

Deployment Date: 3/28/2016

COSTPOINT 7.0 web Hot Fix: cp711_pjpcompr_005.zip

PJ/CR/PJPCOMPR/Compute Revenue

[Deltek Defect Tracking Number:](#)

186545

[Issues Resolved:](#)

Description: When the server level was set at binary and the DB level was also set at binary, some Costpoint stored procedures did not compile.

Customers Impacted: This defect affects you if you access Costpoint using the MS SQL Server DB system.

Workaround Before Fix: Set SQL Server setting to non-binary collation.

Additional Notes: To check the default server collation of a SQL Server installation, run the following SQL query: sp_helpsort. To check the collation of a particular database, right-click the database in SQL Server Enterprise Manager (2000 or older) or Management Studio (2005 or later) and click **Properties**. The collation will be displayed in the **Collation Name** field.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <https://deltek.custhelp.com> before you install the hot fix.

To Download the Hot Fix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click Run Deltek Software Manager.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hotfix folder for your product, and select the hotfix to download.
6. Click Download at the bottom of the screen.

More Information:

If you have any questions, please contact Deltek support at <https://deltek.custhelp.com>.
