- Hosted solution (SaaS) implementation with a multiple instance scheduler based on company-specific queue IDs

Software Issues Resolved

Data validation error

User-defined fields that were marked as required caused a data validation error even though the fields contained default values.

Connectivity issues related to input.local domain

The CaTO agent had two hardcoded URLs that pointed to a Deltek domain. That caused issues when the product was deployed outside of that Deltek domain.

Incorrect prompt to download .NET Framework 4.0

GovWin Contracts and Task Order to Vision CRM Integration incorrectly prompted you to download .NET Framework 4.0. The required version is .NET Framework 3.5 SP1.
