Overview

Welcome to Deltek Budgeting & Planning Version 6.0.9 Hot Fixes 1 to 22 Release Notes. These release notes contain a summary of new features and software issues resolved.

For Additional Information

Customer Care Connect Site

The Deltek Customer Care Connect site is a support Web site for Deltek customers who purchase an Ongoing Support Plan (OSP).

The following are some of the many options that the Customer Care Connect site provides:

- Download the latest versions of your Deltek products
- Search Deltek's knowledge base
- Display or download product information, such as release notes, user guides, technical information, and white papers
- Submit a support case and check on its progress
- Transfer requested files to a Customer Care analyst
- Use Quick Chat to submit a question to a Customer Care analyst online
- Ask questions, exchange ideas, and share knowledge with other Deltek customers through the Deltek Connect Customer Forums
- Subscribe to Deltek communications about your products and services
- Receive alerts of new Deltek releases and hot fixes

For more information regarding Deltek Customer Care Connect, refer to the online help available from the Web site.

Access Customer Care Connect

To access the Customer Care Connect site, complete the following steps:

1. Go to <http://support.deltek.com>.
2. Enter your Customer Care Connect **Username** and **Password**.
3. Click Login.

If you forget your username or password, you can click the **Account Assistance** button on the login screen for help.

New Features

This section includes a summary of a new feature included for the Hot Fix 11 and Hot Fix 19 releases. For instruction on downloading and installing this feature, see [Hot Fix 11 installation instructions](#) and [Hot Fix 19 installation instructions](#) in this document.

Windows Active Directory Logon

Budgeting & Planning now supports Window Active Directory login, which enables individuals to use a single user ID and password for the entire Delttek First Essentials product suite, including Budgeting & Planning and PM Reporting.

The method of login, either Budgeting & Planning or Windows Active Directory, is set at either the global level or the user level by the system administrator. The user record will override the global setting when it is different, and the user can only log on using the method assigned.

Windows Active Directory Configuration

The setting that enables Windows Active Directory is located within the eCONFIG file, which you access from within Microsoft SQL Server Management Studio. After you locate and open the eCONFIG file, complete the following steps:

1. Locate the **Active_Directory_Authentication** line in the table enter "Y" to enable global Active Directory authentication.
2. In the **Active_Directory_Paths** row, enter a valid LDAP path, where the Windows Active Directory information is located. An example of a valid LDAP path is as follows, where <SERVER OR PATH>, <Organizational Unit> and <Domain> are all replaced with your company's specific information:

<SERVER OR PATH>/OU=<Organizational Unit>,DC=<domain>,DC=com

If you enter multiple LDAP paths, use a semi-colon as a separator (for example, DCSERVER1/OU=Users,DC=mycompany,DC=com;DCSERVER2/OU=Corporate Users,DC=mycompany,DC=com).

You can override the global setting for individual users from the **Administration » User Management » User Logon Setup and Maintenance** screen.

User Setup and Maintenance

We added the following fields to the **Administration » User Management » User Logon Setup and Maintenance** screen

- **Authentication** — Use this setting to establish the login authentication. Choose one of the following from the drop-down list:
 - **Use Active Directory** — Select this option to have Budgeting & Planning validate the user ID and password based on the Windows Active Directory logon information.
 - **Use Budgeting and Planning** — Select this option to have Budgeting & Planning validate the User ID and Password based on Budgeting & Planning logon information.
 - **Use Global Setting** — Select this option to have Budgeting & Planning validate the User ID and Password based on the setting in the eProMT_Config table, either Active Directory or Budgeting & Planning. This is the default setting for all employees.

- **Active Directory User ID** — This field is required if **Use Active Directory** is selected in the **Authentication** field, or if global **Active Directory Authentication** is enabled and the user's authentication method is **Use Global Setting**. For each user, enter the Active Directory User ID.

Logon Screen

Users must enter the login credentials specified in either their user record or the global setting. The method in the user record takes precedence over the global setting.

Project Account Group Filter Functionality

We added a Project Account Group (PAG) filter to the GL Account drop-down list in Project Budget tools, which enables users to filter accounts in the Project Budget Account DDL using project account group codes.

To handle cases where no project account group yet exists for users to select (such as with non-backlog or proposal projects), we added two new settings that enable you to configure a default value that can be selected instead. To configure these fields, open Microsoft SQL Server Management Studio and complete the following steps:

1. In the **Object Explorer** frame, expand the DelttekBP database.
2. Expand the **Tables** folder.
3. Locate the **eProMT_CONFIG** table.
4. Right-click and select **Open Table** (or select **Edit All Rows** if you are using SQL 2008).
5. The following parameters were added:
 - **PROJ BGT ACCTDDL TYPE** — This parameter controls whether the project account group is used to filter accounts in the Project Budget Account DDL. Valid values include the following:
 - Use Account Group Setup - PAG
 - Do not use Account Group Setup (default) – STD
 - **DFLT PAGE** — This is the Default Project Account Group Code for non-backlog or proposal budgets. Valid values include any account group code listed in the eACCT_GRP_SETUP table, but it is only used when **PROJ_BGT_ACCTDDL_TYPE** is set to *PAG*.

GCS customers can enter a default account value of *DIR*.

Software Issues Resolved

Descriptions of Software Issues

You will notice that the descriptions of some software defects contain extra information, including ways to work around the defects. For the most part, these issues were addressed before this release through hot fixes, and the additional information was developed to help you decide whether or not you needed to install the hot fixes.

When you install this release, you must install all fixes in the release; you cannot choose to install some and not others. Nevertheless, this additional information has been included in case you instituted some of the workarounds and can now stop using them, or you simply want more background information about the defect repairs.

Software Issues Resolved: 6.0.9 HF1

Released: February 12, 2012

Software Issues Resolved (15)

Budgeting & Planning

Delttek Defect Tracking Number: 169649

Description: When the budget was modified and committed in Audit/maintain Organizational Budgets (B.O.I.1) without any changes, the G&A amount was decreased.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DelttekBudgetingAndPlanning609HotFix01_169649.sql

System File Dependencies

N/A

Delttek Defect Tracking Number: 185784

Description: The Org ID field was not required when creating a proposal from scratch in N.P.I.3 Proposals. The null Org ID field caused errors in other applications.

Customers Impacted: This defect affects CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DelttekBudgetingAndPlanning609HotFix01_185784.sql

System File Dependencies

N/A

Delttek Defect Tracking Number: 186141

Description: In the JSR, the wrong burden rate was applied to the accounts, so the costs

were inaccurate.

Customers Impacted: This affects GCS customers who have BP & IRD Projects.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_186141.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 187122

Description: The refresh process failed because the conversion of a datetime data type to a smalldatetime data type resulted in an out-of-range value.

Customers Impacted: This defect affects both CP and GCS clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_187122.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 187908

Description: Client was unable to create Org budgets in B.O.I.1 due to an error in the refresh process.

Customers Impacted: This defect affects CP7 clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

eProMTWeb.dll

System File Dependencies

N/A

Data Import and Integration

Costpoint

Deltek Defect Tracking Number: 187083

Description: In the PSR, burden rates were missing in the subperiod table (eSUB_PD_PERIODS_ONLY) due to error in the refresh process, so the calculated fees were incorrect.

Customers Impacted: This defect affects CP clients who have changed from subperiods to periods.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_187083.sql

System File Dependencies

N/A

GCS

Deltek Defect Tracking Number: 185272

Description: The GL Detail had missing labor data because there were no entries in the transaction codes file.

Customers Impacted: This defect affects GCS clients who do not use transaction codes.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_185272.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 185779

Description: The values in the P&L YTD columns were overstated when contract entities existed in the chart of accounts but not the contract master file

Customers Impacted: This defect affects GCS clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_185779.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 186105

Description: Records were duplicated in the eGL_DETAIL table, which resulted to incorrect data.

Customers Impacted: This defect affects GCS clients using OBS.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_186105.sql

System File Dependencies

N/A

Organization

Cost Analysis

Deltek Defect Tracking Number: 184944

Description: There was an error in the allocation calculation due to missing service center fringe costs.

Customers Impacted: This defect affects GCS clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_184944.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 185768

Description: An error occurred when C.O.R.1 is accessed for fiscal years that have 13 periods, so the Rate Analysis report did not run.

Customers Impacted: This defect affects GCS clients who have over 12 periods in a fiscal year.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_185768.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 187530

Description: Same pool rate was applied to different pools, as a result, the reports were displaying incorrect rates.

Customers Impacted: This defect affects clients that have more than one pool in a single tier.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_187530.sql

System File Dependencies

N/A

Project

Budget Development

Deltek Defect Tracking Number: 181190

Description: An error occurred when trying to access indirect project budgets.

Customers Impacted: This defect affects both GCS and CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_181190.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 185947

Description: The holidays were not calculated for part-time employees with an FTE of less than 50%, which resulted to inaccurate cost calculations. A new configuration field was added to allow clients to specify if holiday pay should be paid to those employees.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix01_185947.sql

System File Dependencies

N/A

Cost Analysis

Deltek Defect Tracking Number: 184358

Description: In the Hours Breakdown report (C.P.A.1), unposted hours did not display and an error occurred when rates were applied to the Time Collection report for T&M contracts. This resulted to incorrect costs.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

More information about this release is on the following page.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the **Hotfix** folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix01.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting & Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

More Information:

If you have any questions, please contact Deltek support at <https://support.deltek.com>

Software Issues Resolved: 6.0.9 HF2

Released: February 29, 2012

Software Issues Resolved (8)

Budgeting & Planning

Delttek Defect Tracking Number: 188415

Description: The Fiscal Year field did not allow six character codes.

Customers Impacted: This defect affects GCS clients who change their fiscal year codes from four to six characters.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DelttekBudgetingAndPlanning609HotFix02_188415.SQL

System File Dependencies

N/A

Data Import and Integration

Costpoint

Delttek Defect Tracking Number: 171184

Description: Pool costs were incorrectly calculated because there was an error in applying burden rates in the Material & Handling (MH) and G&A pools.

Customers Impacted: This defect affects both GCS and CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DelttekBudgetingAndPlanning609HotFix02_171184.sql

System File Dependencies

Organization

Budget Development

Deltek Defect Tracking Number: 187086

Description: A calculation error occurred in B.O.P.1 and B.O.P.3 reports so the reports were displaying incorrect values.

Customers Impacted: This defect affects both GCS and CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix02_187086.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 187173

Description: In org budgets, tables were unsuccessfully populated due to duplicate values.

Customers Impacted: This defect affects both GCS and CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix02_187173.SQL

System File Dependencies

N/A

Project

Budget Development

Deltek Defect Tracking Number: 170379

Description: In the PSR, revenue account for project budgets were incorrectly displayed because the minimum revenue account number was selected instead of the revenue account number, which was based on group account settings.

Customers Impacted: This defect affects CP clients.

Workaround Before Fix: None.

Additional Notes: None.

Files Updated

DeltekBudgetingAndPlanning609HotFix02_170379.sql

System File Dependencies

N/A

Deltek Defect Tracking Number: 188996

Description: In project budget reports, UID columns were displaying when a report was exported to Excel, so the totals were computing incorrectly.

Customers Impacted: This defect affects both GCS and CP clients.

Workaround Before Fix: Manually delete the UID column.

Additional Notes: None.

Files Updated

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the **Hotfix** folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix04.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting & Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

More Information:

If you have any questions, please contact Deltek support at <https://support.deltek.com>

More information about this release is on the following page.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the **Hotfix** folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix09.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting & Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot fix folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix08.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting and Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot fix folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix17.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting and Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot fix folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix20.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting and Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.

Software Issues Resolved: 6.0.9 HF21

Released: November 28, 2012

Software Issues Resolved (4)

Software Issues Resolved (4)

Organization

Budget Development

Deltek Defect Tracking Number: 269844

Description: In the budget tool, cross charging and setting Indirect Labor cross charge flag was disabled for GCS, but the UTIL% tab's drop-down list displays orgs from another org.

Customers Impacted: This defect affects all GCS clients.

Workaround Before Fix: None.

Additional Notes: None.

Other Applications Affected

System File Dependencies

Project

Budget Development

Deltek Defect Tracking Number: 270346

Description: In the project budget, the burden rate did not calculate because the OBS segments did not match the required B&P structure.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

Other Applications Affected

System File Dependencies

Performance and Variance

Deltek Defect Tracking Number: 269090

Description: In the PPA2 and PPA3 reports, an error occurred when the entered description contained more than 50 characters.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

Other Applications Affected

System File Dependencies

Supplemental Reports

Deltek Defect Tracking Number: 269093

Description: In the SPA5 and SPA11 reports, reports did not successfully run when no cost data was entered for the project.

Customers Impacted: This defect affects all clients.

Workaround Before Fix: None.

Additional Notes: None.

Other Applications Affected

System File Dependencies

Custom Programs Affected:

Sometimes a hot fix can cause custom programs and reports to stop working as expected. Before applying this hot fix, consider whether you have any custom programs or reports in the application area affected by the hot fix. If so, contact Deltek support at <http://support.deltek.com> before you install the hot fix.

To Download the HotFix:

1. From Internet Explorer, go to <https://dsm.deltek.com>.
2. Click **Run Deltek Software Manager**.
3. Log in using your Deltek Customer Care Connect credentials.
4. In the left pane of the Deltek Software Manager, expand your Deltek product.
5. Expand the Hot fix folder for your product, and select the hot fix to download.
6. Click **Download** at the bottom of the screen.

To Install the HotFix:

1. You must have upgraded to 6.0.9 prior to installing this cumulative hot fix.
2. Run DeltekBudgetingAndPlanning609CumulativeHotFix21.exe on your Web server.
3. On the Welcome screen, click **Next**.
4. You will be prompted that your web services (IIS) will need to be reset. If that is okay, click **Yes**. If you click **No**, setup will terminate.
5. On the Database server screen, enter your database server where your DeltekBP database is hosted and a system administrator (sa) level username/password, or select **Windows Authentication** to use the credentials you are currently running.
6. On the Databases To Upgrade screen, select the database(s) that you want to upgrade.
7. On the Start Copying Files screen, select **Next** to start the installation. The hot fix will be applied. This could take up to 10 minutes.
8. On the update Complete screen, click **Finish**.
9. Manually run the refresh process via the Admin account (Super Admin) before using Deltek Budgeting and Planning.

To Check to See if the HotFix is Installed:

1. From the Web server, go to Control Panel--Programs and the product name should reflect the update installed.
2. From the database server, check the **Version** field in the ePromt_Config table.
