer's Social Security tax accrual amount.</li> <li>▪ Calculate and populate the Manage Employee Earnings History record with the employee's Social Security taxable wages.</li> </ul> </li> </ol> <p>This check box will only be visible if the <b>Social Security</b> check box in the <b>Subject to</b> group box is not selected.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This check box will have no effect on calculations done on the Compute Payroll application. Since the employee's Subject to Social Security check box is not selected, Compute Payroll will calculate an Employee Social Security Withholding and Employer Social Security Accrual of 0.00. If the <b>Employer Subject to Accrual via Recompute Taxable Wages</b> check box is selected, the employer Social Security accrual will be calculated after posting payroll when Recompute Taxable Wages is run.</p> </div>

This release applies the following changes to the screen layout:

## Enhancements

- The **Subject to** group box is no longer in the **Federal** group box.
- The **SUTA** group box is now displayed above the **Withholding State** group box
- The **AEIC** group box and its fields are no longer available.

### Manage Employee Earnings History (PRMERF)

The Employee Tax Setup tab provides a new **Social Security Deferral** group box. This contains fields related to the presidential memorandum signed 8/8/2020 which mandates a deferral of the employee portion of Social Security tax for compensation paid to employees whose biweekly pretax compensation generally is less than \$4,000. Withholding, deposits, and payments of the employee portion of Social Security tax are to be deferred with respect to the period from Sept. 1 to Dec. 31, 2020. Due to the temporary nature of this deferral and the fact that the IRS may ultimately require employers to report what the employee's Social Security taxable wages and withholding would have been had they not been deferred, Costpoint stores these values as information-only.

The contents of this group box will be populated by the Recompute Taxable Wages screen and will only be populated for records that have already been posted to payroll.

If the employee's **Employer Subject to Accrual via Recompute Taxable Wages** check box is selected on the Manage Employee Taxes screen, the Recompute Taxable Wages application will recognize the employee as one that is eligible for Social Security withholding deferral under the presidential memorandum signed on 8/8/2020. Under this scenario, the Recompute Taxable Wages application will take the following actions on the Employee Earnings History records that fall within the specified date range:

- The **Employee Social Security Withholding Deferred** check box will become selected to indicate the record was processed for the Social Security withholding deferral.
- The application will calculate what the **Employee Social Security Taxable Wages** would have been had withholding not been deferred and store that amount as information-only in the **Deferred Employee Social Security Taxable Wages** field.
- The application will calculate what the Employee Social Security withholding amount would have been had withholding not been deferred and store that amount as information-only in the **Deferred Employee Social Security Withholding** field.

**Note:** The **Social Security Deferral** group box and its fields will only be visible if the record was processed through Recompute Taxable Wages and the employee's, but not the employer's, portion of the Social Security tax liability was deferred. The following is the setup for this scenario:

- The employee's **Employer Subject to Accrual via Recompute Taxable Wages** check box is selected on the Manage Employee Taxes screen.
- The Employee Earnings History record was processed by the Recompute Taxable Wages screen where the **Recompute - Social Security Taxable and Accrual** check box and **Apply Employee's Current Taxability - Social Security** check box were both selected.

The **Social Security Deferral** group box contains the following fields:

Field	Description
<b>Employee Social Security Withholding Deferred</b>	This check box indicates whether or not the employee's Social Security withholding was deferred under the presidential memorandum signed on 8/8/2020.

Field	Description
<b>Deferred Employee Social Security Withholding</b>	This field displays what the employee's portion of the Social Security tax liability would have been if it had not been deferred under the presidential memorandum signed on 8/8/2020.
<b>Deferred Employee Social Security Taxable Wages</b>	This field displays what the employee's Social Security taxable wages would have been if it had not been deferred under the presidential memorandum signed on 8/8/2020.

### Recompute Taxable Wages (PRPRCOMP)

The screen now has the ability to compute the Employer Social Security Accrual, but not the Employee Social Security Withholding, for employees that have the **Employer Subject to Accrual via Recompute Taxable Wages** check box selected on the Manage Employee Taxes screen.

### Print Data Dictionary Report (SYRDD)

The report now provides information for the following fields that were added for this enhancement:

Table	Field
EMPL_TAX	Employer Subject to Accrual via Recompute Taxable Wages (ER_SS_ACCRUAL_FL)
EMPL_TAX_ADT	Employer Subject to Accrual via Recompute Taxable Wages (ER_SS_ACCRUAL_FL)

## Projects

### Application Optimization

The following applications have been enhanced to process more efficiently and decrease their runtime during simultaneous or batch processing. Deltek recommends that you install the Costpoint 7.1.9 MR in a test environment and test the applications before deploying the MR to production.

- Create Project Report Tables (PJPCRRPT)
- Post Revenue (PJPOSTR)
- Redistribute Revenue (PJPBREAL)
- Update Project Status Report Tables (PJPUPPSR)

## Software Issues Resolved

### Descriptions of Software Issues

You will notice that the descriptions of some software defects contain extra information, including ways to work around the defects. For the most part, these issues were addressed before this release through hot fixes, and the additional information was developed to help you decide whether or not you needed to install the hot fixes.

When you install this release, you must install all fixes in the release; you cannot choose to install some and not others. Nevertheless, this additional information has been included in case you instituted some of the workarounds and can now stop using them, or you simply want more background information about the defect repairs.

### Accounting

#### [Accounts Payable » Manage Purchase Order Vouchers](#)

**Defect 1325660:** You encountered an error when you entered a purchase order (PO) voucher with a line that has an **Invoice Unit Cost** with more than two decimal places.

#### [Accounts Receivable » Manage Cash Receipts](#)

**Defect 1328925:** When you entered a cash receipt, changed the **Pay Currency**, clicked **Save**, and then modified the **Pay Currency** and clicked **Save** again, the latest **Func Amount Recvd** was not reflected in the TRN\_TRN\_AMT column. The **Func Amount Recvd** was still not reflected after you clicked **Recalculate**.

#### [General Ledger » Create Purchase Order Accruals](#)

**Defect 1325316:** When you created purchase order accruals, negative amounts were not included in credit entries, which resulted in an incorrect balance.

#### [General Ledger » Create Revaluation Entry](#)

**Defect 1334398:** The old balance amount was incorrectly computed when you created a revaluation entry for an organization with the following conditions:

- The organization has multiple levels.
- The balance sheet level is in level 2 of the organization structure, and it has a posted transaction with a currency that is different from your functional currency.
- The lowest level organization has a non-project beginning balance for an account.
- There are posted multicurrency journal entries to the account used in the balance sheet level organization.
- The **Create Revaluation as Net** check box on the Configure General Ledger Settings is selected for the company to which the organization belongs.
- The organization has period balances for the fiscal year and period that you entered when you created the revaluation entry.

## Admin

### Security » Manage Users

**Defect 1323476:** In the Manage Users (SYMUSR) application, the **Use as login ID for Deltek Time & Expense** check box on the Information tab confused users and needed to be removed.

### System Administration » Compute Cobra Burden Costs

**Defect 1331952:** A system error occurred when an alternate file location entered in the **Output Files** group box of the Configure Cobra Interface Settings screen had a blank URL/folder. In this scenario, the application should generate an error message instead.

As a workaround, provide a valid URL/folder in the alternate file location. You can also opt not to enter values in the **Output Files** group box fields on the Configure Cobra Interface Settings screen.

## Contracts

### Contract Management Controls » Manage FAR Library

**Defect 1319552:** You were able to delete a FAR library record that is linked to a contract.

### Contracts » Manage Contracts

**Defect 1317494:** On the Project Initialization subtask, you were able to successfully mass add lower-level projects without an existing top-level project by entering them in the Details table window after clicking **Autoload**.

**Defect 1318991:** On the Potential Work Force Employees subtask, when you entered an employee that has no record in the EMPL\_LAB\_INFO table, Costpoint did not save it on the screen but saved it in the backend.

**Defect 1319565:** When you updated the **Title** of a Federal Acquisition Regulation (FAR) number on the Manage FAR Library screen, Costpoint did not reflect the updated **Title** for that FAR number on the FAR Clauses/Provisions subtask of Manage Contracts.

**Defect 1335505:** On the Contract Employee Team subtask of Manage Contracts, when you entered an employee that has no record on the Salary Details subtask of the Manage Employee Information screen, Costpoint did not save the employee on the Manage Contracts screen but saved it in the backend.

### Contracts » Manage Subcontracts

**Defect 1327238:** A system error occurred when you tried to save a subcontract/project modification on a subcontract record.

### Opportunities » Manage Opportunities

**Defect 1319582:** On the Potential Work Force Employees subtask, when you entered an employee that has no record on the EMPL\_LAB\_INFO table, Costpoint did not save it on the screen but saved it in the backend.

**Defect 1323274:** Costpoint did not validate the CTMOPP\_HDR result set when there were changes in the child result set. As a workaround, you can set ALWAYS\_VAL\_FL in the S\_RS\_LIST table for CTMOPP\_HDR from the default value of **N** to **Y**.

**Defect 1335510:** On the Opportunity Employee Team subtask of Manage Opportunities, when you entered an employee that has no record on the Salary Details subtask of the Manage Employee Information screen, Costpoint did not save the employee on the Manage Opportunities screen but saved it in the backend.

## Resources » Approve Prospective Vendors

**Defect 1314067:** The **Certification Date** and **Certification Number** values were not retained after the approval of the prospective vendor.

**Defect 1314076:** When you approved a prospective vendor with a vendor employee, Costpoint also set the the vendor employee's approval status to **Approved** instead of **Pending**.

## Framework

### Framework

**Defect 1321600:** Costpoint sent workflow-generated emails that displayed HTML tags. This issue affected those who used **E-mail Redirect**, a setting located in Configure System Settings.

### Runtime

**Defect 1313412:** A system error occurred when you clicked **Last** to display the last record in a subtask.

**Defect 1328933:** On the Manage Warehouses (INMWHSE) screen, you could not save the transaction if you had hyphens or dashes in your legacy location ID fields. This issue affects you if you use MR 7.1.6 or higher.

### Runtime » Client

**Defect 1326862:** "Unexpected Script error, your session will be closed." was an error message you might have received in various Costpoint applications when you used the Microsoft Edge browser on iPads or iPhones after the IOS 13.5.1 upgrade. As a workaround, you can use the Safari browser on IOS devices.

### Runtime » Server

**Defect 1338059:** The parallelSqlLimit parameter was ignored when a job was submitted to a parallel Oracle queue. This issue affects you if you run processes with a custom parallel setting. As a workaround, you can run processes with the default Oracle parallel setting.

## Materials

### Bills of Material » Compute Costed Bills of Material

**Defect 1324095:** When you ran the Compute Costed Bills of Material process, you encountered a java error.

### Material Requirements Planning » Update Material Requirements Plan

**Defect 1326969:** When you ran the Material Requirements Planning (MRP) process, and you used the Shop Floor calendar, the **Need Date** for the planned order was incorrect. To fix this error, the MRP logic has been updated to ensure that the **Need Date** will not be null when the Shop Floor calendar is in use.

## Procurement Planning » Apply PO Info to Purchase Requisitions

**Defect 1320664:** When you tried to delete rows from the Assign PO subtask and there was a **Closed** requisition line, you encountered the following error: Only requisitions/requisition lines with a status of **'P'ending** or **'R'ejected** can be modified with this function.

## Procurement Planning » Apply PO Info to Purchase Requisitions By Line » Documentation

**Defect 1325986:** On the Apply PO Info to Purchase Requisitions by Line screen, the **Preferred Vendor** field description has been edited to match the field function.

## Production Control » Enter Manufacturing Order Reliefs

**Defect 1329769:** In Web Integration Console (WIC), you were unable to do a partial relief for a lot- (or serial-) tracked part when you used the same XML that was used on the first partial relief.

## Receiving » Manage Purchase Order Receipts

**Defect 1336790:** The **Auto-Receive** and **Auto-Accept** buttons were not functioning properly with amount driven purchase order (PO) lines. Specifically, for subcontract agreement type POs, the **Accept Amount** did not populate correctly.

## Sales Order Entry » Post Sales Order Journal

**Defect 1331308:** When you posted an invoice, you encountered a system error caused by the system inserting a row into the AR\_SALES\_TAX table for invoice lines with SALES\_TAX\_CD that was equal to space and **Revenue Recognition** was equal to **Ready For Use**.

## People

### Benefits » Store Employee Benefit Options Offered

**Defect 1317180:** The end date of option offered was set to the termination date, which affected the Minimum Essential Coverage from being populated correctly.

### Employee » Employee Toolkits

**Defect 1323510:** The **Identify and Flag Deltek Time & Expense Users** check box must be removed. It is no longer necessary since the **Use as login ID for Deltek Time & Expense** check box in Costpoint Manage Users will be removed. The screen will display a **Reserved for future use** check box.

### Employee » Manage Employee Information

**Defect 1321565:** The application displayed an invalid error message when you created a new record with a blank salary **Effective Date** field. As a workaround for this issue, enter a value in the salary **Effective Date** field before you save the record.

**Defect 1341472:** The status text of the **Employer Subject to Accrual via Recompute Taxable Wages** check box had a missing period.

## Employee » Manage Employee Taxes

**Defect 1332243:** The application did not set the **Form W-4 Version** field to **2019** for some of the filing statuses applicable for 2019.

This issue affects you if your company has employees in Guam.

**Defect 1336535:** The **Form W-4 Version** field was disabled even if the employee's withholding state was not a territory. This means that the payroll administrator will not be able to change the **Form W-4 Version** to **2020** for those employees with existing 2019 Form W-4.

This issue affects you if your company has employees that are still using the 2019 Form W-4.

As a workaround, if you have Costpoint Employee Self Service, then the **Form W-4 Version** will be automatically changed to **2020** if the employee will submit a 2020 Form W-4. Otherwise, a new record needs to be created on the Manage Employee Taxes screen.

This issue was introduced when changes were made for Virgin Islands 2020 withholding and tax table updates.

**Defect 1341462:** The status text of the **Employer Subject to Accrual via Recompute Taxable Wages** check box had a missing period.

**Defect 1342206:** When the withholding state's **Territory Tax based on Federal Tax** check box was selected, the application cleared and disabled the following fields:

- Subject to Social Security
- Subject to Medicare
- Subject to FUTA

This issue affects you if your company has employees that are employed in U.S. territories.

## Employee » Transfer Talent Management Data

**Defect 1331331:** If you were not using Costpoint job templates and the employee's Detail Job Title was flagged as a **Corporate Officer** on the Costpoint Manage Detail Job Titles screen, the employee's SSN was set **999999999**. This issue occurred when you imported users from Deltek Talent Management into Costpoint.

## Employee Self Service » State Withholding

**Defect 1337374:** The application did not allow you to select Guam's new filing status, which exceeded 50 characters.

This issue affects you if your company has employees in Guam. As a workaround, you can update the employee's filing status on the Manage Employee Taxes screen.

## Employee Self Service » W-2s

**Defect 1264215:** A system error displayed when you opened the W-2s screen in Costpoint ESS. This issue occurred if an employee had records on the Manage W-2s screen for two different taxable entities.

## Labor » Allocate Compensated Overtime Across Timesheet Lines

**Defect 1326499:** When processing timesheets with sales order timesheet lines, a system error occurred.

## Labor » Export Data To Deltek Time and Expense

**Defect 1323494:** Since the **Use as login ID for Deltek Time & Expense** check box was removed from the Manage Users screen, the application should no longer display the following warning message:

"A new feature was applied on <Date from step a>. This feature added the "Use as Login ID for Deltek Time & Expense" check box in the Manage Users screen, providing the ability to specify whether an employee's Costpoint User ID should also be used as his/her Login ID for Deltek Time & Expense (T&E). In order to select this check box for employees that existed before the feature was applied, you will need to run the "Identify and Flag Deltek Time & Expense Users" toolkit in the People\Employee\EmployeeUtilities menu."

## Labor » Import Timesheets from Deltek Time and Expense

**Defect 1188399:** Imported **D** and **N** correcting timesheets had a difference of 0.01 to 0.02 in labor cost values.

**Defect 1326471:** When you imported timesheets for a second time with auto-adjust options selected, Costpoint adjusted the amounts but did not select the **Auto-Adjusted** check box in the **Timesheet Status** group box on the Manage Timesheets screen.

## Labor » Post Timesheets

**Defect 1326910:** When you imported or manually entered a timesheet and then posted it to the general ledger, Costpoint set the transaction amount to zero. This issue occurred when you selected the **Post Labor Distribution to GL as Summary Entry** check box on the Configure General Ledger Settings screen and when the functional amount was not zero.

## Labor » Recast Overtime Premium to Timesheet Lines

**Defect 1314179:** If a previously recasted overtime line was modified, the application did not re-process the lines again.

As a workaround, you can complete the following steps:

1. Copy the original line manually.
2. Modify only the new line.
3. Delete the old generated lines.

## Leave » Print Leave Edit Report

**Defect 1329422:** When you enabled organization security, the application did not query Salary History Information records properly. This issue affected Salary History Information records with end dates that fell on the day that you printed the report.

## Payroll » Compute Payroll

**Defect 1308194:** When you did not select the **Enable SUTA Reciprocity Functionality** check box on the Configure Payroll Settings screen, the Compute Payroll process incorrectly calculated the SUTA Taxable details.

**Defect 1327217:** The application rounded the union fringe incorrectly when the union setup had an amount with more than two decimal places.

**Defect 1333740:** The application ignored the base tax in the exemption amount when the number of Guam exemptions was zero. As a workaround, you can manually edit the payroll record.

**Defect 1335383:** The application did not calculate local tax correctly when there was a reduction in the rate mid-year.

If checks were processed at a higher tax rate, after the tax rate was lowered, the taxable amount was being set to zero for some employees. You should recalculate the taxable amounts on the Manage Employee Earnings History screen before you run the next payroll.

## Payroll » Create Quarterly SUTA Tax File

**Defect 1099264:** The implementation of SUTA Reciprocity function was incorrect. When you select the **Enable SUTA Reciprocity Functionality** check box on the Configure Payroll Settings screen, the application should apply the following:

- The **SUTA Taxable Amount** field should display the sum of SUTA Taxable Amounts for all states.
- The **Excess Wage** field should display the sum of Excess Wages for the reporting state only.

This hot fix applies to only the following states:

- VA
- PA
- DC
- CT
- AK

As a workaround, you can edit the output file.

## Payroll » Manage Deduction Group Limits

**Defect 1231740:** The application should display a warning if the date range includes more than one payroll (calendar) year.

## Payroll » Manage Employee Earnings History

**Defect 1341608:** When you selected the **Employee Social Security Withholding Deferred** check box, the application still left the **Recalculate** button enabled. This defect affects you if your company has employees eligible for COVID-19 Social Security deferral.

**Defect 1341726:** When you used Table view, the application did not display the **Soc Sec Exempt Deductions Override** column. The label for the **Social Security Deferral** group box also needed to be modified. This defect affects you if your company has employees eligible for COVID-19 Social Security deferral.

## Payroll » Manage State Tax Withholding Adjustments

**Defect 1334363:** The patch needed to be reprocessed to update state withholding allowances for Guam when the **Step 2 of W-4** check box was selected.

**Defect 1335494:** The patch needed to be reprocessed to update the state withholding allowances for Virgin Islands when the **Step 2 of W-4** check box was selected.

## [Payroll » Print W-2s](#)

**Defect 1216078:** The application did not print the Family Leave Insurance Private Plan Number (FLI P.P. #) in Box 18 on the Self Mailer W-2.

## **Planning**

### [Administration » Configuration Settings \(MAM10\)](#)

**Defect 1223543:** On the General tab, the field was labelled as **Effective Rate to Use** instead of **Hourly Rates to Use**.

### [Administration » Refresh Process](#)

**Defect 1321476:** When Project Summary and Prior Year Summary were out of sync, there was no Period Year difference for CER Actual Revenue.

### [New Business Budgeting » Create Project Budget from New Business Budget \(NPI8\)](#)

**Defect 1121553:** When you tried to create a budget from a proposal, there was no validation to check if the project requires a workforce.

### [New Business Budgeting » Maintain Generic Staff \(MAM2, BOM3, BPM5\)](#)

**Defect 1121699:** The New Business Budgets menu was missing the link to the Maintain Generic Staff application.

### [New Business Budgeting » Manage Average Cost GLC Rates](#)

**Defect 1121700:** The New Business Budgets menu was missing the link to the Manage Average Cost GLC Rates application.

### [New Business Budgeting » Manage Average Cost PLC Rates](#)

**Defect 1121701:** The New Business Budgets menu was missing the link to the Manage Average Cost PLC Rates application.

### [New Business Budgeting » New Business Budgets](#)

**Defect 1224087:** When you tried to create a work breakdown structure, there was no POP validation.

### [Organization Budgeting » Organization Budgets / Outlooks](#)

**Defect 1349098:** When you have duplicate records on the Labor Utilization subtask and you changed the Org ID value in these records, an error occurred.

## Project Budgeting » Project Budgets / EACs

**Defect 1324023:** When you ran Labor Summary, the system did not consider the General Ledger Journal Entries into account for computing Prior Year Difference.

**Defect 1332863:** When you created an EAC, the amounts in the Service Center (SC) link of a completed EAC was quadrupled for the future periods.

## Project Budgeting » Project Status (SPA5)

**Defect 1215436:** The Period End Date list did not contain all the periods in the POP.

## Project Budgeting » Revenue Breakdown (BPA15)

**Defect 1336938:** When you tried to run revenue breakdown, the over ceiling Other Direct Costs were not calculating correctly.

## Projects

### Billing » Calculate Progress Payment Bills

**Defect 1312592:** This application included burden from posted transactions in subcontractor progress payments. As a workaround, you can delete the burden on the Manage Progress Payment Bills screen.

### Billing » Calculate Standard Bills

**Defect 1328454:** A system error occurred when you ran this application with the **Billable Value on Unbilled Transactions** option selected.

### Cost and Revenue Processing » Compute Cobra Burden Costs

**Defect 1341909:** If the **Export File** field was blank in the Configure Cobra Interface Settings (AOMCBSET) application and you ran the Compute Cobra Burden Costs (AOPCBLAB) process, you received an error and the CSV file did not save in File Download (SYMDLMGR).

### Cost and Revenue Processing » Compute Revenue

**Defect 1325329:** When you computed revenue, account discounts were not applied to all accounts in the account range specified on the Manage Account Discounts screen. As a workaround, you can split the range of accounts in Manage Account Discounts: one with the account for which the discount was not applied, and the other range including the rest of the accounts. And then, recalculate revenue.

### Project Inquiry and Reporting » Update Project Status Report Tables

**Defect 1336569:** A system error occurred when you ran this application.

### Project Setup » Manage Alternate Projects

**Defect 1313096:** Querying a project report name was taking too long.

## Project Setup » Manage Project User Flow

**Defect 1314930:** When you cloned a top-level project linked to an approval process, the newly created top-level project was automatically linked to the approval process.

**Defect 1321755:** A system error occurred upon saving of the new project ID created by cloning a project with **Discount Method** set to **PLC Discounts** and has a default **T&M Project** value on the Proj Bill Info subtask. As a workaround, you can change the Discount Method option before cloning.

## Subcontractor Management » Manage Work Assignments

**Defect 1312248:** Issues occurred upon allowing changes to work assignment charge lines and vendor employee lines after the charge line/vendor employee line has been used on a timesheet or expense report within Time & Expense. In order to fix the issue, the following fields on the Charges subtask will now be disabled if the charge line has time or expense charged against it:

- PO Line
- Item
- Revision
- Charge Type
- Account
- Organization
- Project
- GLC
- PLC
- Ref1
- Ref2

As a workaround, do not make changes to work assignment charge lines after approval since those lines could be included on a timesheet or expense report.

This defect affects customers who use the Subcontractor Management module and have subcontractors record time and expense in Time & Expense 10.

**Defect 1327251:** The rate entered on the Charges subtask did not flow to the Vendor Employees subtask when vendor employee lines were added through the **Auto Load Workforce** button.

**Defect 1329660:** On the Vendor Employees subtask, the **Func Rate** value of a 3-way match type charge line became incorrect upon saving the record.

## Reports & Analytics

### Dashboards » Finance Manager Dashboard

**Defect 1279065:** The AP Over 30 Days and AP Current dashparts displayed discount taken for paid vouchers as outstanding items, which resulted to data not matching the information on the Open A/P Report.

## Time and Expense

### Configuration » Import Master Data

**Defect 1326439:** When two users had the same Employee ID, modifications made to assigned user groups and security roles were not applied to both users. To correct this, Time & Expense was updated so that changes made to any records matching the Employee ID are updated, or if no records match the Employee ID, matching is instead based on the Login ID.

This issue also affected the following applications:

Affected Applications	Defect No.
Manage Resource Information	1326441
Manage Resource Licenses	1326442

### Expense » Manage Currency Schedules

**Defect 1327983:** Currency codes were missing for Mauritania and Belarus. They were added as follows:

- BYN (Belarus)
- MRU (Mauritania)

### Expense » Manage Expense Report

**Defect 1315835:** The Manage Expense Report application sent 'Expense Report Pending Record of Attachment' notification emails even though no **Notify** check boxes were selected on the Record Task.

**Defect 1320447:** Product managers received multiple emails for the same charge approval task.

### Time » Manage Timesheets

**Defect 1327265:** When supervisors tracking leave by Project added timesheets for their employees, leave charges were not reflected.

**Defect 1329974:** The **Undo Correct** button was disabled when the timesheet period was closed and the **Modify** check box related to timesheets was selected.

**Defect 1337771:** UDTs that were set up in employee history and defaulted to timesheet lines were erroneously saved to Favorites.

### Time and Expense

**Defect 1326440:** Because the **Use as login ID for Deltek Time & Expense** check box on the Information tab of the Manage Users (SYMUSR) application was outdated, it was removed.

## Appendix: For Additional Information

### Deltek Support Center

The Deltek Support Center is a support Web site for Deltek customers who purchase an Ongoing Support Plan (OSP).

The following are some of the many options that the Deltek Support Center provides:

- Search for product documentation, such as release notes, install guides, technical information, online help topics, and white papers
- Ask questions, exchange ideas, and share knowledge with other Deltek customers through the Deltek Support Center Community
- Access Cloud-specific documents and forums
- Download the latest versions of your Deltek products
- Search Deltek's knowledge base
- Submit a support case and check on its progress
- Transfer requested files to a Customer Care analyst
- Subscribe to Deltek communications about your products and services
- Receive alerts of new Deltek releases and hot fixes
- Initiate a Chat to submit a question to a Customer Care analyst online

**Attention:** For more information regarding Deltek Support Center, refer to the online help available from the Web site.

### Access Deltek Support Center

**To access the Deltek Support Center:**

1. Go to <https://deltek.custhelp.com>.
2. Enter your Deltek Support Center **Username** and **Password**.
3. Click **Login**.

**Note:** If you forget your username or password, you can click the **Need Help?** button on the login screen for help.

---

## About Deltek

Better software means better projects. Deltek delivers software and information solutions that enable superior levels of project intelligence, management and collaboration. Our industry-focused expertise makes your projects successful and helps you achieve performance that maximizes productivity and revenue. [www.deltek.com](http://www.deltek.com)
