Hot Fix: cp711_symusr_007.zip

OTHERS/SYSTEM ADMINISTRATION/SYMUSR/Maintain Users

Deltek Defect Tracking Number:

604982

Issues Resolved:

Description: Framework and the following applications have been updated to add support for managing user groups through the Active Directory.

- Manage Users - A new check box, Manage User Groups in Active Directory, has been added to the Authentication tab. This check box is enabled only for Active Directory and Windows Domain and Active Directory authentication methods. Select this check box if you want a user to automatically be assigned to user groups mapped to the Active Directory linked to the user. Upon login, those user groups display on the Assigned User Groups subtask.
- Manage User Groups - A new column, Active Directory ID (sAMAccountName), is now available on this screen. Use this column to enter the ID of the Active Directory you want to map to a user group. After you mapped the Active Directory to the user group, the users belonging to the Active Directory will automatically be assigned to the user group if the Manage User Groups in Active Directory check box on the Manage Users screen is selected for these users.
